Cases of Impure Blood—See Fig. 11G in "Astro-Diagnosis", by the Heindels. For other subjects along this line, and for the effects of Impure, Foul, and Corrupt Blood, see Abscesses, Acidity, Alkalinity, Anaemia, Aneurysm, Aquarius, Arteries, Auto-intoxication, Blood (see the various paragraphs under Blood); Boils, Breathing, Chlorosis, Circulation (see the various paragraphs and references under Circulation); Corrupt, Deposits, Dizziness, Elimination, Eruptions, Excretions, Faintings, Fetid, Fevers, Foul, Gout, Headaches, Heart (see the various paragraphs under Heart); Inflammation, Jupiter, Minerals, Obstructions, Oxygenation, Pimples, Plethora, Poisons, Pulse, Rheumatism, Septic, Skin Diseases, Sores, Stiffness, Stomach (see "Blood" under Stomach); Toxaemia, Ulcers, Urea, Uric, Varicose, Veins, Venus, Vessels, Wastes, etc. Also see other subjects you have in mind, and which are not listed here. Impure blood is usually acid blood, and too much acidity in the body means the death of the body. Pure blood is more alkaline than acid, and alkaline blood is maintained by proper diet, by avoiding excess of starches and sugars, and by eating plenty of fruits, oranges, lemons, grapefruit, vegetables, etc. Also a good and quick way to make the blood, urine, and other secretions of the body alkaline, is to take frequent doses of Citro-Carbonate (Upjohn), which is an effervescent drink, and also to take daily Epsom Salts Baths, one pound of Epsom Salts to

half a tub of water in the bath tub, and soak in this solution for 10 or 15 minutes. Also, after 40 years of age, drink distilled water. Every student should make a scientific study of Diet, and the nature and food value of each article of food, in order to feed the body properly, and to maintain health, and avoid acidity of the blood, and corrupt and foul blood, etc. When the body is wholly acid, death results. Remember that excessive acidity of the body is injurious, and alkalinity of the right proportion is health and life. (See Hyperacidity).

INCURABLE—Incurable Diseases—The Disease, Affliction, or Malady Is Incurable, or Without Apparent Remedy—Many planets in the fixed signs, 8, ♀, ♁, or ♃ at B., and afflicted, tend to deep-seated and incurable diseases. The influences of the malefics, and their afflictions, are the principal causes of prolonging a disease and making it incurable, and especially the influence of ♃ at B., and by dir. If the malefics are angular, ori., and elevated above the Lights, and the benefics are occi., weak, and lend no assistance, the disease tends to be tedious, prolonged, or incurable, and the more ori. or angular the planet is, whether malefic or benefic, the more powerful will be its effects. The malefics in angles at B., well fortified, and in elevation above the Lights and Benefics, and the latter in weak signs; malefics in angles at B., occi. of the ☉, and ori. of the ☽, and the benefics in no way connected with the malefics, nor with the ☉ or ☽; the malefics strong, and holding dominion in angles, or above the Lights, and evilly aspected by ♃ or ♀, or the malefics with the ☉ or ☽ in angles, and the Luminaries receiving no help from the benefics; the malefics holding dominion, and afflicting the hyleg, and with no assistance to the hyleg from benefics, and the malefics elevated above the Luminaries at B., provided the ☉ or ☽ are not in angles, and the malefics receive no good asp. from ♃ or ♀; when a malefic in a sign and house is afflicted by two or more malefics at B., then the part of the body afflicted is apt to develop an incurable malady, and predominate more or less all thru life, and eventually cause death under a train of evil directions, and especially if at B. the malefic is in the 6th, 8th, or 12th H.; the ☉ or ☽ in the 6th H. at B., and affl. by malefics; the ☉ or ☽ in angles, and affl. by malefics elevated above them; the ☽ and many planets in fixed signs at the beginning of an illness (Hor'y); ♁ affl. in the 1st or 6th H.; ♁ diseases are mostly nervous, and often incurable; ♁ ☐ or ♁ ♃ in fixed signs; ♁ ☐ or ♁ the ☽, and often with complete suppression of the functions; ♁ ☐ or ♁ the Asc.; ♃ afflicted in fixed signs; ♃ in the 6th H., and afflicting the hyleg; ♃ afflicted in ♃, due to tendency to dropsy and swellings; indicated by the 6th H. conditions; lord of the 6th affl. by the ☐ or ♁ the lord of the Asc., grievous and hard to cure; lord of the 8th in the 6th; lord of the 1st in an Azimene degree, and affl. by lord of the 6th. INFANCY—Infants—Infantile—The Early Years of Childhood—Life from the cradle to the grave is divided into Planetary Periods, and each period ruled by a different Planet. (See Periods). The first to fourth years of life are ruled by the Δ , and during this period the evil directions of the Δ , or afflictions to the radical Δ by transits or directions, make this period especially dangerous to the native, or to cause sickness or early death. Therefore, it is well to make a study of the star map of every infant, and note the influences of and to the Δ during the first few years of life, and if any evil directions are found, or a train of evil directions, to be forming and culminating during this period, greater care and protection should be given the child during the infantile stage. With every new-born child the prospect of life is an important thing to know, for if early death is indicated, and the directions forming soon after birth are of a fatal nature, and also the vitality weak at B., then all else in the life of the child comes to naught as far as the physical and Earth life is concerned for the time. The death of infants, the causes of early death, their destiny, the future course of the Ego, etc., are explained from an Occult standpoint in the book, "Cosmo-Conception", by Max Heindel. Some Writers and Authorities also say that the first seven years of life in childhood are ruled by the Δ . In the Kabala, Infancy was dedicated to the \odot . The following paragraphs and subjects have to do with the beginnings, birth, the early life, diseases and afflictions of the child, and during the period of Infancy, which subjects see in the alphabetical arrangement when not considered here. Signs of Death—In Infancy—Rules for Judging—Will the Child Live or Die?—Indications in the map of a parent are—Lord of the 5th H. R, combust, in fall or detriment, and affl. by lord of the 8th or 12th H., signs of an early death; lord of the 5th weak, affl. by a malefic in the 8th or 12th H., unless opposite testimonies concur, the

child will speedily die; lord of the Asc. in the 5th H., and afflicted, or H, \sphericalangle , or \sphericalangle be in the 5th H., and R, or \sphericalangle in the 5th H., are signs of death. Also notes the following RULES and Influences—Signs of Death—

(1) the \odot just below the Asc. or Desc., malefics in the \times Navamsa of signs, and with the negative Hora of a sign rising. (See Navamsa, Horas).

(2) The \sphericalangle \sphericalangle a malefic, with no assistance from a benefic, and with malefics in the Asc. or Desc.

(3) Three malefics in three angles, and the \sphericalangle in the 4th angle, and the \sphericalangle and malefics all in evil aspect to each other.

(4) The \sphericalangle afflicted, and also the ruler of the 8th H. afflicting a malefic in the Asc., or just above the Asc.

(5) The ruler of the 4th or 8th H. afflicting the ruler of the Asc. in the 6th H., and with no good asp. from the benefics.

(6) The \odot or \sphericalangle in an angle in \sphericalangle a malefic, or if the malefic be an equal distance from the \odot and \sphericalangle , and without the assistance of good asps., and the rulers of the Lights also in malefic places, the child will die immediately or soon after birth.

(7) The \odot or \sphericalangle angular in \sphericalangle or ill-asp. a malefic, and without the assistance of good asps.

(8) The \sphericalangle in the 12th H., decr. in light, with no benefics in angles, with malefics rising, and also malefics in the 8th H.

(9) The \odot , \sphericalangle , and Asc. afflicted, malefics in angles, and the hyleg without assistance from the benefics.

(10) The \odot and \sphericalangle in \sphericalangle asp., and in \square asp. to malefics which are also in \sphericalangle to each other.

(11) Malefics in the 1st, 7th, 8th or 12th H. in \sphericalangle or ill-asp. the \sphericalangle , with no good asps. to the \sphericalangle , and no benefics angular.

However these rules will not hold good, and the infant will be spared if

(A) If the benefics \sphericalangle and \sphericalangle are in the Asc., in strong signs, well-aspected, and not afflicted by malefics.

(B) Lord of the Asc. strong, not afflicted, and well-aspected.

(C) The benefics in good asp. to, and ruling the hyleg.

(D) The hyleg assisted by the good asps of \sphericalangle or \sphericalangle .

(E) The \sphericalangle in the decanates of \sphericalangle or \sphericalangle in the 6th or 8th H.

(F) The positive horas of signs rising, and espec. those of positive signs. If these last six rules, or conditions, prevail, the child will live beyond the 7th year, but may not live a long life. If the first eleven rules prevail, and with no offsetting good influences, the child generally dies during the first seven years of life. An old Kabbalistic rule is that the 7th hour after birth indicates and decides whether or not the child will live, and a star map erected for a time exactly seven hours after the moment of birth, and studied as to the aspects and positions of the planets, and judged accordingly, will give valuable information as to the

prospect of life. These rules apply to the map of birth only, and the Prenatal Epoch map should also be studied along with the map of birth. (See Death At Birth, Death In Infancy, Death Soon After Birth, in this section; "Death" under Childhood, Children; "Symbols of Death" under Death; "Early Death" under Early; "Short Life" under Life).

(See Stamina, Tone, Vitality; "Healthy", "Long Life", in this section).

Stillborn; Strangled At Birth—Cases—(See Asphyxia, Strangulation).

Strength Increased—The benefics or the ν in the 5th or 11th H., and with fiery signs on the Asc. in the map of parent; σ in the Asc., and well-aspected, and in a strong sign in the map of the child, has much power to bring them thru infancy even tho the map is otherwise weak. If only one Luminary be with H , h , or σ in the 1st or 7th H. the infirmities will be produced in those parts of the body ruled by the signs on the cusps of the 1st and 7th; h in ∞ and in bad asp. the Asc.; the 3rd Decan. m on the Asc. (See Adynamia, Asthenia, Death, Debility, Decay, Decrepitude, Delicate, Disease, Emaciation, Fading, Feeble; "Health Bad" under Health; "Ill-Health All Thru Life" under Ill-Health; Invalids; "Low" under Resistance; Sickly; "Much Sickness" under Sickness; "Low" under Vitality; "Weak Body" under Weak, etc.).

Infirmities may occur in any organ or part of the body, and in the mind, and for the subject, or disease, you have in mind, look for it in the alphabetical arrangement, as nearly every subject in this book has to do with some Infirmity of Body or Mind. Also see such subjects as Brothers, Congenital, Defects, Deformities, Dissolution, Enemies, Extremities, Father, Females, Friends, Heredity, Limbs, Males, Men, Mother, Nobles, Old Age, Parents, Reins, Relatives, Secrets, Serious, Severe, Sister, Women, etc.

INFLAMMATION—Inflammatory—Inflammations—The termination "Itis" to words indicates Inflammation. The Inflammatory Process without alteration of tissues is presided over by J . The Inflammatory Process with degeneration of tissues is presided over by h . Inflammation and Fever are the work of σ to cleanse and burn out the accumulated wastes and filth of the body, and in this way σ is ultimately constructive in his work, altho destructive for a time in the process. (See Cleansing, Combustion, Constructive, Destructive, Energy, Fever). Inflammation is brought on by σ , and mostly because of rash and uncontrolled thinking. Also σ is rubefacient, reddening, and inflammatory, and tends to bring the blood to the surface. (See Centrifugal, Congestion, Rubefacient). Acute diseases under σ are inflammatory. (See Acute). The \odot is also inflammatory, and tends to inflammation, and especially when afflicting σ in the 1st H. Inflammation is produced by the \odot and σ , the positive, electric, and heat-producing planets. (See Mars, Sun). People born under the Biliou and Choleric Temperaments are more subject and susceptible to inflammations and fevers. (See Biliou, Choleric). In any sign σ tends to inflammation in the part of the body ruled by the sign he is in at B., or is now passing thru by transit, progression, or direction. The same influences which tend to inflammations also tend to fevers. (See Fever). Inflammation may attack any organ or part of the body, and for inflammation in the part, or organ, you have in mind, see the subject in the alphabetical arrangement. The following subjects are related to inflammation, and when not more fully considered here, see the subject in the alphabetical arrangement. (See "Causes" in this section).

INFLATION—The Body Inflated—The ♀ in ♂, ♂, or ill-asp. ♀ (or ♂ if he be of the nature of ♀) when taken ill, or at decumb., and caused by surfeits, high living, etc. (Hor'y). (See Distentions, Flatulence, Gas, Puffing, Tympanites, etc.).

INFLEXIBLE—Rigidity—Stiffness—(See Cold, Rigid, Rigors, Stiff). Many planets at B. in fixed signs, or fixed signs upon the angles, tend to give an inflexible, unbending, uncompromising temperament. (See "Fixed Signs" under Fixed; Obstinate).

INFLUENCED EASILY—Impressionable—More Difficult to Cure—More Susceptible to Disease—Convinced on Slight Evidence—Negative—Receptive, etc.—♀ Sig. ♂ the ☉; ♀ weak and afflicted at B., and often in a watery sign; ☉ on the Asc., and the ♀ remote in a common sign, tends to make the native light, credulous and inconstant. (See "Difficult to Cure" under Cure; "Light In Mind" under Mind; Negative, Plastic, Receptive, Sensation, Susceptible).

INFLUENZA—Grippe—La Grippe—Contagious and Epidemic Catarrhal Fever—First called Influenza in Italy in the Seventeenth Century because attributed to the "Influence of the Stars", and this name has passed into Medical use. This disease occurs in Countries at the time of an Eclipse, and where the Eclipse is visible, and espec. in Parts under the Central Line of the Shadow. Occurs when three or four superior planets are in ♂ or ♀. Said to be caused by electrical conditions in the atmosphere, due to planetary influence. Caused by cross aspects of Promittors, or Non-Promittors, to the ☉ when the horoscope is an unfortunate one. Catarrhal Fevers grow worse towards sunset. Also caused by the ☉ and ♀ badly aspected at B., or by dir.; the ☉ in ♀, and affl. by malefics; an eclipse of the ☉ in ♀, and the ☉ badly afflicted by malefics; the ♀ ♂, ☐, or ♀ ♀ at a Solar Rev.; the ♀ hyleg, and to the ♂ or ill-asp. ♀ by dir.; a ♀ disease; ♀ ♂, ☐, or ♂ ☉; ♀ ♀ ☐, and this aspect existed in 1918 during the great Influenza Epidemic of that year; ♀ ☐ ♀; ♀ ♂ ♀ if in the same Lat., or ♀ have

higher Lat. than ♃, and tends to a malignant form; a H disease, and caused by the afflictions of H; ♄ and ♀ are frequently afflicted, showing infection thru the throat; afflictions in ♀ at B., or by dir.; afflictions in common signs, or these signs upon the angles; Subs at MCP, CP, SP, and KP. (See Atmosphere, Catarrh, Colds, Epidemics, La Grippe, Lethargy, Nose; "Sleeping Sickness" under Sleep).

Malignant Influenza—Caused by ♃ ♄ ♀ if of the same Lat. If ♀ have higher Lat. than ♃, and these planets in ♄, Influenza and terrible diseases prevail. (See Malignant).

Nose—The Nose Affected In Influenza—(See "Influenza" under Nose).

INFORTUNES—Malefics—(See Malefics).

INGRESSES—These are the times when the ☉ passes the Equinoxes and Solstices, and the positions of the planets in the Signs and Houses at these times are very important to note in health matters, as they are times when disease is apt to come. Ingresses are frequently referred to in this book. Students of Medical Astrology should make a careful study of Ingresses, Equinoxes, and Solstices in the Textbooks of Astrology. (See Air, Catarrh, Cholera, Enemies, Epidemics, Epilepsy, Equinoxes, Fruit, Mania, Mutilated, Prevalent, Rheumatism, Scarlatina, Solar, Solstices, Tropical, Vernal).

INHIBITIONS—Restraint of Organic Activity—Due to ♄ influence and afflictions; ♄ tends to bind, hinder, retard, and suppress the functions of both body and mind by his afflictions, or to dwarf and disorganize the different organs of the body and cause disease, improper elimination and excretion, etc. (See "Saturn Influence" under Saturn).

Auditory Nerve—Inhibition of—(See "Auditory" under Hearing).

Faculties Inhibited—♄ afflictions to the ☉, ♃, ♄, or Asc., and the Faculties inhibited or restrained are those ruled over by the sign ♄ is in at B., or by the planet, or planets, which are especially afflicted by him, and according to the signs they occupy. (See Dull, Faculties; "Arrested" under Mental).

Functions Inhibited—♄ influence, and to the parts ruled by the sign he is in at B., or in temporarily by tr. or dir., and tends to lack of vital activity and circulation of vital forces in the part. (See Functions, Stoppages, Suppressions).

For further and collateral study see Atrophy, Binding, Cessation, Confinement, Crystallization, Defects, Deficient, Difficult, Diminished, Elimination, Excretion, Hardening, Hindrances, Limitations, Morbid, Restraint, Retarded, Shrinkage, Twelfth House, etc. Inhibitions can occur in any part or organ of the body, due to the presence of ♄, or other malefic, in the sign ruling the part afflicted, and for subjects not listed here, look in the alphabetical arrangement for the subject, part, or organ you have in mind.

INHUMAN—Not Perfectly Human In Shape—When the ruler of the last New or Full ☽ before birth, and the rulers of the ☉ and ♃ are unconnected with the preceding New or Full ☽, tends to unnatural conformities, and monstrous births. If in addition to this absence of connection, H, ♄, or ♀ be in angles, and the ☉ and ♃ be in ♁, ♂, ♃, ♄, ♅, or ♆, in Quadrupedal and Bestial Signs, then the conception will tend to be defective. (See "Beastly Form" under Beasts; "Dogs" under Children; Conception, Congenital, Deformities, Disfigurements, Distortions, Monsters, Savage, Wild, etc.).

Inhuman Disposition—♄ ill-dignified at B., and afflicted by ♄. (See Brutish, Criminal, Cruel, Merciless, Pity, Savage; "High Temper" under Temper; Vicious, Violent, Wicked, etc.).

For Injuries to the various parts, or organs of the body, see the subject in the alphabetical arrangement. For convenience of reference many subjects are re-

listed here. In a general way malefics oriental at B. tend to Injuries, Accidents, Hurts, etc., and when occidental to disease. The malefics in the signs at B. indicate danger of accidents, hurts, and injuries to the part, or parts, of the body ruled by the signs containing them, and especially when under the directions or transits of the malefics to such signs. (See "Danger of Injuries", and the various paragraphs in this section. Also see the Introduction under Accidents, Hurts, Wounds). INSANITY—Lunacy—Mental Derangement—Madness—From a planetary standpoint this disease is very closely related to Epilepsy, varying accord-

ing as to whether η or σ are the afflictors in a day or night nativity. In a disease of this magnitude the configurations and aspects in the natal map must necessarily be very severe, and also during prenatal life. In studying this disease the \mathcal{D} and \mathcal{S} should be primarily considered, their afflictions, their relation to each other and to the Asc. Mental weakness is more apt to result when there is no aspect at B. between the \mathcal{D} and \mathcal{S} , and also when neither form an asp. to the Asc., and at the same time be severely afflicted by malefics. In this case if η be the afflictor in a day nativity, Epilepsy is more apt to occur, but in a night nativity, if η be the afflictor, Insanity may follow, and espec. if the \mathcal{D} , η , σ , and \mathcal{S} be found in Ξ , μ , or \times . On the other hand when \mathcal{S} is the affliction planet, there tends to be Insanity by day, and Epilepsy by night. Also when the \odot and \mathcal{D} are conjoined, and ill-aspected by η , or opposed and afflicted by σ , Insanity may occur, and espec. if the Lights be found in Ξ , \mathcal{I} , or \times , and such infirmities will tend to be incurable if there are no good asps. to the \odot , \mathcal{D} , or \mathcal{S} from the benefics. In Insanity the Asc. is not necessarily afflicted, but in cases of Epilepsy the Asc. is usually badly aspected and afflicted by the \mathcal{D} , \mathcal{S} , and malefics. (See "Causes" in this section).

Agitated—The Insane More Agitated—(See "Full Moon" under Moon).

Asylums—Insane Asylum—Confined In An Insane Asylum or Prison, and Often by the Work of An Enemy— Ψ , \mathcal{H} , or σ affl. in the 12th H.; Ψ affl. in the 4th H., and apt to end days in an Asylum; Ψ in the 12th H., in \square or \mathcal{S} ; η affl. in the 12th H.; afflictions in the 12th. Case—See "Obsession", No. 130, in 1001 N.N. (See Confinement, Hospitals, Limitations, Prison, Restraint, Twelfth House).

Causes of Insanity—In addition to what has been said in the Introduction to this Article, note the following planetary influences—The SUN is also generally afflicted; the \odot above the horizon at B., and \mathcal{S} affl. by σ ; the \odot below the horizon and \mathcal{S} affl. by η ; the \odot and \mathcal{S} in common signs, and affl. by the \mathcal{D} or ill-asps. the malefics, and espec. afflictions from angles, or by planets out of dignity; the \odot and σ contribute to Insanity when they rule \mathcal{H} , \mathcal{Q} , the \mathcal{D} , or 1st H., and espec. if the \mathcal{D} , \mathcal{S} , and Asc. be unconnected with each other or the Asc.; the MOON, \mathcal{S} , and the Asc. in no relation or aspect to each other, and \mathcal{S} affl. by the \mathcal{D} or ill-asp. the malefics, and espec. if the affliction is from angles; the Prog. \mathcal{D}

\mathcal{D} η or \mathcal{S} in the 12th H.; the \mathcal{D} and \mathcal{S} both badly aspected by η , \mathcal{H} , or σ ; a \mathcal{D} disease; NEPTUNE in the configuration plays an important part in this disease, and espec. when his ill-aspects are added to those of η or σ , in which case Obsessions and Demoniacal affections may also occur; an afflicted Ψ ; Ψ affl. in the 12th H.; Ψ \square \mathcal{S} , and espec. if Ψ is in the 12th H.; Ψ \mathcal{D} in \mathcal{Q} , and affl. by \mathcal{H} and the \mathcal{D} , and the map otherwise indicating mental weakness; Ψ in \mathcal{Q} , and in \square asp. the \odot , \mathcal{H} , σ , and \mathcal{S} ; Ψ affl. in \mathcal{Q} in the 12th H.; a Ψ disease; Ψ affl. in the 4th H., may end life in an Insane Asylum; Ψ affl. in the 3rd or 9th H.; URANUS elevated above, and afflicting the \mathcal{D} and \mathcal{S} at the same time; \mathcal{H} afflicting one or both Luminaries, and η or σ afflicting the mental rulers; \mathcal{H} and σ afflictions tend to produce violent forms of Insanity, and where there is great muscular activity; \mathcal{H} affl. in the 6th or 12th H.; \mathcal{H} affl. in \mathcal{S} ; \mathcal{H} by transit in \mathcal{D} , \mathcal{S} , or the \mathcal{D} in the radical map, almost to the point of Insanity in some cases; \mathcal{H} in \mathcal{S} and affl. by the \mathcal{D} , danger of, and espec. when other configurations indicate the disease; SATURN the afflictor in a night nativity; η and σ in an angle, occi. of the \odot , and ori. of the \mathcal{D} , and \mathcal{S} in familiarity with σ ; η , \mathcal{D} , or \mathcal{S} the Asc. in a night nativity, and espec. when in Ξ , μ , or \times , and with \mathcal{S} and the \mathcal{D} in no relation to each other, or to the Asc.; η , \mathcal{D} in or near the 22° μ , and affl. by Ψ , and other configurations concurring; MARS affl. in the 12th H.; σ \square or \mathcal{S} ; σ \mathcal{S} from the 6th and 12th H.; a σ disease; σ afflictions tend to the violent forms; σ the afflictor in the configuration in a day nativity tends to, and to epilepsy in a night map; σ affl. in the 3rd H., and espec. when in a water sign; σ in μ in the 3rd H., and in \square to the \mathcal{D} if other aspects and afflictions concur; σ , \mathcal{D} , or \mathcal{S} the Asc. in a day nativity, with other influences in accord, as stated; σ and \mathcal{S} holding dominion at B., and in familiarity with each other, and σ affl. the hyleg and elevated above the Luminaries, the Insanity is increased; σ afflicts the mental rulers, and espec. in a day nativity; MERCURY and the \mathcal{D} unconnected with each other or the Asc.; a \mathcal{S} disease; \mathcal{S} affl. in the 12th H.; \mathcal{S} badly afflicted at B., \mathcal{D} , or evil asp. the malefics, and with no assistance to \mathcal{S} from the benefics; \mathcal{S} in \mathcal{S} in \mathcal{S} , \mathcal{H} , η , and the \mathcal{D} in μ ; \mathcal{S} combust and affl. by malefics, etc. (This sentence and configuration is finished in full under Idiots). Mutable signs on the angles, and also greatly afflicted, tend to insanity, and also to lack of hope; cardinal and fixed signs on the Asc. and the angles lessen the chances of insanity; the 22° μ or \times on the Asc., or containing afflictions, tend to, and are sensitive degrees for this disease, and also sometimes by the exact \square aspects of the malefics, or of \mathcal{S} and the \mathcal{D} to these degrees; the 12th H. is also generally prominent and afflicted, as this house indicates confinement, limitation, restriction, and suppression of the faculties; the 12th H. is more afflicted in Insanity, while the 3rd H. is

more prominent in Epilepsy, which helps to differentiate the two diseases; the Asc. unconnected with ζ or the Δ , and otherwise afflicted by the malefics η or δ , as stated; the $28^\circ \Delta$ on the Asc. tends to, and to give a weak mind or intellect; Lunations falling on the place of a badly afflicted radical Δ tend to, and to give a temporary attack of insanity. (See Lunacy). The following paragraphs give classified conditions concerning Insanity and further influences not listed in this one, and in the Introduction to this Article. For Cases of Insanity, Birth Data, etc., see "Cases" in this section.

Also Insanity is caused by Obsessions, Evil Spirit Controls, Morbid Fears, Fixed Ideas, etc., which could be largely relieved or mitigated, and possibly cured, by Suggestion in the Hypnotic State, or by commanding the Evil Spirit to depart, as did The Christ in some cases. (See Curable, Incurable, in this section).

Unmanageable—(See "Outrageous" in this section).

INTELLECT—Intellectual—Intelligence—Intelligent—Mind—Understanding, etc.—This subject is mostly considered under the subjects of Mental, Mind. See the various paragraphs under

Mental, Mind. The Intellect is ruled by ☿, which planet is designated as the Mental Ruler in general. The ♃ sign also rules the Intellect. The Asc. is said to rule the brain, and to have great influence over the mind and intellect, and each of the planets as they aspect and influence the ♃, ☿, and the Asc., tend to give their peculiar qualities to the mind for good or evil. Green is the color of the Human Intellect. (See Green). The study of intellectual ability is a deep and far-reaching one, and with many things to be considered which are not always shown and indicated by the map of birth. Heredity, the Age of the Soul, past experiences and causes, the aspects and influences of the prenatal period, etc., and others, are factors which have to be considered, and which play an important part in the state and quality of the Intellect. (See “Judging the Mind” under Mind).

All Evils—Of the Intellectual Parts—All evils of these parts, and diseases of the Mind proper, are ☿ diseases fundamentally, with ☿ weak and afflicted at B., or afflictions to the parts of the natal map partaking of the ☿ influences, etc. (See “Diseases of the Mind” under Mind).

Diseases of the Intellect—Disordered Mind—(See the various paragraphs under Mental, Mind. Also note the various references at the end of this Article).

Dull Intellect—(See Dull, Smoky).

Good Intellect—A Strong and Powerful Intellect—A Good Mind—A Clear Intellect—☿ well-aspected by the ♃ at B., and also in favorable relation to the Asc., and in one of his own signs, as in ♀ or ♁, or with one of these signs on the Asc. at B., and also the 3rd and 9th Houses, the houses of mind, strong and well-aspected at B., tend to give a good and strong intellect, whereas the opposite conditions tend to give a weaker understanding, or poor judgment, a shallow mind. However, ☿ may be rather weak at B., and yet the native have a strong intellect, or be a Genius, if the 3rd H. and Asc. be strongly influenced by ☿, or a ☿ sign. This was the case with some very great men and scholars, as Sir Isaac Newton, Spencer, Huxley, and others. In some cases a strong 9th H. gives a great intellect, as with Kant. Mars in the Asc. in ♄ asp. the ☉ tends to give a powerful intellect. (See “Active Mind” under Active; Genius; “Good” under Judgment; “Quickened” under Mental; “Sound Mind”, “Strong Mind”, under Mind).

Powerful Intellect—(See “Good” in this section).

Shallow Intellect—(See “Humours” under Head; “Shallow” under Mental).

Sound Intellect—The 3rd Decan. of ♃ on the Asc. at B. denotes. (See “Sound Mind” under Mind).

Strong Intellect—(See “Good” in this section).

Weak Intellect—A weak Intellect, Insanity, Imbecility, Mental Defects, etc., usually result from a weak and afflicted ♀, ♃, and Asc. at B., and with ♃ in no aspect with the ♃ or Asc., and also with weak and afflicting influences over the 3rd, 9th, and 12th Houses. The weaknesses of the Intellect are governed by ♃ and the ♃, their relation to each other and the Asc., and the aspects to them. (See Foolish, Idiocy, Imbecility, Insanity; "Weak" under Mental, Mind). For further and collateral study along the lines of Intellect and Mind see such subjects as Chaotic, Comprehension, Confusion, Congenital, Defects, Deficiencies, Dull, Eccentric, Emotions, Epilepsy, Erratic, Examinations, Expression, Faculties, Fancies, Feelings, Fury, Hebetude, Ideals, Ideas, Knowledge, Learning, Look, Mania, Mathematical, Memory, Mental, Mind, Monsters, Notions, Perception, Precocious, Prenatal, Prodigies, Psychic, Reading, Reason, Senses, Study, Talents, Temper, Temperament, Understanding, Will, etc.).

The earthy and fiery signs tend more to fix the mind and attention upon outer and material things, as in extroversion, and to brood more over worldly cares, business, finance, and earthly things. Ill-Health and mental disturbances result from either of these courses if the ideas become too fixed, or the nature be unadaptable to environment. Foreign Travel, Voyages, etc. Malefic planets in these houses at B., or a malefic as lord of these houses, indicate danger in travel, while the benefic planets in these houses tend to benefits and gain by travel, either in business or health matters. These matters are further considered under the subjects of Abroad, Foreign Lands, Location, Native Land, Railroads, Residence, Ships, Travel, Vehicles, Voyages, etc. The following subjects and paragraphs are listed here, as they have to do with the welfare of the native, the health, environment, business success, the mental and spiritual welfare, etc., and to assist with fore-knowledge to avoid dangers which may lead to accidents, injuries, ill-health, sickness, or death thru journeys, by traveling or locating in a wrong direction from the birthplace. Some people, according to their maps of birth, should remain at their birthplace all thru life for the best of success and health, while others should remove, or even locate in a Foreign Land. People born in Northern Latitudes, and who have nearly all their planets below the horizon at B., can, by removing to the South Latitudes, reverse their maps and bring their planets above the Earth, and near the Zenith, and into greater power, and thus a career which would have been obscure in the land of birth may become very notable, powerful, and successful in the opposite Hemisphere.

— SECTION THREE —

THE DISEASES OF JUPITER—The most of the diseases of γ arise from indiscretions in eating or drink, causing indigestion, distempers, distensions, plethora, fullness, too much blood, corrupt blood, etc. No aspects of γ or φ cause disease, but only as configured with malefics. Jupiter does not in himself cause any disease, but afflictions to γ affect the Blood, Lungs, Liver, and indirectly the Heart, as γ rules the Blood. Also afflictions to

γ cause Apoplexy, Abscesses, Boils, Cramps, Pleurisy, etc. (See the Introduction, "Afflictions", "Aspects", "Directions", in Sec. 1 of this Article). The following diseases and conditions are attributed to the afflictions of γ , and when this planet is ill-dignified at B., or afflicting the \odot , \uparrow , Asc., or Hyleg, and the various houses of the map of birth. The adverse influences of ♃ tend to age both mind and body, and this planet strong at B. tends to premature old age, and the contraction and drying up of the body. The ♀ Sign strong at B. tends to preserve the mental faculties to an extreme age, and to keep the mind young and buoyant. The influences of the ♃ Sign tend to preserve the freshness of youth even to an advanced age. (See Well-Preserved; "Youthfulness" under Youth).

He believed in the influence of Comets over human affairs, and at the time of the appearance of a Comet predicted the rise and fall of Wallenstein. Kepler was born at Weil on Dec. 7th, 1571, and died Nov. 15th, 1630, at Regensburg.

The influence of ♃ is that of mystery, and also of treachery. (See Neptune, Plots, Seduction, Twelfth House).

KIDNEYS—The Renal System—Renal Nerves—Renal Circulation—Reins—The Kidneys are under the internal rule of the ♀ Sign. They are also ruled by ♀ and the 7th H. Libra rules the outer and upper part of the kidneys, the medullary and cortical substance, distillation, filtration, and the functional activity of secreting urine. The Distillatory Processes of the kidneys are under the joint rule of ♀ and ♀. (See Distillation, Filtration). The Medullary and Cortical substances are also under the rule of ♀. The renal papillae are ruled by ♀. Venus adds to or subtracts from the Renal Process, modifying the influence of the ☽ or ♃ over the kidneys. Being strongly under the influence of ♀, the kidneys play an important part in the nutrition of the body, as well as in the elimina-

tion of wastes. The ☉ and ♃ in ♁ act upon the Lumbar Ganglia, and also by acting thru the Renal Plexuses affect the Renal System, and give way to the Renal Diathesis. (See "Lumbar Ganglia" under Ganglion). The Circulation in the kidneys is ruled and controlled largely by ♃ acting thru the posterior lobe of the Pituitary Body. (See Pituitary). The ♃ Sign rules the under and lower portion of the kidneys, the Sinus, or Pelvis, and also indirectly affects the kidneys by ruling the bladder and urethra, thru which the elimination of urine takes place. Excretion in the kidneys is ruled by ♃. All of the fixed signs rule and affect the kidneys by planets in them, by their internal government. The cardinal signs also greatly influence the kidneys, and denote the kidneys, as they are in ☐ and ♄ aspect to ♁, and form the cardinal cross, of which ♁ is a part. Wilson, in his Dictionary of Astrology, also says that ♄ has rule over the kidneys, as ♄ rules the ♃ Sign. The ♄ Group of Herbs and Metals tend to have a pathological action on the kidneys, and Gentian, a ♄ remedy, is one of the principle ingredients in kidney medicines and diuretics. Mars is opposed to ♀ therapeutically, and ♄ remedies combat ♀ diseases. (See Opposites). The following subjects have to do with the Diseases, Disorders, and Afflictions of the Kidneys.

The disease may also travel around the world once or twice in a year or two until ♃, or some other planet, gets out of perihelion. It is

caused by disturbed and vitiated atmospheric conditions, and is more prevalent when the major planets, and especially ♃ or ♃, are in perihelion, and these same influences also tend to cause Typhus Fever. (See Colds, Epidemics, Influenza, Pestilence, Typhus).

(See Azimene, Mutilated). If the malefics are in angles ♃ or ♄ the Lights, and the ♃ in her node in a hurtful sign, as in ♏, ♄, ♁, ♀, or ♃, the native will be lame or distorted. The defect will be from birth if the malefics are joined to the Lights, but if in ♄ to them, or if they have a ☐ to them from the 10th H., it will be ♃ falls, blows, or stabs. Caused by the ☐ or ♄ aspects of the ♃; ♃ and ♄ joined anywhere in the map, and especially in angles, or in their own nodes, or in the Lunar nodes, tend to. Lameness is also caused by afflictions, or the malefics, in the signs which rule the legs, as in ♏, ♃, ♁, or ♃, or when these signs are on the Asc. at B., and afflicted; a ♃, ♃, ♁, and ♃ disease; ♃ in one of the signs which rule the legs, knees, ankles, or feet, and also where ♄, ♀, and the 3rd H. are also involved by afflictions at the same time, is a very common indication of this disability; afflictions to ♀, the 3rd H., to ♃ and the 9th H., and where ♄ is also afflicted, tend to lameness; ♄ affl. in ♃. LEO—The Leo Sign—The Fifth Sign of the Zodiac, and is affiliated with the 5th H. Leo is ruled by the ☉, and is the day and night house of the ☉. The symbol of this sign is the Lion. Leo is classed as a fixed, fiery, electric, positive, masculine, active, vital, constructive, barren, hot and dry sign. This sign is classed as barren because the ☉ is barren. The ☉ is strong in this sign, and ♁ on the Asc. at B. gives great vitality. Leo represents the heart of the physical organism, and is significant of vital force, vital power, generation, interchange and ardency, and the sphere of ♁ is a deep-seated and extensive one. As ♁ is a hot sign, it heats the system, and also under affliction tends to cause loss of equilibrium in mind and body. Leo belongs to the trinity of fiery signs, as ♁, ♁, and ♄, and these are considered the signs of greatest vitality when on the

Asc. at B., and also well-occupied by planets, and especially when rising and elevated in the East at B. Leo draws its strength largely from and thru the Spleen, which is ruled by the ☉. Leo on the Asc. at B. tends to give a tall, commanding figure, strong vitality, fiery and expressive eyes, a good complexion, strong and broad shoulders, a fearless and proud nature. (See Cor Leonis, Lion, Mane of Leo). The Hebrew letter Teth (T) is connected with the ♁ sign, and Teth is predominant in love. Gold is the Metal ruled by ♁. The Colors of ♁ are Gold, Red and Gold, Red and Green. For the Countries and Nations ruled by ♁, see "Leo" under Nations. The Typical Remedy of ♁ is Gold. Magnesium Phosphate is the Salt ruled by ♁. (For further details about the ♁ sign see the classified Articles on Leo in the various Textbooks and Dictionaries of Astrology).

LEO RULES—For a classified list of the influences of each of the planets in ♁, see the Textbooks of Astrology. The principal rulership of ♁ is over the Heart, and the Circulation thru the Heart. Also, ♁ rules the Back, and that part of the Spine back of the Heart, and the Heart Place in the Spine, HP, the 2nd Dorsal Vertebra. Each sign has an external, internal, and structural rulership. Externally, ♁ rules the Back and Forearm. Internally, ♁ rules the Heart, Blood, and Liver. Structurally, ♁ rules the Dorsal Vertebrae, the Radius and Ulna of the Arm, and the Wrists. The following is an alphabetical and classified list of the parts of the body, and other matters ruled by ♁, as listed and mentioned in the various Textbooks of Astrology. See these subjects in the alphabetical arrangement—Aorta; Ardency (see Amorous); Back; Blood; Chamomilla; Children; Circulation of the Blood (♁ and ♃ are concerned with Circulation and Distillation); Circulatory System; Constructive Forces of the Body, along with ☽; Creative Powers; Distillation; Dorsal Region of the Back and Spine; Dorsal Nerves (Middle); Dorsal Vertebrae; Equilibrium in the Body; Fifth House; Forearm; Gall and Gall Bladder; Generation; Gold; Heart; Inferior Vena Cava; Interchange of Forces in the Body; Liver; Magnesium Phosphate Salt; Marrow of the Spine; Middle Dorsal Nerves; Nerve Sheaths; Nerves of the Spine; Offspring; Radius; Salt (Magnesium Phosphate); Spinal Cord; Spine—Dorsal Region of—Marrow and Nerves of); Spleen; Superior and Inferior Vena Cava; Ulna; Vena Cavae; Vital Fluids, Vital Forces, and Vital Power of the Body; Wrists. By aspect and reflex action, the ♁ sign also influences all of the other fixed signs, and the parts of the body ruled by them, and is a part of the Fixed Cross, made up of ♁, ♁, ♁, and ♃.

LEPROSY—This disease is caused by disorders of the Pituitary Body, ruled by ♃, and by a disordered Thyroid Gland, ruled by ♄. The disease is caused by filth of body, uncleanness, sex excesses, moral depravity, and venereal diseases, which disturb the functioning of the Pituitary Body. It is also an endemic, chronic, and infectious disease.

General Causes—The D in the Autumnal Equinox at B., and afflicted by h ; the D in the sign of the Vernal Equi. at B. tends to white leprosy; the D affl. in P , S , or I , white leprosy; the D affl. in a , m , or f ; Ψ in W in the 6th H., or afflicting the hyleg or Asc. from this sign; H afflicted at B., and by dir.; a h and W disease; h or S in the 1st or 7th H. in a , W , or X , in signs ascribed to animals or fishes, and especially when in the latter degrees of the signs containing them; h S in the 1st or 7th H., in the latter degrees of I , f , or X , ori. of the C and occi. of the D , tends to leprosy in the extremities, as in the hands, legs and feet; h in the latter degrees of I , f , or X , and one of them in the 1st or 7th H., and espec. when h is occi. of the C and ori. of the D , tends to leprosy in the extremities; S affl. at B., and by dir.; lords of the 1st, 6th H., or the D in airy signs; Subs at CP and KP. Treatment of Leprosy—The use of Chaulmoogra Oil is said to be a cure for this disease. In Guayaquil, Ecuador, 300 cases are said to have been cured by the use of Colodial Salts of Antimony. For information as to the Cure, write to the Department of Agriculture, Washington, D.C.

They are manufactured in the Spleen, and are principally the work of h . See Character, Destiny, Disgrace, Dishonour, Fate, Pain, Reversals, Ruin, Sorrow, Suffering, Trouble; "Free Will" under Will. A person may be liable to many evils, according to the indications of their star maps, especially if they are drifting in life, lacking in wisdom, self-control, discretion, discrimination, and the knowledge of Astrology, but the student of the Occult, of Astrology, the Metaphysical, etc., can usually by his foreknowledge forestall many evils that would naturally overtake the ignorant, the uninitiated, and those who are not ruling their stars. Ripe Fate may be the exception, which is discussed under "Fate".

LIBRA—The 7th Sign of the Zodiac, the day and home sign of ♀, and is related to the 7th H. Libra is classed as an airy, cardinal, positive, masculine, hot, warm, moist, humane, and nervous sign. It is the exalted sign of ♀, and the fall of the ☾. When afflicted it causes inharmony and want of tone by disturbances in the system, and disordered kidneys. Libra implies sublimation, which is vaporization and recondensation. The Symbol of this sign is "The Balance", and the influence of the sign is to help keep the balance in the system by the work of secretion, excretion, elimination, and separating the poisons which are carried off in the urine. Libra and ♄ are considered the weakest of the positive signs. Externally, ♄ rules the external Generative and Urinary Organs, and the Anus. Internally, it rules the Kidneys. Structurally, this sign rules the Lumbar Vertebrae. Libra rules the outer or upper portion of the Kidneys, the Medullary and Cortical Substances. Libra and ♃ are concerned with Distillation and Circulation, and ♄ especially rules Distillation and Filtration. Libra and ♀ are closely associated in the work of the kidneys, secretion and excretion of urine. (See Kidneys, Scorpio, Urine). Libra is a rather fruitful sign because of ♀. For the Nations and Countries ruled by ♄ see "Libra" under Nations. The Colors ruled by ♄ are Black, and Dark Crimson. The Hebrew letter "Lahmed" (L) is connected with the ♄ sign, and also with Sleep and Dreams. When on the Asc. at B. the ♄ sign gives a tall, graceful, slender body, but the last few degrees rising, the body is shorter and stouter due to the influence of the next sign ♀. The Pathological Qualities of ♄ are Jealousy, Melancholy, Self-Centeredness, Sensitiveness. (See Seventh House, Venus). The following are the Qualities ruled over, or given by ♄—Airy, Artistic, Autumnal, Beauty, Cardinal, Changeable, Diurnal, Equinoctial, Fortunate, Fruitfulness, Graceful, Hot, Humane, Masculine, Moist, Moveable, Musical, Nervous, Obeying, Positive, Sanguine, Southern, Speaking, Sweet, Warm, Western, Whole, etc.

LIFE—Prospects of Life—Length of Life, etc.—The expression of life, continuity, and the giving of life, are the most salient characteristics of the ☉, and the ☉ has significance of life and the constitution. The 1st H. also has signification of the life of Man, and his physical body and appearance. The ☉ gives the life force, and life and joy are said to come from the ☉. The fiery signs are life-giving signs. Life also corresponds to the fixed signs, and to the heart and Vital Temperament. Life manifests as motion, or vibration. Saturn afflicts and suppresses life and joy by his evil aspects to the ☉, ♃, Asc., or Hyleg. The following subjects have to do with life, and the planetary influences as they affect and influence life for good or ill, which subjects see in the alphabetical arrangement when not considered here—

Accidents; Anareta—The Destroyer of Life—(See Anareta).

Average Life—The ☉ well-aspected in the Asc. at B. indicates an average length of life, and a strong constitution in Hor'y Q. (See "Long Life" under Life; Middle Life).

Benefics—The Benefics As Givers and Preservers of Life—(See Benefics).

Birth—Continuance of Life After Birth—(See "Continuance" in this section).

Conscious Life—(See Consciousness).

Continuance of Life—Continuity of Life—The continuance and continuity of life after birth are expressed by the ☉; the ☉, ♃, and Asc., and one of them hyleg, well-aspected by benefics, and with good aspects among them, and free from the evil asps. of malefics, promote life and give a strong constitution; the benefics ♃ and ♀ angular, free from affliction, and in good asp. to the hyleg, as by ☉, ♃, ♃, Δ, or P., is a good sign of the continuance of life; the ☉ hyleg in a male nativity, and well-aspected, and the ♃ hyleg in a female nativity, well-aspected, and free from the afflictions of malefics, indicate a continuance of life, and long life. The last aspect formed between the ☉ and ♃ before birth, whether a good or evil asp., is important to be considered when judging of the influences as to continuance and duration of life. Also, in considering whether the child will live, the Asc., its ruler, and the ruler of the 8th H., the house of death, should be noted, and their aspects and relations to each other, whether good or bad. The lord of the 8th H., and especially when a malefic, and afflicting the lord of the Asc. at B., is not favorable for a continuance of life, and the child may soon die. (See "Death" under Childhood, Children, Infancy; "Early Death" under Early; "Nurture" under Infancy; "Long Life", "Short Life", and the various paragraphs in this section).

Destroyed—Life Destroyed—The hyleg setting on the Western Angle, death ensues; the hyleg ☉, ☽, or ☽ ½ or ☽ in the Zodiac or Mundane P. when they are equally distant from any angle, is said to destroy life. It takes a train of evil directions to the hyleg to destroy life, and one evil direction seldom kills, and espec. if the native be young, vigorous and healthy. (See "Certain Death", "Sure Death", under Death; Directions, Fatal).

Probable Length of Life—Of the Querent (Hor'y)—Observe the Asc., lord of

the Asc., and the ♃; also lord of the 8th, and malefics in the 8th; the planet to whom the ♃, or lord of the 1st H. be joined by a ♃, ☐, or ♀ aspect. The time of death and the duration of life may be determined by the number of degrees between the Significator and the aspect of the afflicted planet. Years are denoted if the lord of the Asc. be in ♃ the lord of the 8th in an angle. Angles show strength and vitality and do not hasten death. Half years and half months of life are denoted if the Sig. be in fixed signs; if in succedent houses, months; if in cadent houses, weeks. In this case, the lord of the Asc. is more to be considered than the ♃, and the ♃ of the lord of the Asc. with the ☉ or lord of the 8th is to be feared the most. The lord of the Asc. being sorely afflicted in this question does not denote health or life. Only aspects by application are to be considered. (See Continuity; "Time of Death" under Death; Duration; Continuance, Duration, Length, Long, Short, in this section).

Short Life—Signs of—Early Death—The SUN and ♃ both afflicted at B.; the ☉ badly aspected by the ♃ at B.; the ☉ or ♃ in the 6th H. at B., afflicted, and the rising sign a weak one; born at the time of a total eclipse of the ☉ with males, or an eclipse of the ♃ with females, seldom of long life or strong constitution (see Eclipses); the ☉ or ♃ Sig. ♃ ♂, and ♂ ill-dig., and usually early death thru quarrels, fury, accident, etc.; the ☉ Sig. ☐ or ♀ ♃ if he be in the Asc., unless a good asp. of ♃ intervene, the native is diseased and short-lived; the ☉ Sig. ☐ or ♀ ♃ if the ♃ be hyleg, and the aspect close; if the ☉, ♃, Asc., or lord of the Asc., or the most of them, are weak, afflicted, besieged by malefics, or occupying the same declination as malefics, if they be combust or R., and impeded by lords of the 4th, 6th, 8th, or 12th H., these are signs of short life or of great danger; the ☉ besieged by ♃ and ♂, cadent, and afflicted by lords of the 6th or 8th, or stars of their nature; the ☉ or ♃ affl. in common signs, and espec. in ♋; the ☉ afflicted in signs of low vitality, as

or Common Signs (Hor'y); the life tends to be short, or with some grave danger or misfortune near, according to the quality of the Significators, and of the houses those planets are lords of, and which afflict the ♃ (Hor'y). A number of Cases and birth data of Short Life, and Death in Infancy, are given under Infancy. (See "Death" under Childhood, Children, Infancy; "Early Death" under Early; "No Duration of Life" in this section).

Spared—(a) The Life Is Spared—Death Not Imminent—The Life Saved—Life Pres-erved, etc.—Life will not be destroyed, or end in death from disease, unless the hyleg is sorely afflicted. The life is spared when there is no train of evil directions, as one direction rarely kills, no matter how malignant it is. Life is always spared as long as the hyleg remains strong. When the ♃ is hyleg and directed to the ♄ of a malefic planet, if her Lat. when the aspect is completed differs greatly from that of the afflicting planet at ♀, life will generally be spared, altho a serious illness may result. A good direction of ♃ or ♄ to the hyleg in an otherwise train of evil directions, the life will be spared if the benefics were not badly aspected at ♀; a benefic in good asp. to the Anareta; ♃ or ♄ within orb of the Anareta, and with ♃ within 12°, or ♄ within 8° of the anaretic point, life is spared; a malefic in the term of a benefic; the Anareta in the term of a benefic; a benefic in the term of a malefic will do less good, and renders it vicious; if an evil direction of ♃ or ♄ are within the orb of the anaretic point they help to save life; when the hyleg is ♄ the Anareta, but differing widely in Declination, life will be saved; in the World, or Mundane, even one degree of difference in Lat. between the hyleg and Anareta may save if the Anareta is in the term of a benefic, and espec. if the native has a good constitution, but severe indisposition may follow for a time; if the benefics cast a ray of any kind, good or evil, to the anaretic point, the life will be saved unless they are outnumbered by the malefics, and if two malefics are opposed to one benefic there is little hope except the benefics be strong in an angle, and the malefics cadent; if the Anareta falls in the term of a benefic almost any aspect of a benefic will save life. Ptolemy says a ray of either ♃ or ♄, of any kind, falling on the Anareta will save life, but Wilson in his Dictionary thinks ♄ cannot do so alone unless ♃ assists. (See Amelioration, Crises, Directions, Moderation, Recovery, Recuperation).

(b) Life May Not Be Spared—The hyleg ♄ the Descendant, death usually

results, and espec. if the hyleg is under evil directions of malefics; an assisting benefic in the term of a malefic, or the place of the anareta in the term of a malefic; a benefic is vitiated by being in the house, exaltation, or triplicity of a malefic, but most vitiated when in the term of a malefic; a benefic alone, not strong or dignified, has little power to save when threatened by two malefics. Life may be prolonged for a time, but the two malefics will prevail in time.

(c) Life Not Spared—Death Certain—A benefic in the term of a malefic; the anareta in the term of a malefic; a benefic in the term, house, exaltation, or triplicity of a malefic, death is practically certain unless both benefics intervene with good asps. to the hyleg; a benefic alone, afflicted and undignified, and threatened by two malefics; the hyleg and anareta in ♄, yet differing greatly in declination. (See "Arguments for Death", "Certain Death", "Fatal", "Sure Death", "Threatened", under Death; "Destroyed", "No Duration", in this section).

LIGAMENTS—Sinews—Tendons—The Ligaments are ruled by ♃ and ♄, and ♃ tends especially to harden and crystallize them, and to cause loss of strength in the ligaments, and ♄ in any sign tends to affect the ligaments in the part ruled by the sign he is in at B. Thus ♃ afflicted in ♌ tends to

loss of strength and elasticity in the ligaments of the spine. The ligaments are affected also by the ☿ sign, and the ☉ or ♃ in ☿, and acting thru ☿ and the Plantar Nerves tend to influence and affect the fibro-ligamentous system, the respiratory and synovial systems, the os calcis, the feet, toes, etc., and give way to the Thoracic Diathesis. The liver is the largest gland in the body, and is the seat of the Animal Soul, or Desire Body. (See "Desire Body" under Desire). In the Astral Body ♃ has direct relation to the liver, and the liver is also the central vortex of the Desire Body, and the seat of the passionial desires. (See "Astral Body" under Astral). Jupiter is the main ruler of the liver. It is also under the internal rulership of the ♃ sign. The liver is affected by planets in any of the cardinal signs, as in ♃, ♁, ♃, ♃. The liver is also ruled by ♃, ♃, ♃, and presided over by ♃. The 5th H. denotes the liver. Ptolemy and Wilson say that ♃ rules the liver. Mars also rules the liver, the bile and gall. The upper lobes of the liver are ruled by ♃, and the lower lobes by ♃. The Liver Place in the spine is the 4th Dorsal vertebra, designated as Li.P. The waste products of the Portal Blood Stream are converted into Glycogen in the liver by ♃. (See Glycogen). Saturn forms Uric Acid, Urea, and the Gall in the liver. (See Bile, Urea, Uric). The afflictions of ♃ have an adverse influ-

Mars adds or subtracts to the Hepatic Process, and the ♂ group of herbs act upon and modify the Hepatic Diathesis, and oppose the ♀ diseases of the liver. (See Hepatic). Also the remedies of ♀ have a specific action upon the liver, and relieve its congestion, and especially of the Gall Bladder. The ☉ and ☽ acting thru the ♀ sign, thru the ganglion of Ribes, and thru the cavernous and carotid plexuses, affect the cerebro-spinal nervous system, the head and its dependencies, and give way to the Hepatic Process, and also acting thru the ♀ sign. LOSS OF—Detriment—Losses—There are quite a number of paragraphs throughout this book indicating the loss of something, as loss of health, of comforts, of friends, of loved ones, or property, fortune, honour, etc., and subjects too numerous to list here, and you are requested to look in the alphabetical arrangement for the subject you have in mind. However, the following are prominent suggestions as to subjects along this line. The afflictions and adverse aspects of the planets at B. and by dir., usually tend to the loss of something as regards the individual, while the good aspects of the planets by transit, progression, and direction tend to the restoration of that which was lost, if restorable, as health, wealth, comforts, ease, peace of mind, success, etc. Look for the heading, "Loss Of", under the following subjects, or others you may have in mind—Appetite, Arms, Aunt, Blood, Character, Cheer, Children, Citizenship (see Banishment, Exile); Comforts, Credit (see Cheating, Deceitful, Dishonesty, Forgers, Thieves, etc.); Daughter, Death, Equilibrium, Eyes, Faculties (see Idiocy, Imbecility, Insanity); Family, Father, Feeling, Feet, Finger, Flesh, Fluids, Fortune, Friend, Hair, Hands, Happiness, Health, Hearing, Honour, Husband, Identity, Infant, Inheritance, Integrity (see Cheating, Criminal, Deceit, Disgrace, Dishonour, Forgers, Liars, Libel, Reputation, Ruin, Thieves, etc.); Joy, Legs, Liberty (see Prison); Limbs, Manhood (see the various paragraphs under Men); Marriage Partner, Memory, Modesty, Money, Mother, Passion, Peace of Mind (see "No Peace" under Mind); Position (see Disgrace, Dishonour, Poverty, Property, Reverses, Ruin, Wealth); Property, Reason, Relatives, Reputation, Riches, Seed (see Semen); Sex Desire (see Apathy, Celibacy; "Free From" under Passion); Sight (see Blindness, Sight); Sister, Smell, Son, Speech, Stamina, Stimulus, Strength, Taste, Teeth, Tone, Uncle, Virtue, Vitality, Voice, Volitional Power, Wealth, Weight, Wife, Woman-

LOVE AFFAIRS—Love—Dealings with the Opposite Sex—The 5th H. and the ♀ sign are predominant in love affairs, and also ♂ and the 7th H. Venus is the principle of love, and it is afflictions to ♀ that tend to disturbances in the love nature, and to diseases and ill-health by its abuses. The afflictions of ♄, ♃, and ♂ to ♀ tend to excesses, abuses, and irregularities of the love nature, leading to weakness, exhaustion of the vital forces, sorrow, suffering, or death. The afflictions of ♃ to ♀ also cause carelessness in love affairs, or make one unnatural, or given to excessive illegal practices, or abnormal affections. The good aspects of the planets to ♀ tend to make the affections and love nature true and genuine, and to be properly used, and also restrained. The question of love affairs is a large one, and cannot be gone into here except along lines where the love nature is afflicted, abnormal, perverted, and which tends to ill-health, suffering, injury, or death. The unrestrained use of the love and sex nature, and passionial displays, excesses, and the use of the sex nature for pleasure and gratification, are undoubtedly the causes of much of the sin, suffering, sorrow, and misery in the World today, and often lead to an untimely death, whereas if the vital forces were saved, used only for propagation, and the nature spiritualized, people would live longer, have better health, and be spared much of the suffering that now overtakes them. The Occult side of love, and love affairs, is very fully considered in the books, "The Key of Destiny", by Dr. and Mrs. Homer Curtiss, and also the book, "Cosmo-Conception" by Max Heindel.

Lunacy is a disease of the \uparrow , and is called Lunacy after Luna, Lunar, the \uparrow , and lunacy patients are more affected, agitated, restless, or raving at the time of the Full \uparrow . (See "Full Moon" under Moon). If \uparrow or \uparrow are ori. or angular, and have any configuration with the \uparrow , it is curable. If the \uparrow is with \uparrow it can be cured by medicine. If the \uparrow is with \uparrow it will cure itself. If the Benefics be cadent or occidental, and the malefics oriental, the disorder will be incurable. Other influences causing Lunacy are δ in evil asp. the \uparrow at the Full, or η at a change in \uparrow or \uparrow ; δ afflicting the \uparrow and \uparrow , and the \uparrow in \square or δ \uparrow , causes violent lunacy. Epilepsy and Insanity are very closely associated. (See Epilepsy, Insanity). Case—Child Born of a Mad Mother In a Lunatic Asylum—See "Mad Mother", No. 074; "Obsession", No. 130, in 1001 N.N.

Magnetism is strongly allied with Electricity, and ruled by \mathbb{H} . (See Electric, Electricity; "Native Country" under Native). Terrestrial Magnetism is ruled by \mathbb{H} . (See "Operations" under Nature; Uranus). In disease the magnetic influences are stronger at night due to the \mathcal{D} influences, and hence diseases are usually more raging at night, and espec. with acute fevers. (See "Diseases" under Night). During the daytime the electric forces of the \odot tends to diminish the fevers, and ease the disease. Also \mathcal{H} is cold and magnetic. (See Saturn).

Major Planets—Superior Planets— Ψ , \mathbb{H} , \mathcal{H} , \mathcal{H} and δ . Diseases ruled by these planets are of greater consequence, and more severe in their effects, and espec. when they also hold the dominion of death. (See Severe). The diseases of \mathcal{H} and \mathcal{H} , the minor planets, are less serious unless they hold power at B., hold the dominion of death, or greatly afflict the hyleg both at birth and by direction. (See Perihelion).

Major Subluxations—Of the Vertebrae—(See Subluxations, Vertebrae).

MAJORITY—Majorities of the Planets In a Nativity, and Their Effects—In the diagnosis, prognosis, and consideration of disease, the majorities of the planets in Signs, Houses, Rising, Setting, Elevated or Below the Horizon, Retrograde, etc., should be taken into account. Many planets, or a Stellium, in one sign or house, tend to greater afflictions of the parts of the body ruled by such sign and house. The majority of the planets in the positive signs gives greater will-power, and the ability to overcome disease, obstacles and the limitations of life. (See Positive, Negative). The \odot , and a majority of the planets rising at B. usually give greater vitality and resistance to disease, while a majority setting at B. tend to weaken the physical powers, and give less power to overcome obstacles and make life come your way, as the planets when setting are weaker, and deprived of much of their power, unless greatly dignified by sign, house, and aspect. The majority of planets in fiery signs tend to increased vitality, whereas a majority below the Earth at B. tend to weaken the constitution, and espec. when the majority is in the 6th H., and below the western horizon at B. A study along these lines will help you in judging the map along the lines of health and disease, and to better analyze the case. Life also tends to be longer when the majority of the plan-

ets are rising and elevated, and in fiery signs, regardless of many other evil influences of the map. (See "Signs" under Air, Cardinal, Earth, Fire, Fixed, Mutable, Water; Cure, Diagnosis, Elevated, Life, Prognosis, Recuperation, Resistance, Rising, Setting, Stellium, Vitality, Will, etc.).

MALEFICS—The Malefics—The Infortunes—♁, ♀, ♃, and ♄ are called the malefic planets. Also ♁ (Cauda) is considered malefic, and of the nature of ♃. Saturn tends to give excess of cold in the system, and ♄ excess of heat, and are malevolent in this regard, and espec. in health matters. However, ♃ is said to exert a good influence by his favorable aspects, but is very evil by his adverse aspects, and tends to afflict any sign he is in at B., or after by dir. or tr., and to afflict the part of the body ruled by such sign. The places occupied by the malefics at B. are always considered points of affliction, or weakness, in the body, or in the mind if a mental sign is so occupied; or the mental rulers afflicted by malefics. The signs and houses occupied by the malefics at B. indicate the weak parts of the constitution. The malefics afflict by their ♄,

P, □, and 8 aspects, but their good aspects, as the * and Δ, tend to assist in health matters for the time, and to give more peace of mind. The more angular, oriental, or elevated a malefic may be at B., or elevated above the ☉, ☽, or benefics, the more evil are their effects, and to make disease more tenacious, severe, or incurable. A malefic elevated above the Lights denotes misfortune, sickness, or death, and when Anareta tends to a violent death if the map is a violent one. Any of the malefic planets may become the Anareta, or the killing planet. These matters, and the nature of the influence of each of the malefics, is discussed under these planets. The malefics are stronger when in the positive, or Solar Horas of the Signs. (See Horas). In Perigee or Zodiacal Parallel ♃ lessens the evil of a malefic, but ♃ when in ☉ ♃ or ☽ increases their evil when of the same, or near Latitude, but less so when of widely different Latitude. (See Anareta, Angles, Benefics, Elevated, Evils, Incurable, Malevolent, Malignant, Mars, Neptune, Oriental, Saturn, Severe, Uranus, etc.).

MALEVOLENT—Evil—An Evil Disposition Toward Others—Malicious—The ☉ or ☽ Significators in □ or 8 ♃; the ☽ afflicted in ♀; the ☽ in ♀ and affl. by ♃ or ☽; the ☽ Sig. in ♀; the ☽ or ☽ Significators □ or 8 ☽; the Full ☽ sepr. from ☽ and applying to ☽ in a nocturnal geniture; ♃ as Sig. denotes a malicious person; the influence of ♃ strong at B.; ♃ Sig. □ or 8 ☽; caused by the evil aspects of ♃; ♃ ☽ or ill-asp. ☽, and espec. in angles; in Hor'y Q. ♃ Sig. in ☽ or ☽; ☽ in evil aspect to ♃; ☽ Sig. □ or 8 ♃. (See Cruel, Evil, Malice, "Mean-Spirited" under Mean; Mischief, Revengeful, Treachery, Vicious).

MALFORMATIONS—An Abnormal Shape or Structure—Deformities—Irregularities In Form, Whether Congenital or Acquired—

Acquired Malformations—Some malformations are acquired after birth, and may be the result of disease and various afflictions. They may be caused by the hindrances, retentions, excess deposits, stoppages, and suppressions of the ♃ afflictions. Also ☽ can cause them by an accident, violence, or an excess of heat to a part, as in Ankylosis, the melting of a part, and result in a deformity and abnormality in shape. This subject is largely dealt with in the Articles on Deformities, and also listed under Saturn Diseases, Mars Diseases, etc. The planet ♃ also causes malformations thru wasting of the tissues. (See the Diseases listed under Neptune, Wasting). The following is a list of some of the Acquired Malformations, and abnormalities of shape, due to conditions arising after birth. See these subjects in the alphabetical arrangement—Ankylosis (see Ankylosis, Joints); Atrophy; Contractions; Fractures (the result of); Gout (from Mineral Deposits); Kidney (Floating); Joints (Ankylosis, and Enlarged Joints); Lameness; Paralysis; Rheumatism (from Deposits of Min-

erals, Wastes, Urea); Rickets; Swellings; Twistings; Wastings; Wry Neck (see Neck), etc. For subjects not listed here, look in the alphabetical arrangement for the subject you have in mind.

Congenital Malformations—And Deformities—If malformations exist at B. they are caused by prenatal conditions and afflictions during the period of gestation, and the prenatal map for the time of conception, and for each month during pregnancy, should be studied to trace the causes of malformations which exist at B. The following are some of the influences which have been observed to exist at B. in congenital malformations—the ☉ or ☽ in 8, ☽ a malefic; the ☉ 8 ☽ in angles, and □ ♃ or ☽, with no help from benefics, with benefics in a weak sign, or below the Western Horizon at B.; ♃ □ ♃; ☽ ☽ or ill-asp. ♃ at B., and espec. in angles, and affl. the ☉, ☽, Asc. or hyleg. Congenital Malformations are legion, and too numerous to mention and list here in this Article, but you will find them in the alphabetical arrangement. Consult the Articles which deal with the parts and organs of the body, and the defects, malformations, and irregularities of such parts, or organs, will be found listed in such Articles, and giving both the congenital and acquired malformations. Also see the Articles on Deformities, Extremities, Limbs, Members, Organs, Parts. The following are some of the more prominent congenital malformations, and also the more obscure ones, and which are listed here that they may not be overlooked. See the following subjects in the alphabetical arrangement—Abdomen (Prominent, Rickets); Abnormalities; Arms (Forearm Missing); Barrenness; Beastly Form (see Beasts); Birth (Born Blind, Deaf, Dumb—Paralyzed from Birth—See the paragraphs under Birth); Blind from Birth (see Birth, Blindness); Breastbone (Pigeon-Breasted); Chest (Hollow); Cloaca; Club Feet (see Feet); Conception; Crooked Body (see Crooked); Congenital; Contortions; Contractions; Crippled; Cyclops; Deafness—Deaf and Dumb—(see Dumb, Hearing); Defects; Deformities; Diminished; Distortions; Dogs—Resembles Dogs—(see "Dogs" under Children); Dwarfed; Enlargements; Eunuchs; Excrescences; Extremities; Eyes—Born Blind—Crossed Eyes—(see Eyes); Feet (Club Feet); Foetus; Forearms (Missing); Frog Child (see Forearm); Generative System; Genitals; Gestation; Growth; Harelip (see Lips); Hearing (Deaf and Dumb); Heart (see "Partition", "Right Side", under Heart); Hermaphrodites; Humpback (see Spine); Hydrocephalus; Idiocy; Ill-Formed; Incomplete; Inhuman; Limbs; Maimed; Members; Misshaped; Monsters; Mutes; Organs; Paralysis—From Birth (see Distortions, Excrescences); Parts; Prenatal Epoch; Rectum (see Cloaca); Sex Organs (see Hermaphrodites, Virile); Siamese Twins (see "United" under Twins); Undersized; Undeveloped; Urethra; Virile, Void Of, etc. For a better un-

derstanding of the prenatal conditions which tend to congenital malformations, the student should make a thorough study of the book, "The Prenatal Epoch", by Mr. E. H. Bailey, Editor of the British Journal of Astrology, at 10 and 11 Red Lion Court, Fleet St., London, E.C.4, England. (See the Article on Prenatal Epoch in this book).

MAP—The Star Map of Birth—The Nativity—Geniture—The Radix—Chart of Birth—The Figure of the Heavens for the actual Moment of Birth, at the time of the first cry, when the magnetism of the Universe is breathed into the lungs, shows the stamp which is put upon the native, and the tendencies of temperament he will be apt to follow during his lifetime, the rate of his vibrations, etc. This figure is like a flashlight picture, and the native is really a miniature picture, or photograph, of the Universe for that moment, and as seen from the place of birth, and he will partake of the vibrations, forces, and influences that were operating in the Universe, and the Planetary forces that were reflected and focussed to the place of birth. In Astrology, the moment the child is ushered into the world, or when the cord is cut, are not considered a basis for the map of birth, but the time is taken for the first cry, or breath, when the vibrations of the Universe are in-drawn and stamped upon the native. Thus, by a study of the Map of Birth, and the Signs, Houses, and Aspects of the Planets at birth, forecasts can be made about the Health, the Mind, the Diseases liable to, the Temperament, Prospect of Life, the Degree of the Vi-tality, the best Location for Health, the Shape of the Body, the Physical Constitution, the Complexion, the Fi-nancial Prospects, the Business Suit-ability, whether Positive or Negative, a Leader or Follower, the Religious

Propensities, about Friends, Enemies, Marriage, Love Affairs, Travel, Resi-dence, etc., and about every subject that is vital to human life, and in the affairs, fate, destiny, character, suc-cess or failure, good health or ill-health of the native, etc. This map, hqwever, does not necessarily show the inner, or real character, but only tendencies, the environment and pos-sible contacts with the outer world, the problems to be worked out during the present life. The real character, the Ego, the Spirit, its nature, present stage of Evolution, etc., are better shown and indicated by the Map for the time of Conception, known as the Prenatal Epoch Map, for such map in-dicates the nature of the incoming Ego, its past, and also much of the fate that is overhanging the native, the causes and effects, the sowing and reaping, the difficulties of life and tem-perament that must be overcome if the native would advance, and not stand still, or fall behind, or become a straggler in the Universe. Every stu-dent should make a deep study of As-trology, the Secret and Esoteric Doc-trines, that he may the better under-stand the plan of life, destiny, why you are here, where you came from, and where you go from here, and these matters are well discussed in the vari-ous textbooks and writings of the Occ-ult and Metaphysical Societies of the World, and also in various Religious Organizations. The Map of Birth is said to reveal the secrets of the Soul, and if you do not want these to be known, and your true nature revealed, your weaknesses, as well as your strong points, do not give your birth data to a qualified Astrologer. Every student should make a thorough study of the mathematics of star map work, and be able to erect a map for any time and place on Earth. To learn to make Star Maps, purchase the book, "Casting the Horoscope" by Alan Leo. This book can be purchased from Occ-ult Book Centers, or direct from the "Modern Astrology" Office at 42 Im-perial Buildings, Ludgate Circus, Lon-don, E. C. 4, England. This Office also sends out a very reliable Correspond-ence Course of Lessons in Star Map Work, and on Esoteric Astrology, and the writer of this Encyclopaedia took this Course many years ago, and got a good start in Map and Horoscope work. Other Lesson Courses in Star Map work, and Astrology in general, are sent out by "The Church of Light", (formerly "The Brotherhood of Light"), at 818 Union League Bldg., Los An-geles, Calif. Also a Lesson Course is sent out by the Llewellyn College of Astrology, at 8921 National Blvd., Los Angeles. The A. F. Seward & Co., As-trological Publishers and Book Dealers, 3620 Rokeby St., Chicago, Illinois, also send out a Lesson Course in As-trology, and Star Map work. The practicing student also needs a set of Raphael's Ephemeris for the years from 1860 to the present time, so as to have the Planetary Tables at hand to look up the planetary influences at birth among his clients and friends, and from which to make Star Maps of

Birth. The student also needs Dalton's Tables of Houses, to get the Signs and Degrees of the Zodiac on the cusps of the Houses for the various degrees of Latitude over the Earth, and at the birthplaces of people born in the different Nations and Countries of the World, and at any hour of the day or night, whether in the Northern or Southern Hemispheres. With this equipment, and a thorough knowledge of the Elements of Astrology, Physicians and Healers should be able to become very proficient in Medical Astrology, Diagnosis, Prognosis, etc.

(See Disgrace; "Females" under Fever, Imprudent; Ruin; "Death by Soldiers" under Soldiers; "Death" under Violent; "Death by Wild Beasts" under Wild). The δ when directed to Markab by good aspect is said to give good health. (See "Good Health" under Health).

MARKS—Marked—Marks of—Personal Marks On the Body—Blemishes—Moles—Scars, etc.—Marks, Moles, or some kind of a Blemish, usually are found on those parts of the body ruled by the Signs or Houses containing Planets at B., and especially on the parts ruled by the Asc., Midheaven, or 6th H. Marks may occur on any part of the body, and under the different parts, as Head, Face, Arms, Legs, etc., look for "Blemishes", "Marks", "Moles",

"Scars", etc., under these parts, or any part you may have in mind. The influences of the two malefic planets η and ϕ are largely responsible for Marks, Scars, or Blemishes other than Moles, while the \odot influence away from ϕ , and not afflicted by ϕ , tends to Moles. Marks tend to be Moles when the part is not afflicted by ϕ . The malefics indicate Marks according to their positions. The part ruled by the sign ascending is also subject to Marks, Moles, or a Scar, and also on the part ruled by the sign containing the lord of the Asc., lord of the 6th H., or on the part ruled by the sign on cusp of the 6th. The sign or planet signifying the Mark, when much afflicted, makes the Mark more eminent, obvious, conspicuous, and prominent. The color of Marks is largely determined by the Planets, and the color given by each planet. Thus the \odot gives a chestnut or olive mark; the δ one of a whitish hue, or partly of the color of the planets she aspects; η gives a dark, black, or obscure mark; γ a purple of bluish mark; ϕ a red mark, a red mole, or a red birthmark, and a blemish of a reddish color; η gives a yellow or yellowish mark; ϕ one of a pale or lead color. The Mark is on the right side of the body if the sign or planet are masculine, and on the left side if the sign or planet are feminine. If the Significators of the Mark or Mole be above the Earth, or horizon, the Mark is on the forepart of the body, and visible. If the planet be below the horizon, the Mark is inside and invisible, or on the hinder part of the body. The Marks are on the upper, middle, or lower parts of the part ruled, according to whether the first, middle, or last part of a sign ascend, or a planet be in the first, middle, or last part of a sign. (See Left, Lower, Middle, Right, Upper). Saturn in ϕ ϕ in any sign or house tends especially to a mark on the part ruled by such sign or house. Thus η ϕ ϕ in η , or in the 1st H., a mark on the head or face; η ϕ ϕ in δ or the 2nd H., a mark on the neck, etc. For further examples of the location of Marks or Moles see "Location" under Moles. Peculiar personal Marks are due to the rising of η or ϕ . The subject of Marks, Moles and Scars, etc., and their location, kind, color, description, etc., is dealt with very extensively in the books on Horary Astrology, which books are listed in the Article on "Horary Questions" in this book. (See Colors, Horary). The following subjects have to do with Marks, their location, description, causes, etc., which subjects see in the alphabetical arrangement when not considered here.

MARS—The Red Planet, and known as "The God of War". In size ♂ is smaller than the Earth. Mars is, perhaps, the most written about Planet in Astrological Literature, and has more to do with human ills than any other planet, and creates more disturbances in human affairs by his afflictions than any other planet. However, ♂ has a good and powerful influence also, and along with the O is constructive, gives energy, heat, and force to the body, as well as courage and stimulus to the mind. For convenience of reference this Article is arranged in three Sections. Section One, about the General Influences of Mars; Section Two, what Mars Rules, and Section Three, the Diseases and Afflictions of Mars.

— SECTION ONE —

GENERAL INFLUENCES OF MARS—Mars is known as "The Lesser Infortune", and h as "The Greater Infortune", and both are considered as malefic planets, and especially by their afflictions. The action of ♂ is more acute and violent, while that of h is more slow and chronic. The following paragraphs, arranged alphabetically, give briefly the various influences of Mars. For his special Qualities see the paragraph "Qualities" in this section.

Action of Mars—The action of ♂ is inflammatory, hot, dry and barren, and corresponds to pungent odors, burning astringents and hot acids. The action of ♂ is centrifugal, from the center out, tending to redden the surface, cause congestions of the surface of the body, being rubefacient in action, and is not circumferential in circles like the O , but a violent expulsion

along the lines of the radii. Mars is rubefacient, inflaming, and reddening, and brings the blood to the surface. (See Caustic, Centrifugal, Rubefacient). The plus, or tonic action of σ , tends to exaggerated action. Mars is an energetic, dynamic, positive, inflammatory, acute, excessive, destructive, constructive by bringing fevers to burn up poisons in the system, is generally an antagonistic influence, and one of the most potent forces among the planets. Mars occidental causes dryness only, and when oriental both heat and dryness. Mars is sudden and intense, while η is slow, tardy, and restrained. Together η and σ act as heat and cold, acute and chronic. Mars influence may be compared to a fever, very severe for a time, but not lasting. The basic forms of σ action are inflammatory, intensive, poignant, and centrifugal. Mars accelerates and intensifies, and tends to hurts or illnesses by excesses. Mars tends to action, and to make people assertive, and to do and say what they think and believe, and he never makes hypocrites as η does. (See "Planets" under Tonic. Also for the various actions of σ see the different paragraphs in this Article).

Afflicted—An afflicted σ tends to cause excess of heat, eruptions, fevers, inflammations, excessive action, and violence.

Anareta— σ may become the Anareta, or the Killing Planet. (See Anareta).

Angel of Mars—Samael.

Aries Sign—Ruled by σ , and also μ is the night sign of σ . (See Aries, Scorpio). Mars is strong in φ , μ , ψ . He has his exaltation in ψ and his fall in Ξ .

Author of Strife— σ is the author of strife, quarrels, and contentions, as well as of War.

Blood—Takes Part In Blood Making—Draws Blood To the Surface—(See Centrifugal, Haematopoiesis, Haemoglobin, Iron).

Burns Up Impurities—By Fevers and Inflammation—(See Constructive, Fever, Inflammation).

Causes— σ causes hot diseases, such as Measles, Smallpox, Scarlatina, Fevers, Erysipelas, Inflammations, Typhus Fever, Eruptive Diseases, etc. The \odot or J joined with σ at B. cause the same diseases as if σ were in the Asc. (See the Diseases of σ in Sec. 3 of this Article).

Centrifugal Action—(See "Action" in this section).

Classification Of— σ is classified as positive, masculine, electric, hot, dry, fiery, barren, inflammatory, heating, active, forceful, accelerating, intensifying, etc. (See "Qualities", and the various paragraphs in this Article).

Cleansing— σ cleanses the system by bringing fevers to burn up the excess of poisons and wastes. (See Constructive, Fever, Inflammation).

Color— σ is known as the "Red Planet", and rules red as a color. Also σ rules red in the Solar Spectrum. (See Red). Mars produces a fiery red

color, the result of intemperate heat and dryness. Also σ rules Iron color, and rules Iron, Steel, etc. (See Color, Iron).

Constructive—The σ force is very useful and constructive when properly harnessed and controlled, but destructive when allowed to run wild in our natures. Mars is pathologically constructive by bringing inflammation and rapid fevers to burn up and eliminate the wastes and poisons from the system. (See "Cleansing" in this section).

Day—The Influence of Mars In a Day Nativity—(See Day, Night; "Day" in Sec. 3 of this Article).

Denotes— σ denotes high blood pressure, sharp pains, rapid fevers, external and internal hemorrhages, heat, inflammation, swellings, sores, ruptures, effusion of blood, etc. Mars denotes, or shows death by fevers, burns, injuries, violence, etc. (See "Death" in Sec. 3 of this Article).

Destructive—The σ influence, and especially his afflictions, are very destructive and pernicious over the average person who is drifting in life, and uncontrolled, and leads to much strife, to quarrels, contentions, bloodshed, etc. His influence is also constructive in many ways, by making blood, haemoglobin, cleansing the body, and by giving daring, courage, and fortitude to meet the battles of life. (See Action, Cleansing, Constructive, Pernicious, in this section).

Directions of Mars—The Directions of σ are more dangerous during the σ Period of Life, from the 42nd to 56th years, a 14-year period. (See Directions, Periods).

Diseases Of—(See Sec. 3 of this Article; "Denotes" in this section).

Houses of Mars—The 1st and 8th Houses are especially affiliated with ♂, which houses correspond to the ♀ and ♀ signs, the signs ruled by ♂, and ♂ when in these houses is very strong and powerful in health matters, disease, accidents, hurts, etc., according to his aspects, or the afflictions to ♂ at B., and by dir. The house and sign occupied by ♂ at B. are centers of activity, energy, and augmentation. (See Eighth House, First House).

Indicates—♂ afflicted indicates involuntary muscular action. (See Afflicted, Tends To, and the various paragraphs in this section).

Influence of Mars—This subject is covered largely by the various paragraphs in this Article. Note especially the adjectives under "Qualities" in this section. Mars is dynamic energy, which is said to be the most salient characteristic of ♂. Mars by reflecting the Solar Forces gives dynamic power, but the dynamic energy of ♂, unless directed and controlled, tends to palpitation, to accelerated motion, and to tear everything into pieces. Mars tends to give an active, hasty, and intensive life, and is just the opposite of the ♀ influence, which tends to delays, hindrances, decay, defects, denuding, stoppages, and to slow down the powers and forces of the native by his afflictions. Mars gives some of our worst faults, as well as some of our best virtues, for without his influences at B. we would tend to be cowards, very timid, weaklings, without courage, bravery, and resolution. (See Action, Constructive, Destructive, Qualities, Zest, and the various paragraphs in this Article).

King Of—(See "Emotional Nature" in this section).

Lesser Infortune—♂ is the Lesser Infortune, and ♀ is called the Greater Infortune, but some Authorities think and say that ♂ should be called the Greater Infortune, for his damage and destructive powers are almost without parallel when he is afflicting the native, and especially in a violent map. (See Action, Destructive, in this section; Malefics).

Life—♂ being the planet of action stirs life into action. The ☉ and ♂ are friendly, and both play their part in giving life, blood, vital force and energy to the system, and also courage, daring, and fortitude to the mind. (See "Fires of Life" under Life).

Malefics—The Malefic Planets are ♃, ♀, ♂. (See Malefics).

The pathological action of ♂ is both constructive and destructive. (See Constructive, Destructive, Tonic, in this section).

The diseases of ♂ are relieved by the remedies of ♃. Mars is hot and ♃ is cold. Mars is centrifugal, working from the center out, driving blood to the surface, while ♃ is centripetal, chilling the surface, and driving the blood inwards, causing internal congestions. (See "Action", and the various paragraphs in this Article; Saturn).

Strong—♂ is strong in ♁, ♃, ♃, and in the Asc. or 10th H. (See "Aries Sign" in this section).

Sun and Mars—These two bodies are sympathetic in nature, both fiery, life-giving, constructive. Mars aids the ☉ in maintaining life, and by bringing fevers and inflammations to burn the refuse and impurities out of the system. In this way ♂ has a constructive influence over the body. Mars transmutes the Solar Forces into passion, anger, and animal spirits, and is ever a dangerous and consuming fire unless controlled by the Will, the Reason, and by Spiritual Attainment. Mars working with the ☉ tends to aggravate and accentuate the ☉ diseases. The aspects of ♂ to the ☉ are necessary to give zest to life, and his bad aspects are better than none at all. (See Sun).

— SECTION THREE —

MARS DISEASES AND AFFLICTIONS—Here are a few general considerations concerning the action of ♂ in disease, health matters, and his efforts to vitalize, cleanse, and restore the balance to the system. The ☉ and ♂ act together in sympathy in disease, and the diseases of the ☉ are accentuated by ♂. The ☉ joined with ♂ causes the same diseases as when ♂ is in the Asc. The fevers and inflammations caused by ♂ are of a more destructive, quick, burning, and contagious type, while those produced by the ☉ are slower, but severe. Mars by his fevers and inflammations burns up the impurities of the system, and in this regard is constructive. Mars is rube-facient, caustic, centrifugal, and draws or drives the blood to the surface. Mars causes hot diseases, such as Measles, Smallpox, Scarlet Fever, Fevers, Inflammations, Erysipelas, Typhus Fever, etc. Mars is less malignant at night, as his heat is moderated by the moisture of the night. An afflicted ♂ tends to cause heat, eruptions, and excessive action. Also ♂ afflictions indicate involuntary muscular action. Mars diseases tend to be relieved when the Prog. ♃ forms a good aspect to ♀. Mars focusses heat, and draws an abundance of blood to the part ruled by the sign he is in. Mars exerts a quick, hot, positive, electric, heating, and infectious nature. The plus, or tonic action of ♂, tends to exaggerated action of the mind and body. For the Pathological Action of ♂, his Therapeutic Properties, and Typical Drugs of, Remedies of, see these paragraphs in Sec. 1 of this Article. Saturn or ♂ in 8, and espec. when in the 12th H., and affl. the ☉, ♃, or ♀ tend to Mastoid Abscess. Also afflictions in ♀ or ♁ may cause the trouble, and the extension of Ear Abscess over into the Mastoid Process. The right or left Mastoid Processes are affected according to sex, and whether ♃ or ♂ are the afflictors. Also this trouble is sometimes caused by the Prog. ♃ in ♂ with planets in the radical map, and espec. if in ♂ with ♃, ♂, ♀, or ♃ in this sign. (See Abscesses, Left Ear, Right Ear, under Ears). Case of Mastoiditis—See Fig. 7B in the book, "Astro-Diagnosis" by the Heindels.

MATERIA MEDICA—The Branch of Medical Science Treating of Drugs—Many Drugs, Herbs, Plants, Metals, and Minerals are listed alphabetically in this book, and giving their Planetary Rulership, Action, Therapeutic Value, etc. Look in the alphabetical arrangement for the subject you have in mind. Also under each of the Planets see such subjects as "Drugs", "Herbs", "Metal", "Remedies", "Therapeutic Qualities", "Typical Drugs", "Treatment", "Pathological Qualities", etc. Also see the general subjects of Antipathy, Cure, Drugs, Healers,

MATERIALISM—A ♃ influence; ♃ strong at B., ruler, or in the Asc.; ♃ in the 9th H., the house of the Higher Mind and Religion; many planets in earthy signs at B.; earthy signs on the Angles. People born with many planets in the earthy signs tend to be more earth-bound, materialistic, and to have a more slow, plodding, and laborious career, and also to be more given to Melancholy, Despondency, Hypochondria, Mental Depression and Dejection, and to have a greater desire for wealth and the things of this World, and to the possible neglect of their spiritual welfare. Brooding over worldly matters may tend to ill-health, and to weaken the vitality. The negative earth sign people, as 8, ♀, ♃, tend to Materialism, and to diseases, such as Gout, Rheumatism, Crystallization, Hardening, Suppression of the Functions, Excess Deposit of Wastes and Poisons in the system, which are ♃ diseases, and these diseases usually go with a Materialistic Mind, as the mind is turned downward toward the Earth, and earthly things, in most cases, rather than upward toward the higher and more spiritual Truths, and the Secret Doctrines and Mysteries. The good aspects of, and the higher influences of the planets ♃ and H., tend to uplift the native, and away from Materialism. (See Metaphysical, Neptune, Occult, Rationalism, Saturn, Scepticism, Spirituality, Uranus).

MATERNITY—Maternal—Pertaining to the Mother and Motherhood—In these matters the positions and aspects of the ♃ and ♀ are to be considered. The supreme function of maternity depends almost wholly upon the positions and affections of the ♃ and ♀, and the conditions of these two bodies in the horoscope of the mother. The wife may be fruitful, and have a fruitful map of birth, yet may not become a mother unless she also has a fruitful husband, as many men are impotent and sterile from birth. Therefore, if a prospective bride wishes to make sure that she is fruitful, and will have children, she also should know beforehand that her intended husband has a fruitful map, or she may make a mistake, and be sorely disappointed. Also there are women who are fruitful, but who have the malefics ♃ and ♂ in the 5th H., the house of children in their maps, which would indicate unfortunate children, or their early death, and it would be well for a woman to know of these things before she marries, so as to know what to expect, what to prepare for, and how to the better understand her children, and early take them in hand, and give them the proper care and training. Some women, while fruitful, tend to be unfortunate as to children, and make very undesirable mothers.

Aunts and Uncles—Maternal Aunts, Uncles, and Relatives—The mother's relations are ruled by ♀ in your map, and the aspects to, or by ♂, and the position and strength of ♀ at your birth will determine your relation largely to your relatives on your mother's side, and also their condition, illnesses, or possible death. Aunts and Uncles on the mother's side are also ruled by the 6th H. in a male nativity, or on the father's side in a female geniture. The 12th H. rules the opposite conditions. (See Aunts, Brethren; "Aunts", "Relatives", under Father; Relatives, Uncles).

Death of Maternal Relatives—Death of Maternal Aunts and Uncles—Suffering and Illness of— $\frac{1}{2}$ ruler of the 12th H. at B., and $\frac{1}{2}$ ♂ or ill-asp. the Asc. by dir. (See "Death" under Relations; Sixth House, Twelfth House).

Functional Trouble—In Maternity—The ♃ in the 5th or 6th H. at B., and afflicted; ♀ afflicted in the 6th H. (See Functions).

Instincts—Maternal Instincts—These are strong when the ♃ sign, or the 5th H. are well and favorably occupied and aspected at B. Mars in the 5th H., and well-aspecting the ♃, gives a strong desire for children, but danger of accidents and sickness to them. The maternal instincts are lessened when ♃, H, or $\frac{1}{2}$ occupy the 5th H. at B., and also many planets in the positive and masculine signs at B. (See the influences under "Amativeness", which give a strong desire for children, and to propagate the Race. Also see Barren, Fruitfulness, Instincts).

Maternal Place—In the Map of Birth—The place of ♀ by day, or the ♃ by night, in the map of the mother. (See Conception, Family, Foetus, Moon, Mother, Parturition, Paternal, Pregnancy, Prenatal Epoch, Puerperal, Venus, Wife, etc.).

Maternal Relatives—(See "Aunts and Uncles" in this section).

MATHEMATICAL—A Good Mathematician—Mathematical Prodigy—Lightning Calculator—The 8 sign is said to give good mathematical ability. Also ♂ is associated with ♀, either by ♂ or ♀. The □, P., or any aspect of ♂ to ♀, tends to make the mind more keen for mathematics. In Hor'y Q. ♂ Sig. ♂ ♀, or in * or △ ♀, indicate a good mathematician. Mars and ♀ in angles, in aspect, or in houses of mind, the 3rd or 9th H. Some of the greatest Mathematical Geniuses, Lightning Calculators, Chess Players, Mechanical Geniuses, Inventors, etc., and even as Child Prodiges, have ♂ or ♀ in the 3rd or 9th H., and also with H lending a good and strong aspect to ♀. Neptune also in good asp. to ♀ at the same time gives a higher, intuitional, inspirational, and spiritual trend to the mind, and capable of great mental and spiritual feats. The greatest Mathematicians are usually Advanced Souls. It is said also that high attainments and gifts in mathematics are indications of a genuine and highly developed spiritual nature, but not necessarily an emotional nature, or relig-

ious fervor, which may be mistaken for spiritual power. (See Freaks, Genius; "Great Ability" under Great; Learning, Mechanical; "Quicken'd" under Mentality; Precocious, Premature, Prodiges, Scientific, Spiritual).

MATRICIDE—(See "Patricide" under Father).

MATRIX—The Womb—(See Womb).

MATTER—Substance—Material Things—The ♃ is typical of Matter, and the ☉ of Spirit. Matter is condensed Ether, or condensation of the etheric and gaseous particles which float in the Ether. During the great Cosmic Nights of the Universe all Matter, Planets, and Bodies in space, are dissolved back into their etheric and gaseous state. It is said that "Matter is Condensed Spirit". No matter is ever lost in the Universe, but merely changes form. The influence of $\frac{1}{2}$ tends to decay, or resolution of matter into its primary elements and gases, and to bring on the "Death", or separation, of living cells and organisms, such as the human organism. A corpse is much alive as the cells become disorganized, their leader, master, and organizer, the Ego, having departed, and each cell struggles for its freedom that it may enter into other organized forms and combinations. (See Ether, Spirit, Substance).

MATURE—Maturation—Maturity—Ripening—Is typified by the full ♃. In the Kakala mature age was dedicated to ♃. (See "Full Moon" under Moon).

Dies Before Maturity—Will Not Live to Maturity—Rarely Lives to Maturity—The ☉ or ♃ in an angle at B., ♂, or ill-asp. a malefic, and with no good aspects from the Benefics; a malefic rising and afflicting the lord of the 8th H.; ruler of the Asc. in the 6th H., and afflicted by lord of the 8th H. and with no assistance from Benefics. For other influences along this line see "Death" under Childhood, Children, Infancy; "Early Death" under Early; "Short Life" under Life; "Dies Before Middle Life" under Middle Life; "Death In Youth", "Early Youth", under Youth).

(See Adults; "Good" under Constitution, Health, Recuperation, Resistance, Stamina, Tone, Vitality; Immunity; "Long Life" under Life; "Death" under Middle Life).

Mean Actions—Hating All Sordid and Mean Actions— $\frac{1}{4}$ in the Asc. at B., and free from the affliction of malefics. (See Honest, Honorable, Humane; "Popular" under Reputation). For the influences which tend to a mean disposition and temper see Anger, Cruel, Hate, Revengeful; "High Temper" under Temper; Vicious, Violent; Mean-Spirited in this section.

Mean Creature— σ Sig. in Ξ , mean, servile, and unfortunate; δ Sig. in Ξ , a mean little wretch if δ is afflicted.

Mean-Spirited—Mean Disposition—The Δ Sig. \times , Δ , \square , or δ $\frac{1}{2}$, mean in actions; the Δ in $\frac{1}{4}$ partile asp. the Asc.; $\frac{1}{4}$ Sig. δ $\frac{1}{2}$, mean and deceitful disposition; persons devoid of σ influence at B.; δ Sig. δ $\frac{1}{2}$; η on the Meridian at B., and affl. by $\frac{1}{2}$. (See Anger, Choleric, Conduct, Cruel, Deceitful, Dishonest, Evil, Hatred, Jealous, Malevolent, Malice, Revengeful, Secretive, Savage; "High Temper" under Temper; Thieving, Vicious, Violent, etc.).

The δ , Ξ , and \times influences produce small persons, and of mean stature. The $\frac{1}{4}$ sign gives a short, slender, and ill-formed person, and often corpulent.

(See Corpulent, Fat, Fleshy; "Middle Stature" under Middle; "Moderate Stature" under Moderate; "Body" under Short).

These Epidemics occur when σ is perigee, and the major planets $\frac{1}{2}$ or $\frac{1}{4}$ in perihelion. MEAT—

Ill-Digested Meat—Illness From—The Δ in Ξ , δ , \square , or δ $\frac{1}{2}$ (or $\frac{1}{4}$ if he be of the nature of $\frac{1}{2}$) at the beginning of an illness or at decumbiture. (See "Meat" under Indigestion).

Meat Eating—One Astrological Authority advises that people who have σ in η at B. should avoid meat as food. Meat is somewhat heating, it is said, and does not agree very well with people born with many planets

in fiery signs. Also meat contains the passion, vibrations, and poisons of the animal, and with people badly afflicted by h at B, or born under h , tends to Gout and Rheumatism, excess of deposits and wastes, and would tend to have better health to live on nuts, vegetables, fruits, fruit juices, etc., and avoid meat. The question of Meat Eating is a large one, and many Authorities advise the eating of Meat, while others are against it. The Occult Writers in general seem to be against Meat Eating, and the killing of animals for food, and say that it is not right to take the life of animals. The Religions of the Orient are especially strong against taking the life of animals, birds, or even insects. Blood is strongly related to the Astral Plane, and the Occult Masters teach that the eating of the blood of animals tends to violent vibrations in the body, and to increase the passion, and also to incorporate the poisons and wastes of the flesh of the animal into the human body. Dr. Duz, the famous French Medical Astrologer, strongly advocated meat eating. The question of Meat Eating, both from an Occult and Physiological standpoint, and also Vegetarianism, are discussed in the book, "Cosmo-Conception", by Max Heindel, of the Rosicrucian Fellowship. (See Diet, Eating, Food, Fruit, Vegetables).

MEDICAL ASTROLOGY—The Branch of Astrology which has to do with the Planetary Causes of Disease, and also the Planetary Rulership of Herbs, Metals, Minerals, Plants, etc., and their Therapeutic value. In every Nation and Tribe there is a remedy, an Herb or Mineral, for the cure and alleviation of every disease known to such locality, and the Medicine Men of such communities generally know of such Remedies. Every Herb is governed by a Planet, but the highest efficacy of such herbs depends largely upon the time they are gathered, and under the right planetary influence. Medical Astrology deals with the Star Map of Birth from the health standpoint, showing tendencies, weaknesses, the parts of the body most afflicted from birth, the probable degree of vitality, and the times along thru life, under directions, progressions, transits, etc., when accidents, disease and ill-health

are apt to come in the life of the ordinary individual, and the time of the duration of such indisposition, when it may begin, and when it will end in the course of Nature, the quality and nature of the disease, and the planetary aspects be more favorable again for normal health, peace of mind, and freedom from worry and anxiety. In Ancient Times, all Physicians were required to be Medical Astrologers, and to know the Planetary Causes of Disease, and the Philosophy of Disease, before they were permitted to Practice upon, or Treat the Sick. This practice should be revived today, and the subject of Medical Astrology taught in every School of Healing, whether it be in Schools which teach the use of Drugs, or in the Drugless Healing Schools. The First National University of Naturopathy, and the Mecca College of Chiropractic, located at 143 Roseville Ave., Newark, N. J., under the able leadership of their Founder and President, Dr. Frederick W. Collins, A.M., M.D., have already established a Chair of Medical Astrology, and other Schools should speedily follow their example. It is my desire to spend the remaining years of my life visiting the various Schools of Healing over the World, to Lecture, and bring before the Faculties the value of Medical Astrology as an aid in Diagnosis and Prognosis, and to have them establish such study in their Curriculums. In my years of Practice as a Physician, I have, by the use of Astrology, been able to very quickly locate the seat of the disease, the cause of the trouble, the time when the patient began to feel uncomfortable, as based upon the birth data of the patient, and this without even touching or examining the patient, and my intense desire to get this knowledge and wisdom before students and Healers in a classified form, is the reason for this Encyclopaedia, as such knowledge is today in a rather scattered and unclassified condition, and not available for the student unless he spends years in going thru a large library of books on Astrology. When once you have discovered the cause of the disease, and understand its philosophy and the relation of the patient to the great Scheme of Nature, the matter of Treatment I leave to you, and according to the System and Methods you may be using. Read the Books, "Astro-Medicine" by Dr. Duz; "Daath's Medical Astrology"; "Elements of Astrology", by Dr. Broughton; "The Textbook of Astrology", by Dr. Pearce. These books are especially strong along the lines of Medical Astrology. Also, Mr. E. H. Bailey, the Editor of the British Journal of Astrology, has issued a course of brief lessons on Medical Astrology to send out as Mail Order Lessons. Also read the book, "The Prenatal Epoch", by Mr. Bailey, which deals with the Prenatal causes of disease, Congenital Defects, the time of Conception, etc. Medical Astrology is one of the very important Branches of Astrology, and should be carefully and scientifically studied by every student.

In this volume see Cure, Drugs, Healers, Herbs, Map, Medicines, Nativity, Prenatal Epoch, Prognosis, Remedies, Surgeons, Therapeutics, Treatment. Also under each of the Planets see "Drugs", "Pathological", "Remedies", "Therapeutic", "Treatment". "Typical Drugs", etc.

MEDICINES—Medicine—Drugs—Remedial Agents—Medicine As a Profession, etc.—Drugs have a local action on the body, and in order to be remedies must operate on the same organs the disease affects, as each organ has an affinity for a certain drug, whether it be a mineral or herb. (See Chap. V in Pearce's Textbook of Astrology). For a list of the Therapeutic Values of the different Medicines see the Article on Drugs. The names of the various Medicines and Remedies mentioned in this Encyclopaedia will not be listed or mentioned in this Article, and for such see the Articles on Herbs, Metals, Minerals, Poisons, etc., and also see the paragraph on "Typical Drugs" under each of the Planets. The names of drugs, and also their Therapeutic Qualities, are listed alphabetically in this book. Look in the alphabetical arrangement for the subject you have in mind.

Best Time to Take Medicine—When the ☽ is in ♀ or ♃, as these signs are moist and have strong absorbing powers; when the ☽ is on the place of ♃ or ♀ at decumbiture; when ♃ or ♀ are in the Asc.; in a ♀ or ♃ hour. (See "Hours" under Planets).

Care In Taking Medicine—The Star Map of Birth should be carefully studied before giving medicines, to know what organs are especially afflicted, and what dangers there are to combat in the use of drugs. Be careful what medicines are taken when the Asc. has come to the place of Cor Leo by direction, as they are more liable to disturb the heart action.

Cooling Medicines—♄ remedies. They should be taken when the Asc. comes to the place of The Ascelli, or Capricornus. Externally, Ice or Snow, ruled by ♄, may be used. (See Refrigerant).

Dealing In Medicines—♀ ruler of the Profession favors dealing in Medicines, Perfumes, Cordials, Wines, etc., and if ♄ gives testimony, to deal in poisons. (See "Make Good Chemists" under Chemists).

The medicines and their nature, and whether they are proper or not, are shown by the 5th H. and its lord. When the lord of the 8th is in the 6th H., there is danger of the Physician giving the native a wrong medicine by mistake. (See "Injured By" under Healers; "Sickness from Poisoning" under Poison).

When to Give Medicine—(See "Best Time" in this section).

When Not to Give Medicine—When the ☽ is passing thru a Ruminant Sign, thru a sign symbolic of an animal which chews the cud, as ♄, ♃, or ♄. Medicines taken in a ♄ hour tend to do more harm than good. Do not give when the 1st face of ♀ is on the Asc. Emetics are best given when the ☽ is passing thru a ruminant sign, as vomiting is more easily induced at such times. (For further study, see Antipathy; "Chemical Action" under Chemical; Compatability; "Cure of Disease" under Curable; Drugs, Emetics, Explosions; "Curable" under Fits; Incompatibility, Incurable, Moderation; "Medicines" under Obsessions; Opposites, Remedies, Roots, Ruminant, Sympathy, Treatment).

Treatment of Melancholy—Blue, the color of f , has a soothing effect upon a melancholic person, and to live and study in a room with blue colorings. (See Blue). The best way to prevent melancholy is to seek Truth, have an understanding of the Universe, its plan, about the Secret Mysteries, to Know Yourself, and how to rule and shape your destiny, and to find your true calling in life, and do your work. This entails study and research along Occult, Mystical, and Metaphysical lines. You must find the God in you, and discover your Higher Self, conquer your lower nature, strike at the source of the evil in your nature and tear it

out of your heart, and fight daily the battle against evil, depression, failure, and be optimistic. Advanced and enlightened Souls are not given to melancholia, but know how to conquer the conditions of their environment, rise above, and not be affected by them in an adverse manner. There are many Books, and Systems of Teaching, which will bring you this Light, and these you will find for yourself when you are ready for them. "When the Pupil is ready, the Teacher appears", is an Occult Maxim. Medicines and lines of physical treatment do not cure Melancholy, and if you do not relieve the cause, and get your Understanding broadened and enlightened, you will not make much progress. Keep your Personality, or Lower Mind, under control, and let your Ego, your Spirit, your Higher Mind, which is Divine, rule you. Know first your Star Map of Birth, your tendencies, your weak and strong points, and thus know what the plan of God over you is for the present life, then keep down the evils of your Map, let the good in you predominate, and do the work to which you have been called. (See Character, Destiny, Fate, Horoscope, Map, Nativity, Star Map).

MERCURY—The Planet Mercury—Hermes—Also known as "The Messenger of The Gods." This planet is the principal ruler of the Mind, and is known as the planet of Mind, Reason, Logic, etc. Also ♄ rules the Nerves and Nervous System in general. Mercury well placed and aspected at B. gives a good and well-balanced mind, but when weak and afflicted at B., and by dir., various disorders of the Mind and Reason develop, mental diseases and disturbances, shallowness of mind, poor reasoning powers, bad judgment, madness, insanity, epilepsy, nervous diseases, etc. Mercury is strongest at B. when found in the airy signs, as in ♀, ♁, and ♄, and is also strong in ♁. Mercury rules the two signs ♀ and ♁, and is said to be exalted in ♁ or ♄, to have his detriment in ♃, and fall in ♄. Mercury stirs the vocal cords into action, and rules the air which vibrates them. Also the vibrations which give Sight are originated by ♄. The aspects and position of ♄ sometimes express the Features. Mercury exerts a dry influence when masculine, and moisture when feminine, and is considered a variable, varying, or irregular planet, and partakes largely for the time of the planet, or planets, with which he is in aspect. When with ♃ he becomes like ♃ in influence, and tends to cause the same kind of diseases as does ♃, and so with each planet. Mercury is called the Hermaprodite planet, owing to his dual nature, as he may be either masculine or feminine, according to the nature of the planet with which he is aspected, or associated for the time, or his position. He is masculine when oriental of the ☉, and feminine when occidental. He is masculine when in a masculine sign, and feminine when in a feminine sign; is masculine when with a masculine planet, and feminine when with a feminine planet; is masculine or feminine according to the number of his aspects with masculine or feminine planets, and the sign he is in, or as he is ori, or occi.; is masculine or feminine, diurnal or nocturnal, good or evil in influence, lucky or unlucky, accord-

ing to the nature of the planets with which he is aspected. Mercury is considered as being ordinarily a cold planet, cold in influence, cold and dry when masculine, and cold and moist when feminine. He is considered a cold, dry, earthy, and melancholic planet, and is also nervous, impulsive, egotistical, malefic when with malefics, and benefic in influence when with the benefics. Mercury when well-aspected and dignified gives a strong mind and memory, active, and subtle. When afflicted he tends to cause overwork, sleeplessness, insomnia, restlessness, nervous diseases, and is indicative of a lack of spiritual calm. Also when afflicted, ill-dignified, or combust, he tends to produce a mean person, a liar, thief, gambler, swindler, etc. He may also be taken for the Anareta when strongly afflicted at B. He is considered by Max Heindel to be the lower octave of Ψ , and by most other Authors as the lower octave of H . For convenience of reference this Article is divided into three Sections, as follows: Section One, The Influence of Mercury; Section Two, Mercury Rules, and Section Three, The Diseases and Afflictions of Mercury.

Mer-

cury causes, and has relation to nervous and mental disorders which affect the nerve fibres of the various organs and parts of the body. Mercury brings danger of Consumptions, Madness, Fits, when badly afflicted, and according to the afflictions, and the signs from which it occurs. MIND—The Mind—Intellect—Reason—Understanding—The Mentality, etc.—The planet φ is the principal ruler of the Mind. The Mind is ruled by φ , the Δ and the Asc., and the relation between these three at B. largely determine the Mentality. The Δ , taken separately from φ and the Asc., has only partial rule over the Mind. The Hebrew letter Vau (V) is related to the φ sign, and is predominant in Mind and Hearing, and the transformation of Thought into Speech. Thus φ (Intellect), and δ (Speech) are closely related, and the organ of Coordination is located in δ . An afflicted φ tends to disturbances of the Mind, and to Brain and Nerve Disorders. The 3rd and 9th Houses also rule the Mind, and planets therein tend to show afflictions or benefits to the Mind. Mercury and the Δ are Significators of Mind, and any evil aspect between them tends to weaken and injure the Mind, and its expression. Uranus and φ are called the Mental Planets. This subject of Mind is also largely considered under the subjects of Intellect, Mental, Perception, Reason, and Understanding, in this book, and quite lengthy under "Mental" for convenience of reference, as so many of the references in the Textbooks of Astrology use the word "Mental" in giving the influences about the Mind. (See the various paragraphs under Mental). This Article is divided into two Sections: Section One, General Considerations About the Mind; Section Two, Diseases and Afflictions of the Mind.

— SECTION ONE —

GENERAL CONSIDERATIONS—

Divisions and Sub-Divisions of the Mind—Qualities—Manifestations and Expressions of the Mind, etc. See the following subjects in the alphabetical arrangement—

Abilities—(See "Abilities" under Mental).

Accomplished Mind—(See "Accomplished" under Manners).

Acquired Tendencies—(See Acquired).

Action of the Mind—Action of the Mind Upon the Body— φ , the ruler of the μ sign, the sign of health, and also the influences of the 6th H. at B., the house of health, and the house of φ , indicate the action of the mind upon the body, and especially as related to the causes and origins of disease, as the φ , μ , and 6th H. influences connect mind and body, and afflictions to these important centers in the radical map tend to physical disorders arising from a mental cause. (See "Mind" under Action; Mercury, Sixth House, Virgo; "Principle" under Vital).

Active Mind—Acute Mind—(See "Active Mind" under Active; "Mental Energy" under Energy; "Quickened" under Mentality).

Judging the Mind—To judge of the mind, consider the sign on the Asc., planets in the 1st H., or Asc., if any, and the aspects of planets to the Asc. The ♃ and ♄ are chiefly to be considered, and the aspects to them, their relation to each other and to the Asc. Also, before judging of the effect of any planet upon the ♃, ♄, or Asc., note how that planet itself is aspected and affected by other planets, as every planet acts upon every other planet by its aspects, except the ♃ and ♄, which are passive. Any planet in the 3rd or 9th H. has a powerful influence upon the mind for good or evil. Uranus and ♄ are termed the Mental Planets, and their aspects, positions, and influences tend to greatly determine the quality, state, and conditions of the mind. (See "Mental Faculties" under Faculties; "Good", "Weak", under Intellect; "Weaknesses" under Mental; Prenatal Epoch; "Quality", and the various paragraphs in this section).

MINERAL—Minerals—Mineral Salts—The Minerals of the body are connected with the Earthy Signs ♁, ♃, ♄. (See "Earth Signs" under Earth). The earthy minerals carried by the blood, which are used to form the bony structures, and also the concretions in soft tissues, are ruled by ♁ and the ♄ sign. Saturn rules the bones, and supplies the minerals to the bones, and an afflicted, weak, and ill-dignified ♁, will tend to weaken his action and influence in this regard, and to cause disorders of the bones. (See Bones).

Blood—The Mineral Salts of the Blood Deficient—The Prog. ♃ in ♃, ♂, ♁, or ♁ ♁ and other males; ♁ afflicted in ♃, thru the obstruction of intestinal digestion and assimilation, and indirectly denying the bones and muscles the necessary minerals for their strength, and often resulting in Rickets or Tetanus. (See Rickets; "Influence Of" under Saturn; Tetanus).

Deposits of Minerals—Excess Mineral Deposits Over the Body, Causing Disease—Caused by ♁ and his afflictions, and tend to such ailments as Stone, Calculus, Sand, Gravel, Gout, Rheumatism, Hardening of the Arteries, Deformities, Contortions, the Retention of Wastes, Suppression of the Functions, and the Retarding of Elimination and the Secretions. Leukocytes, ruled by ♁, form a nucleus for mineral deposits. (See these subjects just mentioned. Also see Chalk, Concretions, Crystallization, Deposits, Hardening, Hyperacidity, Impure, Leukocytes, Lime, Retention, Suppression, Tumors, Urea, Uric Acid, Wastes, etc.).

Mineral Waters—(See "Mineral Waters" under Healers).

MINIMIZING—Of the Disease—The disease is weakened, minimized, and largely neutralized, when the attributes of the afflicting planets are conflicting and opposing, as when the ☉ and ♁ are the afflictors, as the ☉ opposes ♁, and are opposites in influ-

ence. (See Abatement, Amelioration, Antipathy, Crises; "Minimizing" under Disease; Mild, Minor, Moderation, Opposites, Sympathy).

MINISTERS—Clergymen—Priests—Anxiety To—(See Clergymen).

MINOR—Minor Ailments—Minor Bodily Disorders—The Disease Is Not So Important—Mild Disorders—Minor Ailments are ruled by the ♃. These disorders usually occur from the ♃ being posited in a Tropical or Equinoctial Sign, which are the cardinal signs. (See Cardinal, Equinoxes, Minimizing, Slight, Tropical). The Benefic Planets in a sign, and also the absence of a malefic from a sign, tend to lessen the diseases to the parts of the body ruled by such signs, and to give minor, mild, and slight disorders to that part, and not as malignant or severe.

Minor Fevers—(See "Slight" under Fevers).

MIRTH—Mirthful—Joyful—♃ and ♀ are the planets of Mirth, Joy, Good Cheer, Happiness, Peace and Contentment, when they are strong and well-aspected at B., and the rulers of the horoscope. The Hebrew letter Qoph (K) is connected with the ♃ sign, the sign of ♃, and is predominant in Mirth. For the value of the Hebrew letters of the alphabet, and their connection with Astrology, every student should read the book, "The Tarot of the Bohemians" by Papus. (See Joy).

MISANTHROPIC—Distrust—Mistrustful—Hatred of Mankind—Suspicious—♃ influence; the ♃ to the ♃ or ill-asp. ♃ by dir., and ♃ weak, ill-dig., and afflicted at B. (See Aversions, Hatred, Miserly, Mistrustful, Penurious, Reclusive, Seclusive, Secretive, Selfishness, Suspicious).

MISCARRIAGE—Abortion—Premature Birth—Death by Miscarriage—(See "Death by Miscarriages" under Abortion; "Death" under Hemorrhage; Parturition). Cases of Death by Miscarriage—(See "Cases" under Abortion; "Premature Birth" under Premature). Cases of Miscarriage and Premature Birth are often caused when several of the Moon's librations do not return to, and cross the central line of impulse at the monthly period during gestation, thus causing a lack of equilibrium, and an unbalanced condition of the Foetus. (See Prenatal Epoch).

These influences at B., and the ♃ or lord of the 1st afflicted by dir., tend to bring some calamity, mischief, misfortune, and suffering upon the native. (See Accidents, Air, Blows, Burns, Calamity, Danger, Death, Disgrace, Drowning, Earthquakes, Epidemics, Events, Falls, Famine, Fire, Flood, Grief, Heat, Highwaymen, Honour, Hurt, Injury, Misfortune, Murdered, Perils, Pestilence, Pirates, Public, Reputation, Reverses, Robbers, Ruin, Scandal, Shipwreck, Sickness, Sorrow, Storms, Thieves, Travel, Trouble, Vehicles, Violence, Weather, Wind, Wounds, etc.). Moderation of Disease—Abatement or Amelioration of—The ☉ or ☽ angular, ori., and elevated above the malefics, and also the benefics in a strong position and well-aspected; a Solar Eclipse falling on the place of the radical ♃; the ☽ coming to the * or Δ the lords of the Asc., 9th, 10th, or 11th H. brings an interval of ease and amendment; the Prog. ☽, ♁, * or Δ ♃ or ♀ in the radical map; ♃ or ♀ ori., and elevated above the malefics; a good aspect of ♃ or ♀ to the ☉, ☽, Asc., or hyleg at the same time there are evil aspects from the malefics, tends to moderate the disease. Also ♀ configured with ♃ gives the addition of skillful Healers, or the proper

remedies and treatment. When a malefic applying to the ☽ at decumbiture passes the ☽, the patient gets better. Any disease will tend to be mitigated, ameliorated, or curable if the benefics be elevated above the malefics which produce it, and the more angular, ori., and elevated above the malefics the benefics may be, the more they assist in the cure and amelioration of the disease. When a train of evil directions and aspects indicate ill-health or death, the course of disease is modified and ameliorated when the good asps. of ♃ or ♀ to the hyleg intervene. A strong map of birth tends to modify disease and give greater powers of resistance, no matter how evil the directions. If an afflicted planet causing the disease is well-aspected by the benefics, as by ☽ or P. asp., then the evil will be mitigated. The afflicting planet turning R. tends to modify the disease. Planets passing from cardinal to common signs tend to a falling off in the power and degree of morbid action in disease, and to moderation and improvement. (See Amelioration, Antipathy, Continuity, Course, Crises, Curable; "Better" under Disease; Duration, Ease; "Disease" under Force; "Improved" under Health; Minimizing, Modification, Opposites, Prognosis, Recovery, Recuperation, Remission, Resistance, Retrograde; "Illnesses" under Short; Termination, Treatment; "Good" under Vitality; Worse, etc.).

MODESTY—♃ is the author of; ♀ Sign * or Δ ♀, modest, shy, and retiring. (See Backwardness, Bashfulness, Blushing; "Chaste" under Females; Gentle, Immodest, Manners, Meek, Prudery, Quiet, Reserved, Retiring, Shy, etc.).

MODIFICATION OF DISEASE—The horoscope as a whole should be studied in judging of the force or outcome of a disease, and not any one aspect, as the good aspects from the benefics, the ☉ or ☽, will tend to modify the disease in a fortunate map. If the radical map is generally weak, the disease would tend to be more severe. Each planet imparts a special type of disease to an organ, but the disease may become disguised, modified, or changed by cross aspects from other planets, by the afflicting planet passing from one sign or house to another, or turning R. Also at the crisis time in a disease, if it is acute, it will either resolve itself, or go into a chronic form, and especially if the disease has progressed for about 28 days, one revolution of the ☽ from the time it began. (See the references under Moderation. Also see "Crises" under Acute; "Long Chronic Distempers" under Chronic; Complications, Diagnosis; "Complications" under Disease; Fatal; "Disease" under Force, Judgment, Nature, Quality, Severity; Polarity, Worse, etc.).

MOISTURE—Moist—Dampness—Vapors—Humidity—Wet—Water, etc.—Moisture is a feminine quality and passive, and is a benefic influence given by the ☽, and the benefics ♃ and ♀, and also by the watery signs ♋, ♌, and ♍. The airy signs ♁, ♂, and ♃, are next in degree of moisture. Dryness and mois-

ture are passive qualities, and heat and cold are active qualities. The ♃ is moist in quality, and generates moisture, dampness, and vapors. The ♃ rules largely over the radical moisture of the body, and its distribution, and contributes moisture of temperament to the body. The ♃ makes the constitution moist from the New ♃ to the 1st Quarter. Jupiter is warm and moist, being temperate in nature, and produces moisture when occidental. Venus gives off much moisture, gathers the moist vapors from the Earth, and causes moisture when occidental. Venus denotes death by epidemics, rottenness, and putrefactions which proceed from too much moisture. White, the color ruled by the ♃, is passive, and is the sign of radical moisture. The colors of ♃ and ♀ combined are signs of heat and moisture combined, as blue and yellow. Mercury produces moisture when femininely constituted, and dryness when masculine. Moisture is prolific and nutritive. Heat and Moisture combined are positive and tend to fermentation. (See Zymosis). The feminine signs of the Zodiac, the even signs, predominate in moisture. The elementary qualities of moist and dry alternate in the signs of the Zodiac, one being moist, and the next one dry, etc., on around thru the 12 Signs. The ♃ and ♀ Groups of Herbs and Plants have a cold and moist action, but some Authors say that the Herbs of ♀ have a moist and warm influence. Moisture largely predominates in the female sex, and is a female and passive quality. Moisture is more feeble in the left side of the body, as the left side is ruled by Cold. Damp vapors are caused by the nearness of the ♃ to the Earth, thus tending to cause putrefaction and relaxation of animal bodies. Humidity is ruled by the ♃. The following subjects have to do with Moisture, its influences and action, the diseases caused by, and its general effects upon Humanity.

Abundance of Moist Humours—And Suffering From—Over-Moist Air—Excess of Rain and Floods—The ♃ sign ascending at a Vernal Equi., and espec. in places ruled by this sign. (See Floods, Rain; "Moist" in this section).

Brain—Moisture of—The ♃ coming to the ☉, and ruled by ♃, or the ♃ at her Full being ruled by ♃, and espec. when it may happen in ♃, ♃, or ♃. Under these conditions if the males be in Eastern Parts and in angles, and the benefics in the West, tend to demoniacal affections, and ♃ and the ♃ cooperating in the scheme contribute

to moisture of the brain; the ♃ and ♀ unconnected with each other or the Asc., ♃ and ♀ angular and ori., and with ♃ and ♀ setting and occidental. (See "Wild" under Delirium; Demoniac; "Outrageous" under Insanity).

MOLECULAR NUTRITION—Under the rule of ♀. (See Nutrition).

MOLES—A Small, Brown, Cutaneous Spot—Marks tend to be Moles when the part is not afflicted by ♂. The ☉ alone in a sign, away from ♂, tends to a Mole rather than a Scar or Wound. (See Blemishes, Defects, Freckles, Marks, Scars). For the influences which cause Moles on the various parts of the body, see "Moles" under the part you have in mind. See "Moles" under such parts as Arms, Back, Breast, Face, Feet, Front, Knees, Left Side (see Left); Legs, Neck, Right Side (see Right); Shoulders, Thighs, Throat, etc. Many of the rules as to the location of Moles are given in the Articles on Marks and Scars, and also in this section in what follows.

Location of Moles—Examples of—

(1) A masculine sign on the Asc., and a masculine planet in the Asc., as ♁ on the Asc., and ♀ in the Asc., tends to a mole on the right side of the face. (See "Left Side", "Marks", under Face).

(2) The latter degrees of ♁ on the Asc. would indicate a mole on the

lower part of the Reins near the Haunches.

(3) The first part of ♀ on the 6th H., a mole on the head near the hair, or on scalp. The middle part of ♀ on the cusp of the 1st or 6th, a mole near the middle of the right side of the face.

(4) ♂ lord of the 6th, in ♀, near the middle of the sign, and under the earth, shows a mole on the back part of the right thigh, near the middle of the thigh, and not as noticeable. If ♂ had been prominent and above the earth, the mole would be on the front of the thigh and more prominent.

(5) The ♃ in a female sign, and under the earth, indicates a mole on the left foot, under and near the extremity of the foot.

(6) ♃, a feminine sign, on the Asc. would denote a mole on the left cheek, as the Asc. rules the head and face. Also as ♃ rules the feet there would be a mole on the left foot.

(7) ♁, a masculine sign, on the 10th denotes a mole, scar, or mark on the right side, below the breast, as ♁ rules the Sides. Other examples might be mentioned. Learn the rules and you can apply them to any case. (See "Moles" under Left; "Organs" under Lower, Middle; Naevus; "Lower Part" under Organs; Right; "Organs" under Upper).

MOMENT—The Time of Events—

Moment of Action—Hesitates In—(See Chaotic, Confused, Dreamy; "Doubts" under Fears; Inconstant, Mutable, Negative, Restless, Vacillating, etc.).

Moment of Birth—The time when the child takes in its first breath, and makes the first cry, for it is at this time that the magnetic forces and vibrations of the Planets, Aspects, and Universe, etc., are stamped upon the native, and not when the cord is cut. The cord may be cut some minutes after the first cry and intake of breath. However, some Authorities take either time as the Moment of Birth, as Wilson does in his Dictionary of Astrology under the subject of "Nativity". The Moment of Birth, and the actual Map of Birth intended for the native, are usually a fixed time, and predetermined, and interferences with normal birth may change the map, and thus considerably interfere with, or change and modify the destiny of the individual. (See "Planetary Baptism" under Baptism; "Causes of Birth", "Moment of Birth", under Birth; Calamity; "Born" under Children; "Map of Birth" under Map; Nativity).

Moment of Conception—(See "Moment" under Conception; Prenatal Epoch). See Events, Time.

MONARCHS—(See Kings, President, Queens, Rulers).

MONDAY—Ruled by the ♃. (See Week).

MONEY—Reckless and Extravagant In the Use of—Disease and Suffering From, etc.—(See Appetites, Conduct, Debauched, Dissipated, Dress, Drink, Eating, Excesses, Expense, Extravagant, Feasting, Food, Fortune, Gambling, Generous, Gluttony, Habits,

Harlots, Love Affairs, Luxuries, Men (see "Health Injured" under Men); Passion, Pleasures, Poverty, Prodigal, Property, Prosperity, Recklessness, Resources, Reverses, Riches, Ruin, Social Life, Sports, Travel, Wealth, Women, etc.).

MONOMANIA—(See this subject under Mania).

MONSTERS—Monstrosities—Monstrous Births—Teratism—An Anomaly of Conformation, and Usually Congenital—Too Many Parts or a Deficiency of—Abnormalities—Unnatural Conformations—Freaks of Nature—Congenital Conformations, etc.—Teratology is the Science, or Study of Monsters. The subject of Monsters, and especially of Congenital Monsters, is one largely for Prenatal study, and the conditions which existed at Conception and during Gestation, the aspects, position, and condition of the ☽ at her monthly return to the central line of impulse during pregnancy. The Map of Birth also may show conditions which indicate Monstrosity, if not at birth, that which may be acquired, and develop at some time later in life when certain directions and influences culminate. The Map of Birth is also apt to contain influences, aspects, and indications which supplement prenatal conditions. The Occult side of Monstrosities, and their relation to the Laws of Cause and Effect, and the Law of Karma, etc., are discussed in the book, "Cosmo-Conception", by Max Heindel.

Animal Forms—Resembles Animals or Fowls—The Luminaries in Bestial or Quadrupedal Signs at B. and the malefics in the Asc. or M.C. at the New or Full ☽ previous to birth, the birth will not be fully human. If the Lights in such case are supported by no benefic, but greatly afflicted by malefics, the person so born will be of a wild, savage, or indocile nature. In features such births often resemble the animals in appearance, as cats or dogs. Aspects from ☿ at the same time tend to bird features, or those of cattle or swine. Mercury in the foregoing configurations tends to a disposition agreeable to nature, but with an unnatural body, and not conforming altogether to human form. The Luminaries disconnected with the Asc. at a New or Full ☽ just previous to birth, and being in bestial signs, with no support from benefics, and afflicted by ♃ and ♄ at the same time, the offspring will then be like dogs, cats, or other creatures held in religious veneration, and used in worship. (See "Beastly Form", "Beastly Signs", under Beasts; "Dogs" under Children; Inhuman).

General Causes—General Considerations—Map of Birth and Prenatal Considerations—Monsters are often caused by an over-production of the secretion of the Pineal Gland under an afflicting influence of ♀, which planet rules this Gland. If at conception the Lights are in the 6th or 12th H., and the malefics angular, or if the place of the last Full ☽, or its lord, and the disposer of the Luminaries have no aspect to the Asc., monsters are gen-

erated. Also may occur when the ruler of the last New or Full ☽ before birth, and the rulers of the ☉ and ☽ are unconnected with the preceding New or Full ☽. The Luminaries at the time of a New or Full ☽, or just previous to birth, are usually unconnected with the Asc. by aspect. In these cases the Luminaries at B. have been found cadent from the Asc., and forming no aspect to the Asc., and also with the malefics in angles, and espec. in the Asc. or M.C. Also the malefics in angles, and the ☉ and ☽ in 8 in the 6th and 12th H., which would indicate great limitations. Are also said to be produced by the common sign influence predominant at conception, and at birth, the common signs on the angles, or the common signs much afflicted during gestation. Other influences along this line are given in the other paragraphs of this Article.

Monstrous In Quality—But with Proper Conformation of Body—The ☉ and ☽ in ♀, ♁, ♃, or ♄; the ruling planets discordant; the Luminaries in signs of human shape, and the other circumstances in the scheme of the nativity existing as before described, the body will be human, partake of human nature, but be defective in some peculiar quality. In order to ascertain the nature of the defect the shape and form of the signs containing the ☉ and ☽, and those on the angles occupied by malefics, should be considered. (See "Void Of" under Reason). For further and collateral study along this line see Abnormalities, Acquired, Armless Wonder (see Arms); Birth, Body, Born Blind (see Blindness); Congenital, Contortions, Cyclops, Deaf and Dumb (see Hearing, Mutes); Deaf, Dumb and Blind (see Deafness); Defects, Deficient, Deformities, Demoniac, Diminished, Distortions, Dwarfed, Enlarged, Eunuchs, Eyes Fused (Cyclops); Foetus, Freaks, Frog Child (see Forearm); Gestation, Giants, Growth, Heredity, Hermaphrodites, Idiots, Imbecile, Incomplete, Insanity, Irrational, Legs Missing Below Knees (see Forearm); Malformations, Mind (Weak Mind); Mutes, Organic, Perversions, Pineal Gland, Pregnancy, Prenatal Epoch, Reason, Savage, Structural, Twins (see United Twins); Underdeveloped, Undeveloped, Unnatural, Virile, Void Of, Wild, etc.

MOODS—Moody—Moodiness—Melancholic Moods are given by ♃.

Subject to Moods—The ☉, ☽, or ♃ in ♃; the ☉ or ☽ to the ♃, ♀, ♁, or ♃ ♃ by dir.; the ☉, ☽, or ♃ afflicted by ♃ at B.; ♃ or ♃ on the Asc. The influences of the watery signs tend to moodiness, and espec. the ♃ sign, and also attended by a lack of cardinal influences strong at B., and the mutable signs predominant. The fiery signs strong at B. tend to emotional instability, but with greater power to throw off moods. (See Anxiety, Brooding, Dejected, Depressed, Despair, Despondent, Emotions, Fears, Gloom, Hope, Hypochondria, Introspection, Melancholy, Morbid, Morose, Obsessions, Regretful, Repining, Sadness, Serious, Sorrowful, Taciturn, Worry).

MOON—Lunar—The ♀ is one of the principle influences to be considered in Astrology, as her aspects, positions, influences, and progressed positions, tend to bring into action the vibrations of the ☉ and planets for good or ill over human life, as well as over the animal and vegetable kingdoms. The ♀ is the collector of the Solar forces, and reflects the heat and light of the ☉, and by her rapid course around thru the 12 Signs each month she is the distributor and conveyor of the forces of the ☉, and other planets she passes and aspects. The ♀ was thrown off from the Earth because it became a hard crystal and was holding back the evolution of the Earth. The bones in man's body were soft and cartilaginous before the ♀ was thrown off. The distant action of the ♀ now is to harden and crystallize, and after the ♀ was thrown off in the Hyperborean Epoch the bones of man began to harden, and a stronger skeleton was formed. The action of the ♀ today is to harden and crystallize man's body, and to bring on death. If man were to live on the ♀ his body would turn into stone and he would soon die. There is no plant, vegetable or animal life on the ♀. The ♀ is a corpse and gives off corpse-like emanations which makes her influence obnoxious. (See Decay, Moonlight). See the book, "Cosmo-Conception" by Max Heindel, for a full discussion of the origin of the ♀, and her present influences and destiny. The ♀ is feminine in quality, and along with ♃, a feminine planet, and is the general Significator of health in a female nativity, and also rules the female functions. The ♀ is the planet of Fecundation, the planet of fertilization and impregnation, and the ♀ stands at the head of the functional group, and is the chief index of functional activity. The ♀ rules the night, and the ☉ the day time. The ♀ has special affinity with the eyes, and when afflicted at B, and by dir, tends to eye disorders and blindness. The period of Gestation in man and beast is measured by the ♀. The ♀ is magnetic, and also an indicator of disease. She generates moisture, and causes putrefaction, rotteness, and relaxation of animal bodies by generating damp vapors. The ♀ has the greatest effect in infancy, and affects both mind and body. The ♀ weak and afflicted at B, rarely brings good health, and especially in females. In quality the ♀ is negative, feminine, magnetic, cold, moist, fruitful, changeful, lymphatic, plastic, romantic, and wandering. Her influence tends to change, and also to act as an expulsive, cleansing, and alterative agency. She is a receiver, and the preparer, and has strong influence over the breasts, stomach, and womb, and is of powerful import in a female nativity. A ♀ person is ever inconstant, restless, changeable, variable, and a rover. As the ☉ is typical of Spirit, so the ♀ represents Matter, organic decay, and transitory experience. (See Matter). What she represents is of an illusive nature, and has to do with present existence on the Earth Plane. The ♀ influence im-

plies fate, thralldom of the flesh, and bondage to Matter. The ♄ sign is the home and only sign of the ♀. She has her exaltation in 8, her fall in ♍, and her detriment in ♃. The ♄ and ♃ signs are the two best signs for the ♀, and the airy signs. The fire signs are not favorable for the ♀, and also ♎ and ♏ are considered bad signs for the ♀, as she has her fall and detriment in these signs. In order to get the ♀ influences in shape for more ready reference, this Article has been arranged into three Sections. Section One—Influences of the Moon, and General Considerations. Section Two—The Moon Rules. Section Three—Diseases and Afflictions of the Moon.

— SECTION ONE —

INFLUENCES OF THE MOON—

Above the Earth—The ♀ to be powerful should be above the Earth in a night nativity, and below the Earth in a day geniture. When the ♀ is above the Earth in a night map, the functional activities of the body are more normal and regular. The influence and power of the ♀ are weakened when above the earth by day, or below the horizon by night. (See "Below the Earth" in this section).

Absorbent Vessels—The ♀ rules the Absorbent Vessels, and when in the watery signs ♋ and ♌ is most at home and gives efficient and strong functions, and the action of the absorbent vessels and lymphatic system are regular and normal. (See Absorption; "Strong" under Functions; Lymph).

Action of the Moon—The Moon's action is reflective, and she has no basic nature of her own, but focuses the planetary influences upon the mind and body. The action of the ♀ by her different positions and aspects becomes chemically convertive, metamorphic, assimilating, integrative, and secreting. The Moon's action is periodic, mutational, changing, fluidic, and of the ebb and flow order, and traceable for the most part among the fluids. The action of the ♀ also is to harden and crystallize the body with age. (See the Introduction, "Qualities", and the various paragraphs in this Article).

Acts as a Medium—The ♀ acts as a medium of relationship between the ☉, planets, and human, animal and vegetable life and mundane affairs. She rapidly takes up the magnetic force from the other planets and distributes it, and quickly lets go, thus producing change and a great variety of conditions over mind and body.

Afflictions of the Moon—The ♀ afflicts by her ☐ and 8 aspects, and by her progressed evil aspects to the radical ☉, planets, Asc., M.C., or hyleg. (See "Aspects" in this section).

Air Signs—Next to the watery signs, the airy signs are rather congenial to the ♀. (See "Air Signs" under Air).

Anareta—The ♀ as Anareta—(See Anareta).

Angel Of—Gabriel.

Appearance—The ♀, her sign and house position, have considerable influence over the personal appearance,

and the positions of her nodes are also said to partly determine the height of the body. (See Appearance, Decanates, Height).

Aspects—Aspects and Position of the ♃—These tend to bring events to pass, as she is the time marker in human affairs and World conditions, the minute hand on the clock of destiny, and the ☉ is the hour hand. (See Events). The aspects and position of the ♃ affect and react on the general health, and also the aspects of the other planets to the ♃ have much to do with the general health. The ♃ is fortunate or evil in her influences according to the planets with which configured, and in many respects is the most powerful of all the planets in health and other matters, the ☉ not even excepted. She afflicts by her ☐ and ♁ aspects, and tends to benefit the mind and body by her favorable aspects to the ☉, planets, Asc., M.C., and hyleg. (See Afflictions Of, Evil Aspects, in this section).

Below the Earth—The ♃ rules by night, and the ☉ by day, and the ♃ to be more powerful should be above the Earth in a night nativity, and below the earth in a day geniture. The influence and power of the ♃ are weakened when above the earth by day, or below the earth by night. Also when the ♃ is below the earth by day or night the functional activities are not as strong and regular as when the ♃ is above the earth, rising, elevated, dignified, and in a watery sign, as in ♋ or ♌. This is the rule with all the planets that they are more powerful when rising and elevated, and weaker when setting, or below the earth, or horizon at B. (See "Above the Earth" in this section).

Benefic—The action of the ♃ is more benefic in influence when increasing in light, and to some extent malefic and weaker in her action on the functions when in her decrease.

Best Signs—For the ♃—The watery signs ♋ and ♌.

Bodily Forces Weakest—At the New ♃. (See "New Moon" in this section).

Changeable and Variable—In the 12 Signs the influence of the ♃ is variable and changeable, and does not follow the same arrangement as the ☉ and Asc. The ♃ and ♁ are considered variable planets and take on much of the nature and attributes of the planets with which configured. Thus the ♃ with ♄ gives a very serious, grave and despondent nature and personality, and also retarded and suppressed functions. The ♃ with ♃ gives a more fortunate and buoyant nature, and aids the functions, etc. (See Variable).

Changes of the Moon—The ♃ at her changes, as the New and Full ♃, has a very strong influence over Epileptics, Lunatics, Hysterical and Nervous people, and such people are very sensitive to these changes, and at the Full ♃ especially are very restless, and should never sleep in the open moonlight. (See "Full Moon", "New Moon", in this section).

Character and the Moon—The sign position of the ♃ at B. represents the

personal character, the personality, the personal habits, and the functional activities, and to react on the general health according to the nature of the sign, house position, and aspects to the ♃.

Chemical Action Of—Is more deleterious at night by blending with the carbonic acid exhalations of the vegetable kingdom. (See Moonlight, Night, in this section).

Chief Index Of—The ♃ is the chief index of functional activity. (See Functions).

Children—The ♃ is the Sig. of children in Hor'y Q. The ♃ is classed as fruitful, and a giver of children. Females born at the time of an eclipse of the ♃, at a New ♃, are apt to die at birth, or soon after. (See "Death At Birth" under Birth; Eclipses, Fruitfulness).

Classification Of—The ☉ and ♃ are both reckoned as planets in Astrology. The ♃ is classified as a feminine, negative, passive, nocturnal, cold, moist, magnetic, fruitful, phlegmatic body. (See "Qualities" in this section).

Colors—The ♃ rules Green in the Solar Spectrum. Also rules white, or white spotted, or a light mixed color, silver, violet, spotted and mixed colors. The color of the ♃ has a passive power, and white is the sign of radical moisture. (See Colors).

Conduct and the Moon—The ♃ has much to do with the conduct and habits of life, the growth, the functional activities, and the general health.

Constitution—The Constitution Strengthened—(See "Strengthened" under Constitution).

Contracts Disease Easily—(See Contracts).

Crises In Disease—Ruled by the ♃. (See Crises).

Critical Days—Of the ♃ Influence—(See "Crises" under Acute; Amelioration; Crises, Critical, Decrease; "Disease" under Increase, Severe; Moderation; Full Moon, New Moon, Quarters, in this section).

Cycle of the Moon—(See "Metonic" in this section).

Damp Vapors—(See "Damp Vapors" under Moisture).

Dark of the Moon—(See "Decrease" in this section).

Day—The ♃ Above the Earth by Day—(See Above, Below, Night, in this section).

Death and the Moon—(See the Introduction, "Death" in Sec. 3 of this Article).

Decrease of the Moon—The vitality is usually less during the decr. of the ♃, and the body often loses two pounds in weight, and then regains it again during the light, or increase of the ♃. Sickness begun in the decr. of the ♃ is more apt to be depressing and weakening until after the New ♃. During the decr. of the ♃ the fluids of the body are at low ebb, and rise again, and fill the vessels of the body to a greater fullness during the incr. of the ♃. Goi-

ter and Tumors decrease in size during the decr. of the ♀. The ♀ is more malefic during her decr. (See Benefic, Fluids, Last Quarter, in this section).

Diastole and Systole—Of the ♀—(See Full Moon, New Moon, in this section).

Diathesis—(See "Fifth Thoracic" under Ganglion).

Directions Of—The evil directions of the ♀ are especially dangerous during the Lunar Period of life in infancy, and from the 1st to 4th years especially. The directions of the ♀ along thru life bring to a climax other directions culminating and operating, and which are released by the ♀ entering into the configurations. Thus the time of crises in disease, and the critical times, months, and periods of life, can largely be predetermined by the movements of the ♀, and her aspects to the planets in the radical map. (See "Directions" under Children; Crises, Critical, Directions, Periods, Prognosis, Secondary).

Diseases Of—(See Section 3 of this Article).

Domain—Of the ♀—Is over Fluids. (See Fluids).

Dragon's Head—And Tail—The Nodes of the ♀. (See Dragon's Head).

Drugs Of—(See Herbs, Metal, Typical Drugs, in this section).

Earthy Signs—And the ♀—The ♀ is more fortunate in 8, which is the sign of her exaltation, and tends to good health, regular functions, fixed and methodical habits. In ♀ the ♀ is not as fortunate, and tends to irregular bowel action, irregular functions, and digestive disorders. In ♀ the ♀ has her detriment, and is tinged with ♀ influence. (See "Earthy Signs" under Earth).

Eclipses Of—(See Eclipses, Lunations; "Full Moon", "New Moon", in this section).

Elementary Qualities—At the New ♀ the ♀ is hot and moist; at the 1st Quarter is hot and dry; at her Full is cold and dry, and the 3rd Quarter, cold and moist. (See First Quarter, Full, Last Quarter, New Moon, in this section).

Epoch—The sign the ♀ is in at the Epoch, or time of conception, or the opposite sign, is the Asc. at birth, as a rule. (See Prenatal Epoch).

Equivalent To—The ♀ is equivalent to a ♀ planet when slow in motion, and moving less than 13° 11' in 24 hours. (See Retrograde).

Events and the Moon—(See Events; Aspects, Directions, in this section).

Evil Aspects Of—The ♀ Fortunate or Evil In Her Influences—(See Afflictions Of, Aspects, in this section). The evil aspects of the ♀ indicate the ailments which arise after birth, and to the detriment and injury of the native's health. (See Asquired).

Exaltation Of—The ♀ has her exaltation in 8. (See "Earthy Signs" in this section).

Eyes—The ♀ has special affinity with the Eyes. (See Blindness, Eyes, Nebulous, Sight).

Fall—The ♀ has her fall in the ♀ sign. (See Scorpio).

Fecundation—Is the most salient characteristic of the ♀. (See Fecundation).

Females and the Moon—The ♀ is the principal ruler over the health of females, and the female functions, and is usually taken as the hyleg in female nativities when strong and well-aspected at B. Also ♀ is a ruler over females. (See Females, Functions, Menses, Women).

Fevers—The motion of the ♀ regulates fevers, and hot and dry diseases. (See Better, Crises, Fevers, Moderation, Recovery, Resolution, Worse).

Fire Signs and the Moon—The ♀ is not congenial in fiery signs and tends to disturbed functions and many disorders when in such signs, and also to give a hasty and excitable nature. (See "Fire Signs" under Fire).

First Quarter—Exerts a hot and dry influence, and acts especially on the Bile. The 1st Quarter of the ♀ is also concerned with the revitalization of the fluids and functions of the body, and with organic development.

Fluids—The ♀ rules the white fluids of the body, or the body oil; the lymph, chyle, synovial fluid, etc. (See Fluids).

Foetus—The ♀ Influence Over the Foetus—(See Foetus).

Fortunate or Evil—(See "Aspects" in this section).

Friendly To—The ♀ is friendly to all our planets except ♀ and ♂. (See Antipathy, Opposites, Sympathy).

Fruitfulness—The ♀ is fruitful and a giver of children. (See Fruitful).

Full Moon—The Full ♀ is of a cold and dry nature, and affects the Inner-ervation. The Full ♀ corresponds to the Lunar Diastole, and is the Lunar expiration, while the New ♀ typifies the Lunar inspiration, preparation for a new cycle, and is the Lunar Systole. The Full ♀ is typical of maturity, or maturation, of the fullness or plenitude of fluids, the high tide, high tension, fruition, etc. Discharges are more profuse at the Full ♀. The Brain is largest at the Full ♀ and smallest at the New. Fits of nervousness are worse at the New and Full ♀, and also Lunatics are more affected, agitated or raving at these times, and the Insane, Hysterical, Nervous, and Epileptic patients are worse at the Full ♀, and should not sleep exposed to the Moonlight. At the New or Full ♀ the ♀ influence is not so manifest except with Lunatics, whose fluids are more violently disturbed at these times. A child born at the instant of the Full ♀, and especially females, usually dies at the next New ♀, and a child born at the New or Full ♀ rarely lives unless ♀ give a favorable aspect. The exact time of the Full ♀ is very dangerous for a surgical operation. White is the symbol of the Full ♀, which is the symbol of Initiation. (See Changes, First Quarter, Last Quarter, New Moon, in this section; Brain; "Death At Birth" under Children; Discharges;

Dropsy, Eclipses, Emissions, Entozoons, Evacuations; "Nervous Affections" under Pits; Fluids, Fluxes, Haemoptysis; "Profuse" under Hemorrhage; "Discharges" under Hemorrhoids; Insanity, Itching, Scabs, etc.).

Functions—The ♃ has rule over the Functions and the natural powers of the body, and especially over the female functions, childbirth, the menses, etc. (See Functions).

General Health—The ♃ has rule over the general health and habits. (See Habits; "General Health" under Health).

Generates—The ♃ generates moisture and damp vapors. (See "Damp Vapors", and the various paragraphs under Moisture).

Gestation—The period of Gestation for Man and Beast is measured by the ♃. (See Gestation).

Gives Life—The ♃ reflects the Solar Forces which helps to give life.

Growth—The ♃ has much to do with the growth and development of the body. (See Growth).

Habits of Life—The ♃ has an important influence over the personal habits. (See Habits).

Health—The ♃ weak at B, and afflicted tends to ill-health, and espec. in females. The ♃ strong at B, hyleg, and well-aspected, tends to good health in females, good vitality, and prospect of long life. (See Females, Health, Women).

Height of the Body—The Nodes of the ♃ have influence over. (See Height).

Herbs of the Moon—(See "Moon Group" under Herbs).

Home—The ♃ is at home in the watery signs ♋ and ♌, and also in her exalted sign 8.

Horas—Lunar Horas—(See Horas).

Hour—Hour—(See "Hours" under Planets).

House Position Of—The ♃ tends to disturb the functions more severely when in the 6th H., or ruler of the 6th, and afflicted by lords of the 1st, 6th, or 8th H.

Hyleg—The ♃ is hyleg in female nivities when she is strong, and can be taken for such. (See Hyleg).

Identified With—The ♃ is identified with the negative, passive, magnetic, and feminine forces in Nature.

Implies—The ♃ influence implies fate, thralldom of the flesh, and bondage to matter.

Increase Of—(See Benefic, Decrease, First Quarter, New Moon, in this section).

Indicator Of—The ♃ is an indicator of events, and of disease or health, and espec. in females.

Infancy—The ♃ has greatest effects over Infants, as Infancy is the Lunar Period of life. (See Infancy; "Directions" in this section).

Influence and Power Of—(See "Above the Earth", and the various paragraphs in this section).

Last Quarter—Third Quarter of the ♃—Is cold and moist, and acts especially on the Lymph. This Quarter is typical of the reaping period, the reaping of the harvest, and the application of power already generated. Sleep is more quiet during the last Quarter. (See "Quarters" in this section).

Life—(See "Gives Life" in this section).

Light of the Moon—Increase of—(See Benefic, Gives Life, Increase, Moonlight, in this section).

Lunar—Lunar Horas—Solar Lunar Forces—(See Horas; "Solar-Lunar" under Solar).

Lunations—(See Lunations).

Lymphatic System—Ruled by the ♃. (See Lymphatic).

Magnetic—The ♃ is a magnetic and negative body. (See Magnetic, Negative).

Mars and the Moon—The ♃ ♂ tends to cause the same diseases as does ♂ in the Asc. at B.

Malefic—When the ♃ is more Malefic—(See Benefic, Decrease, in this section).

Matter—The ♃ is typical of Matter. (See Matter; "Implies" in this section).

Metals—Ruled by the ♃—Aluminum, Silver. (See Therapeutics).

Metonic Cycle—Cycle of the ♃—The Nodes of the ♃ complete one revolution in about 1000 weeks, or 19 years, and the ♃ forms her ♂ with the ☉ on the same day every 19 years. The Eclipse at this time is very powerful for good or ill in health matters, according to her sign, aspects, etc., as related to the map of birth, and for People and Countries falling under the shadow of such an Eclipse. (See Eclipse).

Minerals Of—Emerald, Marcassite, Moonstone, Selenite. (See Minerals).

Moisture—The ♃ generates moisture and damp vapors. (See "Damp Vapors" under Moisture).

Moon People—A Moon person is ever inconstant, restless, changeable, variable, and a rover. Moon people, and with the ♃ afflicted at B., tend to contract disease easily, and usually have less vitality. The ♃ sign ♋ on the Asc. at B. tends to give a weak constitution. (See Cancer Sign; "Contracts Disease Easily" under Contracts; Restless; "Weak" under Vitality).

Moonlight—The night air and moonlight are noxious and tend to produce miasmatic ailments, malaria, etc. (See "Full Moon", "Sleep", in this section; Malaria, Miasma, Noxious).

Moonstone—A Mineral ruled by the ♃.

Motion of the Moon—(See Equivalent, Fevers, in this section; "Planets" under Motion; "Motion" under Planets).

Mutation of Fluids—(See "Mutation" under Fluids).

Nebulous Spots—And the ☽—The ☽ with at B. tends to Eye Trouble and Blindness. (See Blindness, Eyes, Nebulous).

Negative—The ☽ is a negative and magnetic body. (See Negative; "Classification" in this section).

New Moon—The New ☽ is the systole, or the low ebb of her influence, and implies death, disintegration, and the preparation for a new Cycle. The New ☽ is hot and moist in influence. The functional activities are lower at this time, and the bodily forces are weakest. A male child born at the time of the New ☽, which may also be a total eclipse of the ☾, may not survive. Much infant mortality is referable to the New ☽, which is a critical time with infants, and tends not only to weaken the constitution, but to make any contemporaneous malefic aspects and influences more powerful in their action upon the body. (See "New Moon" under Children). At the New and Full ☽ the ☽ influence is not so manifest except with Lunatics, whose fluids are more violently disturbed at these times. The New ☽ just previous to an event, an accident, or the beginning of a disease, has much to do with precipitating the event, and even before it would otherwise occur, and the aspects of a New ☽, or a Progressed ☽, tend to focus the hidden forces. Thus a New ☽ may hasten an event if it occurs previous to the natural time of a possible event, or tend to retard an event when it occurs soon after, or immediately after the time of the culmination of an event, accident, or the beginning of a disease. In a train of evil directions the focus of their action is often guided by a New ☽ at or near the time of their culmination. The influence of a New ☽ just previous to birth often tends to congenital malformations and monstrosities. (See Changes, Full Moon, in this section; Directions, Eclipses, Events; "Nervous" under Fits; Irritable; "Low Spirits" under Low; Lunations, Misery, Monsters, Prenatal Epoch).

Night Action Of—The ☽ by Night—The ☽ being magnetic helps to keep up the morbid action of germs at night, and make disease worse. The action of the ☾ being electric tends to destroy and overcome the morbid action of germs during the day, and to equalize the deteriorating action of the ☽ at night, and thus save life. (See Above the Earth, Chemical, Moonlight, in this section; Day, Electric, Germs, Magnetic, Night, Noxious).

Nodes—Of the ☽—(See "Height" in this section; Dragon's Head).

Noxious—(See Chemical, Damp Vapors, Moonlight, Night Action, in this section).

Personality—(See "Represents" in this section).

Physiological Action—Of the ☽—Influences the Tears and Mutation of Fluids; influences the stomach; makes the womb receptive to the seminal fluid; rules and influences impregnation, inspiration, the animal instincts, and tends to inertia and sedentary habits. Movement in the body is a physiological action of the ☽. Moisture is a physiological action of the ☽, and tending to rotteness and putrefaction. The ☽ is classed as a physiological planet, and not pathological. The physiological action of the ☽ Group of Herbs has a cold and moist action, and tends to Mycozymiasis, Zymotic Periodicity, and to affect the Sympathetic Nervous System. (See "Moon Group" under Herbs; Microzymiasis, Zymotic).

Plants Of—The general action of the ☽ plants tends to periodicity, and to be intermittent and zymotic. (See "Physiological Action" in this section).

— SECTION THREE —

DISEASES OF THE MOON—Diseases and Afflictions Ruled by the Moon—The ♃, by reflecting the aspects and influences of the ☉ and planets, tends to produce and regulate disease, and eventually to bring death. Her Quarters from the time of the beginning of a disease are the crises times. (See Crises). The ♃ rules and causes all Acute and Acquired Diseases. The ♃ joined with ♂ at B. causes the same diseases as ♂ does when in the Asc. The ♃ rules such diseases as return after a time, as Periodic Diseases. The ♃ rules the Functions and Health matters in females, and an afflicted and ill-dignified ♃ at B. tends to disturbed and irregular female functions. The ♃ is the Significator of Health in a female horoscope. Moon people contract disease easily. Over the body the ♃ normally represents a cleansing, alterative, and expulsive influence, and also with age to harden and crystallize the body, and the ♃ being a cold, ashy and cinder-like body, the body of man would quickly turn into stone if he lived upon the Moon, and death quickly result, as vegetable and animal life cannot exist on the ♃. MOTHER—The Mother—Motherhood—The ♃, ♀, and the 10th H. are allotted to the Mother. In Hindu Astrology the 4th H., the house of the ♃, always rules the mother. Also in European Astrology there is a finer ruling which says that the 4th H. rules the mother in a male nativity, and the 10th H. the mother in a female nativity, and this rule seems to work out in its practical application. The 10th H. is said to rule the affairs of the mother in a general way, and the 4th H., the affairs of the father. By day the ☉ and ♀ are the chief representatives of the parents, and the ♃ and ♃ by night. In Hor'y Q. the ♃ and ♀ are Significators of the mother. (See Father). The following influences are to be noted in the map of the child, and especially in the map of the first-born, if living. However, the influences may exist in the maps of any of the children. Also the map of the mother should be studied in regard to some of the paragraphs, which give influences which especially apply to her map, and show her indications. Disease—Diseases Will Attend the Mother—The Mother Diseased—The Mother Subject to Many Diseases—The Mother May Suffer, etc.—In considering the question of the sickness of the

mother, the nature of her diseases, the property of the signs in which the afflicting planets are posited should be noted. The ☽ and ☽ by day should be observed, and ☽ and ☽ by night. There is a close bond of sympathy in these matters between the horoscope of the child and that of the mother, and by making a study of the child's map, the principle concerns of the parents may be ascertained. Evil directions in the child's map may not injure the child, but will tend to affect the parents or guardian. In such study the map of the first-born is preferable, then the map of the second child, etc. Along this line, the following influences are to be noted in the map of the child as to the causes of disease in the mother—The ☽ ori., and afflicted by ☽; the ☽ to the ☿ or ill-asp. ☽ or ☿ by dir.; the ☽ in the 1st or 10th H., and afflicted by ☽, the mother is diseased; the ☽ in the 10th H., ☐ or ☿ ☽ from an angle; the ☽ at a Solar Rev. passing the place of ☽ at B.; the ☽ to the ☐ or ☿ the ☽ or ☽ by dir.; the ☽ to the ☿ or P. Dec. Regulus if the ☽ be hyleg; an eclipse falling on the radical ☽ in a child's map; ☽ passing over the place of the ☽ or ☽ at B. by tr., or at a Solar Rev.; ☽ affl. in the 10th H. at B.; ☽ in the 10th H., ☐ or ☿ ☽; ☽ or ☽ ☽ or evil asp. the ☽ in the 4th, 5th, 7th, or 8th H., the mother is subject to many diseases; ☽ in the 4th H. in a male nativity, or in the 10th H. in a female, and afflicted by the ☽ or ☽; ☽ cadent, slow in motion, ☽, and afflicting the ☽; ☽ in evil asp. the ☽ or ☽, and in angular or succedent houses; ☽ succedent to the ☽ or ☽, and in ☐ or ☿ ☽ to them, and with ☽ and ☽ ☽; the Asc. to the ☐ or ☿ the ☽ or ☽ by dir.; the M.C. to the ☽, P., or evil asp. the ☽ or ☽ if either be weak or afflicted at B.; lord of the 6th in the 4th or 10th H., the mother is afflicted or sickly. (See Afflicted, Early Death, Fevers, Short Life, Sudden Sickness, and the various paragraphs in this section).

Early Death Of—☽, ☽, or ☽ in the 10th H., and afflicted by the ☐ or ☿ of planets; lord of the 10th a malefic in the 8th, and afflicted. These influences may also apply to the 4th H., according to the sex of the child, as the 4th H. rules the mother in a male nativity, and the 10th H. the mother in a female horoscope. (See Short Life, Sudden Death, in this section).

Eyes—Or Face—Hurts To—The ☽ in the 1st or 10th H., and afflicted by ☽; the ☽ to the ☿ or ill-asp. ☽ or ☽ by dir.; the ☽ ori. and angular, and ☐ or ☽ ☽ or ☽; ☽ or ☽ angular, ☐ or ☿ ☽. (See "Eyes" under Father).

MUCOUS—Mucus—Muciparous—Mucous Surfaces—Mucous Membranes—Mucous Discharges and Exudations—The Mucous System—Phlegm—Sputum, etc.—Mucous Discharges are ruled in general, and as a fluid, by the δ . The \times sign, and the watery signs in general, also rule over, and greatly influence the secretion, flow, and production of, and especially in pathological and disease conditions. Mucus is also strongly influenced and acted upon by the ν sign, which sign rules the Skin and Surfaces, and the \odot and δ acting thru this sign tend to greatly influence mucous secretions, and especially those associated with skin disorders. (See what is said about the Mucous System, the ν sign, and the Splenic Diathesis, in the Introduction under Knees). The Saturn Group of Metals tends to have a pathological action on the Mucus, Cutaneous, and Osseous Systems, and especially the metal Lead, which is a $\frac{1}{2}$ metal. Sulphur, a strong $\frac{1}{2}$ remedy, also tends to greatly influence the mucous membranes and secretions, and to modify their action and functions. Arsenic, a σ remedy, when given in large doses, acts as a powerful irritant to the mucous membranes, and especially the bronchial membranes. Phlegm is mucus from the Bronchial Tubes, and a number of paragraphs concerning Mucus are considered in the Article on Phlegm.

Inflammation—Of the Mucous Membranes—Catarrhal Disorders are Inflammations of the Mucous Membrane of the part involved. Acute Inflammations of Mucous Membranes may be caused by ☿ in the sign ruling the part, as ☿ in ♀ tends to colds on the lungs. Saturn in signs tends to a chronic form of irritation and inflammation, as ♃ in ♀ to consumption, continued and morbid expectoration, etc. (See such subjects as—Bronchitis, Catarrh, Conjunctivitis, Colds, Consumption, Defluxions, Diphtheria, Discharges; "Catarrh" under Nose; Pneumonia; "Inflammation", "Sore Throat", under Throat, etc.).

Mucous Membranes—Mucous Surfaces and Fluids—Diseases of—The ♃ rules the internal mucous surfaces in a general way, and the ♃ sign rules the outer mucous surfaces, and the comparatively dry Epidermis. Arsenic, a ☿ drug, is an irritant to mucous membranes. The mucous membranes and vascular tissues are influenced by ♀ in such diseases as result from Impure Blood, Poisoning of the System, and Sloughing Sores resulting from Pustular Diseases. Afflictions to the ♃, and the ♃ ☿ or ill-asp. ♃, and af-

flictions in ♃, tend to disorders of the mucous membranes, surfaces, and the normal secretion of mucus. (See "Exudations", and the various paragraphs in this section).

MUNDANE ASTROLOGY—This has to do with Events in the World At Large, and treats of the influence of the Planets, their Aspects, Conjunctions, Sign and House positions, as they affect different Countries, Nations, Cities, and Divisions of the World. This subject has much to do with the study of Calamities, Catastrophes, Cholera, Disasters, Drought, Earthquakes, Epidemics, Famine, Floods, Excessive Cold or Heat, Pestilence, The Plague, Wars, their causes and predetermination, etc. (See these subjects). Every student should make a study of Mundane Astrology, and a convenient Textbook is "Raphael's Mundane Astrology." Also see Pearce's Textbook of Astrology. (See "Planetary Aspects" under Aspects; Humanity, Mankind, Nations, Parallel, Perigee, Perihelion, Planets, Prevalent, Public).

Mundane Parallel Aspect—(See Parallel).

MURDER—Murders—Murderers—Murdered—Murderous—Mars and his afflicting aspects are the principal causes of murder, and of causing people to do things under sudden, exciting, and rash impulses. The afflictions of ♃ over the mind tend to premeditated murder, as resulting from malice, hatred, revenge, plots, jealousy, suspicion, treachery, etc., and especially when ♃ is conjoined with Mars. Murders which are committed under very sudden impulses are usually caused by ♃, and are of the unexpected and unpremeditated class, extraordinary, and unusual, tragical, etc.

MUSCLES—The Muscular System—Muscular—The Muscles, Tendons and Sinews are ruled principally by ♂. Also ruled by the ♃. Certain Groups of Muscles are ruled by other planets. Mars in any sign rules the muscles of the part, or organ, ruled by such sign. Thus, ♂ in ♀ rules the muscles of the head; ♂ in ♂, ♀, ♁, the Intercostal muscles; ♂ in ♁, the muscles of the stomach; ♂ in ♀, the muscles of the heart; in ♀, the abdominal muscles; in ♃, the thighs. Also ♃ rules the locomotor muscles of the hips and thighs. Mars in ♃, ♁, and ♀, the muscles of the knees, calves, feet, etc., and ♂ afflicted in any of these signs tends to affect and disturb the muscular action in the part. The Motor Nerves, which supply the muscles, are also ruled by ♂, and influenced by ♀, and afflictions to ♂ and ♀, or by them, tend to disturbed muscular action, cramps, spasms, paralysis, etc. The muscles of the Genito-Urinary Organs and System, as a whole, are ruled by ♂, as ♂ rules the external Genital Organs.

GENERAL CONSIDERATIONS—

Activity—Muscular Activity—Mars draws upon the Glycogen in the liver for fuel for the muscles during muscular activity. Also during muscular activity, ♀ deposits Uric Acid over the body, causing Gout and Rheumatism. (See Deposits, Glycogen, Gout, Rheumatism, Urea, Uric, Wastes).

Body—A Muscular Body—Athletic—The ☉ Sig. in ♂, proud of his physical strength; the ♃ in ♀; ♂ rising at B., more muscular than corpulent; ♂ in ♀ or ♀; given by ♂; ♀ in ♀. (See Athletics, Exercise, Sports; "Body" under Strong; "Strength" in this section).

Strength—Muscular Strength and Power—Strong Muscles—Given by ♂ and the ♂ signs ♀ and ♀. Also assisted by the good aspects of ♀ to ♂, and with the ☉ and ♃ in favorable asp. to ♂ also. The bad aspects of ♀, the ☉ or ♃ to ♂ tend to give strength, but with more danger of disease, strain, or accident. Neptune, ♀, ♀, and the ♃ tend to less muscular strength and power.

The 8 and # sign people often have strong and muscular bodies, and also m develops muscular strength by exercises and physical culture. The O Sig. in 8, proud of his physical strength. The mutable signs do not tend to give much muscular strength, and especially X, which is weak, and tends to give corpulency. The mutable signs tend to give agility rather than muscular strength, except X, which is a rather weak sign physically, and tends to dissipation, drink, lethargy, slovenliness, lassitude, etc. Some general aspects which give muscular strength are—♂ in the 6th H. in m, and well-ascpected by the O and D; ♂ rising at B. in ♀ or m, and well-ascpected by the O, D, and H; ♂ ♂ H in m in the 6th H.; ♂ * or Δ the Asc. great muscular strength; the D ♂ H in II, and well-ascpected by the O and ♂. Contortions—(See Contortions).

Contractions—Of the Muscles—H in any sign, and afflicted, tends to erratic and spasmodic contractions in the part ruled by the sign. Also h tends to contractions due to cold, deposits, impeded functions, as his influence is to hinder, suppress, and interfere with the nerve supply to a part, and as indicated by the sign he is in at B.

An alternating contraction is called a clonic spasm of the muscle. A continued rigid contraction is known as a tonic spasm. There are various movements in the muscles, due to contractions, such as jerkings, tremors, tremblings, irregularities, etc., due to the nature and aspects of the afflicting planet or planets. An exaggerated muscular contraction is often caused by a ♂ of ♂ with H, known as Hyperkinesia. Irregular, Alternate, and Spasmodic Contractions are the work of H, while a continued contraction is more apt to be caused by h, and to become chronic, which may result in a deformity. In intensified muscular contractions ♂ combines his influence in the configuration. (For Contractions in the various parts of the body see Contractions; "Contractions" under Anus, Arms, Face, Feet, Limbs, Neck; "Muscles and Limbs" under Father. Also see Action, Clonic, Cramps, Hyperkinesia, Involuntary, Myoclonic, Opisthotonus, Paramyoclonus, Spasmodic, Tetanus, and the various paragraphs in this section).

MUSHROOMS—Ruled by Ψ.

MUSIC—Musicians—

Fond of Music—Has Musical Ability—Denoted by ♀ and ♀ strong at B. Venus especially rules music, and when well-aspected with ♀ gives the higher and inspirational musical genius. The ♀ sign favorably placed and occupied gives manual dexterity, and a good touch in musical work and piano playing. The fire and water elements are also strong in the map, as they rule strongly over the emotions. Taurus and ♄, the signs of ♀, are musical signs, but ♄ gives better executive ability than ♄. The ♄ and ♄ signs also give musical ability. The special areas of the signs which give musical ability and genius are the 16° 8 and m; the 15° of the cardinal signs, and espec. of ♀ and ♄, and also the 24° of cardinal signs; the latter degrees of ♀ and ♄, and the first few degrees of m and ♄. As ♄ rules the hearing, this planet when well configured with ♀ and ♀, and otherwise favorably placed, tends to give a good ear for music, and to detect all inharmony. Other general influences found in the maps of musical people are the ☉, ♃, or ♃ in ♄ or ♄; ♃ and ♀ configured with ♃; ♀ in ♄ or ♄; ♀ in the Asc. near the horizon, or ♀ in ♃ gives a musical voice; ♀ Sig. ☉, ♄, or ♄ ♀; ♄ or ♄ on the Asc. or M.C.; many planets in bicorporeal signs. (See Geniuses, Prodigies; "Influence Of" under Libra, Taurus, Venus).

Music Halls—Case—Killed In a Fire In a Music Hall—See "Lafayette", No. 812, in 1001 N.N. (See Amusements, Theatres).

Singers—♀ ruler at B., rising in the Asc., and well-aspected, tends to make good singers, and espec. with ♀ rising in 8. Also, ♄ or ♄ on the Asc., the signs of ♀. Loud singing and straining of the voice should be avoided when ♀ is afflicted in 8 at B., as ♄ here often tends to nerve disorders of the larynx and vocal cords. (See "Hoarseness" under Larynx; "Musical Voice" under Voice).

MUSTARD—Sinapis—(See Rubefacient, Sinapis, Vesicant).

MUTABLE—Changeable—The Mutable Signs, etc.—

Diseases of the Mutable Signs—Diseases Ruled By—The Common Signs show Asthma, Blood (Poor Blood, Spitting of Blood); Bowel Disorders, Bronchial Disorders, Consumption, Cough, Dejection (Mental); Depression (Mental); Diabetes, Dropsy, Extremities (Diseases In); Kidney Disorders, Lung Diseases, Melancholy, Negative States of Mind, Nervous Diseases, Neurasthenia, Respiratory Disorders, Sciatica, Scurvy, Spasms, Tuberculosis, Worry, etc. (See these subjects).

Mutable Disposition—A Changeable, Vacillating, Restless, and Negative Nature—Given by the mutable signs, such signs on the angles at B., or many planets in them; the 3rd Decan. of ♄ on the Asc. (See "Lack Of" under Concentration; "Mind" under Instability; "Negative Nature" under Negative; Plastic, Restless, Vacillating, etc.).

Mutable Signs of Zodiac—Also called Common Signs, Flexed Signs, and Acute Signs. These signs are ♀, m, ♄, and ♄, and are closely allied with the cadent houses, the 3rd, 6th, 9th, and 12th Houses. (See Cadent). These signs relate to Thought. Flexibility is the main characteristic of the mutable signs, and people born with many planets in them are more amenable to suggestion and treatment. These signs form the Mutable Cross, and are all in ♀ or ♄ aspect to each other, and planets and afflictions in any of them tend to affect or afflict parts or organs ruled by all the common signs. (See "Disease" under Nature). These signs are ruled by ♃ and ♃. Resistance to disease is low with many planets in common signs at B., and especially if the planets are out of dignity, setting, B, below the horizon, and badly afflicted, and the mutable signs are more identified with disease than the cardinal and fixed signs. The m people especially court disease, and think and brood much about their health conditions. (See Virgo). The m and ♄ signs, and the 6th and 12th Houses, both have to do with matters of health and sickness, hospitals, asylums, etc. (See Asylums, Hospitals, Pisces, Sixth House, Twelfth House). People born under these signs are more passive, amenable to suggestion, and are subject to many diseases, but easily cured if under the right treatment, but disease may also be greatly prolonged with them, and become chronic, if under evil influences, and bad suggestions as to their condition and cure. People born with all four of the common signs on angles are more vacillating, changeable, and difficult to cure, as they are apt to change Healers frequently, go from one Healer, or System of Healing, to another, and for this reason they often become chronic invalids, and die an early death. Common signs on the angles also increase the chances of Insanity unless the mind is well controlled, and especially if the ♃, ♃, and the Asc. are badly afflicted at B. Pisces is considered the weakest of the common signs, and this sign on the Asc. at B. tends to give a very weak constitution, and also to corpulency, flabbiness of muscle and tissue, a watery constitution, and less vitality. Afflictions in ♄ tend to affect the lungs, bowels, thighs, and feet. (See Pisces). Gemini is the strongest of the common signs, is a positive and highly intellectual sign, and gives more power to resist and fight off disease. (See Gemini). Also, ♄ is a strong, fiery, masculine, and vital sign, and when on the Asc. at B. gives good vitality. (See Sagittarius). The mutable signs are Motive in Temperament, and correspond to the legs, and motion. Gemini, ♄, and ♄, are also called double-bodied signs, and tend to produce Twins, Monsters, and Hermaphrodites. (See Double-Bodied).

Rulership of the Common Signs—The Common, or Mutable signs, bear rule especially over the Arms, Bowels, Digestion, Extremities, Feet, Glandular System, Hands, Legs, Limbs, Lungs, Nervous System, Thighs. (See these

subjects). For further study see Angles, Cardinal, Curable, Fixed Signs, Incurable, Mutation, Ninth House, Residence, Sixth House, Suicide, Third House, Twelfth House.

These degrees on the Asc. at B., or when such degrees contain malefics, are supposed to cause Deformities, Distortions, Lameness, Mutilations, and especially Lameness. MYSTERIOUS—Strange—Extraordinary—Peculiar—Vague—Obscure, etc.

Mysterious Death—Mysterious and Sudden Death—Caused by ♄ or ♃; ♄ the afflicting planet; ♄ afflicted in the 8th H.; ♃ afflicted in the 8th H., or afflicting the hyleg, tends to a strange and mysterious death, and in an uncommon, sudden, and extraordinary manner; the evil aspects of ♄ or ♃ to the hyleg at B., and by dir. (See "Mysterious Death" under Children; Curious, Extraordinary, Remarkable; "Death" under Strange, Sudden; Trance, Untimely, etc.). Case of Mysterious Death—See "Mysterious Death", No. 362, in 1001 N.N.).

Mysterious Diseases—Obscure Diseases—Vague—Having a Psychic Rather Than a Physical Origin—♄ diseases. (See Extraordinary; "Imaginary Diseases" under Imagination; "Obscure; "Diseases" under Peculiar; Praeincipients, Pseudo, Psychic).

Mysterious Sayings—(See Demoniac).

Mystery—Fond of Mystery, Mysterious Doctrines and Studies, and of The Mysteries—(See Metaphysics, Mystical, Neptune, Occult, Philosophy, Perception, Psychic, Science, Truth; "Influence Of" under Uranus).

MYSTICAL—Inclined to Mystical Studies and Practices—Having the Power of Spiritual Sight and Illumination—Intuitive—People who are mystical usually have the Pineal Gland more fully developed than the ordinary person. This Gland is ruled by ♄, the planet of Spiritual Sight, and mystical people are born under the strong influence of ♄; and have ♄ in ♃, the Asc., M.C., 9th H., or ♄ ♃ ♃. Mystical people are in greater danger of obsessions by evil spirits, and Spirit Controls. Uranus is the planet of Occultism, rather than Mysticism, but ♃ conjoined with ♄ aids in giving mystical power, and a desire for Illumination and greater spiritual power and sight. Also ♃, when powerful in the nativity, or conjoined with ♄, renders one mystical, and a confederate in secrecy. (See Hypnotism, Magic, Metaphysics, Neptune, Ninth House, Occult, Philosophy, Psychic, Religion, Science, Spiritual, Truth, etc.).

MYXOEDEMA—Cretinism—Caused by afflictions to ♃, the ruler of the Thyroid Gland; Subs at AT, AX, LCP, SP. This is a disease with mucus-like dropsy, and also is often accompanied by spade-like hands, and with Idiocy, Goiter, and an undeveloped body. (See Cretinism, Dwarf, Goiter, Idiocy, Undeveloped).

N

NADIR—This is the point below the Earth, directly opposite to the Midheaven, or Zenith, and is the beginning of the cusp of the 4th H. and planets occupying the Nadir at B. are considered very strong in their influences to cause disease, and especially when malefics are so situated. The Nadir in a map of the Northern Hemisphere becomes the Midheaven if the native removes to the Southern Hemisphere. Therefore, if a group of malefic planets occupy the Nadir and the 4th H. at B., the native should remain in the Northern Hemisphere where they have less power to cause disease or misfortune, for if he removes to the Southern Hemisphere, he brings these planets to the Midheaven, and makes them powerful for disease, misfortune, or loss of vitality, according to their nature and aspects at B., etc. For this reason, people crossing the Equator, changing Hemispheres, tend to greatly change their fate in life, have misfortune, illness, early death, or good fortune, according to the conditions of their natal map. People born with ♃ ♄ ♀ on the Nadir would thus tend to have better fortune by crossing the Equator, and living in the Southern Hemisphere. If the malefics were all elevated at B., and near the Midheaven, they also would tend to benefit in health if they removed to the Southern Hemisphere, for they would then be on the Nadir of their map, and the polarity changed. Thus, in disease, and the cure of disease, and to change one's fate in life, the map of birth should be carefully studied along this line, and a proper location chosen according to the rules for location and residence. (See Abroad, Foreign Lands, Fourth House, Location, Misfortune, Nations, Native Land; "Place of Birth" under Place; Polarity, Residence, Travel, etc.).

NAEVUS—Nevus—Birthmarks—A Congenital Cutaneous Blemish—Birthmarks are supposed to correspond with the planetary positions at the time of birth.

Face—Naevus On—(See "Naevus" under Face. For further influences along this line see Blemishes, Congenital, Defects, Disfigurements, Freckles, Imperfections, Marks, Moles, Prenatal Epoch, Scars, etc.)

NAILS—Nails of the Fingers and Toes—The Nails are connected with the ♍ sign, and are supplied by the Virgo Salt, Potassium Sulphate. Different kinds and shapes of Nails are given by the various Temperaments. In diagnosis, and as an index of disease, health, and the state of the constitution, the Nails make an interesting study. Thus pink nails indicate a good circulation, and a white background under the nails, an anaemic state, low vitality, etc. When there are many planets in one sign at B. the nails change shape as the native gets older. People born under ♀ tend to have

beautiful nails, to harmonize with the comeliness, grace and shapeliness of the rest of the body. Born under ♂ tends to make the nails strong, durable, and with resisting and fighting power when they are used in self-defense. When born under ♃, the nails are dryer, more brittle, lacking in vitality, circulation, etc., and break more easily, and are also more ugly and ill-shaped, and partake of the qualities of ♃. The nails of a ♀ person are usually thin, long, may have ridges and crack easily, and such characteristics are a strong sign of intellectuality, and of a studious and philosophical temperament. And so on with each of the planets. Judge the nature of the nails according to the characteristics of the ruling planet, and the predominating signs and planets at B. Note the following paragraphs about the Nails—

Blue Discolorations—The Half-Moons Dark—The sign of heart trouble, bad circulation, and caused by afflictions in the heart sign ♃, and especially ♃ in ♃. Also caused by ♃ on the Asc., and afflicted. (See Cyanosis; "Nails" under Heart).

NATIONS—Countries—Peoples—Races—Rulership of the Various Nations—A list of the Rulership of Countries and Nations can be found in Lilly's Grammar of Astrology. A list will also be given here, as far as I have been able to gather up to this time. The Π sign is said to rule North America, and the benefic planets in Π at B. would make America more fortunate for residence. If a person born in England, ruled by φ , should have γ and η in Π at B., he would be apt to have more good fortune in North America than in England, and especially if he had malefics in φ at B. However, before removing from one's Native Land, the conditions over the 4th and 9th Houses should be noted, and to know whether the map is fortunate, or unfortunate, for Foreign Residence or Travel. For these rules see Fourth House, Location, Native Land, Ninth House; "Place of Birth" under Place; Residence, Removals, Travel, etc. The following paragraphs give the rulership of the Signs of the Zodiac over the various Nations, and in choosing residence Abroad, see what signs you have γ and η in at B., and choose a Country ruled by such signs, if you leave your Native Land. Also it is well to travel and locate in the direction of the benefic planets in your map, provided there are no malefics with them at B., and in the same direction.

NATIVE—Natal—Native Country—Native Land, etc.—

Native Country—The Native Land—The Country of Birth—Hereditary tendencies, and also the nature of the individual environment, are indicated by the sign which rules the Country of Birth. If it is a positive sign, an electro-positive environment is indicated. If a negative sign, an electro-negative environment, etc. In long and chronic diseases the Native Land is often a curative agency in disease if the environment is suited to the constitution. The male is positive by nature, and the female negative. A male, or positive person, being born with the ☉ in ♋, a negative ♃ sign having a potentiality contrary to his own, would be out of place in a Country ruled by the ♋ sign, but such conditions would benefit a female. Thus ♃, ruler of ♋, may thus be evil for a male, but good for a female. Health conditions will tend to be better when a male having the ☉ in a positive sign at B. lives and locates in a Country

ruled by a positive sign, as ♃, ♀, ♁, etc., which location gives a potentiality similar to his own, etc. A female with the ☉ in a negative sign at B. would tend to thrive better in a Country ruled by a negative sign, as one ruled by ♃, ♁, ♀, etc. By following these illustrations up, and applying them to all the Signs, and choosing a Country for residence accordingly, the magnetic conditions over each individual may be better balanced. (See Location, Nations, Polarity, Residence; "Native Land" in this section).

Dangers and Perils—Many Dangers and Perils to the Native—(See "Many Dangers" under Danger; "Narrow" under Escapes; Perils).

Native Land—Should Remain In—Should Not Remain In—

(a) Should Remain In—The ☉, ♃, ♃, or ♀ well-aspected in the 3rd or 4th H.; Planets well-aspected in the 4th H.; or Benefics in the 4th in good aspect to the ☉ or ♃; the ☉, ♃, ♃, or ♀ in the Asc., and well-aspected, will tend to give the native success and good health either at Home or Abroad.

(b) Should Remove from Native Land—Malefics in the sign ruling his Native Land; ♃ or ♀ in the 9th H., or rulers of the 9th, and with no malefics in the 9th, and also with the 4th H. badly afflicted by malefics. (See Abroad, Foreign Lands, Location, Nativ; "Place of Birth" under Place; Residence; "Fortunate In Travel", and the various paragraphs under Travel).

Native Place—(See "Place of Birth" under Place).

NATIVITY—Chart of Birth—Figure of the Heavens for the Moment of Birth—The Horoscope of Birth—The Time When the Child Draws the First Breath—The Nativity, or Horoscope of Birth, shows the tendencies and temperament of the native, the environment and external conditions he will encounter, and how he will manifest during the present Incarnation if he drifts with the influences shown. In every nativity there are the good and evil influences. The good should be allowed to manifest, and the evils overcome and transmuted. In every map of birth lies the secret of God's Will over the native, his place and work in life, the niche he is to fill if he finds out what it is. The Nativity shows what line of work to follow for success, advancement, and usefulness; shows the possible health conditions, the parts of the body weakest, most sensitive and ill-fated, and the prospects along health lines; the map shows the financial indications, the relation of the native to neighbors, relatives, children, friends, the Public, etc., for good or ill; shows the marriage conditions, the sign and birthday of the type of person to marry; the prospects of a happy or unhappy marriage; shows who will be the friends, and his possible enemies, and the signs they are born under. In fact, the Nativity deals with every possible condition that will be apt to confront the native, and the nature of the Personality, and the Lower Mind, and what he will

have to contend with along moral lines. Man is born with Free Will to use this map as he will, and as he sows, so will he reap. Libraries have been written along this line, and the nature of the Chart of Birth, what it shows and indicates, and every student will have to make a deep and thorough study of the Elements of Astrology in order to understand life, himself, and destiny, and to obey the Axiom, "Man Know Thyself." More is said along this line under the following subjects. (See "Planetary Baptism" under Baptism; "Moment of Birth" under Birth; Character, Destiny, Environment, External, Fate, Heredity, Horoscope; "Map of Birth" under Map, Radix, etc.). Almost every subject in this book has to do with the Map of Birth, the Nativity, and your relation to it Mentally, Physically, and Spiritually. Look in the alphabetical arrangement for the subject you have in mind.

NATURAL—The ♃ rules the Natural and Expulsive Energies over the body, and also the Natural Functions, and especially the natural functions in the female. The ♃ is the source of the natural powers of the body, as the natural powers of each organ, or part, are maintained by the regular and proper functions of such part. (See Energy, Expulsion, Females, Functions; "Influence of the Moon" under Moon).

Natural Abilities—Innate—Inborn—Hereditary, etc.—

(a) Great Natural Abilities—(See the various paragraphs under Ability, Active, Ambition, Energetic, Excellent, Genius, Gifted, Good, Great, Inventive, Learning, Mathematical, Mechanical, Metaphysics; "Good" under Mind; Music, Orator, Philosophy, Prodigies, Qualities, Reading, Scholar, Speech, Study, Talents, Vocation, etc.).

Natural Death—Ordinary Death—Death from Natural Causes—Death in the Ordinary Course of Nature, and Not by Accident, Violence, or by Extraordinary Means—When a natural death is judged to ensue, the 6th and 8th H. are taken into consideration, and the signs in which the malefics are placed. Note the hyleg, the 8th H., and the nature of any planets in the 8th, and also the ruler of the 8th. A benefic planet well-aspected in the 8th H., as ♃ or ♀ in the 8th, or ruler of the 8th, and with no malefic influences in the 8th H., indicate a natural and easy death, and to die in comfort, and in order, and usually at home; ♃ or ♀ in the 8th H., and not afflicted by malefics; ♃ or ♀ in the 4th H., and not afflicted, and with no malefics in the 8th; ♃, ♀, ♂, or the ♃, in the 8th H., well-aspected, and the Asc. hyleg also

favorably aspected; ♃ in the 8th H., well-aspected, or in ♃ or ♃ in the 8th; in Hor'y Q. a natural death is indicated when ♃ or ♀ are lords of the 8th, or in the 8th, or aspecting the cusp of the 8th H. by a * or Δ, and the death will be by such diseases as shown by the sign they are in, and the part of the body they govern; the lords of death possessing their own natural and peculiar properties, and the malefics H, h, or ♂ elevated above them, tend to death in the ordinary course of Nature; lord of the 8th in the 8th; lord of the 1st in good aspect to, or stronger than lord of the 8th, or planets in the 8th, or if the benefics be lord of the 8th, or in the 8th, or if there be translation by good aspect. (See "Easy Death" under Death; "Death" under Home).

Natural Defects—In Body or Mind—(See the various references and subjects under Blemishes, Body, Congenital, Defects, Mind).

Natural Faculties—Are ruled by the ♃. (See Faculties).

Natural Forces—In the Body—The Natural Powers—The ♃ is the source of the Natural Forces and Powers of the body. The ☉ and ♂ also tend to endow the bodily forces with life and greater activity. The ♃ afflicted in ♀ tends to lower the natural powers of the body, the vitality and tone, and especially the functions in females. Saturn tends to weaken, subdue, destroy, and to cause death and decay of the natural forces by his afflictions. (See Active, Diminished, Energies, Forces, Functions, Hindrances, Increased, Powers, Retarding, Suppressions, etc.).

Natural Functions—In the Female—Under the rule of the ♃. (See "Functions" under Females; Functions, Menses).

Natural Habits—(See "Natural" under Habits).

Natural Powers—(See "Natural Forces" in this section).

Natural Temperament—The Bodily Temperament—The Physical Temperament—This Temperament is ruled by the Asc., the sign rising, and especially by the Decanate of the rising sign. (Note the various paragraphs under Temperament which refer to the body, such as Cold, Cold and Moist, Hot, Hot and Dry, etc. Also see Decanates).

Unnatural—Contrary to Nature—(See Abnormal, Unnatural).

NATURE

Active Nature—(See Active, Ambition, Angles, Brisk, Cardinal, Energy, Force, Movement, Motion, Positive, Powers, Quick, Rapid, Walk, etc.).

Curing—Nature-Curing—Nature Cure—☿ is the sign of, and this sign strong at B., and well-occupied, tends to give the magnetic forces which enable one to effect cures along Natural lines. Uranus strong at B. also tends to make Natural Healers, Magnetic Healers, Chiropractors, Naturopaths, Masseurs, Drugless Healers, Faith Healers, Spiritual Healers, Christian Science

Healers, etc. (See "Nature Cure", and the various paragraphs under Healers).

Death—Nature, Kind and Quality of the Death—The Terminus Vitae—Species of the Death—The nature and quality of the death are ruled over by the 8th H., the house of death, and indicated by the 8th H. and the nature of the planets in this house, or ruler of the 8th. The kind of death depends chiefly upon the nature of the planets which by direction tend to cause death, and also to forecast the nature of the final illness, the signs in which such planets were located at B. must be considered, and to know the part of the body liable to be attacked. The nature of the death is to be judged principally by the Directions in operation at the time. If ζ is the afflictor, death will most likely be from some ζ disease, as from Cold, Cough, Consumption, Rheumatism, etc., or by a blow or fall if violence is indicated. Saturn when afflicting the hyleg at B., or by dir., or holding the dominion of death, causes death by ζ diseases, and so with each of the planets when they hold the dominion of death in the natal map, and afflict the hyleg at B., and by dir. Even the Benefics cause death when so situated. When the planet is known which afflicts the hyleg, see the diseases ruled by that planet for the one which may cause death, and the disease under that planet most likely indicated by the map of birth. The nature and kind of the death is also chiefly denoted by the planet which most afflicts the \odot or J , and the sign and house in which placed, and also by the 6th H. conditions. (See "Death" in the Disease Section under each of the planets, where the kind and nature of death are noted under each planet. Also see Anareta; "Quality" under Death; "Death" under Kind, Quality, Species; "Kind of Death" under Old Age).

Disease—Nature of the Disease—Quality and Type of the Disease—The nature and state of the planet from which the J is separating at decumb. shows the cause and nature of the disease, and the state of the sick. (See Sick). The nature and cause of the disease, or sickness, illness, fever, etc., are shown and indicated by the signs on the 6th H. and the Asc., and also by the position of the Significators. Also note the sign in which the majority of the planets are posited at B., and especially the signs which contain the malefics. Shown by the planets which afflict the \odot , J , or Asc. The nature of the disease is said to be known from the signs containing the lords of the 1st and 6th H., and the J , and whether they are fiery, airy, earthy, or watery signs, as each of these classes produce diseases of a different nature. (See "Signs" under Air, Earth, Fire, Water). In Hor'y Q., to judge of the nature of the disease, take the sign containing the J for the nature and place of the disease. If not the J take the sign on the cusp of the 6th H., and next to it the signs containing the Dispositors of the \odot and J , and there can be little doubt

of the nature of the disease if all, or nearly all, of these agree. If they disagree it is an indication that the Querent has no particular anxiety in the matter. Cardinal Signs show Mental Derangement, Weak Stomach, Kidney and Liver Complaints, Fevers, Indigestion, Vertigo. The Fixed Signs indicate Heart Trouble, Diseases of Throat, of the Urinary Organs, Bronchitis, Stone, Gravel. The Common Signs show Poor Blood, Dropsy, Spitting of Blood, Consumption, Sciatica, Bowel Disorders. (See Ascendant, Cardinal; "Fixed Signs" under Fixed; "Mutable Signs" under Mutable; Parts; Rising Sign; "Quality" under Sickness; Sixth House, Species, Type).

Operations—The Four Operations of Nature—These are based upon the four great Elements, Water, Air, Fire, and Earth, and are known respectively as Congelation, Volatilization, Combustion, and Condensation. These four fundamental and essential operations of Nature are synthesized by Hydrogen, Nitrogen, Oxygen, and Carbon. Hydrogen and Congelation are related to the Watery Signs of the Zodiac, C , m , X . Volatilization and Nitrogen are related to the Airy Signs, II , sc , sc . Oxygen and Combustion are related to the Fiery Signs P , Q , f . Condensation and Carbon are related to the Earthy Signs B , m , D , and the fundamental operations in Nature result from the combinations of the elements in various degrees. Heat, Light, Electricity, and Magnetism are the forces which animate the elements of Water, Air, Fire, and Earth, and bring them into correlation with the Universe. (See Air, Earth, Fire, Water, and "Signs" under these subjects; also see Carbon, Combustion, Condensation, Congelation, Electricity, Ether, Heat, Hydrogen, Light, Magnetism, Nitrogen, Oxygen, Rhythm, Volatilization, etc.).

(See Carelessness).

NATUROPATHY—(See this subject under Healers; Medical Astrology; "Nature Cure" under Nature).

Physic tends to nauseate if given when the ♃ is in ♀, ♁, or ♃, the Ruminant Signs. (See Antiperistalsis, Emetics, Incoordination, Peripheral, Physic, Ruminant; "Irritations" under Stomach; Vomiting, etc.).

Bilious Nausea—♃ in ♁, or in ♂ or ill-asp. the ♃. (See "Biliousness" under Bile).

NAVAMSA—This is a term used in Hindu Astrology, and is much discussed and mentioned in the British Journal of Astrology, and some mention of it will be given here. (See Hindu). The Navamsa is a division of each Sign of the Zodiac into nine parts of 3.20° each, and each part having a sub-influence of the 12 Signs in strict rotation. Thus ♀ from 0° to 3.20° is the ♀ Navamsa; from 3.20° to 6.40° is the ♁ Navamsa, etc., and so on around thru the Signs. By following this out you can erect and complete your own Table of Navamsas. Navamsa is a Sanscrit term, and means nine-fold division. This is a Hindu division of the Signs, and is not spoken of in European Astrology, but should be studied by Western students, as these sub-influences have been able to account for many diseases and conditions not found or explained in our Western Textbooks. The parts of an organ afflicted are shown by the Navamsa. Thus ♀ rules the head as a whole, but the subdivisions, as Eyes, Nose, Lips, Forehead, etc., would be indicated by the Navamsa. In the heart, the valves, pericardium, endocardium, auricles and ventricles, etc., would be shown by the Navamsa subdivisions of the ♀ sign, to show the rulership of the various parts. Consumption is an affliction of the common signs, and the common sign subdivisions of such signs. Thus the 28° of ♀ and ♃ govern Consumption, as they are in the ♀ and ♃ Navamsa of these signs. (See Consumption, Convulsions, Decanates).

NAVEL—Umbilicus—Under the external rulership of the ♃ sign. Also ruled by ♀ and the 7th H.

NEBULOUS STARS—Nebulae—Nebulous Clusters—Nebular Areas—Nebular Spots—The principal Nebulous Stars mentioned in the Textbooks of Astrology are the Pleiades, Antares, the Ascelli, Hyades, Castor, Pollux, Praesepe, Cloudy Spot of Cancer, Mane of Leo, Sting of Scorpio, Arrow Head of Sagittarius. These Nebulous influences, and their places and degrees, signs, etc., as they appear thru the Zodiac, are given in the front Glossary of Simmonite's Arcana of Astral Philosophy, and also you can find them listed in the various Textbooks and Dictionaries of Astrology. They are listed in this book. Look for them in the alphabetical arrangement. The Nebulous Stars, when directed to the ☉, ♃, or Asc., or rising with the ☉ or ♃ in the Asc. or 10th H., tend to Banishment, Blindness, Cataracts, Decapitation, Disgrace, Dreadful Diseases; Bad Eyes, and Hurts to Eyes; Evils, and every Evil that can befall Humanity; Hurts to Face, Violent Fevers (see Fever); Glaucoma, Imprisonment (see Prison); Miseries, Murders, Quarrels, Rape, Ruin, Sickness, Stabs, Violent Death (see Violent); Wounds, Wretchedness, etc. (See these subjects). These Clusters impair the physical sight by interfering with the etheric vibrations sensed by the retina of the eye, and greatly afflict the sight, and especially when these Nebulous Areas are in ♂ or bad aspect the

☉ or ☽ at B., or in angles with the Luminaries. The ☽ in an angle, afflicted, and with Nebulous Stars, tends to a defect in the Sight. The ☉ or ☽ in a Nebulous place at B., and afflicted by a malefic, tend to eye trouble. Also if the malefic be in one of these places, and afflict the ☉ or ☽, there is danger to the eyes. The influence of ♀ is said to be with these Areas. The Nebulous Areas are mostly of the nature of ♂ and the ☽ combined. (See Blindness, Eyes, Optic, Retina, Sight; "Fixed Stars" under Stars).

NECK—The Part of the Body Between the Head and Trunk—The Cervical Region—The Neck is under the external rulership of the ♄ sign. Is also ruled by ♀. NEPTUNE—This planet was discovered in 1846. Some Writers say this planet does not belong to our Solar System, but is an outside planet exerting more of a psychic and spiritual influence over Humanity, and tending to Involuntary Clairvoyance, Mediumship, Psychic Diseases, Weird States of Mind, etc. The older Textbooks of Astrology, as Lilly's Astrology, do not mention this planet. Some Writers say that Ψ is the higher octave of φ . Max Heindel says it is the higher octave of φ , and exerts an inspirational influence over the mind, and corresponds to the higher vibrations of φ rather than those of φ . Also Ψ is considered the higher octave of φ because he acts so strongly upon the Nervous System. (See the book, "Cosmo-Conception", by Max Heindel). At this writing not much is found about this planet in the Textbooks of Astrology, but the Magazines are well-filled with Articles on his nature and influence. Max Heindel, in his book, "The Message of the Stars", has given considerable information about Ψ , and information given by the Rosicrucians, and The Elder Brothers of Humanity. In this Article, the information and influences of Ψ have been collected and arranged, both from Books and Magazine Articles. Neptune is especially affiliated with the 12th sign κ , the sign which rules the Ocean, and the Seas, and

also with the 12th House. Neptune is considered strongest in his influence when in ♆. He is said to have his exaltation in the ♊ sign. From observation the influence of ♆ is said to be similar to that of ♃, and is Astringent and Contracting. (See Astringent, Contractions, Ocean, Pisces, Sea, Twelfth House, Waters). This Article has been arranged into three Sections as follows: Section One—General Considerations. Section Two—Neptune Rules. Section Three—Diseases and Afflictions of Neptune. See the following subjects in the alphabetical arrangement when they are merely listed in any of the three divisions of this Article—

— SECTION ONE —

GENERAL CONSIDERATIONS—Also see the Considerations in the Introduction to this Article.

Abstract—♆ in the abstract is semi-spiritual, occult, supra-material, ensnaring, and illaquetive.

Action Of—The action of ♆ is aesthetic, magnetic, negative, moist, warm, fruitful, mysterious, inconstant, seductive, ensnaring, treacherous, etc. (See the various paragraphs in this Article).

Acts Upon—Acts upon the Nervous System, and also upon the Moral and Spiritual Nature, and the Psychic Powers. Acts strongly upon the Pineal Gland, which Gland it rules, which is the Spiritual and Intuitive center in the brain, and also greatly influences the Emotions, and especially in Religious matters. See Emotions, Intuition, Morals, Nerves, Pineal, Psychic, Religion, Spiritual).

Afflictions Of—Evil Aspects of—♆ afflicts by his ♂, ♀, ☐ and ♁ aspects. This planet is seductive by his evil aspects, and tends to greatly deprave the moral nature, and also lead to the Drug and Narcotic Habit. His afflictions tend to a chaotic mind, false fears, weird states of mind, obsessions, spirit controls, and Astral disturbances, etc. For the influence of his good aspects see "Aspects" in this section. (See the Diseases of ♆ in Sec. 3 of this Article).

Anareta—♆ may become the Anareta when powerful at B., and afflicting the hyleg, and he usually disposes to death in a riotous manner, by assassination, violence, etc., when Anareta. (See Anareta).

Aspects Of—Good Aspects of—The good aspects of ♆, his ✱, △, etc., to the ☉, ☽, and ♀ tend to greatly enhance the psychic, spiritual and intuitive powers, and to give true and genuine clairvoyance, spiritual sight and foresight, and power to discern Truth. For his Evil Aspects see "Afflictions" in this section).

Chaos—The Planet of Chaos, Doubt and Fear—♆ is the planet of Fear, and Chaos, and Doubt, to ordinary Humanity, as, it is said, the Human Race is not yet very responsive to the higher and better influences of this planet. (See Chaos, Doubt, Fear).

Colors—Lavender. (See Colors).

Discovered—In 1846. See the Article on Neptune, Chap. XVIII, in Pearce's Textbook of Astrology.

Doubt—The Planet of—(See Doubts, Fears).

Drugs—♆ has association with drugs and narcotics, such as Cocaine, Morphine, Heroin, Opiates, and other soporifics and stimulants. (See Narcotics).

Emotions—Influence of ♆ Over—(See Emotions).

Environment—The lower vibrations of ♆ are ensnaring, enticing, and often lead to passionall excesses, and an immoral environment. (See Environment, External; "Morbid" under Imagination).

Evil Aspects Of—(See "Afflictions" in this section).

External Influences—The negative and afflicting influences of ♆ tend to unwise entanglements, sex excesses, and to lead the native astray, and into low and bad company. (See Companions, Environment, External, Licentiousness, Morbid, Nymphomania, Sensuality, etc.).

Eyesight and Neptune—(See "Nebulous" in this section).

Fear—♆, the planet of Chaos, Doubt, Fear, Timidity, etc.—(See these subjects).

Herbs Of—(See Herbs).

Hyleg and Neptune—♆ in evil asp. to the hyleg at B., and by dir., helps to destroy life, and to act as Anareta. (See Anareta, Hyleg).

Inclines To—♆ inclines to secrecy and hidden methods of work, deceit, treachery, etc., when afflicted at B., and by dir. (See Deceitful; "Secretive" under Secret; Treachery; "Tends To" in this section).

Indicates—♆ indicates Anaemia, Necrosis, Depletion, and Catalysis. (See Diseases in Sec. 3 of this Article).

Influence Of—The influences of ♆ by his afflictions are not always physical, but tend to be psychic, and to act upon the mind. The good aspects of ♆ to the ☉ tend to benefit the constitution psychically rather than in a physical way. Example of the Influence of ♆. Case—See "Neptune", No. 283 in 1001 N.N. (See the various paragraphs in this Article).

Inimical—The influence of ♆ is said to be inimical to the great majority of the Earth's inhabitants at this time, due to their materialistic tendencies, and lack of spiritual development. Neptune is attributed as the planet which will rule strongly over the new Sixth Sub-Race, and the Sixth Race, the foundations of which Races are now being formed. At this Stage and Era of the Evolution of the Earth, and of Humanity, people tend to respond more to the lower, or evil vibrations of ♆ than to his higher and spiritual ones, and to be greatly disturbed thereby, and especially along moral and sex lines, and to have chaotic, morbid, weird and sensuous states of mind. (See Chaos, Sixth Sub-Race, in this section).

Magnetic— Ψ is a magnetic and negative planet, and tends to render the mind and body negative, timid, and subject to a variety of affections, and susceptible to external influences and environment. In this regard Ψ has an influence similar to ν . (See Magnetic, Negative, Receptive, Susceptibility).

Mars and Neptune—These planets when in \odot tend to make one lawless, unrestrained, self-indulgent, and to possibly become an Atheist or Anarchist, and go to extremes in whatever they do, and also to be more subject to obsessions, and the influences of incarnate spirits, and the influences on the Astral Planes. (See Anarchists, Astral; "Atheistical" under Religion; Self-Indulgent, Unrestrained, etc.).

Mental Qualities— Ψ tends to make the native psychic, romantic, intuitive, spiritual, imaginative, and inspirational, according to his aspects. (See Aspects, Qualities, and the various paragraphs in this section).

Metals and Minerals— Ψ is said to rule Potassium, and such substances as Ambergis and Meerschaum.

Morals and Neptune—His afflictions and lower vibrations tend to loose morals, and morbid sex desires, and especially when afflicting the \odot , J , or Q at B. (See Aspects, Inimical, Tends To, and the various paragraphs in this section; "Loose Morals" under Morals).

Most Evil In— Ψ is most evil in his afflictions when in the 6th or 12th H. at B., or afflicted in m or X . The 6th H. and m are indicators of disease, while the 12th H. and X tend to bring sorrow, self-undoing and trouble. (See Sixth House, Twelfth House).

Nebulous Areas—And Ψ —The influence of Ψ is largely with the Nebulous Areas, which afflict the Eyes and the Eyesight. (See Blindness, Eyes, Nebulous, Sight).

Negative Planet—(See "Magnetic" in this section).

Neptune Persons—The Ψ person is often unconsciously deceptive, and without malice or predetermination. (See Inclines To, Tends To, and the various paragraphs in this section).

Nervous System— Ψ acts strongly upon the Nervous System, and for this reason is considered the higher octave of Q . (See Nerves).

Occult Influence Of— Ψ is a Mystical Planet fundamentally, but Occult in the abstract. (See "Abstract" in this section).

Octave Of—(See the Introduction to this Article).

Orbit Of—It takes Ψ approximately 164½ years to make one revolution in his orbit, and he is about 14 years passing thru one Sign of the Zodiac, which tends to prolong his afflictions over the various Signs and Classes of people, as Ψ in any sign tends, more or less, to afflict the people born under that sign unless they are Advanced and highly spiritualized. (See the Diseases in Sec. 3 of this Article).

Pathological Action Of—(See the opening statements in Sec. 3 of this Article).

Period Of—(See "Orbit" in this section).

Persons—(See "Neptune Persons" in this section).

The Pineal Gland, the center of Ψ in the brain, will be more highly developed in the future Ages to come, and people will have more Spiritual Sight, Intuition, Voluntary Clairvoyance, and the power to see and recognize Truth, Doctrine, and things as they are, and not as they seem to be, and when illusion, superstition, and fear will be done away with. (See "Inimical" in this section; Pineal, Pituitary).

— SECTION THREE —

DISEASES OF NEPTUNE—The Afflictions of Neptune—Neptune acts principally upon the Mind and Nervous System, the Emotions, the Psychic Powers, the Passions by his lower vibrations, and tends to chaotic and morbid conditions. The strong pathological action of Ψ over the Nervous System is considered a strong argument in favor of Ψ being the higher octave of φ , as φ is the ruler of the Nervous System in general. Neptune has more of a Psychic and Mental effect than physical in causing disease. Also the vitality of the physical body is increased by the good aspects of Ψ thru psychic and mental effects, and by creating greater poise, and intensifying the Spiritual Powers, the Higher Intuitions, and Spiritual Sight. Neptune is closely related to the Nebulous Areas, and tends to affect the Eyes and Eyesight of Man. Neptune tends to strange and mysterious diseases and afflictions, hard to explain

without a knowledge of the Occult and Mystical Sciences. Neptune has the most effect in a pathological way upon Sensitives, those very susceptible to Astral influences, and people who are nervous and high strung. The sicknesses caused by Ψ are chiefly of a depressive nature, and of a nervous tendency. The pathogenic and disease-producing influences of this planet are stronger when he is in the 6th or 12th H., or afflicted in the μ or κ signs, the signs afflicted with these two houses. (See "Most Evil In" in Sec. 1 of this Article). In a general way the pathological action of Ψ tends to Analgesia, Involuntary Clairvoyance and Mediumship, Obsessions, Spirit Controls, Psychic Disturbances; Dissipation of Functional Energy, and Atrophy of Process thru the cessation of functions; also causes laxity, relaxation, and lack of cohesion of parts. His pathological action is suggestive, delusive, ensnaring, hypnotic, analgesic, soporific, sleep-producing, anodyne, and with a feeling of torpor, lassitude, and a dreamy, chaotic, and weird state of mind, and even to demoniacal demonstrations, as in Obsessions and Spirit Controls. The following is a list of the Diseases and Afflictions of Ψ , as far as I have been able to gather from my reading, study, observation, and the careful examination of nearly 10,000 Maps of Birth of people, and their letters setting forth their diseases and complaints, during my career as a Physician Astrologer. Treatment—The treatment of Ψ diseases should be mostly Psychic and Spiritual, and thru the Will Power, and also by proper knowledge of Astral Influences, the Astral Planes, and the Entities thereon; a knowledge of Spirits, Elementals, etc., and how to deal with them, drive out evil Spirits, and to bring relief to those who are under Obsessions and Spirit Controls. The use of Suggestion to patients in the Hypnotic State has proven very valuable in these cases to effect cures, but the Operator must know the nature of the Forces he is dealing with, and how to rid the patient of them. Evil Spirits do not linger long in the presence of a Master who knows and recognizes them, and gives them their orders. (See "Psychic Healers", "Spiritual Healers", under Healers; "Treatment" under Hypnotism).

NERVES—Nervous System—Mercury is said to rule the Nerves in general, as φ rules the right Cerebral Hemisphere and the Motor Segment of the Spinal Cord. Neptune, as the higher octave of φ , also rules over, and strongly influences the Nerves, and acts upon the Nerves thru the Brain Centers, the Mind, the Psychic and Spiritual Powers, the Emotions, and acts especially upon the Pineal Gland, which Gland is ruled by Ψ . Uranus also has a very remarkable influence over the Nervous System, and especially upon the Motor

Nerves, disturbing their action, and tending to Erratic, Spasmodic, and Jerky Movements over the body. The Motor Nerves are ruled by H and ζ . Mercury exerts a nervous influence, and is usually badly afflicted in nervous and mental disorders. The Airy Signs are Nervous Signs, and on the Asc. at B. tend to nervousness. The \odot is also said to rule strongly over the Nerves and the Brain. The Nerves, acting as sinews, or wires of transmission for nerve force and nerve impulses and messages from the Brain and other centers, are ruled by the \odot . The nerves of the brain are fed by the rays of the \odot . The Common, or Mutable Signs, also strongly influence the Nervous System, and especially Π and ζ . The Nerve Sheaths are connected with the Ω sign, and are also under the rule of the δ . The Third House also rules and influences the Nerves, and the conditions of the 3rd House, the house of φ , should be studied in connection with Nervous Complaints. The Nerve Fibers are said to be under the internal rulership of the Π sign, the 3rd H. sign. The \equiv sign, the strong sign of H, also is a strong ruler over the Nervous System. For convenience of reference this Article is divided into two Sections. Section One—General Considerations. Section Two—Diseases of the Nervous System. See these subjects in the alphabetical arrangement when they are not more fully considered in this Article.

NETTLE RASH—Urticaria—(See Hives, Itch, Urticaria).

NEURALGIA—Pain in a Nerve—Neuralgia may occur in any part, or organ of the body, and is caused principally by ♃ afflicted in the sign which rules the part or organ. Also ♃ causes Neuralgia, and lingering pains in a part due to the deposit of wastes and minerals in the part, and interfering with function, elimination, secretion, excretion, etc. Uranus also contributes to Neuralgia when configured with Mercury. Mars causes acute neuralgic pains in a part; darting, sharp, shooting, or violent pains and Neuralgia in those parts ruled by the sign he may be in at B., as ♃ in any sign tends to draw heat to the part ruled by the sign, and to cause disturbances at times, pains, and an acute form of Neuralgia. The Neuralgia of ♃ is more chronic, dull, lingering, throbbing, more like an ache, but very severe

and painful at times. Mercury afflicted in ♀ tends to Neuralgia and pains in the head, and headaches; ♀ in ♂, Neuralgia of the neck and throat; ♀ in ♀, of the chest and lungs; ♀ in ♁, of the stomach; ♀ in ♃, Neuralgia in the bowels and abdomen; ♀ in ♄, of the kidneys; ♀ in ♅, of the generative organs, womb, bladder, etc.; ♀ in ♆, in the hips and thighs; ♀ in ♇, in the knees and legs; ♀ in ♈, in the calves, ankles, and lower legs; ♀ in ♉, Neuralgia and pains in the feet, etc. For additional influences which may cause Neuralgia in the different parts and organs, see "Nerves", "Neuralgia", "Pains", under Arms, Bladder, Bowels, Face, Feet, Hands, Head, Heart, Inter-costal, Kidneys, Legs, Stomach, Teeth, Womb, etc., and in other parts or organs which may not be mentioned here. Also note the various paragraphs in the Article on Pain, as the parts afflicted by Pains and Neuralgia are listed there, and also the various kinds of Neuralgic Pains, such as Darting, Sharp, Shooting, Violent, etc. In the treatment of Neuralgia the tonic remedies of ♂ will often relieve the Neuralgia caused by ♀, and where ♀ has caused a weak circulation, as ♂ opposes ♀, on the theory of opposites. (See Antipathy, Opposites; "Medicines" under Tonic).

NEURITIS—Inflammation of a Nerve—(See "Neuritis" under Nerves).

NEUROMA—Nerve Tumor—(See "Neuroma" under Nerves).

NEUROSTHENIA—Over-Activity of the Nervous System—(See this subject under Nerves).

NEUROTIC—Nervous—Pertaining to Neuroses—(See "Neurotic" under Nerves).

NEUTRAL—Neutral Planets—♃ is a neutral, or variable planet, and partakes of the nature of the planet with which configured. This is important to note in making a study of the map of birth along health lines. Mercury with ♀ becomes like ♀, and causes the same diseases as ♀. Mercury with ♀ adds to the power of ♀ in musical and artistic matters. Mercury with ♂ adds to the hasty and impulsive tendencies of the mind, and to excitability of the nerve centers, etc. The ♃ is also variable, and takes on the nature of other planets when configured with them, the same as does ♃. The ♃ ♂ ♀ gives a very depressed and despondent nature, or personality, and often leads to an increase of ♀ diseases, and to add to their power. (See Variable). Also study the Articles on the Moon and Mercury, and note their neutral, and variable influences).

NEW BORN—(See Birth, Children, Infancy, Parturition, Puerperal).

NEW GROWTHS—Neoplasm—Tumors—(See "New Growths" under Growths"; Tumors).

NEWSMONGER—A Gossip—Busy-Body—Prattler—Meddler—Tale-Bearer—♀ affl. in ♁.

NEWTON—Sir Isaac Newton—Born Dec. 25, 1642. Died March 20, 1727. He came to be a great believer in Astrology. On one occasion, when upbraided by Mr. Halley, the discoverer of Halley's Comet, for his belief in Astrology, answered, "I have studied the subject, Mr. Halley, you have not". The only way to understand Astrology is to study it, observe the effects of the planetary influences over individuals, and not persecute what God has ordained as fixed Laws over His Universe. (See Kepler, Map, Medical Astrology, Nativity, Paracelsus, Star Map).

NICOTINE—(See Tobacco).

NIECES—Nephews—Ruled by the 3rd H., and come under the same rules as for the brothers and sisters of the native. (See "Case" under Aunt; Brothers, Sisters).

NIGHT—Nocturnal—The Night is ruled by the ♃, and the ☾ rules the Day. The night is magnetic, while the day is electric. At night the ♃ tends to keep up the action of morbid germs, while the electric action of the ☾ by day tends to destroy them. The night is less vitalizing than the day. Saturn is more malignant at night as the moisture of the night adds to his cold. Mars is less malignant by night as the moisture of the night moderates his heat and dryness. Thus ♀ is more malignant in night nivities, and ♂ less so. However, as Anareta, ♀ and ♂ are equally destructive to life whether they be diurnal or nocturnal. In a night nativity the ♃ is more powerful when elevated above the Earth, and tends to better functions. (See Day, Elevated). The planetary causes of disease, and even in the same disease, as in Insanity, tend to differ in a day and night nativity, due to the degree of malignancy of the afflicting planet. Thus in Insanity ♀ may cause and rule the scheme in a day nativity, and ♂ in a night nativity. (See Insanity). Moonlight and night air are noxious, and tend to Miasmatic diseases. The exhalations of the vegetables at night, the prevalence of carbonic acid, and the chemical action of the Moon's rays, become very deleterious at night. People should not sleep with the Moonlight directly upon them. The Insane, Epileptics, the Hysterical and Nervous, are more affected by Moonlight, and at the Full Moon, and should not be allowed to sleep under the Moon's rays. (See Electric, Magnetic, Malignant, Miasma; "Full Moon", "Moonlight", "Night Action of the Moon", under Moon; Noxious). The following subjects have to do with the Night, and the Planetary Influences over Disease at Night.

Air—The Night Air Noxious, and Causing Miasma, etc.—(See Miasma, Noxious).

Danger to Life—In a Night Nativity—Influences Tending To—(See "Danger to Life" under Danger).

Diseases by Night—(a) Disease More Prevalent At Night—The ♃ in ♁, and afflicted by the ☉ or ☽ when taken ill (Hor'y). (b) The Disease Worse by Night—The Disease is worse at night if the ♃ was badly afflicted at B., as the ♃ rules the night, and also the ♃ be afflicted by direction at the time. The ☉ being more afflicted than the ♃ at B. tends to make the disease worse by day, as the ☉ rules the day. Females tend to suffer more at night in disease, as the ♃ rules strongly over female disorders, and the ♃ rules the night. Fevers and diseases which are strongly influenced by Miasmatic conditions are usually worse at night. Also Chronic and Low Fevers usually get worse towards Sunset, and at night. (See "Chronic" under Fever; Miasma; "Night Action" under Moon).

Epilepsy—♂ ruling the scheme by day and ♀ by night. (See Epilepsy, Insanity).

Mother—Disease In—In studying the diseases of the mother note the positions and aspects of Venus in a day nativity, and the ♃ in a night nativity. (See "Disease" under Mother). With the father the ☉ is to be noted in a day nativity, and ♀ by night. Thus the ☉ and ♀ represent the parents in a day geniture, and the ♃ and ♀ by night.

Nativity—Night Nativity—(See the Introduction, and the various paragraphs in this Article).

Nightmare—Horrible Dreams—(See Dreams; "Nightmare" under Sleep).

Night Study—(See "Night Study" under Study).

Nocturnal Life—Night Life—Disposed To—The 3rd Decan. of ♄ on the Asc. at B. More common among people born between Sunset and Midnight, and with the ♃ in this Quarter and afflicted by malefics, and also with the ♃ and many planets in watery signs

in this Quarter, which influences may lead to dissipations of various kinds. Also people born between Noon and Midnight may be inclined to a night life. People born between Midnight and Noon, and with the ☉ and many planets rising in the East, are more active during the day, and inclined to rest and relax at night.

Nocturnal Signs—The Feminine Signs—♄, ♁, ♃, ♀, ♁, ♃, ♁, and called nocturnal because they excel in dryness or moisture. These are also the night signs, or night houses, of the planets, except ♁, which is the only sign of the ♃, and serves as the home and strong sign by day or night. The diurnal signs are ♃, ♁, ♃, ♁, ♃, ♁, as their rulers are stronger in them by day than at night. The ☉ has only one sign, that of ♃, and the ☉ is equally strong in this sign, day or night.

Noxious Air At Night—(See Miasma).

Pain Greater At Night—The ♃ ♂ or ill-asp. ♀ (or ♂ if he be of the nature of ♀) at the beginning of an illness, or at decumbiture (Hor'y). (See "Diseases by Night" in this section).

Worse—Disease Worse At Night—(See "Diseases by Night" in this section).

NIMBLE BODY—Nimble Step—(See "Energetic" under Gait; "Quick" under Motion).

NINTH HOUSE—The house of ♃ and ♀, and a masculine house. Denotes the Fundament, the Hips, Thighs, Hams. This is the House of Religion, Philosophy, the Higher Mind, Dreams, Dream Consciousness, Visions, Kindred of the Marriage Partner, Long Journeys, Foreign Travel, Voyages, Residence Abroad. In the body this House rules the Hips, Thighs, and Fundament, and signifies all diseases in these parts. Malefics in the 9th H. at B. tend to disturb and unbalance the mind, or cause Religious Excitement, Religious Fanaticism, Distorted Religious Views, Religious Mania, Unorthodox Views, and trouble with Religious Authorities. Malefics in the 9th H. also tend to dangers in Foreign Travel, Injury, loss or death at Sea, and ill-health, dangers, or death Abroad. Mars afflicted in this House at B. tends to dangers at Sea by Lightning, Fire, or Shipwreck, and also to cause many conflicts with the Clergy and Orthodox Leaders. Neptune or H well-aspected in this house at B. tend to give an Occult and Mystical mind, Advanced Views, and with good powers to comprehend and appreciate Truth wherever found. People having malefics in this house at B.

and afflicted, and with no benefics in the house, or favorably influencing the house, should remain in their Native Land, and not take voyages, or go Abroad, as such might bring them disease, ill-health, accident, injury, capture, death, failure, or disaster. The benefics ♃ and ♀ in this house, and with no malefic in, or ruling, the house, tend to give a religious and devotional mind, and with greater success along Orthodox lines and the Ministry, and to have more success in ordinary Church work. Uranus here tends to make the native soon rebel against the Orthodox interpretations of the Bible, and to study into the Mysteries, and the Esoteric explanations of Christianity, and of all Religions, and to delve into the Secret Doctrines of the Ages. These tendencies for Esoteric study are also given by the ☉ or ♃ ♁ ♀ at B., or with ♀ rising in the Asc. or M.C. Neptune well-aspected in the 9th H. gives strong Psychic, Clairvoyant, Mediumistic, and Spiritual Powers. The Colors ruled by this house are Green and White. (See Abroad, Foreign Lands, Jupiter, Religion, Sagittarius, Third House, Voyages, etc.).

(See "Pain" under Breast, Chest).

Nitrogen is unstable, highly explosive, and tends to explosions and accidents, and death by explosions when ♁ is afflicted in the 8th H. at B., and by dir. Hydrogen, Nitrogen, Oxygen and Carbon correspond to the four elements of Nature, as Water, Air, Fire, and Earth respectively, and the four fundamental and essential Operations of Nature are synthesized by their qualities, namely—Congelation, Volatilization, Combustion, and Condensation. (See these subjects. Also see Air, Carbon, Explosions, Gases, Hydrogen; "Operations" under Nature; Oxygen, Uranus, Urea).

NODDING SPASM—Of the Head—(See "Nodding" under Head).

Nods Head to One Side—When Speaking—(See Skippish).

Nodding of the Eyeballs—Rolling of—(See "Nystagmus" under Eyeballs).

NODES—The points where planets cross the Ecliptic from South Latitude into North Latitude, and also where they cross again from N. Lat. to S. Lat. The Nodes of the ♃ are the ones mostly used and studied. The North Node of the ♃, when she crosses the Ecliptic going North, is called Caput Draconis, or the Dragon's Head, and is considered a fortunate influence in health, and other matters, when falling on the place of the Asc., or M.C. in a nativity. (See Dragon's Head). The South Node of the ♃, where she crosses the Ecliptic going South, is called the Dragon's Tail, and is considered unfortunate, and to have an influence similar to ♃ in health matters when it falls in the Asc., M.C., and other vital centers of the map of birth. (See "Nodes" under Moon). However, in the consideration of the power and force of the planets in disease, the Nodes of all the planets should be considered, and their Latitudes. A planet is stronger in its influence when near its node, and on or near the Ecliptic, and the further from the Ecliptic the afflicting planet may be, the less is its power to cause affliction and disease. Also the aspects between planets which have a wide difference in Latitude are not as important to consider as those which are in aspect in and near the same degree of Latitude, either North, or South. If several planets are on the Ecliptic at B., near their Nodes, and afflicting the hyleg, their power is greater to cause disease, or great suffering and affliction. It is very important, therefore, for every student and Diagnostician in Astrology to have an Ephemeris which

gives the Latitudes of the planets, and to study their positions as to Latitude and Declination, as well as Longitude. (See Latitude). Declination is the distance of a planet North or South of the Equator, and planets with the same Declination, or within 1° of the same, are said to be in Parallel Aspect, which is a very strong aspect for good or evil in health matters, according to the nature of the planets so aspected. (See Parallel).

The Southern Signs are Υ , μ , \mathcal{I} , \mathcal{O} , \mathcal{M} , \mathcal{X} , and a planet in these signs, in direct δ to a planet in a Northern sign, and with the same Declination, is weaker, and is said to obey the northern planet, and the Southern Signs are called Obeying Signs.

NOSE—Nostrils—Nares—Nasal Fossae—Nasal Bones—Nasal Septum—Turbinated Bones—The Nose, taken as a whole, is ruled by the μ Sign. It is also said to be under the external rulership of the \mathcal{V} sign, and influenced by \mathcal{P} , and planets in this sign, and especially by σ in \mathcal{V} , as σ rules both the \mathcal{V} and μ signs. The Nose has special affinity with the μ sign, and is one of the organs of Excretion. The nasal bones, and the nasal orifice, are ruled by μ . Ptolemy says the Nostrils are ruled by \mathcal{Q} . Wilson, in his Dictionary, says the Olfactory Nerves are ruled by \mathcal{Q} . The Nerves to the Nose pass thru the 3rd, 4th and 5th Cervical Vertebrae, known as MCP, Middle Cervical Place, and these nerves when impinged tend to nasal disorders. The Naso-Pharynx is especially affected when planets are in both the \mathcal{V} and δ signs, or with σ in δ . The Nasal Duct is the Tear Duct, or Lachrymal Duct. (See Aries, Excretion, Scorpio, Taurus).

NUMBNESS—Tingling of a Nerve—Lack of Feeling In a Part—Caused by an afflicted h in the sign ruling the part, or in a sign in \square or φ ; h δ or ill-asp. φ ; also caused sometimes by H , and H δ φ in the sign ruling the part. This is generally due to pressure upon a nerve, and the spine and vertebrae should be relieved of subluxations. Also caused by poor circulation, due to the cold, restraining and suppressing influence of h , and h δ φ , Υ , or φ tends to considerable numbness, and disturbance in the part ruled by the sign so occupied. (See Analgesia; "Poor Circulation" under Circulation; "Raynaud's Disease" under Fingers; Paraesthesia, Tingling).

For a Nurse to be compatible with the patient, the places of the malefics in her nativity should not fall in the 6th H. of the patient, or her vibrations and magnetism would tend to injure, worry, and weaken the patient. This is also true of the Healer and patient. The same influences which are good for the work of a Healer, Physician, Midwife, etc., may also be good for Nursing and the care of the sick. (See "Compatibility", and the various paragraphs under Healers; Hospitals, Midwives, Obstetricians).

NURSING—The Nursing, of Infants—(See Breasts; "Nursing" under Children; Milk, Nipples, Weaning).

NUTRITION—Nutriment—Nurture—Nourishment—Sustenance—Nutritive—Nurturing—Alimentation, etc.—The Δ is nurturing, and nourishment and alimentations are ruled largely by the Δ and the z sign. The influences of Ψ , Υ , and φ are also nutritive, and are concerned with the nourishment, sustenance, conservation, preservation, and the apthetic processes in the body. The functions of growth and nutrition are ruled by φ and H . Venus rules growth and nutrition until puberty and adolescence, and then the H influence takes charge of growth and assimilation. The Kidneys, being under the rule of φ , tend to play an important part in the nutrition of the body, as well as to eliminate wastes and poisons. Physiologically δ acts thru the demands of sustenance and evolution. Heat and moisture are nutritive. The Venus Group of Planets are nutritive. Fermentation, which is produced by heat and moisture, plays an important part in nutrition and alimentations. Venus rules the fermentative, or nutritive process, and also the distillatory processes in the body. Molecular Nutrition is under the special rule of Υ . (See Alimentary, Assimilation, Conservation, Diet, Digestion, Distillation, Eating, Fermentation, Food, Growth, Heat, Jupiter, Moisture, Neptune, Pituitary, Preservation, Processes, Venus, Zymosis, etc.). NUX VOMICA—Is one of the typical Polycrest Remedies, corresponding to the ♀ sign, the sign ruled by ♀. Some Writers, therefore, class it is an Herb of ♀. The Herbs of ♀ are Nervine, and tend to calm nervous excitement. Nux Vomica, and its alkaloid, Strychnine, are, on the other hand, stimulant, supporting, tonic, and exciting, and have the action of ♂. This Writer has, therefore, taken the liberty of classing Nux Vomica as a ♂ Drug, even though it is assigned to the ♀ sign in the Polycrest classification. However, ♀ may also have some rule over Nux Vomica, as excitability and irritation are ♀ qualities, and a few drops of the Tincture of Nux Vomica given before meals excite the nerves of the stomach, increase the appetite, and aid digestion. Mercury is a variable planet, and partakes much of the nature of ♂

at times, and ♀ and ♂ can both have rulership over Nux Vomica. (See "Polycrest" under Zodiac).

Morbid Mental Manifestations are caused, and complicated, and made more mysterious, extraordinary, obscure and peculiar by the afflictions of ♀ and ♀, in addition to the ♀ configurations, and

especially when afflicting ☿, the mental ruler. (See Dejected, Depression, Despondency, Gloom, Hope, Hypochondria; "Low Spirits" under Low; Melancholy, Morbid, Obsessions, Spirit Controls, Worry, etc.).

OBSTINATE—Stubborn—Resisting—

Obstinate Nature—Headstrong—Stubborn—Tenacious—Resisting—The ☾ Sig. ☿ ♃; the ☾ in the Asc. ☐ ♃ in the 10th; the ☾ or ☽ afflicted in ♃; ☿ afflicted in the 1st H.; ☿ affl. in ♃, ♃, ♃,

or ♃; many planets in fixed signs at B., and with fixed signs on the angles; ☿ on the Asc., the sign of "The Bull", especially obstinate in nature. (See "Fixed Signs" under Fixed; Inflexible, Rebellious).

OBSTRUCTIONS—Stoppages—Hindrances—Occlusions—Obstruction is the keynote, and the most salient characteristic of ♃. Also Cauda (♃) is of the nature of ♃, and tends to obstructions when in ☾ the ☾, Asc., M.C., or hyleg at B., and to especially obstruct and afflict the part of the body, or matters ruled by the sign ♃ is in at B. (See "Dragon's Tail" under Dragon; "Influence Of" under Saturn). Saturn tends to obstructions in the body, in the tissues, blood vessels and organs, by retaining the wastes and poisons of the system, hindering and suppressing elimination, functional activity, secretion, and by causing hardening of the tissues, crystallization, retardation, deposit of mineral wastes, and the deposit of too much Urea over the body. The good aspects of ♃ tend to obstruct when coming to the other planets. Saturn in an angle, occi. of the ☾, and ori. of the ☽, tends to obstruct. Caused by ♃ or ☿ when the dominion of death is vested in them. Signified by ♃ in ♃ when ♃ is the afflictor in the disease. Saturn in any sign tends to obstructions in the part, parts, or organs ruled by the sign so occupied, and even ♃ in his own signs ♃ and ♃ tends to afflict the knees and lower legs, and make them subject to cold, obstructions, etc. Saturn causes all diseases proceeding from obstructions in any part of the body. In this regard the influence of ♃ is normal, as it is necessary for the planetary influences to be balanced, otherwise the influence of any one planet in excess, as that of ☿, would tend to tear people apart, or bring instant death, if not opposed and balanced by ♃, ♃, and ♃. To grow old in the body here is normal, natural, and the only way to progress, as continued life in the body on Earth would be a hindrance to the evolution and progress of the Soul. Also the ☾ in the 6th H. has an obstructing influence in health matters, and invites disease; the ☾ or ☽ afflicted by ♃; the ☽ afflicted in ♃, or afflicting the hyleg therefrom. The ☽ afflicted in ♃ tends to great obstructions; the ☽ or ☿ afflicted in ♃ or ♃. Obstructions may take place in any part of the body, and go under the names of various diseases. A few of these conditions are listed as follows. See these subjects in the alphabetical arrangement not commented upon here, as they are all caused by the obstructing work of ♃, and by his deposits, or work of suppression, retardation of function, etc.

OCCASIONAL INDISPOSITION—(See Indisposition).

OCCIDENTAL—Planets Occidental—The ☾, ♄, and planets in the Occidental Quarters of the Heavens at birth show disease, and in the Oriental Quarters indicate Acute Pains and Accidents. Malefics occi., and afflicting the ☾ or ♄, tend to cause disease. Planets are considered Occidental, in a general way, when setting in the West between the M.C. and Nadir, and Oriental when rising between the Nadir and Midheaven. The Occidental Quarters of the Heavens are those from the Nadir to the Asc., and from the M.C. to the Descendant, and the ☾ or ♄ found in these Quarters at B. are said to be Occidental. Also planets are said to be occidental when rising and setting after the ☾, and oriental when rising and setting before him. (See the lengthy Article on "Oriental" in Wilson's Dictionary of Astrology, which also deals with Occidental conditions). In Health matters; and in judging of the effects of disease, or the liability to the predisposition to disease or accidents, it is necessary for the student to understand these differences between Oriental and Occidental in order to be able to more accurately diagnose ailments, and to know the severity or mildness of the complaint, its nature, prospects, and possible outcome. Mercury rising before the ☾ tends to give a keener and better mind, but rising after the ☾, to dull the mentality. The ♄ in an Oriental Quarter at B., indicates an early marriage, and a late marriage when in an Occidental Quarter, etc. Jupiter oriental, and rising before the

☉, or elevated above the ☉, is more powerful in health matters than when he is occidental, or rising after the ☉. In this book, many references are made to oriental and occidental, and such influences listed under the various diseases, and it is very important to note these causes in making a planetary study of disease, accidents, affliction, etc., as well as in matters of joy, happiness, abundance, good health, success, long life, etc. (See Elevated, Majority, Oriental, Quadrants, Quarters, Rising, Rouse, Setting).

(See "Immediate Causes" in this section).

Loss of Blood—Undesirable Elemental Spirits often are present at Operations to absorb the life force from the blood of the patient, introduce Astral infections, and prevent recovery. Every operation should be preceded with

prayer to prevent the presence of Elementals, and to place an Aura of Protection about the patient.

Major Operations—Time and Rule For—(See "Rules" in this section).

Nature—The Four Operations of Nature—(See "Operations" under Nature).

Operations Dangerous—Performed when the ☉ is in the 12th H., in ☊ ♀ or ☽, and ☿ afflicted in the 6th H. at the same time. (See Death, Rules, in this section).

Ovariectomy—Rules For—(See Ovaries).

Pelvic Operations—(See "Operations" under Hips; Pelvis).

Rhythmic Operations—In the Body—(See Rhythm).

Rules for Operations—Statistics show that operations are more successfully performed when the ♃ is increasing in light, between the New and Full ♃, and heal more quickly, and are less liable to complications than when the ♃ is past the full and decreasing. Note the following Rules—

(1) Operate in the increase of the ♃ if possible.

(2) Do not operate at the exact time of the Full ♃, as the fluids are running high at this time.

(3) Never operate when the ♃ is in the same sign as at birth.

(4) Never operate upon that part of the body ruled by the sign thru which the ♃ is passing at the time, but wait a day or two until the ♃ passes into the next sign below, and especially if the ♃ be in ☊, ☐, or ☿ ♀, ♀, ♀, or ☿ at the time. This rule should be especially followed in major operations. Ptolemy says, "Pierce not with iron that part of the body which may be governed by the sign actually occupied by the Moon".

(5) Do not operate when the ♃ is applying closely to the ☐ or ☿ the ☉, ♀, or ☿.

(6) Let the ♃ be increasing in light, and in ♋ or ♌ ♃ or ♎, and not afflicted by ☿.

(7) Let the ♃ be in a fixed sign, but not in the sign ruling the part to be operated upon, and such sign of the ♃ also not on the Asc.

(8) Do not operate when the ♃ is applying to any aspect of ☿, as such tends to danger of inflammation and complications after the operation.

(9) Avoid operation when the ☉ is in the sign ruling the part upon which the operation is to be performed.

(10) Never operate when the ♃ is combust, or within 17° of the ☉, and with the ♃ ☿ ☿ at the same time.

(11) The ♃ should be free from all manner of impediment.

(12) ♃, ♎, and the ruler of the Asc. should be in the Asc. or in the M.C., if possible, and free from ☿ affliction.

(13) Fortify the Sign ruling the part of the body to be operated upon.

(14) A ☿ hour is evil for surgical operations.

(15) Do not cut a nerve when ☿ is afflicted. (See Amputations, Death, and the various paragraphs in this section).

Surgeons—(See Surgeons).

Successful Operations—(See "Rules" in this section).

Times for Operations—(See "Rules" in this section).

Undergoes An Operation—(See Immediate Causes, Liable To, in this section).

Womb Operations—(See "Abdominal" in this section).

OPHIUCUS—Stars in the last part of m and the first half of ♃, of evil import, and threaten disease, disgrace, ruin, sickness, every evil, and debauchery when with the ☉ or ♃ at B., or when the Lights are directed to them. The Right Knee and Leg, and the Left Hand of Ophiucus, are mentioned. (See Debauchery; "Threatened" under Disease; Disgrace).

OPHTHALMIA—(See "Conjunctivitis" under Conjunctiva; Xeroma).

OPINIONS—Views—Notions—

Distorted Opinions—Wrong Notions In General—Wrong Opinions—(See Anarchists, Confused, Eccentric, Erratic, Fanatical, Ideals, Ideas; "Bad" under Judgment; Notions; "Atheistical", and the various paragraphs under Religion).

Fixed Opinions—(See "Obstinate" in this section).

Forms Bad Opinions—Of Every One—♃ Sig. ☐ or ☿ ♀. (See Mistrustful, Suspicious).

Inconstant In Opinions—Constant In No Opinion—☿ ill-dignified at B.; ☿ afflicted in ♋. (See Inconstant).

Independent Opinions—(See Independent).

Obstinate In Opinions—Fixed Notions and Opinions—Born under strong ♃ influence; many planets in fixed signs at B., or fixed signs on angles. (See "Fixed Signs" under Fixed; Inflexible, Misunderstood, Obstinate, Reformers, Riotous, etc.).

Opinionated of Himself—Egotistical—(See "Egotistical" under Ego).

OPISTHOTONOS—A Spasmodic Rigidity of the Body in which the Trunk is Thrown Backward and Arched Upward—A ♀ disease and affliction; ♀ afflicted in ♎; ♀ ☿ ☿ in ♎, or in fixed signs; ♀ ☿ ♀ in ♎. (See Contractions; "Movements" under Erratic; Incoordination; "Contraction" under Muscles; Rigidity, Spasmodic, Trunk).

OPIUM—Opiates—Poppy Plant—Papa-ver—Ruled by ♀. (See "Neptune Group" under Herbs; Narcotics).

OPPOSITE—Opposites—Opposition—

Aspect—The Opposition Aspect—The 180° aspect (♁)—In health, and other matters, this is a very evil aspect, and is of the same nature as the ☐ aspect, or 90° aspect, the ♁ being a double square. When the ♃ is in ♁, the ☉ at B., as at the exact time of Full ♃, the vitality tends to be weakened. Also malefics in ♁ the ☉, ♃, Asc., or hyleg, or in ♁ to each other, tend to weaken the nativity, invite more disease, affliction, and trouble. (See Aspects).

Fond of Opposition—The ☉ Sig. in ♁. (See Obstinate, Taurus).

Opposite Sex—(See the next Article after this one).

Opposite Signs—Of the Zodiac—The Opposite Signs, as ♀ and ♂, ♃ and ♄, etc., are complementary, or supplementary signs, and both rule and effect the same parts, or organs by their reflex action, and there is great sympathy between opposite signs, especially in health matters. Planets in ♀ not only affect the sex organs and nature, but also the throat, and vice versa. There is Polarity and affinity between opposite signs. These signs are 180° apart, and planets in them at B. are in ♀ aspect, if within orb of the aspect. Many planets in opposite signs at B., and in the signs which are in □ to each other, indicate weakened vitality, a more difficult fate, and many troubles and vicissitudes to be overcome. (See Kinetic; "Aspect", "Planetary Opposites", in this section).

Planetary Opposites—Planets ruling opposite signs oppose each other in their action. Mars, ruler of ♀, opposes ♀, the ruler of ♂, Saturn, ruler of ♄, opposes the ☉, the ruler of ♌. The remedies of the ☉ will cure the diseases caused by ♄, and on the theory of Antipathy. Jupiter, the ruler of ♃ and ♁, opposes ♃, the ruler of ♋ and ♄, the opposite signs, and ♃ remedies tend to offset and heal the diseases of ♃, etc. Mars is strong in ♀, and ♄ has his exaltation in ♂, the opposite sign, and also ♄ has his fall in ♀, and the remedies of ♂ tend to bring cure and relief to ♄ diseases, and the diseases and afflictions of ♂ are relieved by ♄ remedies. By observing this rule of Opposites, the student can soon quickly learn how to analyze and treat disease Astrologically and scientifically. In treating disease by sympathy, a ♄ remedy is used to relieve a ♄ disease, and a ♂ remedy to alleviate a ♂ disease, and this is the theory of Homeopathy. The Planetary Opposites are as follows—The ☉, ruler of ♌, opposes ♄, ruler of ♋. The ♃, ruler of ♋, opposes ♄, ruler of ♋. Mars, ruler of ♀ and ♄, opposes ♃, ruler of ♃ and ♂. Saturn, ruler of ♄ and ♁, opposes the ☉ and ♃, rulers of ♌ and ♌. Jupiter, ruler of ♃ and ♁, opposes ♃, ruler of ♋ and ♄, opposes ♃, ruler of the opposite signs ♀ and ♄. Mercury, ruler of ♀ and ♄, opposes ♃, ruler of ♃ and ♁. (See Antipathy, Aspects, Chemical, Complications; "Allopathy" under Healers; Herbs, Homeopathy; "Disease" under Mild; Minimizing, Signature, Sympathy, Treatment).

OPPOSITE SEX—The Relations of the Opposite Sex and Their Dealings with Each Other—

Addicted to Women—(See Love Affairs, Marriage; "Addicted To", "Fascinating", under Men; Passion, Sex).

Aversions—To the Opposite Sex—Indifferent To—(See Apathy, Aversions, Bachelors, Celibacy, Deviations, Indifferent; "Aversion" under Marriage; "Free From" under Passion; Perversions).

Health Suffers—Through the Opposite Sex—Energies Wasted On the Op-

posite Sex—♂ diseases; ♂ ♄ or ill-asp. the ♃ or ♃; lord of the 6th in the 5th or 7th H. (See Amorous; "Energies Wasted" under Love Affairs; "Health Injured" under Lust, Men; "Passional Excesses" under Passion; Venereal).

OPPRESSED—Oppression—♄ influence, and ♄ in any sign tends to oppression, suppression, and affliction to the part ruled by the sign, he is in at birth. (See Depressed; "Oppression" under Heart; "Oppressed" under Lungs; Saturn, Suppression).

OPTIC—Pertaining to Vision and Its Organs, the Eyes—

Decay of Optic Nerve—Atrophy of—Crystallization of—Hardening of—Inhibition of—Weakness of—Sight Destroyed or Dimmed By—The ☉ or Asc. in Nebulous Parts at B., and afflicted by ♄; the ☉ and ♃ in angles at B., and the ☉ afflicted by ♃, tends to weakness of the optic nerve; ♃ in the Asc. at B., near Nebulous Spots, and afflicted by the ☉, ♃, or ♃, tends to some affection of this nerve; Subs at MCP (3,4C). (See Blindness; "Crystallization" under Eyes; Nebulous, Retina, Sight).

Optic Nerves—Ruled by ♃ and the ♃ sign. Also ruled and affected by ♃ when in ♀. Also strongly influenced by ♄.

OPTIMISM—Optimistic—Hopeful—Cheerfulness—People who are optimistic, cheerful, and hopeful, who have developed an inner vision of power, and who avoid worry, have better health, and avoid loss of nerve and vital force, while the pessimistic, negative, despondent, worrisome, melancholic Saturn person, full of fear, is apt to weaken, become a chronic sufferer, and die an earlier death. The following influences tend to Optimism and Good Health. The ☉ and ♃ well-aspected by ♃, and with ♃ in one of his own signs, and favorably aspected; the ☉ and ♂ strong and well-aspected at B., and especially when in ♀ or ♌; ♃ is considered the planet of optimism and hope, and this planet when in the Asc. or M.C. at B., and in favorable aspect to the ☉, ♃, ♃, or ♃, tends to optimism; ♃ alone does not tend to optimism as much as she does to resignation and contentment in life, when strong and well-aspected at B. However, ♃ in the 10th H. at B., and favorably aspected, tends to optimism, cheerfulness, and success in life, which favors better health. Mercury in the 3rd H., and well-aspected by the ♃, ♃, and ♃, tends to hopefulness, a cheerful and optimistic spirit; ♃ progressed, and to the * or Δ ♂, favors an optimistic and enthusiastic state of mind for the time. (See Cheerfulness, Contentment; "Resigned" under Fate; Happiness, Hope, Joy; "Peace of Mind" under Mind; "Sanguine Temperament" under Sanguine).

Optimism Destroyed—A Pessimistic State of Mind—Fears—Doubts—Gloomy State of Mind—Saturn strong at B., rising in the Asc. or M.C., and afflicting the ☉, ♃, ♃, Asc., or Hyleg, tends to destroy hopefulness and optimism, and to bring grief, sorrow, sadness, gravity, a less hopeful outlook upon

life, and to invite mental depression, ill-health, chronic diseases, loss of nerve and vital force, and with more of a desire for seclusion, separateness, and to lead a solitary life. Also ♃ is called the planet of Doubt and Fear. (See Doubts, Gloom; "Hopes Cut Off" under Hope; "Low Spirits" under Low; Melancholy, Misanthropic, Miserable, Miserly, Pessimistic, Recluse, Secretive, Selfishness, Unhappy, Worry, Wretched, etc.).

ORANGE COLOR—Saffron—This Color in the Solar Spectrum is ruled by the ☉. Orange Color tends to sharpen the appetite, and rooms papered with Orange tend to increase the appetite, and stimulate the forces of the body to better action, as Orange color is pregnant with the vital Sun forces. Gold, the orange-colored metal, is also ruled by the ☉. (See "Planets and Color" under Colors; "Saffron" under Complexion; Gold, Saffron).

Orange Fruit—Citrus Aurantium—The Gold-Colored Fruit or Berry—Ruled by the ☉. The juice of the Sun-kissed Orange contains the vital forces of the ☉, and is health-restoring, nerve building, a purifier and eliminator of the poisons, wastes, and over-acidity of the body. (See "Sun Group" under Herbs).

ORATOR—Oratorical Ability—A Good Voice—No Stammer or Defect of Speech—(See Eloquent, Fluency, under Speech; "Gifted" under Voice).

ORBS OF PLANETS—The planets in forming aspects with each other are said to be within orb of the aspect, and to cause the aspect to act, if within a certain number of degrees of the exact aspect. The Orbs of the planets are as follows: The ☉—17°; ♃—12°, 30'; ♃—8°; ♀—8°; ♁—10°; ♄—12°; ♂—7° 30'; ♁—8°; ♁—7°. Example—The orb of the ☉ plus the orb of the ♃ are equal to 29° 30'. One-half of this is 14° 45', the distance on either side of the exact aspect. The ☉ and ♃ to be in Δ aspect each other at B, must be within the orb of 14°. The ☉ in 4° ♀, and the ♃ in 18° ♄ would still be within the orb of the Δ aspect, and fortunate for good health. The smaller orbs of the other planets make the range of the aspects smaller. The student should study carefully the subject of Orbs in the Textbooks and Dictionaries of Astrology, and how to calculate aspects. (See Aspects, Reaction).

ORDINARY—(See "Ordinary" under Complexion, Death).

ORGANIC—Pertaining To, Or Having Organs—The Physical Body—Structural—

Organic Constitution—The ☉ is the chief index of the Organic Constitution. Also the Asc. rules largely over, and determines the nature and quality of the physical constitution. (See Constitution, First House, Structural).

Organic Decay—(See Decay).

Organic Defects—Those inherent in the body, and congenital. Caused by the ☉ afflicted in signs, and also by prenatal conditions. The ♃ rules Ac-

quired Defects. (See Acquired, Congenital, Defects, Heredity, Structural).

Organic Development—The ♃ shows the quality of Organic Development. (See "First Quarter" under Moon).

Organic Diseases—Constitutional Diseases—Structural Diseases—Inherent—Hereditary—Innate—Organic diseases are due to afflictions to the Signs of the Zodiac, while Functional Disorders are caused by afflictions to the Planets. The ☉ is the chief index of the organic constitution, and to determine organic diseases, note the nature of planets afflicting the ☉, and the signs they occupy, and the sign and house the ☉ is in at B. Organic diseases are denoted by conditions in the radical map, and by the afflictions to the ☉. The organic elements of the body, and the organic resistance against disease, are largely ruled by the sign on the Asc. at birth. Organic diseases are those which take a deeper hold upon the constitution, and tend to be chronic, slow, tedious, or fatal. The nature of structural and functional disorders can be inferred from the combination of the sign, planet, house and aspects of the ☉, ♃, and other planets. The Organs of the body are ruled by the different Signs, and a planet, or planets, in each sign will definitely affect the organs, and part, ruled by such sign. Also the position of the ☉ in the houses plays some part in the development of an organic disease, and whether the ☉ is rising, elevated, above, or below the horizon at B, and according to the degree of the power of the ☉ in the map of birth. The ☉ below the horizon at B, between the middle of the 6th H., and the middle of the 1st H., tends to a weakening of the constitution and vital powers, and if much afflicted to bring the danger of serious constitutional and organic diseases. The ☉ ☐ or ♁ the Asc. tends to organic diseases. Organic diseases which tend to mental disorders are indicated by the ♃ and Asc. (See "Organic" under Mind). The following influences are some of the principle causes of organic diseases. The ☉ in each sign, from ♀ on around to ♁, tends to organic diseases, and structural defects in those parts which are under the special rule of the ☉. Thus the ☉ in ♀ would tend to affect the Brain and Eyes; the ☉ afflicted in ♁, organic defects of the throat and neck; the ☉ afflicted in ♃, organic defects and weakness of the lungs; the ☉ afflicted in ♄, organic weakness of the heart, etc., and on around thru the Signs. Afflictions in the Fixed Signs tend to organic diseases. (See "Fixed Signs" under Fixed). The evil aspects between the ☉ and ♃ tend to disturbances of the organic functions ruled by the ♃. (For a list of Constitutional and Organic Diseases see "Constitutional Diseases" under Constitution; Structural; "Diseases of the Sun" under Sun).

Organic Force—(See Force).

Organic Functions—(See "Organic under Functions).

Organic Headaches—(See Headaches).

Organic Power—Given by the fire signs on the Asc. at B. (See "Fire Signs" under Fire).

Organic Resistance—The ☉ or ♂ ♀ or ♀ on the Asc. (See "Abundance of Health" under Health; Immunity, Resistance; "Body" under Strong; "Good" under Vitality).

Organic Weakness—Structural Defects—Afflictions to the ☉ at B., and usually in the part or organ ruled by the sign the ☉ is in; the ☉ or ♀ in the 6th H., and afflicted by malefics. (See Congenital, Heredity; "Ill-Health All Thru Life" under Ill-Health; Organs; "Low" under Vitality; "Weak Body" under Weak).

ORGANS—Organs of the Body—The Organism—Members of the Body—In a general way the ☉ rules the structural organization of the organs of the body, and the organic functions are ruled by the ♀. The ☉ in the different signs tends to organic and structural diseases of the part, or organs, ruled by the sign the ☉ is in at B. Also the Organs are ruled by the different Signs, and a planet, or planets, in each sign will definitely affect only certain parts of an Organ. Thus ♄ rules the head and face, and the ☉ in ♄ affects the Brain and Eyes, and tends to organic Brain trouble. The ♀ in ♄ affects the Glands and Eyes. Venus in ♄, the Skin and Complexion. Jupiter in ♄, the Arteries and Right Ear. Saturn in ♄, the Skull, Teeth, and Left Ear (some Authorities say the Right Ear). Uranus in ♄, the Membranes of the Brain and the Pituitary Body. Neptune in ♄, the Optic Nerve and the Pineal Gland, etc. The various Organs of the body, and the planetary influences relating to them, and the Diseases of Organs, are listed alphabetically in this book, and only the general conditions tending to affect the Organs will be listed in this Article. Also see the Articles on Body, Constitution; "Left Side" under Left; Lower, Members, Middle, Parts; "Right Side" under Right; Upper. Also there are subjects which may include and deal with Parts containing several Organs, such as Abdomen, Chest, Head, Thorax, Trunk, etc. The following subjects have to do with the Organs of the Body—

Ablation of Organs—(See Remote, Removal, Suppression; "Ablation" under Tonsils).

Affected—The Organs affected in disease are denoted by the Sign occupied by the afflicting planet. The House position of the afflicting planet shows which part of the organ is affected, and whether on the right or left side of the body, according to the sex of the native. (See "Left Side" under Left; "Disease" under Members; Namamsa; "Right Side" under Right).

Atrophy of Organs—(See Atrophy).

Birth—Organs Afflicted from Birth—(See Birth, Blindness, Congenital, Crippled, Cyclops, Deafness, Deformities, Distortions, Dumb, Forearm, Frog Child, Hearing, Hermaphrodites, Idiocy, Lameness, Limitations, Maimed, Missing, Monsters, Mutes, Prenatal

Epoch, Twelfth House; "United" under Twins; Virile, etc.).

Bulky Organs—(See "Organs" under Enlarged; "Over-Developed" in this section).

Chest—Organs of, and Afflictions To—(See the subjects under Chest).

Cold Organs—h rules Cold, and the Organ, or Organs, ruled by the sign in which h is posited at B., tend to be cold, and more subject to disease, poor circulation in, etc., and especially if it is a weak sign for h, and h is badly afflicted by the ☉, ♀, or malefics. (See Cold, Saturn).

Compression of Organs—(See Compressed).

Conformity of Members—(See Conformity, Harmony, Well-Proportioned).

Coordinated Action—Of Organs—(See Coordination, Incoordination).

Deficient Development—Of the Organism—(See Cretinism, Deficient, Development, Diminished, Undersized, Undeveloped).

Head—Organs of—(See "Organs" under Head).

Heart—The Heart On the Right Side—(See "Right Side" under Heart).

Ill-Placed Organs—(See "Displacement" in this section; "Right Side" under Heart; Floating, Proapsed, under Kidneys; "Falling Of" under Womb).

Incomplete Organs—(See "Born Incomplete" under Incomplete).

Incoordination—Of Organs—(See Incoordination).

Inhibition—Of Organs—(See Inhibition, Suppression; "Ablation" in this section).

Intermittent Action—Of Organs—(See Erratic, Intermittent, Irregular, Jerky, Spasmodic).

Internal Organs—(See Internal).

Irregular Action—Of Organs—(See "Intermittent" in this section).

Kidneys—(See Floating, Prolapsed, under Kidneys).

Left Side—Of the Body—Organs of Affected—(See Left).

Lower Part of Organs—Is shown by the latter part of a Sign, or the 3rd Decanate. The upper and lower parts of an organ may be ruled by a different sign. The ♊ Sign rules the upper part of the Stomach, while ♋ rules the lower part. Gemini rules the upper lobes of the Lungs, while ♌ rules the lower lobes. The upper lobes of the Liver are ruled by ♍ , while ♎ rules the lower lobes, etc. Thus, ♌ in ♊ would tend to affect the upper lobes of the Lungs, and ♌ in ♍ , the lower lobes, etc. (See "Lobes" under Liver, Lungs). The upper part of an organ is shown and indicated by the early degrees of a Sign, or the first Decanate, and planets in this decan. tend to affect the upper part. The middle part of an organ is shown by the second decan., or from 10 to 20° of the sign. Thus, to judge which part of an organ is the more afflicted, or diseased by the action of a malefic, or afflicting planet, note the position of the planet in the sign. (See Decanates; "Organs" under Lower, Middle, Upper; Navamsa).

Middle Parts of Organs—(See "Lower" in this section; "Organs" under Middle).

Misshaped Organs— Ψ influence; Ψ afflicted by ♌ , and in the part ruled by the sign Ψ is in at B. (See Misshaped; "Development Of" in this section).

Nerve Fibres—Of Organs— ♃ rules Complaints which affect the nerve fibers of organs; also diseases of the ♃ sign ♊ ; caused by the afflictions of Ψ and ♃ to ♃ . (See "Fibers" under Nerves).

Organic Diseases—(See Organic).

Over-Activity Of—(See Over-Active).

Over-Developed Organs—Enlarged—Bulky— Ψ influence; Ψ ♃ ♃ , ♃ , or ♀ in airy signs; Ψ afflicted by ♌ , and the organ afflicted is that ruled by the sign containing Ψ ; ♃ ♊ or ♃ the ♃ and ♀ , abnormally enlarged organs according to the sign containing the ♃ and ♀ . Also the overgrowth of connective tissue, or an organ, often result from ♌ affliction, and the mineral deposits of ♌ . (See Development; "Organs" under Enlarged; "Abnormal" under Growth).

Over-Growth—Of Organs—(See "Over-Developed" in this section).

Parenchyma Of—(See Parenchyma).

Part of Organ Afflicted—(See Lower, Middle, Upper, in this section).

Perversion—Of the Natural Function of An Organ—(See "Perversion" under Functions; Perversions).

Polarity of Changed—(See Polarity).

Prolapsus of Organs—(See Prolapse; "Ill-Placed" in this section).

Right Side—Of the Body—Organs of Affected—(See Right).

Rulership of Organs—Each Sign of the Zodiac rules over a different Organ, or part of the body, and also each of the Planets rules one or more organs. A Sign of the Zodiac may rule an organ as a whole, yet the different parts of an organ may be ruled by different Signs, as explained in the paragraph on "Lower Part Of" in this Article. Also the Decanate and Navamsa divisions of a sign indicate what part of an organ may be afflicted. (See Decanates, Navamsa; also see "Lower Part" in this section). The Head, as a whole, is ruled by the ♁ Sign, but the Nose is ruled by ♋ . The ♃ and ♄ rule the Heart, yet the various forms of disease which attack the heart may be caused by the afflictions of other planets when in ♃ , and especially the malefics in ♃ . The different parts of the heart, as the auricles, ventricles, endocardium, pericardium, etc., and how to know which part of the heart is afflicted, is explained in the Article on Navamsa. The ♃ and the ♄ Sign also rule the Spine, taken as a whole, but the Spinal Canal is ruled by Ψ , and the rulerships of the different parts of the Spine need to be studied carefully to diagnose Spinal Disorders. (See Spine). For the rulerships of the various organs of the body, see the Articles on each of the Planets, as Sun, Moon, Neptune, etc. Also see each of the 12 Signs, as Aries, Taurus, Gemini, etc. Also look in the alphabetical arrangement for each of the Organs of the body, as Brain, Ears, Eyes, Heart, Larynx, Liver, Lungs, Nose, Spleen, etc. (See "External Rulership" under Signs; the Introduction to this Article).

Rupture of Organs—(See "Accelerated" under Motion; Rupture).

Secretory Organs—(See Glands, Secretions).

Sensitive Organs—(See "Organs" under Sensitive).

Shrinkage Of—(See Shrinkage).

Spasmodic Action—Of Organs—(See "Organs" under Spasmodic).

Suppression—Of Organs—(See "Ablation" in this section).

Undersized Organs—Undeveloped—(See Atrophy, Diminished, in this section).

Upper Parts of Organs—(See "Lower" in this section; "Organs" under Upper).

Vital Organs—The Internal Organs, such as Bowels, Brain, Heart, Liver, Lungs, Stomach, etc.—(See these subjects).

Weak Organs—Weakened— ♌ in any sign tends to weaken, and make more liable to disease, the part ruled by the sign he is in at B., and the sign so occupied is usually considered the most vulnerable part of the organism, or to cause death eventually thru disease and breakdown of the organ, organs, or parts, ruled by such sign. Thus ♌ afflicted in ♃ usually brings death by

heart trouble; ♃ afflicted in ♌, by kidney disorder, etc., and especially if ♃ holds the dominion of death, and otherwise afflicts the ☉, ☽, Asc., or Hyleg. (See Saturn Diseases and Afflictions under Saturn).

ORIENTAL—Planets Oriental—The more oriental and angular a planet is at B, whether benefic or malefic, the more powerful will be its effects for good or ill. The ☉ and ☽ are oriental from the 1st to 10th H., and from the 7th to 4th House, and when in these Quarters at B, tend to have different effects in health matters. Planets rising between midnight and noon are considered oriental, and occidental when setting between noon and midnight. Planets in the Oriental Quarters at B, indicate Acute Pains and Accidents, and when in the Occidental Quarters tend to Disease. Planets are also said to be oriental when rising and setting before the ☉. Malefics ori., and afflicting the ☉ or ☽, tend to cause Blemishes. (See Benefics, Blemishes; "Total Blindness" under Blindness; Fits, Lunacy, Malefics, Occidental). The oriental influences of the planets are listed and mentioned many times in this book, under the different diseases and conditions, and the student should make a careful study of this subject in the Textbooks of Astrology, and thoroughly know the Elements of Astrology before he can expect to make a good Diagnostician, or Medical Astrologer. (See Quadrants).

ORIENTATION—Ability to Know Correctly One's Position In a Given Environment—(See Balance; "Coordinated Action" under Coordination; "Sound Mind" under Mind).

Disorientation—Loss of Identity—(See Identity, Memory).

ORIFICES—Of the Body—A Mouth, Opening, or Entrance Into the Body from the Outside World. (See Ears, Eyes, Mouth, Navel, Nose, Rectum, Urethra, Vagina, etc.). Also in Infancy the Fontanelle is an opening in the Skull, covered by a thin membrane. In Occult Literature considerable is said about the 12 openings into the human body, and their Mystical meaning. There are also many internal orifices in the body, as the Valves, the Pylorus, the Inguinal Canals, the Ducts, etc. The Orifices in the different parts of the body are under the rulership of the Signs ruling the part. In Ancient Times, it is said, there was a Third Eye in the human head, enabling one to see on all sides, and to avoid dangers when the Earth was in a more molten stage, but that opening has long since been closed. (See Pineal Gland).

ORION—Constellation of Orion—

Orion's Belt—Cingular Orionis—Three stars, from 21° to 24° ♀, of 2nd magnitude, of the nature of ♃ and ♄. These stars are mentioned in the following subjects—(See Assassination; "Causes" under Blindness; Drowning; "One Eye" under Eye, as causing loss of one eye). Other references to subjects and diseases are given under Bellatrix and Rigel.

Orion's Foot—(See Rigel).

Orion's Left Shoulder—(See Bellatrix).

Orion's Right Shoulder—Betelgeuse—A fixed star of the first magnitude in the last face of ♀, of the nature of ♂ and ♀. (See "Many Calamities" under Calamity; "Many Dangers" under Danger; Disgrace, Drowning; "Hot Diseases" under Heat; "Feverish" under Putrid; Ruin; "Danger Of" under Sickness; Trouble; "Death" under Violent).

ORNAMENTS—(See "Adornment" under Dress; Neat).

ORPHANS—(See Adoption; "Early Death", "Separated from Parents", under Parents).

OXYGEN—Oxygenation—Non-Oxygenation, etc.—Oxygen is one of the Gaseous Elements, and the Supporter of Life, and is an important element in Heat and Combustion. Oxygen is essential in the four Operations of Nature. (See Combustion; "Operations" under Nature). The \odot rules Oxygen, and also the oxygen in the blood is supplied and ruled by the \odot . The oxygen of the \odot , and the iron of δ , maintain the heat of the blood. (See Haematopoiesis). Also, oxygen is ruled largely by the Fiery Signs of the Zodiac. Oxygenation of the blood is ruled by, and is a function of the Π sign, the sign which rules the Lungs, and people born under Airy Signs require more oxygen, and should sleep in well-ventilated rooms. The atmosphere about us is made up of about 23 per-cent of oxygen by weight, and Nature gives this gas to us freely, if we will breathe it in, to replenish, purify, and revitalize the blood. People who have η afflicted in Π , the lung sign, tend to shallow breathing, and for lack of sufficient oxygen, tend to Anaemia, and also to be more liable to go into Consumption. Sunlight, Oxygen, and the most of the vital, and life-giving forces about us, both in drink, and our food, are ruled by the \odot , as the \odot is the Giver of Life. The fruits and vegetables which are ruled by the \odot are strong with oxygen.

PAIN—Pains—Painful—Painless—Aches—Acute Suffering, etc.—The various parts of the body are more apt to suffer with pains at the time of the Moon's Perigee. Also Pains, Tumors, and Fluxions follow a Solar Periodicity. The afflictions of the malefic planets, and especially of h and z , are the principal causes of pain and distress in suffering, and especially when they afflict the Asc., or are in the 6th H., or lords of this house. (See "Pain" under Jupiter, Mars, Mercury, Moon, Neptune, Saturn, Uranus, Venus). Every part of the body is subject to pain and disease at times, and each of the planets when afflicted tends to cause pain in the part, parts, or organ ruled by the sign in which posited. Mars tends to acute, sharp, darting pains. Saturn gives dull pains and aches. Uranus tends to spasmodic pains. For pain in the various parts and organs of the body see "Pain", or "Pains", under the subject you have in mind. In this Article a partial list of the organs and parts affected by pain are listed, and also general considerations and conditions concerning pain. For subjects not listed here, look in the alphabetical arrangement for what you have in mind.

At the time of a crisis in disease, if the D is z , \square , or z a planet which afflicts the Asc., lord of the Asc., or if the D is in evil aspect the lord

of the 6th H., the patient suffers much pain and distress, the disease runs high, and medicines do little good. Also all Progressed Parallels should be noted, as a Prog. P. aspect from a malefic to the \odot , D , Asc., or Hyleg, or Prog. P. aspects between two malefics, tend to cause great disturbances of the health or mind while such aspects last. The P. Aspects are strong factors in causing disease, as they are usually of long duration. Two planets are in P. aspect when they have the same Declination, North or South of the Equator, but of greater severity when both are North, or both South, and of the same Declination. P. Aspects between the malefics, or of the malefics to the \odot or Hyleg, are very dangerous and annoying for the time, and may cause death, injury, or severe illness. P. Benefics in this house tend to a greater love and affection, which is also strengthened by a benefic in the 5th H. of a parent, or a benefic ruling the 5th and 7th. Malefics in the 7th H. may make the parents cold and ill-disposed towards their children, which may be added to by the influence of malefics in the 5th or 11th H., causing the children to bring sorrow and misfortune upon the parents. Saturn weak and afflicted in the 7th H. of the child denotes antipathy from the father, and the ☽ so situated, antagonism from the mother. Also the conditions of the 10th and 4th H. should be noted, and judgment formed according to the sex of the native. The ☽ by day represents the father, and ♃ by night; ♀ by day, the mother, and the ♁ by night. PART OF FORTUNE—(☽)—A point in the Horoscope where the rays of the ☽ and ♁ converge, and where the ☽ would be if the ☽ were exactly rising. Many Authors refer to the Part of Fortune as a benefic influence, and to indicate good fortune, good health, etc., when in favorable aspect to the Significators in the map. Wilson in his Dictionary says that the Part of Fortune is but a "Phantom hatched in the brain of Ptolemy", and has no influence whatever. Some Writers say the Part of Fortune may become Hyleg in a Nocturnal Horoscope if the ☽ be decreasing in light, and both the ☽ and ♁ are below the horizon, and not in a hylegical place. They also say the Part of Fortune may become Anaretta when the ☽, ♁, or Asc. are hyleg.

The student should learn how to compute the place of the Part of Fortune, both in the Zodiac, and Mundane, and there are good Chapters and Articles on the subject in the various Text-books and Dictionaries of Astrology. (See Anareta, Hyleg).

PARTNER—Companion—Associate—

PARTS OF THE BODY—Members—Organs—

Absence of a Part—(See Missing).

Afflicted Parts—The Parts, Organs, or Members of the body usually afflicted are those ruled by the signs containing the malefics, or a badly afflicted ☉ or ☽. The Asc. denotes the part of the body liable to affliction from external causes. (See External). The Sign in which the Significator of disease is found indicates the Part, or Organs, principally affected. The Parts afflicted are also those containing the ☉ or ☽ if the Lights are in ♂ or ill-asp. with malefics. The places occupied by the malefics at B. are always considered places of affliction. (See Malefics). The Part of the Body afflicted is also shown by that part of the Sign, Face or Decanate of the Sign, which is rising upon the Eastern horizon at B., and especially if afflicted, or containing a malefic. (See "Locating the Disease" under Diagnosis). The Part of an Organ afflicted is denoted by the Face, Decanate, or Division of the Sign containing the afflicting planet, and which indicates whether the upper, middle, or lower part of the organ is afflicted. (See Decanates; "Organs" under Middle; Navamsa; "Lower Part" under Organs; "Organs" under Upper). The Asc. afflicted by a malefic tends to trouble in the head. (See "Disorders Of" under Head). For the influences causing diseases, infirmities, and afflictions to the various parts and organs of the body, see the Part, Organ, or Member in the alphabetical arrangement. The Sixth House should be noted, as this is the House of Health, and the Sign, Signs, and Planets ruling this house at B., and the parts of the body coming under these influences, are very subject to disease and weakness when the vitality becomes lowered for any reason, or thru worry and anxiety, bad thinking, and adverse planetary influences by Direction, Transit, or Progression, etc. Also observe the Sign and House containing the ☽, and especially with females, and the planets to which the ☽ may be applying, or from which she is separating, as such influence of the ☽ helps to form a judgment as to the part of the body afflicted, and also the nature of the disease. (See "Disease"

PARTURITION—Childbirth—Delivery—Confinement—Accouchment—Puerpera—Puerperal—Pertaining to Child-bearing, etc.—Ruled by the ♀ and the 5th H. conditions. The time of birth of a child is ruled by the movement of the ♀, but it is the influence of ♂ which ushers the child into the world. The rules of the Prenatal Epoch govern the time of the Accouchment. (See "Moment of Birth" under Moment; Prenatal Epoch). Normal births are ruled by ♀. Abnormal births, and dangerous and difficult parturition, are caused by the influences of the malefics at the time, or such influences in the 5th H. of the mother at B. The following subjects have to do with Parturition, Childbirth, and the normal, abnormal, dangerous, difficult, premature, or delayed entrance of the child into the world. See these subjects in the alphabetical arrangement when not more fully considered here—

Abortion; Accident At Birth—Extreme Danger In—Danger to the Mother and Child—The ☉ or ♃ to the ☽ or ill-asp. ♂ by dir. at the time; ♀ afflicted in the 5th H. at B., and afflicting the 5th H., or ruler of the 5th by dir.; ♀ afflicted in ♀ at B.; ♂ afflicted in the 5th or 11th H.; ♂ afflicted in ♀, the sign afflicted with the 5th H.; the afflictions of ♂ are very dangerous in cases of childbirth, and especially if ♂ is in the sex sign ♀ at B., or in ♀ by transit or direction at time of the Accouchment. These influences also often make it necessary for an instrumental delivery (and especially if ♀ is involved in the configuration causing delay), excision of the foetus (Caesarian Operation), or extraction of the foetus in mutilated parts. The ♀ or ♀ body afflicted by ♀ or ♂ during pregnancy at the times corresponding to the monthly periods, bring danger of an accident, or dangerous trouble to the mother during parturition. (See "Death At Birth" under Children; "Excision", "Mutilation", under Foetus; "Accidents At Birth" under Infancy; "Injured" in this section).

Or observe on what day ♃ or ♀ will transit the cusp of the 5th H., and look for the birth on that day. (Hor'y). (See "Cause of Birth", "Moment of Birth", under Birth; "Birth of a Child", "Born", under Children; "Moment of Conception" under Conception). PASSION—Intense Emotion—Intense Sexual Desire—Erotic Disturbances—Abuses of the Passional Nature—Morbid Passions—Excess of Passion—Passionate Diseases and Disorders from Passional Excesses, etc.—The Passions are ruled principally by ♂ and the ♀ sign. Are also ruled by the ♃ and the ♁. Animal Lust and Passion are ruled by the ♃ and ♂. The Liver is the seat of the passional desires. (See "Desire Body" under Desire; the Introduction under Liver. Also see Reins). The afflictions of ♂ tend to increase of the passion. Mars rules passion in men, and ♀ in women. The good aspects of ♂ stimulate the sex feelings along lawful lines, but the bad aspects of ♂ tend to destroy it by over-stimulation and excesses. In good aspect, ♀ tends to control passion, but in evil aspect perverts, destroys, or suppresses it. The ☉ also tends to give passion. Mercury in ♀ tends to center the mind upon sex and to give morbid sex desires. Since the separation of the sexes in the Lemurian Age, it is said the greatest problem of Earth life is to learn to properly control and use the creative force, avoid its abuse, perversion, waste. The creative function is at present under the control of Man, and to use at his will for pleasure or propagation, whereas in the earlier Races this function was under the control of the Higher Powers, and propagation was limited to certain times of the year when the planetary influences were favorable for such. The abuse of sex, sex excesses, and misuse of the creative power, is said to be the cause of sickness, suffering, sorrow, and earlier death upon the Earth today. From the Occult standpoint the question of Sex, its proper use, and how to transmute it to its proper use, is elaborately considered in the book, "The Key of Destiny", and other books by Dr. Homer and Mrs. Curtiss, Founders of the Order of Christian Mystics, or "The Order of the Fifteen." Passion is legitimate when properly used, and should not be killed out, but controlled. Each of us has within us much of the animal, but the Higher Mind should rule, and the animal in us guided, directed and controlled. From the human, or lower mind side, much is given in the Textbooks of Astrology along the lines of passion, its abuse, excesses, deviations, perversions, etc., and the following paragraphs and subjects have to do with such matters, as gathered, tabulated, and arranged from my Library of books. See the following subjects in the alphabetical arrangement when not more fully considered here—

Those who have the ☉ critically afflicted at B. tend to have peculiar trouble and serious illness every tenth year of life. The hyleg afflicted by ♃ at B., or ♃ in the Asc. or

M.C., or afflicting the ☉, ♃, or Asc., tends to cause the return of some chronic ailment, or cause some chronic disease every seven years when ♃ passes the evil aspects of ☐, ☿, and ♃ to his place at B., and also again when he reaches his place in the map of birth at from the 28th to 30th years of life, and also at about the 58th and 59th years of life, when ♃ finishes his second revolution in his orbit after birth. The ♃ in bad asp. to ♃ at B. tends to ill-health every seven years. The ♃ ruler of the 1st or 6th H. at B., and in bad asp. to ♃, tends to ill-health periodically, both by transit and the directions of ♃, when the ♃ is in bad asp. to ♃ at B.; the ☐ or ☿ Asc., periodic illness. (See Crises, Lunations; "Rules" under Operations).

Life—Periods of Life Ruled by the Planets—Authorities seem to differ on the Periods of Life, as ruled over by the different Planets. The first four years of life are ruled by the ♃, and also it is generally understood that the ♃ rules the first seven years of life. Mercury rules from the 4th to 10th years, by ♃. From the 10th to 18th years, by ♃. From the 18th to 37th years, by the ☉. From the 37th to 52nd years, by ☿. From the 52nd to 64th years, by ♃. After the 64th year, by ♃. Another division given by some Authors is as follows: The ♃ rules the first seven years of life; ♃ from 7 to 15; ♃ from the 15th to 24th years; the ☉ from the 24th to 34th years; ☿ from the 34th to 45th; ♃ from the 45th to 57th; ♃ from the 57th to 70th. If a person lives beyond 70, then ♃ rules from 70 to 84, and ♃ from 84 to 99. When the ruler of any of these periods is severely afflicted at B., it indicates that that part of the life ruled by such planet will tend to be especially unfortunate, and filled with trouble, trials, misfortune, or illnesses of the nature attributed to such planet. The ♃ badly afflicted at B. tends to more danger in infancy. In the Kabala, Infancy was dedicated to the ☉; childhood to the ♃; youth to ☿ and ♃; mature age to ♃, and old age to ♃. (See Climacteric; "Critical Periods" under Critical; Cycles).

Middle Life—Period of—(See Middle Life).

Old Age—Period of—(See Fourth House, Old Age, Terminal).

Planetary Periods—Periods of the Planets—The revolution of ♃ takes 29y. 167d. 4h.; of ♃, 11y. 314d. 20h.; of ☿, 1y. 321d. 22h.; of ♃, 224d. 7h.; of ♃, 87d. 23h.; of ♃, about 84 years, or 7 years in a Sign; of ♃, 165 years, or about 14 years in one Sign of the Zodiac; of the ♃, 27d. 7h. 43m., her periodical course, but the period between her actual conjunctions is 29d. 12h. 44m. The ☉, about 365 days to pass thru the 12 Signs, as seen from the Earth. (See "Direct Motion" under Direct; Retrograde).

Seven-Year Periods—Every 7th year of life is said to be a changing, and more critical year in life, which years correspond to the Quarters of the ♃. Life is divided into seven-year periods, as 7, 14, 21, 28, 35, 42, 49, 56, 63, 70, etc., which are considered crisis years in life, or more dangerous years. Also every 7th year from birth corresponds to the ♃, ☐, ☿, and ♃ aspects of ♃ from his place in the radix, as his period is about 28 years, which makes every seventh year more critical for the health. The 49th and 63rd years of

adult life are considered dangerous years, being doubly climateric, and many deaths occur in such years of life. (See Aspects, Climateric, Crises, Seven).

These nerves also ruling the skin and mucous membranes, and also being ruled by ♀, tend to morbid diseases and manifestations. Cold, ruled by ♀, also affects these nerves, driving the blood inward, and causing internal congestions, and acute diseases start with disturbances in the peripheral nerves. (See Acute, Capillaries, Centripetal, Chilblain, Chill; "Blood" under Circulation; Cold, Colds, Congestion, Constrictions, Ganglion; "Congestion" under Internal; "Mydriasis" under Iris; the Introduction under Knees; Nausea, Saturn; "Arms" under Skin; "Sympathetic Nervous System" under Sympathetic).

PHYSIC—A Purge—Cathartics—Laxatives—Medicine—An Opening Medicine—Yellow color acts as an opening medicine. Physic works less when the ♀ is in a fixed sign. Dr. Pearce, in his Textbook of Astrology, says, "Healthy Persons should never take Physic." In purging, the ♀ and lord of the Asc. should be descending and under the Earth. Do not give a physic when the ♀ is in a fixed sign, but give it when the ♀ is in a watery sign, as in ♀ or ♀, for the best and quickest results. A physic given when the ♀ is in ♀, ♀, or ♀, the Ruminant Signs, tends to nausea and vomiting. Avoid physic when the ♀ is in ♀, as this sign governs the Excretory System. (See Antiperistalsis; "Biliousness" under Bile; Constipation, Costiveness, Emetics, Enema, Faeces; "Organic" under Functions; "When to Give"; "When Not to Give"; under Medicine; Nausea, Peristalsis, Podophyllin, Vomiting, Xylostein; "Bowels" under Yellow).

PHYSICAL—Physique—Pertaining to the Physical Body—Physiological—The Physical Body is ruled largely by the sign on the Asc. at B, and the Asc. rules the physical strength, the body, and the organic force. Also as the Sign the ♀ is in at B, is either the Asc. or Descendant at Epoch, this sign should be considered in judging of the physique, as the ♀ is the Astral Mould upon which the body is built. When the ♀ is setting at B, or decr. in light, people come very much under the influence of the sign on the Descendant at B. (See Ascendant, Astral, Body, Descendant, First House; "Organic" under Force; Moon, Prenatal Epoch, Seventh House).

PINEAL GLAND—The Hypophysis or Conarium—A Small, Reddish, Vascular Body in the Posterior Part of the Third Ventricle—The Third Eye—The Spiritual Center in the Body—The Organ of Spiritual Sight and Spirituality—The Seat of the Soul in the Body—The Organ of Thought Transference—This Gland, or Organ, is ruled by ♃, and ♃ in ♁ especially rules and affects this Gland. In the earliest Races of Humanity this organ is said to have been a Third Eye in the back of the head, so the people of that time, when the Earth was hot and full of dangers, could see in all directions at the same time for protection. In later Ages, when sight in so many directions became less necessary, this organ was withdrawn into the brain, and is now known as the Pineal Gland. (See Orifices.) This Gland in present Humanity is not very well developed, but is now becoming very well developed again in certain types of Humanity, and is especially connected with what is termed "The Sixth Sense". In the coming Sixth and Seventh Races, the Pineal Gland will be very highly developed, and be a powerful organ for high spiritual development and perception. The Pineal Gland is vibrated by the Ether, or Luminous Gas, in the Spinal Canal, and tends to produce Spiritual Sight and Religious Ecstasy.

A high rate of vibration of this gland tends especially to religious ecstasy. Drink, Drugs, and Narcotics produce a supernormal rate of vibration of the Pineal Gland, causing Delirium, and the seeing of Demoniacal Shapes, due to Ψ afflicted in the map of birth, and especially when Ψ is in the watery sign X , or in the 12th H. The Pineal Gland is stimulated and awakened also by the \ast and Δ aspects between Ψ and H at B. Also progressed planets, except h , in O , \ast , or Δ Ψ tend to awaken the Gland, and to cause unusual cravings and Soul hunger, and often to lead to the use of Narcotics. (See Delirium, Demoniac, Ductless Glands, Ecstasy, Monsters, Narcotics; "Sixth Sub-Race" under Neptune; Pituitary; "Canal" under Spine; Spiritual). See the Chapter on the Pineal Gland in the book, "The Message of the Stars", by Mr. and Mrs. Max Heindel, of the Rosicrucian Fellowship at Oceanside, California.

The planet Ψ is also strong in this Sign, as X and Ψ rule the Sea. (See Neptune). Pisces is a double-bodied sign, and the most fruitful of all the signs, and tends to a large family when strong at B., and to the production of Twins, Triplets, and multiple births. This Sign is connected with the Hebrew letter Qoph (K), and is also predominant in mirth. Pisces is a sign of restraint and confinement, as symbolized by the Fishes joined together, and a sign of self-undoing. It is called "The Sign of Sorrows", and people born with the O and h in this sign are subject to great sorrows, tribulations, secret enemies, plots, treachery, self-undoing, restraints, confinement, isolation, as well as to reserve, and more of secrecy and seclusion. Pisces is classified as a bicorporeal, broken, changeable, cold, cold and moist, cold-blooded, common, crooked, double-bodied, effeminate, feminine, fruitful, humid, hyemal, imperfect, lymphatic, moist, motive, mutable, mute, negative, nocturnal, obeying, phlegmatic, plastic, relaxing, sickly, southern, torpid, unfortunate, watery sign. Also other qualities assigned to X , and which often characterize the Pisces people are—Brooding, clair-

voyant, compassionate, confining, consumptive, debauched, dissipated, erratic, fretful, generous, grievous, idle, indifferent, intoxicating, jovial, kind, loquacious, mediumistic, mirthful, obessional, prodigal, psychic, receptive, reserved, restless, restraining, scattering, secretive, self-undoing, slothful, sorrowful, spiritual, stagnant, susceptible, sympathetic, treacherous, vacillating, weak and of low vitality, worrisome, etc. This sign, when on the Asc. at B., gives the least vitality of all the Signs. It tends to a softening and relaxing effect upon the tissues, and to produce phlegm and mucus. It has a torpid, lymphatic, plastic, and humid action, and leads to many ailments thru carelessness, forgetfulness, or dissipation. This sign, when afflicted at B., and containing the O and malefics, tends to affect the lungs, and many Consumptives have the O or h in this sign, or X upon the Asc. at B. Pisces is said by many Authors to be the most Spiritual Sign of the Zodiac in its higher vibrations, and being the last Sign of the Zodiac, denotes the end of material experiences, and the transition to a higher Spiritual State if the Soul is ready for it. However, with the unregenerate person, those who are drifting with Earth-life tendencies, and being dominated by Personality, it is considered a sign of Drink, Dissipation, Debauchery, and Self-Undoing. Being a watery sign, it is restless, changeable, and vacillating, and tends to idleness, slothfulness, and indifference to life's duties in the unawakened person.

PITCH-BLENDE—A Mineral ruled by H. It is a source of Uranium and Radium. (See Radium, Uranium; "Metals and Minerals" under Uranus).

PITTED DEGREES—Of the Zodiac—Pitted or Deep Degrees of the Zodiac—The Asc., or its lord, in any of these degrees makes the native subject to deep marks by scars or the pockmarks

of smallpox. They also cause an impediment in the speech. These degrees are as follows—♄ 6, 11, 16, 23, 29; ♃ 5, 12, 24, 25; ♀ 2, 12, 17, 26, 30; ☿ 12, 17, 23, 26, 30; ♁ 6, 13, 15, 22, 23, 28; ♀ 8, 13, 16, 21, 22; ♁ 17, 20, 30; ♀ 9, 10, 22, 23, 27; ♄ 7, 12, 15, 24, 27, 30; ♃ 17, 22, 24, 29; ♁ 1, 12, 17, 22, 24, 29; ♃ 4, 9, 24, 27, 28. (See "Face" under Smallpox).

PITUITARY BODY—Pituitary Gland—Hypophysis Cerebri—A Small Reddish Body in the Sella Turcica in the Pituitary Fossa of the Sphenoid Bone—Pertaining to Phlegm—The Pituitary Body is a Ductless Gland, and is ruled by ♀ and the ♀ Sign. Uranus in ♀ especially rules and affects this Gland. The Anterior Lobe of this Gland rules over the Creative, or Sex Force, and over the Nerve Fibers. (See "Fibers" under Nerves). The Posterior Lobe rules over the circulation of the Fluids of the body, and especially the circulation in the Kidneys. (See "Circulation" under Kidneys). The Pineal Gland, ruled by ♀, and the Pituitary Body, ruled by ♀, are closely related to the spiritual side of our natures. The Thyroid Gland acts as a connecting body between the Pineal and Pituitary Glands. The Pituitary Body, and also the Pineal Gland, are now more or less dormant and inactive in their workings in the majority of people, but are gradually becoming awakened in the more highly advanced and evolved Souls, and form the link between the Soul and the Spirit World about us. These Glands are gradually coming under the control of the Cerebro-Spinal Nervous System, which system rules the voluntary muscles. The Pineal and Pituitary Glands, acting as Spiritual Centers in our Being, rule over Voluntary and genuine Clairvoyance, Mediumship, Spiritual Sight, etc., and in a coming distant Age will be very highly developed, so that people can see and know what is going on in all parts of the Universe. These organs, or Glands, are not atrophied, as is usually thought by the Medical Profession, but are merely dormant, awaiting their future time and renewed development, and in the coming Sixth Race these Organs will be highly developed and very active. (See "Sixth Sub-Race" under Neptune). The Pituitary Body is awakened and stimulated by the * and Δ aspects of ♀ to ♀. Also progressed planets, except ♃, when in ♃, *, or Δ ♀, tend to arouse and awaken the organ, and to cause unusual cravings and Soul hunger. Uranus acting too freely upon the Pituitary Body often causes too much Pituitary Secretion, and overgrowth of the body, Giants, and Freaks of Nature. (See Freaks, Giants; "Abnormal Growth" under Growth). Lethargy of the Pituitary Body is given by the Lymphatic Temperament. (See "Temperament" under Lymphatic). Uranus in ♃ also tends to diminish the Pituitary Secretion. The Pituitary Body supplies a secretion made up by the Uranus Alchemy, which, by passing into the blood, aids the growth and nutrition of the body. The assimilation of food

is also regulated by ♀ through the Pituitary Body. (See Assimilation, Cerebro-Spinal, Clairvoyance, Ductless Glands, Dwarfed; "Basal Ganglia" under Ganglion; Glands, Leprosy, Mediumship, Nutrition, Phlegm, Pineal; "Creative Force" under Sex; Sphenoid, Spiritual, Thyroid, Uranus). See the Chapter on the Pituitary Body in the book, "The Message of the Stars", by the Heindels.

PITY—Compassion—Mercy—Sympathy—

Has Pity for Others—The watery signs tend to be more emotional, and to soften the nature and create sympathy for others. Venus in ♃ is a strong symbol of sympathy, but if ♃ or ♃ afflict ♀ in this sign, the sympathies and pity may be unwisely or foolishly bestowed. (Pisces is a strong sympathetic sign, being the sign of ♃, the planet of benevolence, and also ♃ in his exalted sign ☿ tends to pity and a sympathetic nature. The Airy Signs ♁ and ♃, when well-aspected at B., and occupied by benefics, are considered very sympathetic signs, and to make the native kind and pitiful of those in sorrow, trouble, illness, or distress. Aquarius is the sign of "The Water Pourer", and people born with the ☿ in ♃, or ♃ on the Asc., tend to be humane and full of mercy for others, and Emancipators, as was Abraham Lincoln, who was an Aquarian. (See Aquarius, Humane, Kind, Merciful, Sympathetic, Well-Disposed).

Shows No Pity—Cruel—Rough—Without Compassion—Merciless—Cold-Blooded, etc.—Born under the strong influence of ♃, and ♃ afflicted and ill-dignified at B. The ♃ signs ♀ and ♀ when afflicted tend to make the nature harder and more severe and cruel, and especially under provocation. The malefics, ♃ and ♃, when rising and elevated at B., and afflicting the mental ruler, ♃, tend to make the nature harder, more cruel, unsympathetic, revengeful, fierce and savage. The ♃ signs tend to be hard and self-occupied, and especially if ♃ be in the Asc., or afflicting the Asc. (See Brutish, Cruel, Fierce, Inhuman; "Rough", "Violent", under Manners; Merciless, Raving, Rough, Savage, Vicious, Violent).

PLACE—Location—Residence, etc.—

Place of Birth—Is ruled by the 4th H. When ♃ is in this house at B., and well-aspected, and with no malefics in this house, the place of birth is the most fortunate location for the native. The native should remain at the place of birth when the 3rd and 9th Houses, the Houses of Home and Foreign Travel, are afflicted by malefics, or ruled by them, as danger, injury, accident, sickness, or death, would be indicated by travel, making the place of birth the safest and most fortunate location. Also if the ☿, ♃, ♃, and ♃ are all above the Earth at B., remain at the place of birth. However, the native should remove from the place of birth when ♃ is in the 4th H. at B., and afflicted by malefics, or when there are malefics in the 4th H., and no benefics there, or when a malefic

rules the 4th H., and is evilly aspected. Uranus or σ in the 4th H. at B. and afflicted, tend especially to make the birthplace very unfortunate and full of trouble. Also η afflicted in the 4th H. tends to bring many sorrows, delays, hindrances, and disappointments if the native continues to live at the birthplace. (See Abroad, Environment, External, Foreign Lands, Fourth House, Location, Nadir, Native Land, Removals, Residence, Travel, etc.).

Place of Death—The Killing Place In the Map of Birth—The Anareta—Is indicated by the foremost, or most malevolent direction, in a train of evil directions to the hyleg. (See Anareta). For the actual place of the death, and the conditions under which death is apt to occur, see such subjects as Abroad, Accident, Desert, Exile, Foreign Lands, Home, Native Land, Prison, Shipwreck, Travel, Voyages, etc.).

Place of Residence—(See the paragraphs under Residence. Also see Abroad, Location, Native Land, Removals; "Place of Birth" in this section).

PLACENTA—(See "Placenta" under Womb).

PLAGUE—A Contagious, Malignant, Epidemic Disease—Pest—Pestilence, etc.—Plagues are usually coincident with the appearance of Comets in the sign ruling the different Countries and Nations. The appearance of Halley's Comet is usually followed by a Plague, and especially in the Country ruled by the Sign of the Zodiac in which the Comet appears. Plagues are also caused by afflictions in Ω , and are a Ω and \odot disease. Also caused by the σ of two or more Superior Planets. (See Comets, Eclipses, Epidemics, Pandemics, Perihelion, Pestilence).

Black Death—An Epidemic Disease with dark blotches upon the skin, and caused by the σ of several superior planets, and especially in airy signs. In March, 1866, this disease broke out in Dublin, Ireland, at a time when σ was badly afflicted in π , the sign which rules the blood, and when η was also afflicting Ireland. Also the Black Death occurred in England in the 14th Century.

Bubonic Plague—(See Bubo).

Madness Plague—(See Madness).

Plague Sores—A σ disease, and caused by σ afflictions. (See Sores).

Spotted Fever—(See Spotted).

PLANETS—Planetary—Dominion of the Planets—From Ancient Times seven Planets have been referred to in Sacred Writings as belonging to, and making up our Solar System. In the Christian Bible, in Rev. 1:4, it speaks of the Seven Churches in Asia, and the Seven Spirits which are before the Throne. In Rev. 1:20 it says, "The Seven Stars are the Angels of the Seven Churches". Occult Writers refer to these verses as meaning our Planets, and the Seven Great Planetary Angels, the Planetary Hierarchies, the Seven Archangels, and that each Planetary Angel is an Aspect of God, and doing the work the Higher Powers have ordained to be

done in our Universe. No Planet is, therefore, evil, but may have its disciplinary action for the good of Humanity, and to help Souls on in their Evolution. For the names of the Planetary Angels see "Angel" under each of the Planets. The seven Planets which make up our System are the \odot , J , η , γ , σ , φ , and ξ . Neptune and M are not spoken of by early Writers, and many Writers say that these two Planets are outside of our Solar System, but have a certain spiritual influence over us, acting thru the Pineal Gland, and the Pituitary Body, which influence is to gradually awaken Humanity to Powers which will be needed, and brought into greater manifestation in the people of the coming Sixth Race. (See Pineal, Pituitary; "Sixth Sub-Race" under Neptune; Pluto; "Influence Of" under Uranus). Much has been written upon the Occult and Mystical side of planetary influence, and the student can find these Teachings in the various Occult and Mystical Societies, such as The Rosicrucians, The Theosophical Society, The Order of Christian Mystics, etc. For the action and influence of the Planets, and the nature of their good and bad aspects over Humanity, see each of the Planets in the alphabetical arrangement. The Masters, Adepts, Initiates, and very Advanced and highly evolved Souls, have conquered the Planetary and Zodiacal influences, and are no longer affected by them, but ordinary Humanity, those who are still drifting with their Stars, and who may be still living in their lower minds, and who also may be breaking the Laws of God and Nature, are considerably affected by the Planetary influences for ill at times, which influences are placed over us for testings, training, education, experience, etc., and all which in the end are for our good and advancement. (See Aspects, Character, Destiny, Fate, Map; "Free Will" under Will). The following paragraphs have to do with the Planets, their Action, Classification, Influence, etc., and along lines which are generally spoken of in the Text-books of Astrology.

Accidents—And Planetary Influence—(See Accidents, Directions, Events).

Acid Action Of—(See Acids).

Action of the Planets—(See "Action", and the various paragraphs under each of the Planets. Also see Pathological, Perverted, Physiological, Polarity, Tonic, in this section).

Afflictions Of—The Planets may afflict by their evil aspects to the Significators in the Map of Birth, and benefit by their good aspects. The \odot , γ , φ , ξ , and the J afflict only by their \square or δ aspects. The malefics afflict by their σ , P, \square , or δ aspects. However, any aspect of η is considered an affliction in the life of the ordinary person, but his evil aspects are more inimical. Saturn in any part of the horoscope is considered an affliction to the Sign, House, and part of the body so ruled. Judgment cannot be based upon any one affliction, but the progressed planets, transits, directions, and the

last New Moon, should be studied. (See Affliction, Aspects, Directions, Lunations).

Alkaline Action Of—(See Alkaline).

Angels—The Planetary Angels—These Angels have charge of the affairs, and various Departments in the rule of our Solar System. They are called "The Elohim" also in the Bible. They each manifest under a different Ray, or Color, and represent the seven principal Planetary Colors, or the seven Primary Colors of the Solar Spectrum. (See "Planets and Color" under Colors; "Angel" under each of the Planets).

Colors and Planets—(See Colors; "Angels" in this section).

Conjunctions Of—(See Aspects; "Afflictions Of" in this section).

Cycles Of—(See Climacteric, Cycles, Periods, Years).

Daily Motion Of—This varies from time to time. A fast motion tends to make diseases more speedy and sharp, and to terminate more quickly. A slow, stationary, or \mathcal{R} motion, when such a planet is the afflictor in the disease, tends to make the ailment more protracted, and difficult to cure, and especially until such planet assumes a direct, faster, and more normal motion, as seen from the Earth. A Table of the standard Daily Motions of the Planets can be found in the Textbooks of Astrology. Also see the Article on the Motional Strength of the Planets in Chap. XI, in Daath's Medical Astrology.

Debilities Of—Dignities of—Exaltation of—Fall of—Detriment of, etc.—These are mentioned in the Articles on each of the Planets in this book. Also see the Tables of Dignities of the Planets in the various Textbooks of Astrology.

Dignities Of—(See "Debilities" in this section).

Direct Motion—The forward motion of a Planet, as seen from the Earth. The influence of a planet is more fortunate when direct in motion, and also more prompt and swift in disease. (See Direct).

Directional Strength—(See Directions. Also see the Article on "Directional Strength" in Chap. XI, in Daath's Medical Astrology).

Disease—The Planets and Disease—(See Complications, Course, Disease, Ill-Health, Sickness).

Elevated Planets—(See Elevated).

Exaltation Of—(See "Debilities" in this section).

Fall of Planets—Planets have their fall in the sign in \mathcal{G} to the sign of their exaltation, and planets in their fall at B. tend to be more troublesome and evil in health, and other matters. (See "Debilities" in this section).

Feminine Planets—The \mathcal{D} and \mathcal{F} .

Fiery Planets—The \odot and \mathcal{M} . (See "Fire Signs" under Fire).

Heliocentric System—Of the Planets—(See Heliocentric).

Herbs—Herbs Ruled by the Planets—(See Herbs).

Hot and Fiery Planets—The \odot and \mathcal{M} .

Hours—Planetary Hours—The Hours of the day are ruled by the Planets. There are 24 Planetary Hours in each day. The time from Sunrise to Sunset is divided by 12, which gives the time of the day-time planetary Hours. The Planetary Hours at night are from Sunset to Sunrise, and this time also divided by 12 gives the length of the night Planetary Hours. The Planets rule these hours, from sunrise to sunset, in the following order. On Sunday, the first hour after sunrise is ruled by the \odot ; the 2nd planetary hour by \mathcal{M} ; the 3rd hour, by \mathcal{F} ; the 4th hour, by the \mathcal{D} ; the 5th hour by η ; the 6th hour, by \mathcal{M} ; the 7th hour, by \mathcal{M} , and the 8th hour by the \odot again, etc., and in this order on thru the 24 hours. The first planetary hour of each day at sunrise is ruled by the planet which rules the day. Thus, Sunday, ruled by the \odot , the first hour at sunrise is ruled by the \odot . The \mathcal{D} , ruling Monday, rules the first planetary hour after sunrise. Tuesday is ruled by \mathcal{M} , and \mathcal{M} rules the first planetary hour after sunrise; \mathcal{F} the first hour after sunrise on Wednesday; \mathcal{M} the first hour after sunrise on Thursday; \mathcal{F} the first hour on Friday, and η the first hour after sunrise on Saturday, etc. The planetary hours of each day of the week follow the same order of the planets as given for Sunday in this paragraph. The planetary hours are longer in the daytime in the Summer, as the days are longer, and shorter at night, with the shorter nights. In the Winter time, the night planetary hours are longer, due to the longer nights, and longer time between sunset and sunrise, and the daytime planetary hours shorter, etc. The happenings of each hour are said to be of the nature of the planet ruling the hour. Thus, the η hour brings delays, trouble, hindrances, des-

pondency, increased suffering, and is also known as the hour of death. To take sick in a $\frac{1}{2}$ hour tends to prolong the disease. (See Calm). The δ hour tends to accidents, injury, quarrels, etc., and so on with each of the planetary hours. The important planetary hours to be considered in connection with the health are the $\frac{1}{2}$ and δ hours, which are usually bad hours for the health, or for an operation. The η and ζ planetary hours also tend to bring alleviation and moderation in disease, and happier conditions. The student should make a study of Planetary Hours in the Textbooks of Astrology. In Dr. Broughton's book, "The Elements of Astrology", the subject is treated quite at length, and also a Perpetual Table of the Planetary Hours given for each of the 12 months of the year, and which can be used and adapted to any location. Also see the Articles on "Hours" in Wilson's Dictionary of Astrology, and in Alan Leo's Dictionary of Astrology. Also read the book, "The Silver Key", by Sepharial. (See "Order of the Planets" in this section; "Hour" under Saturn, Sun; "Days of the Week" under Week).

Houses—The House Position of the Planets—(See each of the 12 Houses, as First House, Second House, Third House, etc.).

Humid and Moist Planets—The δ especially rules Moisture. Also η and ζ give off moisture. (See Moisture).

Illnesses Caused By—(See the section on "Diseases" under each of the planets. Also see Disease, Ill-Health, Infirmities, Sickness).

Inferior Planets— ζ , δ , and ζ .

Influences Of—(See the section on "Influences" under each of the Planets).

Intrinsic Nature—Each planet has its own intrinsic and fundamental nature, rules over a certain Department of life and Human Affairs, and always acts in this manner unless modified by the aspects of other planets, and its sign or house position. Thus, $\frac{1}{2}$ is cold, contracting, suppressing, hindering, hardening, obstructing, etc. Mars is hot, fiery, hasty, combative, and tends to anger, fevers, inflammation, etc. The nature of the planets is given in the Articles on each of the Planets. Also good Articles on each of the Planets, and their nature, are given in the book, "The Message of the Stars", by the Heindels, and also in the Textbooks and Dictionaries of Astrology. Also see "Action", "Perverted", and the various paragraphs in this section).

Keywords—The Keywords, or the Intrinsic Principle of Each Planet—(See "Principle Of" under each of the Planets).

Kinetic Points—The Static and Kinetic Points for each planet are quite fully considered in Chap. XII, in Daath's Medical Astrology. These points have an effect upon the physical organism. The static point of a planet is its degree of Longitude in a Sign, while its kinetic points are those places in the map affected by its aspects. Thus $\frac{1}{2}$ in μ tends by his static

position to affect the sex nature and organs, and by his reflex aspect, or kinetic point in δ , to greatly affect the throat and cause throat disorders. (See Ablation, Antipathy, Aspects, Opposites).

Life—The Period of Life Ruled by Each of the Planets—(See Periods).

Magnetic Planets—(See "Negative Planets" under Negative).

Major Planets—(See Major).

Majorities—Of the Planets—(See Majority).

Malefic Planets—(See Malefics).

Mars—(See Mars).

Masculine Planets—The \odot , μ , $\frac{1}{2}$, η , and δ are classed as masculine planets. Also planets are classed as masculine when rising before the \odot between the 1st and 10th Houses, or setting before the \odot between the Descendant and Nadir. The δ and ζ are classed as feminine. Mercury is variable according to the sex of the planet with which aspected and configured.

Mental Planets— μ and ζ .

Mercury—(See Mercury).

Metals—Metals Ruled by the Planets—(See Metals).

Mind and Planets—(See Intellect, Mental, Mind, Perception, Understanding, etc.).

Minerals—Minerals Ruled by the Planets—(See Metals, Minerals).

Minor Planets—Inferior— δ , ζ , ζ .

Moisture—Planets Exerting a Moist Influence— δ , η , ζ . (See Moisture).

Moon—(See Moon).

Motion of the Planets—The motion of the planets tends to modifications in health, disease, and states of the mind, and the planets have various effects in their vibrations over the mind and organism, according to their motion, whether slow, rapid, retrograde, or direct, and the aspects they form to each other, and their sign and house positions from time to time, by transit, direction, or progression. However, the motional strength of planets as related to disease is still considered an uncertain factor by some Authors. (See Daily Motion, Direct, Retrograde, Slow, Stationary, in this section; "Degree of Disturbance" under Disturbed).

Mystery Planet—(See Violet).

Nature Of—(See "Intrinsic" in this section).

Negative Planets— ψ , $\frac{1}{2}$, ζ , and the δ . (See "Negative Planets" under Negative).

Neptune—(See Neptune, Pineal).

Neutral Planets—(See Neutral).

Nutritive Planets—(See Nutrition).

Occidental—Planets Occidental—(See Occidental).

Orbs of the Planets—(See Orbs).

Order of the Planets—Esoteric Order of the Planets—The Planets considered in this order are as follows— \odot , ζ , δ , η , $\frac{1}{2}$, μ , δ . This is also the order of the Planetary Hours in their rotation. (See "Hours" in this section).

Oriental—Planets Oriental—(See Oriental).

Passive Planets—(See Passive).

Peregrine Planets—(See Peregrine).

Perigee—Planets In Perigee—(See Perigee).

Perihelion—Planets In—(See Perihelion).

Periods of Life—Ruled by the Planets—(See Periods).

Perverved Action Of—Each planet in its action is intrinsically normal, tonic, or above normal; atonic, or below normal; electric or magnetic, positive or negative. A planet in its fundamental nature is always the same. The action of the planets is changed, perverted, and mutated by the constantly new-forming polarizations formed by aspects to other planets. Also in a nativity there may be too much of the action of a planet, or an insufficiency or permutation, which may lead to disease, mental disorders, etc. Thus, the action and reaction of the planets upon each other is what causes the many contingencies of life, such as sin, suffering, misfortune, disease and death by their evil aspects, and good health, good fortune, peace of mind, etc., by their more favorable aspects, progressions, and directions after birth. (See Aspects, Atonic, Polarity, Tonic; Afflictions Of, Intrinsic Nature, and the various paragraphs in this section).

PLUTO—The Planet Pluto—This planet will not be considered in this Edition of this book, as very little is known of it, and at present is considered by

many Authorities to be a hypothetical planet. It is also doubted by some Writers as being a part of our Solar system, and is said to be outside of the Earth's Zodiac in the greater part of its orbit. (See Planets). Mr. E. H. Bailey, Editor of the British Journal of Astrology, writes in the October, 1931 issue of his Journal, and says—"I have no belief whatever in the alleged influence of this planet. It is a very great question whether it is a member of our Solar System . . . and I would warn my readers not to accept anything at the present time. It is far too early to lay down definite information with regard to a body which may, or may not, have any astrological influence." Also in the November, 1932 issue of the British Journal, Mr. Bailey further says—

"Several correspondents have written me asking for my opinion respecting this planet, and whether I consider it has any real influence in Astrology, and if so, in what way its influence will be felt. Also what sign it rules. To be quite candid, I must confess that I have little or no belief in this planet, and from the evidence which I have obtained personally, and what has been sent to me by students, I see no reason whatever to include it when dealing with horoscopes. It is far too early in the day for students to lay down any definite information as to its influence, real or imaginary, yet one would think from published statements that certain students were fully aware of its action in horoscopes, and knew nearly all there was to be known about it. A number of horoscopes have been sent to me from readers, in which they allege that certain events have been shown by this planet, but in all the cases sent, I have been able to detect the real cause without incorporating Pluto, or any other hypothetical planet."

POLARITY—Polarization—The fresh polarizations of the Planets cause their changing influences. Each planet has a certain and definite polarity in itself, and when unpected will always act in a certain manner, and produce certain effects from the causes it generates. The aspects, and the changing and modified polarities of the planets, tend to produce the different diseases, different states of mind, and the afflictions and testings of life, according to the vibrations. Plants and Herbs gather the different properties given by the Planets, and individualize these properties, or vital forces, according to their form. The Plants contain particles of matter and colors corresponding to the seven planetary rays. The organs, tissues, and cells of the body also contain a polarity, and are ruled by planets, and when an herb is used as a remedy, by the law of antipathy or sympathy, such remedy can change the polarity of an organ or tissue, and thus modify, cure, or heal a disease, or make it worse, according to the reaction between the remedy and the organ. The location, or place of residence, also have a polarity which may, or may not agree with the native, and a change of residence in case of sickness often brings relief and a cure if the polarity of the new location is harmonious with the vibrations of the patient. Certain Adepts and Masters have the power to change their polarity, overcome the law of gravitation, cause their bodies to rise or float in the air in Levitation, and also to perform various unusual phenomenon. (See Antipathy,

The stars in the knees and feet of Castor and Pollux are equally injurious. The \odot directed to the place of tends to cause blindness in one or both eyes, and if Praesepe be also with the \odot and δ in an angle, or on the Asc., certain blindness is almost sure to result, or hurts to the face. The danger of a violent death is also denoted, and much evil to the native, if the \odot is with Pollux at B. The δ to the place of Pollux often denotes blindness, or a great defect in the sight, and especially if the \odot or δ at B. were with Nebulous Stars. The δ to the place of Pollux also tends to ill-health, danger of a violent death, or damage to the wife or daughter. Fear of Poverty—♃ afflicted in the 2nd H. at B. (See Fear).

Indigent—(See Apathy, Careless, Dull; "Lack of Forethought" under Forethought; Idle, Indigent, Indifferent, Indolent, Lazy, Vagabond, etc.).

Journeys—Danger from Privations On Journeys or Voyages—(See "Privations" under Sea).

Property and Riches—Loss of—(See Expense, Money, Prodigal, Property, Reverses, Riches, Ruin, etc.).

Voyages—Privations On—(See Famine; "Privations" under Seas).

Want—Fear of Coming To—(See "Fear" in this section).

POWDER BURNS—(See Gunshot).

POWER—Powers—Powerful—Energy—Force—Strength, etc.—The ☉ and ♃ when strong at B., and supporting each other by aspect, tend to give the native more power, force, and energy on the physical plane, and in health matters, with increased vitality. The ☉ and ♃ weak and ill-dignified at B., and the ☉ not supported by ♃ by a good aspect, or no aspect, and at the same time with a weak sign rising in the Asc., tend to weaken the powers of the native, lower resistance to disease, etc. (See Mars, Sun).

Application of Power—(See "Last Quarter" under Moon).

Creative Powers—(See Creative).

Dynamic Power—♂ is the planet of. (See Dynamic, Mars).

Energy—(See the various paragraphs under Action, Energy, Force, Life, Motion, Movement, Muscles, Physical).

Men In Power—(See "Power" under Men).

Mental Powers—(See Intellect, Mental; "Active Mind" under Mind; Perception, Understanding, etc.).

Natural Powers—(See "Natural Forces" under Natural).

Organic Power—(See Organic).

Physical Powers—(See Body, Physical, Strength, Strong, Weak, etc.).

Psychic Powers—(See Psychic).

Sources of Power—All of the Planets endow certain powers, according to their nature, sign and house positions, aspects, etc. For the nature and quality of the powers given by the Planets, see each planet in the alphabetical arrangement, and especially note the sections on "Influences", and the Qualities endowed by each planet. Also note the various paragraphs in this section.

Spiritual Power—(See Pineal, Pituitary, Spiritual).

Strength—(See the various paragraphs under Strength, Strong).

Vital Powers—(See "Life Force" under Life; Vital, Vitality).

Weak—The Powers Weakened—(See Diminished, Feeble, Lack Of, Loss Of, Void Of; the various paragraphs under Weak).

Will Power—(See Will).

POX—Syphilis—A Contagious, Eruptive, Pustular Disease—(See Eruptions, Pustular, Syphilis).

PRACTICAL—Utilitarian—The Earthy Signs strong at B. tend to make one practical, as these signs have more to do with the material, or Earth Plane. The Fiery Signs are also usually practical, and the ♃ influence, and the ☐ sign. Also ♃ when well dignified at B. tends to practicability in the business affairs of life, but with some dangers of going to extremes and being eccentric, peculiar, and misunderstood when ill-dignified and ill-aspected at B.

Impractical—The ♃, ♁, and ♃ signs do not tend to be as practical, and are usually more impractical and dreamy. The ♃ afflictions at B. also tend to make one less practical, and to be more liable to obsessions, hallucinations, dreamy ideas and notions, and to resort to strange, weird, uncanny, or unusual methods in their procedures. (See Chaotic, Dreamy, Eccentric, Erratic, Fanatical, Fancies, Ideals, Imaginations; "Bad" under Judgment; Notions, etc.).

PRACTICE OF MEDICINE—And Healing—(See "Physicians" under Healers).

PRACTICES—(See Conduct, Evil, Excesses, Good, Habits, Ideals, Ideas, Manners, Morals, Notions, Perversions, Religion, Vices, Wicked, Unnatural).

PRAELNCIPIENTS—In Disease—Incipients—♃ and ♃, as related to disease, and as incipients and praelncipients in disease, are classed as planets which tend to obscure, extraordinary and mysterious causes in disease, and peculiar complications. Incipient diseases, those at their very beginnings, if taken when they first manifest

themselves, as indicated by the diathesis and idiosyncrasies, habit in disease, etc., can usually be broken or neutralized by the proper remedy and treatment. Thus ♃ and ♂ in ♀ predispose to lung disorders, colds on the lungs, etc., and if this is known to the native who has such influences at B, he can safeguard these tendencies, remove the causes of nose, throat, and lung troubles in the body, and also have a remedy at hand always to quickly disseminate and break up the first symptoms of disease when they appear. Each person should make a study of his own case, know the tendencies of his body and mind, and then set out to control and rule conditions, and be Master of his Fate and Destiny, and thus avoid much unnecessary suffering, pain, sorrow, and tribulation. (See Antipathy; "Cure of Disease" under Cure; Diagnosis, Diathesis, Hexis, Opposites, Prevention, Prognosis, Remedies, Sympathy, Treatment, etc.)

PRAESEPE—The Cratch—The Crab's Claw—The Ascelli—A Nebulous Cluster in the first Decanate of ♄, of the nature of ♂ and the ♃, and said to cause blindness, or hurts to the face, when rising in ♂ the ☉ or ♃, and especially when in an angle. (See Ascelli). Also said to cause disgrace, diseases, and every calamity and evil upon humanity. The ☉ directed to Praesepe tends to blindness in one or both eyes, and if Praesepe be on the Asc., or with the ☉ or ♃ in an angle, certain blindness. The ☉ directed to the Cratch, in the 6° ♋, tends to danger to the head and eyes, injury by machinery, gunshot, falls, or bruises. The ☉ with Praesepe at B. also is indicative of evil, and the danger of a violent death. Also the ☉ and ♃ with Praesepe at B., and especially in an angle, tend to every kind of calamity upon the native, disgrace, and to cause diseases of various kinds. The ♃ to the place of tends to great defects in the sight, and often blindness, and especially if the Lights are with Nebulous stars at B. The ♃ with Praesepe, and espec. in an angle, tends to blindness, or injury to the eyes. The ♃ Sig. ♂ the ☉, and near Praesepe at B., the native is likely to be nearly blind. The Ascelli, Praesepe, and the Cratch, are all very close together in the first Decan. of the ♋ sign, and of the same nature, and make up a Nebulous Cluster, and in the Textbooks seem to be used interchangeably, and the influences given in the Article on The Ascelli in this book will also apply to those for Praesepe, or Praesepe, as this word is spelled both ways in the books. Praesepe is mentioned many times in the Textbooks of Astrology. In this book Praesepe, the Cratch, or the Ascelli, are mentioned in the following subjects, and as taking a part in causing these diseases, afflictions, or injuries. See these subjects in the alphabetical arrangement—Arms (Wounds To); Banishment, Beheaded, Blindness, Bruises, Calamity, Conjunctivitis, Disgrace, Evil (Every Evil); Exercise (Death By); Eyes (Bad Eyes, Danger To); Face (Hurts To); Fevers (Violent); Fire (Death By); Gunshot

(Danger, Death, or Wounds By); Head (Danger To); Imprisonment (see Prison); Iron (Death By); Machinery (Accidents By); Murder (Death By); Nebulous Stars (see the Article on Nebulous); Ruin, Shipwreck, Shot to Death (see Gunshot); Sight (see Blindness, Sight); Stabs, Stars, Trouble, Untimely Death (see Untimely); Violent Death (see "Death", under Violent); Wounds, etc.

PRANA—The Hindu name for Vital Force, Life Force, etc. Ruled by the ☉. (See "Life Force" under Force; "Force" under Vital). Prana is Life Force in the Air, in Food and Drinking Water, and gives force, energy, strength, and nourishment to the body. It is an etheric force, and separate from the actual ingredients in air, food or water, and it is said that we absorb more of this Prana when we are conscious of its presence, and hold the thought that we are taking in this Force when breathing or eating. Orange is the color of the Pranic life forces in the blood. Occult books on the Science of Breath, and Breathing, deal with this subject quite fully. Read the Chapter on "Prana Absorption" in the book, "Hatha Yoga", by Yogi Ramacharaka (William Walter Atkinson). Prana is also said to increase the Spiritual Powers when taken in consciously, and directed by the thoughts and prayers to such Centers. (See "Fire Signs" under Fire; "Solar Plexus" under Plexus).

PRECARIOUS—Perilous—Uncertain—Subject to Dangers—(See "Many Dangers" under Danger; Escapes; "Precarious Life" under Life; Perils).

PRECIPICES—High Places—Falls From—(See Heights; "Dangers" under Travel).

PRECIPITATE—Hasty—Hurried—Without Due Deliberation—

Precipitate Actions—Accidents from Precipitate and Impulsive Actions—♃ in the 1st H., ♀ or ♂ the ☉ or ♃ at B. (See Foolhardy; "Lack Of" under Forethought; Hasty, Impulsiveness, Rashness, Recklessness, etc.).

Precipitate Fancies—(See "Foolish" under Fancies).

PRECIPITATION—The Throwing Down of Solids from Liquids—In the human body this is usually the work of ♃, thus causing excessive mineral deposits in the tissues, and resulting in disease, such as Gout, Rheumatism, Uric Acid Poisoning, etc. (See Deposits, Gout, Minerals, Rheumatism, Uric, Wastes, etc.).

PRECOCIOUS—Premature Development—Precocious Mental Development—(See Backwardness, Genius, Mathematician, Premature, Prodigies).

PREDETERMINATION—Of Sex—To Foretell Whether Male or Female During Pregnancy—Judgment of the 5th H. of a parent indicates whether the first child will be male or female. Also the time of conception, if known, and the planets in the signs at that time, are to be considered, and the nature of the signs and planets. The ☉, ♃, and Asc. are principally to be observed, and the planets which have

prerogative over them. If the ☉, ♃, and Asc. are femininely constituted, then judge a female child. The masculine planets are the ☉, ♀, ♁, ♃, and ♂, and the ♃ and ♀ are feminine. Mercury partakes of both genders, according to his location and aspects with the masculine and feminine planets. The odd signs, as ♈, ♁, ♃, etc., are considered masculine, and the even signs, as ♉, ♊, ♋, etc., are feminine. The watery signs are very fruitful, and also feminine. In judging of the sex keep the gender of the planets, signs, and the degrees of the signs in mind. A Table of the Masculine and Feminine Degrees of the Zodiac is given in the book, "The Prenatal Epoch" by Mr. E. H. Bailey. Also see "Degrees" under Feminine, Masculine. For further consideration of this subject see "Female Children", "First-Born Child", under Children; Conception; "Birth of a Female" under Female; "Births" under Male; Prenatal Epoch, Quadrants, Quickening, Triplets, Twins).

PREDICTIONS—Predicting—(See Character, Curable, Destiny, Diagnosis, Directions, Events, Fatal, Fate, Foretold, Incurable, Judgment, Predetermination, Prognosis, Progressions, Prophetic, Quality, Secondary Directions, Transits, Type, Will, etc.).

PREDISPOSED — Predisposition — Inherent—Innate—Hereditary—Tendencies—Idiosyncrasies—Diathesis, etc.—The Signs occupied by planets at B, the rising sign, the signs on the Mid-heaven, and the 6th H., especially indicate what parts of the body are more predisposed to disease, afflictions, accidents, etc., and especially the signs occupied by malefics. The degree on the Asc. at B. gives predisposition to certain diseases and afflictions, according to the sign rising. (See the book, "Degrees of the Zodiac Symbolized" by Charubel). The part ruled by the sign occupied by the ☉ denotes a sensitive part, or organ, and more liable to disease if the ☉ is badly afflicted at B. (See Congenital, Constitutional, Diathesis; "Strong" under Disease; Environment, External, Heredity, Hexis, Inherent, Innate, Organic, Praecipients, Prenatal, Propensities, Structural, Susceptibility, Temperaments, Tendencies, etc.).

PREGNANCY — Impregnation — Pregnant — Gestation — Prenatal Period — Fertilization — Conception, etc.—The ♃ and the 5th H. rule pregnancy, and the ♃ is the planet of impregnation and fertilization. (See Fifth House, Moon). The conditions for fruitfulness must exist, and the ♃ and watery influences strong and predominant at B, before impregnation can take place. Barren conditions in the map prevent pregnancy. Note the following subjects—

Barrenness—Not Capable of Becoming Pregnant—(See Barren).

Conception — Conception Has Taken Place — (See the paragraphs under Conception).

Delivery — To Know Time of — (See "Time of Delivery" under Parturition).

Fancy—A Pregnant and Ingenious Fancy—(See "Pregnant Genius" under Genius).

Fecundation—(See this subject).

Female — Male or Female During Pregnancy—(See Predetermination).

Fertilization—(See Fecundation, Fertilization).

Foetus — (See the paragraphs under Foetus).

Fruitful — May Often Become Pregnant — (See "Many Children" under Children; Fruitful).

Genius — A Pregnant Genius — (See Genius).

Gestation — (See the paragraphs under Gestation).

How Long Pregnant?—Observe the ♃ and lords of the Asc. or 5th H., and find the nearest past aspect they make to any planet. If separating from a ☉ of a planet, it is the first month of pregnancy; if sepr. from the ✱ aspect, judge she is in the 2nd or 6th month; from the ☐ aspect, in the 4th month; from the △ aspect, in the 3rd or 5th month; from an ♂ aspect, in the 7th month, etc. These are the rules for judging the matter in Hor'y Questions.

Male or Female — During Pregnancy — How to Judge the Matter — (See Predetermination).

Maternity — (See the paragraphs under Maternity, Mother).

Mother—Motherhood—(See Maternity, Mother).

Parturition — The Puerperal State — Childbirth—(See Parturition, Puerperal).

Party Has Just Conceived—(See this subject under Conception).

Period of Gestation—(See Gestation, Prenatal Epoch).

Prenatal Epoch—(See Prenatal).

Quickening—Of Foetus—(See Quickening).

Sign of Pregnancy—A Benefic in Cazimi. (See "Woman Is with Child" in this section).

State of a Woman With Child — This is judged by the 5th H. and its influences. Also the last application of the ♃, before she leaves the Sign she is in, denotes the state of the mother (Hor'y).

Uterus In Pregnant Women—Is especially affected and influenced by the ☉ and ♃ acting thru the ♁ sign.

Vexations During Pregnancy—Malefics in the 5th H. at B. and by dir.

When Will the Child Be Born?—(See "Born" in Sec. 1 of the Article on Children; "Time of Delivery" under Parturition).

Woman Is With Child—In Hor'y Q., the following influences indicate that she is with child—If the lord of the 5th H. behold a planet in an angle, and with reception; lords of the Asc., 5th, or 7th H., or the ☉, ♃, ♀, or ♂ be in the 5th H., and fortified, except when ♀ is in the 5th H. in aspect to a malefic, and with no aspect to a benefic, when ♀ cannot be relied upon; if

translation of light has passed between the lords of the 1st and 5th, or if the ♃ be just separating from the latter in a fruitful sign, or in the 5th, 7th, or 11th H.; lords of the 1st and 5th, or the ♃, in reception to a planet angular; the ♃ and the lord of the triplicity she is in both be in fruitful signs, or if ♃ and ♀ be both angular and free from affliction, these are symbols of conception having taken place. If at the time any of these symptoms appear, ♃ be cadent, or afflicted, or ♃, ♄, or ♀ be present at the place of the aspect, or on the cusp the 5th H., there is either no conception, or there will be an abortion. It is the same if they afflict the ♃, ♀, or lord of the 1st or 5th H. (See "Signs of Children" under Children; Conception, Fruitfulness).

Woman Is Not With Child—Signs of No Conception In Hor'y Questions—Denoted when the ♃ is void of course; ♃ and ♀ afflicted; ♀ joined to ♃ or ♄, or to ♀ if he be afflicted, and these planets ♀, combust, or in ♋, ♌, or ♍; ♃ in the 11th H. frustrates hope; ♃ or ♄ in the 5th H., ☐ or ☿ the lord of the 5th; a barren sign on the Asc., or malefic planets there, or afflicting their lords or the ♃; a barren sign on cusp the 4th or 5th H.; lord of the Asc. joined to a ♀ planet, or to one in a cadent house, or received by a ♀ or combust planet, or if there be no translation of light or aspect between lords of the 1st or 5th, are all signs of no conception. (See Barren).

PREJUDICE—Prejudiced—

Fancies—Prejudiced Fancies—(See Fancies).

Heat or Fire—Prejudice By—(See "Danger" under Fire).

Mind—Prejudiced Mind—Narrow-Minded—A characteristic of the fixed signs, and with ♀ and many planets in these signs at B.; ♀ afflicted by ♃ tends to prejudices and narrowness of mind; the ♌ sign and its influences tend to prejudice of mind, and to make one more critical and fault-finding, and less tolerant of the views and opinions of others. The ♀ and ♄ signs are more liberal. (See Doubts, Fears; "Shallow" under Mentality; "Light In Mind" under Mind; Mistrustful, Reason, Scepticism, Suspicious; "Weak" under Understanding, etc.).

PREMATURE—Precocious—

Premature Baldness—(See "Early In Life" under Baldness).

Premature Birth—Premature births may be attributed in some cases to the mother, and her tendency to habitual abortion. (See Abortion). In other cases the afflictions to the ♃ during the gestation period, when the ♃ crosses, or does not cross the central line of impulse at the monthly periods during the prenatal period, may cause it. If several of the Moon's librations do not return to, and cross the central line of impulse during pregnancy, there tends to be a lack of equilibrium, and an unbalanced condition of the foetus, which may lead to its expulsion. (See Prenatal Epoch). Diseases of the Foetus are also a cause.

CASES OF PREMATURE BIRTH—

(1) Born Two Weeks Before Time—See "Weak Mind", No. 146, in 1001 N.N.

(2) Born Three Weeks Too Soon—See "Deaf and Dumb", No. 166, in 1001 N.N.

(3) Born At Eighth Month—(See "Eight Month's Children" under Children).

(4) Born Six Weeks Too Soon—(See Chap. XIV, in Daath's Medical Astrology).

(5) Born At the Seventh Month—See "Weak Mind", No. 145; "Twins", No. 681; "Sight Defective", No. 684, all in 1001 N.N. (See Abortion; "Eight Months Children" under Children; Miscarriage).

Premature Burial—Danger of Being Buried Alive—(See Burial).

Premature Death—(See "Death by Accident" under Accidents; Burial; "Death" under Childhood, Children, Early, Extraordinary, Hurts, Infancy, Injuries, Mysterious, Peculiar, Strange, Sudden, Untimely, Unusual, Violent, Wounds; "Short Life" under Life, etc. Also note the various paragraphs under Death).

Premature Decay—(See Decay; "Fluid" under Vital).

Premature Mental Development—Precocious—The favorable aspects of the ☉, ☿, ♄, or ♀ all tend to early mental development. (See "Active Mind" under Active; Backwardness, Genius; "Mind" under Growth; Mathematical; "Quickened" under Mentality; Precocious; Prodigies).

Premature Old Age—(See Juvenility; "Senility" under Old Age).

Premature Wrinkles—(See Wrinkles).

PREMONITIONS—Presentiments—Forebodings—(See "Impending" under Calamity; "Mental Chaos" under Chaotic; Dreams (Case of Strange Dreams and Premonitions); Fears, Forebodings; "Hallucinations, Hauntings, Imaginations, Obsessions, Spirit Controls, Terrors, Visions, Weird, etc.).

PRENATAL EPOCH—The Epoch—Conception—The time of conception is called The Epoch, and this time has a definite and fixed relation to the time and moment of birth, as these two points are connected by a fixed and determined arc, and when the time of birth is approximately known, the time of conception can be accurately determined by the proper astronomical calculations, and also when the time of conception is determined, the true time of birth can also be found, and the exact degree rising on the Asc. at the true moment of birth. Thus, by this method, the time of birth can be rectified, if such time is approximately known. Ptolemy, in his "Tetrabiblos", laid down many of the rules for the Epoch and its determination, which rules have been further worked out, amplified, and systematized by the Modern Astrologers Sepharial, and Mr. E. H. Bailey, Editor of the British Journal of Astrology. Read the books, "Sepharial's Manual of Astrology", and "The Prenatal Epoch", by Mr. E. H. Bailey. The fundamental rule of the Epoch is that the sign and degree of

the ♃ at Epoch, or Conception, becomes the exact sign and degree on the Asc. or Descendant at the quickening, and at birth. (See Quickening). If at birth the ♃ is increasing and above the Earth, the place of the ♃ at conception becomes the Ascendant at B. If at birth the ♃ was below the Earth, and decreasing, the place of the ♃ at the Epoch becomes the Descendant at B. Thus, when the hour of birth is known approximately, the Prenatal Epoch calculations give us one of the best methods for rectifying the exact moment of birth, for when once the time of conception is determined, according to the Order, it is an easy matter to calculate the exact degree on the Ascendant or Descendant at the time of birth.

Orders of the Epoch—The Epoch may be regular or irregular, and the Epochs are classified into four Orders.

(1) The ♃ increasing and above the Earth at B, which gives a time of conception 273 days before birth, less the days for correction, which makes the period of gestation less than the ordinary time, or what we would call an "undertime" child.

(2) The ♃ above the Earth and decreasing, which makes the time of conception 273 days, plus the days for correction, and an "overtime" child. These two Orders of the Epoch have to do with the true Asc. at B., and the degree rising.

(3) The ♃ below the Earth and increasing at B., which gives a count back of 273 days, and plus the days for correction, and gives an "apparently overtime" child.

(4) The ♃ below the Earth and decreasing, which gives a pregnancy of 273 days, minus the days for correction, or an "undertime" child. In the book, "Prenatal Epoch", By Mr. Bailey, the Irregular Epochs are considered, and how they are calculated. The Index Date, or the ordinary day of conception, is found by counting back nine calendar months to the day and date when the ♃ is in the same sign and degree as at birth, or near the same degree. The distance in degrees of the ♃ from the Asc. in the first Order, and this distance divided by 13, gives the number of days for correction to the Index Date, to be subtracted, and the conception took place within 14 days following the Index Date. In the 2nd Order, the distance of the ♃ from the Asc. at B., divided by 13, gives the number of days to be added to the Index Date, and which may make the time of conception as much as 14 days before the Index Date, and an apparently overtime child. A knowledge of these Laws, and how to calculate the map for the time of conception, helps to clear away many of the mysteries of why children are not born on the exact times expected, some being born two weeks "ahead of time", and others two weeks late, etc. The time of birth is fixed by the arc of direction between conception and birth, and the child under normal conditions has to be born at the time fixed and set by Nature.

Therefore, birth should not be forced, or instruments used, if the mother seems to be in Labor too long, according to the Physician's views, or the opinions of the family. The child will be born when its time comes, if things are normal and allowed to have their way. This Article is not intended to be a full elaboration on the subject of the Prenatal Epoch, but only to give the student some ideas of the work, its importance, and then you must follow this up for yourself, and study the books mentioned. The Chart of Descent is a perpendicular line drawn from the place, sign and degree of the ♃ at Epoch to the degree of the Asc. at B. This line of descent is also known as "The Descent of the Monad." The date each month during Gestation when the ♃ is nearest to the ascending or descending degree at B. should be noted, and a line drawn on the Chart of Descent to this point. A Figure for a Chart of Descent is given on page 155 in Mr. Bailey's book. The ♃ at her return to this degree each month may come to the central line, fall short of it, or cross it. In a normal child, the ♃, at her return each month, should cross back and forth over the central line. If for several months the ♃ does not touch or cross this line at the time mentioned, it indicates an unbalanced condition of the child, lack of equilibrium, and when disease, malformation, idiocy, mental disorders, insanity, defects or even premature birth, abortion, or miscarriage may take place. Cases and illustrations of these unbalanced conditions are given in Mr. Bailey's book, such as The Frog Child, born minus a forearm and legs below the knees. Many weaknesses that exist in the child after birth, or at birth, such as deformity, malformation, tendency to certain diseases, etc., can be explained by the Prenatal Map, and by noting the descent of the ♃ thru gestation, and the relation of the ♃ to the line of central impulse, and also the aspects to the ♃ at these times. The Map of Birth is valuable to study in connection with the Epoch Map, and the maps for each month during the descent of the Monad. The map of the Epoch helps to explain many things. Infant Mortality is caused by afflictions to the ♃ at conception, or the Epoch. Procreation may be controlled, and even the sex of the child predetermined, if coitus and conception can take place at a time which will predetermine the Epoch map, which map is then reflected in the map of birth. Mr. Bailey deals with this subject, and many others, in his book, and it would take a whole volume to go into these matters here. The address of Mr. Bailey is 10 Red Lion Court, Fleet St., London, E. C. 4, England. The ☉, ♃, and Ascendant at birth are controlling factors in the calculation of a Prenatal Epoch Map. Also the gender of the degrees of the Zodiac have to be considered, and to ascertain the sex positions of the ♃ and Asc., and as given in the Table of Genders of Degrees, on page 40 of Mr. Bailey's book. The map for the time of conception

also shows the nature of the incoming Ego, the innate character developed in previous Incarnations, the stage of the evolution of the native, etc., while the map of birth shows the environmental conditions, the contacts with the world which are laid out for the native in the present life; shows the Personality, tendencies of the mind and body, lessons and tests to be encountered, the diseases and afflictions apt to come to the native, and also his relation to Society, etc. In this Encyclopaedia, the Prenatal Epoch, its workings, and the conditions it causes in the body before birth, at birth, and after birth, are mentioned, or have to do with the following subjects, which see in the alphabetical arrangement, and the Epoch Map, and Chart of Descent, will help to explain the causes and presence of these diseases and conditions when such indications may be absent from the map of birth. Also the causes of many diseases, afflictions, defects, deformities, malformations, etc., are gone into quite fully in Mr. Bailey's book, and in Sepharial's Manual of Astrology. PRESBYOPIA—(See Sight).

PRESENTIMENTS—(See Forebodings, Premonitions).

PRESERVATION—Preservatives—Preserved—Preservation is a Therapeutic Property of ♃, and this planet exerts a preservative and conserving influence over the body and tissues. The Sun Group of Herbs are preservative. In the physical world Sugar is a preservative, and is the result of ♃ action, and is ruled by ♃. (See "Substance" under Cells; Conservation, Defensive, Jupiter, Nutrition, Phagocytes, Prevention, etc.).

Life Preserved—(See Escapes; "Spared" under Life; "Disease Pre-

vented" under Prevented; "Patient Will Recover" under Recovery).

Preserves—Sweets—Sugars—Over-Indulgence In—♀ afflicted in ♃. (See Sugar).

Self-Preservation—(See this subject).

Well-Preserved—In Body—(See Juvenility).

PRESIDENT OF THE U. S. A.—Danger To—Danger of Assassination—Death or Injury To—These influences are the same as for Kings, Rulers, and Prominent People. (See Assassination, Famous; "Great Men" under Great; "Assassination" under Kings; Nobles, Princes, Queens, Rulers, etc.).

PRESSED TO DEATH—(See Crushed).

PRESSURE—Force—Weight—

Atmosphere—Excessive Atmospheric Pressure—Diseases Arising From—♀ diseases and influence. (See "Pressure" under Air, Gases; Caisson Disease, Compressed).

Blood Pressure—High or Low Blood Pressure—(See "Pressure" under Blood).

Nerves—Pressure Upon, and especially in the Spine, and as the Nerves make their exits thru the Vertebrae, as in Subluxations. (See Subluxations, Vertebrae). Undue, or abnormal pressures may be exerted upon any part, or organ of the body, due to diseased conditions, the deposit of minerals, poisons and wastes of the system by ♃ influence, as in Gout and Rheumatism. Pressure of the skull upon the brain by congenital defects, or by accidents to the head, is caused by ♀ in ♀ at B., or ♀ upon the Asc. There may be pressure upon the heart, due to stomach gases and indigestion, as caused by afflictions in ♃. Too much blood may cause undue pressure upon the blood vessels, resulting in rupture of the vessel, Apoplexy, Hemorrhage, Plethora, etc. Falls, caused by ♃, may result in too much pressure upon a part, causing a rupture of the tissues, as in Inguinal Hernia. (See these subjects).

PRETENDER—Pretenses—Pretended—Pretensions—

Pretended Ailments—♃ in evil asp. to ♀. (See Complaining, Delusions, Exhibition, Hysteria, Illusions, Imaginations, Lamentations, Mysterious, Neptune, Obscure, Obsessions, Peculiar, Spirit Controls, Strange, Weird, etc.).

Pretender—A Pretender to All Kinds of Knowledge—(See "Void Of" under Learning).

Pretenses—Outwardly of Great Decorum—♃ influence.

PREVALENT—Prevailing Generally Among the People or Nations—The Mundane, or House positions of the Planets from day to day, rule over World Affairs, and tend to bring disease, epidemics, pestilence, famine, earthquakes, storms, calamity, catastrophe, public sorrow and distress, outrages, panics, etc., and the student should make a study of Mundane Astrology. Planetary influences at the Vernal Equinox, and at Solar Ingresses, tend to a general prevalence of World conditions, for good or ill. Comets, Eclipses, the conjunction of several Superior Planets, Planets in perihelion or perigee, etc., tend to unusual World conditions. (See Comets, Eclipses, Ingresses, Mundane, Perihelion, Vernal). Under the following subjects the planetary influences are given which tend to some of these prevailing conditions, and by which Mankind is afflicted in various ways. See these subjects in the alphabetical arrangement, and especially look for "Prevalent" in these Articles. See Abdominal Diseases; Aged—Great Mortality Among—(see Old Age); Bereavement; Bloodshed (see Blood); Bolls, Calamity, Carbuncles, Catastrophy, Chest Diseases, Cholera, Colds, Colic, Conjunctivitis, Consumptions, Contempt for Religion (see Religion); Crime; Dangers (see Great Perils Generally) under Danger); Death (Painful Deaths Prevalent—see "Death" under Pain); Diarrhoea, Dissipation, Dropsy, Earthquakes; Effusion of Blood (see Effusions); Enemies (see "Fear Of" under Enemies); Epidemics, Eye Diseases, Famine, Fevers, Fluxes, Grief, Hatred; Head Diseases (see "Disorders" under Head); Heat (see "Extreme Heat" under Heat); Highwaymen, Incendiarism, Influenza, La Grippe, Lung Diseases, Mania, Measles; Melancholy (see "Much" under Melancholy); Mischief (see "Every One" under Mischief); Misery, Misfortune, Mortality, Murders, Nervous Diseases; Night (Diseases by Night); Outrages; Painful Deaths (see "Death" under Pain); Pandemics, Perils, Pestilence, Piracy, Plague, Pleasure Seeking, Plots; Public (see the paragraphs under Public); Railroad Accidents, Rapine; Reproductive Organs (Diseases of Prevalent); Robberies; Sadness (Much Sadness Generally); Sex Diseases (see "Diseases" under Sex); Shipwrecks; Skin Diseases, Slaughter, Smallpox; Sorrow (see "Sorrow" under Public); Suffering; Terrible Diseases (see Terrible); Trouble, Urinary Diseases, Violence, War, etc.

PREVENTED—Prevention—Averted—Preventive—

Birth Prevented—(See Abortion;

Death—Death In Sickness Averted—(See Averted).

Disease Prevented—Averted—"To be Forewarned is to be Forearmed", is an old saying. Much of the sickness, suffering, and sorrow in the world today could be prevented if people would live and think right. It is said the abuse of the sex nature is the cause of sickness, weakness, and premature death, and that by the proper use and conservation of the sex fluids and vital forces of the body, man would live to an extreme old age, as they did in Ancient Times. The greatest problem of Earth Life is to learn to control the creative force under the regime of the Separated Sexes, and to not abuse and misuse it for sensuous purposes. This question is discussed in the book, "The Voice of Isis" by Dr. and Mrs. Homer Curtiss. (See "Separation of the Sexes" under Sex). The more Advanced Souls are born with star maps which do not have the aspects which increase passion, and it is easier for such people to properly use their creative forces. People born with good and well-balanced maps, showing strong vitality and practical immunity to disease, have more power to prevent or throw off disease when it comes. (See Immunity; "Strong" under Resistance; "Body" under Strong; "Good" under Vitality). There are also Herbs, Remedies, and many Natural Methods, and the regulation of Diet, to combat and prevent disease. People who overeat, and clog the system, invite disease. Also worry, anxiety, fear, melancholy, despondency, depression, low spirits, etc., tend to bring on disease, and lower the vitality and powers of resistance. (See these subjects). The proper remedies, or treatment given at the beginning of a disease, can often scatter and prevent its progress, as remedies change the polarity of the disease. (See Polarity, Praeincipients, Remedies, Treatment). Many diseases originate in the Mind, and may be imaginary, and the power of Suggestion is a strong factor in the prevention or elimination of disease, if rightly used by the Healer. (See "Disease" under Fear; Healers, Hypnotism, Imaginations, Psychic, Suggestion). The Occult Masters teach that perfect health is the right of every one, and when we learn to think in terms of perfect health, and not in terms of disease, we will have health, for "As a Man Thinketh in His Heart, so is He". Spiritual Attainment and Spiritual Sight, the New Birth, and the proper use of our Forces, are essential to good health and the prevention of disease. The Masters, Adepts, and Initiates among us today in physical bodies have the spiritual power to control their health conditions, keep their bodies young, vigorous and healthy, and to renew their youth, and it is said they can renew their physical bodies, and keep them as long as they wish, and throw off the body also at their pleasure. Also Hygiene, Sanita-

tion, and Cleanliness, play a large part in health, and the prevention of disease. (See these subjects. Also see Antipathy; "Cure of Disease" under Cure; Diathesis, Opposites, Medicines, Prognosis, Subluxations, Sympathy).

Simonite's Arcana is considered the most complete work on the subject, as Tables, Formulae, various Examples and Helps are given in this book. Primary Directions are very powerful in their action, and especially when assisted by a Secondary Direction, a Revolution, or Transit. They are also enduring in their effects, slower to form, and slower to pass away, and the student of Diagnosis, Prognosis, and the Causes of Disease, should be well up in the Mathematics of Astronomy and Trigonometry to do this work when required. PROGNOSIS—Prognostication—Prediction of the Course and End of a Disease—Possible Outcome of the Disease—The Planetary influences operating over the lives of people at B., and by transit, progression, or direction, give a very important clue to the possible beginnings of disease, of affliction, misfortune, and the time, nature and outcome of events, and especially with people who are drifting with their stars, following their tendencies, and who are being dominated by their lower minds and the personality. By self-control, will-power, knowledge, wisdom, discretion, discrimination, spiritual sight, etc., it is usually possible to change the nature of events, or forestall them altogether, except in the case of ripe fate. (See Events, Fate; "Free Will" under Will). It is very difficult to give a correct prognosis as to the outcome of disease, suffering, or temporary affliction, in the case of Advanced Souls, Adepts, Initiates, etc., as the planetary influences have less power over them, and they have learned how to live more in harmony with Law, rather than to go against, and break them. (See "Disease Prevented" under Prevented). Predictions, therefore, and prognostications, may fall in proportion to your degree of spiritual attainment and development. The Art of Prediction has its foundations in Nature, and the movements of the Planetary Bodies. Events on the Earth Plane are but repetitions of similar occurrences, diseases, accidents, afflictions, trials, or sorrows of the Past, and which were produced by similar planetary aspects

and influences in some remote Age of the World. Observations of these influences for thousands of years have enabled Astrologers to recognize, discover, and tabulate into a Science the Laws of Nature as they affect the destiny of the Individual, of Races, and Nations. Any possible event in a human life, from the cradle to the grave, can be reasonably foretold by the study of the coming aspects, conjunctions, and influences which will be culminating over the native and his map of birth, and even the time of death can ordinarily be predicted if the native drifts along, and follows the leadings of his planets, gives way to his weaknesses and tendencies, instead of controlling himself, and listening to the voice of Intuition and his Higher Mind. (See "Future Events" under Future).

Rules for Prognostication—

(1) Never predict the possible time of death.

(2) Never predict the actual future, or say what disease will actually come.

(3) Never predict that sickness, accident, or misfortune will actually come at a certain time.

(4) Do not say discouraging things to a patient.

(5) Do not tell the patient when crises are due.

(6) Never suggest sickness to a well person, or tell them they look pale and sickly, and especially to a Virgo person. (See "Time Of" under Accidents, Disease, Death; Calamity, Character, Danger, Diagnosis, Directions, Events, External, Fate, Future, Healers; "Good Health", "Periods of Bad Health", under Health; Individuality, Influenced, Map, Misfortune, Mutable Disposition, Nativity; "Death", "Disease", under Nature; Negative Disposition, Personality, Planets, Positive Nature, Predictions, Progressions, Prophetic, Receptive, Secondary, Spiritual, Susceptibility, Time, Transits, etc.). PROGRESSION—Progressed—Progress

—The Progressed Horoscope—Directions, etc.—According to the System of Primary Directions, the movements of the planets for each day after birth correspond to a year of life, or very close to a year. Thus, if σ be in the 1st degree of φ at B., and the Asc. in $6^\circ \varphi$, we know that at about the 5th year of life σ will have progressed to the σ the Asc., and with the danger of an accident, injury, smallpox, hurts to the head or face, or a serious quarrel, etc. (See Primary). Secondary Directions, or Progressions, are based upon the movements of the δ on the days immediately after birth, and are calculated at the rate of two hours for every month, and the aspects thus formed by the δ to the positions of

the radical planets are important to note, and tend to bring events, diseases, and afflictions, according to the nature of the planets, or planets aspected at such times. (See Secondary). The movements of the planets after birth are known as Progressions, Directions, Transits, etc., and the aspects, conjunctions, parallels, etc., formed to the radical planets by these progressions and movements of the planets after birth, indicate the possible time of events, disease, trouble, sorrow, misfortune, gloom, joy, happiness, good or bad health, prosperity, reverses, and possible death, etc., according to the nature of the planets aspected, and also the directions and transits which may be operating at the time. PUNISHMENT—Penalties—Operation of the Law of Cause and Effect—Sowing and Reaping—Punishments, Chastenings, Afflictions, Suffering, Troubles, and Sorrows are usually brought upon us because we have broken some Law, and are not living right, or in harmony with the Laws of God, Man, or Nature. The Human Race is punished in thousands of ways, to adjust and restore the balance of harmony. Ill-Health is a punishment, and we usually bring sickness upon ourselves by our manner of living and thinking, and by engaging in excesses and indiscretions in some way. It is said that "Character is Destiny", and our fate in life is much as we make it by our character, innate and acquired tendencies, conduct, habits, etc. (See Character, Fate). Saturn is said to be "The Chastener", and it is principally into the hands of the Angel of Saturn that the chastenings, testings, and disciplinary measures have been given by the Higher Powers. (See Saturn). The Twelfth House also denotes sorrows, punishments, limitations, confinements, self-undoing, restraints, and if this house is badly afflicted at B., or had a malefic as its ruler, the native is apt to have his trials and afflictions considerably increased until he gets the New Birth, and learns how to live in harmony with the Law. (See Twelfth House). Our God is not an "Angry God", as is taught by some Creeds, nor does He seek revenge upon His Children, and, in the spiritual sense, there are no punishments inflicted upon us, but what we call punishments are merely trials, chastenings, suffering, and afflictions brought upon us to teach us lessons, increase our wisdom and understanding of life and destiny, and to show us the folly of sin, debauchery, wickedness, and an evil life. Good living always has its rewards and blessings, and the person who is living right, and in harmony with Law, and who has made conscious contact with his Higher Mind, and the Divine Within Himself, and who has learned to rule the animals within himself, and to not be dominated by personality and the lower mind—to such there are no "Punishments", but constant progress and attainment. Most every subject in this book deals in some way with the "Punishments" of life. Look in the alphabetical arrangement for the subject you have in mind. Q

QUADRANTS—Quarters of the Heavens

—The three Houses, or the Quadrant from the Asc. to the Midheaven, and the three opposite Houses from the Descendant to the Nadir, are called the Male Quadrants, and are positive, and many planets in these Quadrants at B., and especially in the houses between the 1st and 10th H., tend to make the native very positive, forceful, energetic, and also to have more vitality, and greater resistance to disease. (See Quadratures, Quarters). The other Quadrants are the negative or feminine ones, those from the Nadir to the cusp of the 1st H., and from the Midheaven to the cusp of the 7th H., or Descendant. The Male Quadrants, and with the D in such at conception, tend to produce male children, and with the D in a female Quadrant at conception, the child conceived will usually be a female. These distinctions are important to note in connection with the study of the Prenatal Epoch, and the determination of sex. (See Predetermination, Prenatal Epoch). The Male Quadrants are also classed as Oriental as regards the position of the O and D at B., and the Female Quarters are Occidental, and the O or D in these Quarters at B., are oriental or occidental. With the other planets they are called oriental when in the Eastern Quadrants, occidental when in the Western half of the map. Planets are also called oriental when rising before the O . (See Occidental, Oriental). A planet rising before the O is much more powerful over the mind and body, for good or ill, according to the nature of the planet, and its aspects, etc. (See Elevated, Majority, Rising, Setting). The D in an oriental Quarter at B. indicates an early marriage, and a late marriage when in an occidental Quarter. (See "Early Marriage" under Marriage).

QUADRATURES—Quarters—This refers principally to the Quarters of the D , and to the position of planets in their orbits when the \square , S , and M aspects to their place in the map at B., and these aspects, or Quarters, are very important to note in health matters, as they usually precipitate some crisis in the life of the native. (See Crises; Decrease, First Quarter, Full Moon, Increase, New Moon, Quarters, Third Quarter, under Moon; "Planetary Periods" under Periods; Quarters, Quarters).

QUADRUPEDS—Quadrupedal—Four-Footed—Four-Footed Beasts—The Four-Footed, Terrestrial, or Animal

Signs of the Zodiac, are P , S , O , T , and U , all typical of the four-footed beasts which are symbols of these signs. People born with malefics in these signs, and especially when they are on, or in the Asc., are more liable to attacks and injuries by Quadrupeds when under evil directions or transits. They also tend to have more of the animal nature in them, and to partake somewhat of the form, shape, and characteristics denoted by the animal symbol of the sign. (See "Animal Signs" under Animal; Beasts, Brutish, Four-Footed; "Human Signs" under Human; Hurtful, Ruminant. Also see each of these Signs in the alphabetical arrangement).

Animals—Injuries By—(See "Hurts By" under Animals, Beasts).

Quickening—Of the Foetus—The ☉ produces the Quickening of the foetus. The quickening occurs, as a rule, at about the end of the fourth month of pregnancy, and when the ♃ is passing the same sign and degree she will be found in at birth. The position of the ♃ at the quickening, and at birth, is also said to be the Ascendant at conception, and the position of the ♃ at conception becomes the ascendant or descendant at birth. Also the Ascendant at the time of the quickening is said to be the sign and degree position of the ♃ at conception, or very near it. By a study of the Prenatal Epoch, and the Chart of Descent, it is an easy matter for the student to determine beforehand the exact time of the quickening, as it is so closely related to the ♃ and Asc. at conception, and the positions of the ♃ and Asc. at birth. This matter is quite thoroughly discussed, and with illustrated Charts, in Chap. XXVIII, in the book, "The Prenatal Epoch" by Mr. E. H. Bailey. The quickening occurs approximately at the half-way point between conception and birth, and at the time of the fifth liberation of the ♃, as shown in the Chart of Descent. In a Horary Map the Quickening has taken place if the Dispositor of the ♃, and the lord of the hour be angular, or ♃ in the 7th H. If ♃ be in the 7th H. a male is indicated. (See Conception, Foetus, Gestation, Pregnancy, Prenatal Epoch).

RACEMOSE GLAND—A Gland Resembling a bunch of Grapes. The Pancreas is such a Gland. Also the Meibomian Glands of the Eyelids. These Glands are also called Aggregate Glands, as they are composed of a number of vesicles arranged in groups, or globules, and their arrangement gives the largest amount of secreting surface in the smallest space. These Glands come under the rule of the Sign ruling the part in which located. The Racemose Glands of the Eyelids are ruled by the ♀ sign. The Pancreas by the ☿ and ♃ signs. (See Glands, Pancreas).

RACES—The different Races and Nations of the Earth come under the rulership of the various Signs of the Zodiac. These rulerships are given in the Article on Nations, Races, their color of skin, and their special characteristics, have been established in the various parts of the Earth, and adapted to their location, and to play their part in the Grand Plan of Humanity. There are Sixteen Races in all in the scheme of the Evolution of our Planet. For a good discussion of the Origin of Races, their time and endurance, destiny, etc., see the book, "Cosmo-Conception" by Max Heindel. RADIUS—The Small Bone of the Forearm—The Radius is under the structural rulership of the ♃ sign, and also influenced by ♃, and disorders, or fractures to the bones of the forearm, as the Radius and Ulna, and also the Wrists, are caused by afflictions in ♃, and especially ♃ or ♂ afflicted in this sign, or in ♃. (See "Accidents", "Broken Arms", under Arms; Forearm). Case—Radius of Left Arm Fractured—See "Saturn in the Tenth", No. 831 in 1001 N.N.

RADIX—The Radical Map—The Chart of Birth—The Nativity—Radix means "Root", and the Map of Birth is the Root Map, a foundation map upon which you are to build. The Radix Map shows the Permanent Habit, or Hexis, of the diseases to which you will be subject, your fundamental tendencies, and your relationship to external conditions, environment, etc. The Directions and Progressions of the planets over this map show the Diathesis, or Transient Disposition of the disease. Diseases indicated by the radical map tend to be constitutional, organic, structural, deep-seated, and if neglected and allowed to progress, to become chronic, morbid, malignant, and fatal. The Prenatal Epoch Map also shows fundamental conditions and

tendencies, and should be studied in connection with the radical, or map of birth. (See Acquired, Character, Chronic, Diathesis, Directions, Fate, Fortune, Heredity, Hæmis, Map, Nativity, Organic, Prenatal Epoch, Progressions, Star Map, Structural, etc.).

RAILROADS—Public Conveyances—Vehicles—Street Railways, etc.—The Third House is the house of Short Journeys, Inland Journeys, as by Rail, or any class of Vehicle. Also ♄, the ruler of the 3rd H. influences fundamentally, and the ♀ sign, which sign is affiliated with the 3rd H., have strong rule over short journeys and travel by land. Uranus is said to especially rule Railroads. Benefics in the 3rd H. at B., and with no malefics afflicting this house, make short journeys fortunate, and with less liability of accidents, injury, or death during inland travel. Malefics in, or ruling this house, make travel and short journeys, railroad, bus, automobile, or aeroplane travel very dangerous, and especially when the directions to the 3rd H., planets in this house at B., or to the ruler of the 3rd H., are bad. Before going on a journey by train, or other vehicle, every person should study the planetary conditions over them at the time, and be warned of impending dangers, or benefits, and by so doing travel could be reduced to a scientific basis, and many deaths and serious injuries avoided. In a serious railroad accident, those who are under bad directions are the ones who usually suffer, while the more fortunate escape. The opposite house, the 9th H., rules voyages, long journeys, and Foreign Travel. (See Journeys, Third House, Travel, Vehicles).

(See "Brings Disease Upon Himself" under Disease; Folly; "Lack Of" under Forethought; Imprudent, Indiscretions, Intemperance; "Disease" under Irregularities; "Health Injured", "Injured Thru Women", under Men; Recklessness).

Free from Rash Actions—The ♃ Sig. in ♌, and well-aspected. (See Gentle, Harmless, Humane, Kind, Mild; "Even Temper" under Temper).

RATIONAL FACULTIES—The Reasoning Faculties—Ruled by ♃. (See Comprehension, Coordination, Faculties, Fears, Insanity, Intellect, Intuition, Irrational, Judgment, Mentality, Mind, Perception, Reason, Thinking, Understanding). Aquarius is classed as a Rational Sign of the Zodiac.

RATIONALISM—The Formation of Opinions from Reason Alone—Not Drawing Upon the Intuitive or Spiritual Powers to Reach Conclusions—The Earthy Signs strong, predominant, and well-filled with planets at B., and holding the Asc., angles, etc. Also ♃ strong and predominant at B., and in an earthy sign, tends to Rationalism. Also caused by ♃ when this planet partakes of the nature of ♃, and is in an earthy sign. The watery signs, when prominent and well-occupied at B., are quite free from Rationalism and Materialism. (See Materialism, Radicalism, Reactionary, Revolutionary).

RATTLE-BRAINED—Rapid and Noisy Talk—Talking Rapidly, Foolishly, and with Little Depth of Thought—(See "Shallow" under Mentality; "Light in Mind" under Mind; "Rapid" under Speech).

RAYNAUD'S DISEASE—(See Fingers).

REACTION—Opposite Signs of the Zodiac, as ♃ and ♄, affect each other by reaction. Also signs in ☐ aspect to each other tend to have an unfavorable reactionally influence upon each other, as ♃, ♌, ♍, and ♎. There is also

the reaction of the Planets upon each other by their ☉, ☐, ♃, and other aspects, when within orb of aspect. The unfavorable reactions of Signs and Planets upon each other tend to produce affliction, discord, disease, and in-harmony, except as they are ruled and transmuted. Planets in any of the fixed signs tend to react upon all of the fixed signs, and also with the cardinal and mutable signs. The stomach, ruled by the ♌ sign, is afflicted by planets in all the cardinal signs, or when these signs are on the Asc. Planets in ♄, the sex sign, also afflict the throat, ruled by the ♃ sign, etc. (See Action, Antipathy, Aspects, Opposites, Orbs, Removal, Sympathy).

REACTIONARY TENDENCY—Violent or Sweeping Methods of Procedure—The Fixed Sign influences, combined with a very strong ♃ influence at B., and with the cardinal and mutable signs in weaker positions; ♃ strong and prominent at B., as in the Asc. or M.C., and ☉ the ☉, ♃, or ♃, often tends to very radical characteristics, and a desire to bring about great Reforms, even tho resorting to violence. (See Anarchists, Fanatical, Radicalism, Rationalism, Reformers, Religion, Revolutionary, Seditious, Violence, etc.).

READAPTATION—In the System—♄ influence. (See Recovery, Restoration, Scorpio).

REARED WITH DIFFICULTY—(See "Reared" under Children).

REASON—The Reasoning Faculties—The Rational Faculties—The Rational Mind—Ruled by ♃, and the Principle of ♃ is Reason. Uranus and ♃ are termed the Mental Planets, and greatly influence the Mind. Reason finds expression thru the planet ♃, and the good aspects to ♃ tend to a good mind, and to act as a check upon the lower nature. By many Authors ♃ is considered the higher octave of ♃. The Rational Mind corresponds to the Stars;

the Subconscious Mind to the ♃, and the Superconscious Mind to the ☉. (See "Influence Of" under Mercury, Uranus. Also see the paragraphs under Intellect, Mental, Mind, Perception, Rational, Thinking, Understanding). The following subjects and paragraphs have to do with the Reasoning Faculties, which see in the alphabetical arrangement when only listed here—

Detriments—To the Reasoning Faculties—(See "Mental Chaos" under Chaotic; Confusion, Idiocy, Insanity; "Bad" under Judgment; "Weak Mind" under Mind; "Weak" in this section).

Impulses—(See "Blind" under Impulses).

Insanity; Intellect—(See the paragraphs under Intellect).

Irrational; Irresponsible; Judgment—(See "Bad" under Judgment).

Mental—Mind—(See the subjects under Mentality, Mind).

Monsters; Not Governed by Reason—(See Feelings, Foolhardy; "Impractical" under Ideals; Impulses, Irrational, Rashness, Recklessness, etc.).

Perception; Prejudiced;

Reasonableness—An Open Mind—The Airy Signs prominent at B., and ♀ strong and well-aspected, tend to give a reasonable mind, open to conviction, the study of Truth, and to gain new viewpoints. The ♀, ♁, ♃, and ♄ people are especially open to discussion and new points of view, while the watery signs strong at B. tend to prejudice, aversion to new ideas which disturb their fixed beliefs, while the earthy signs tend to give narrow and materialistic views and opinions. The planet ♀ strong at B. tends to give a wide mental outlook, and the ☉ influence the widest range for the emotions. (See Ideals, Ideas, Judgment, Materialism, Metaphysics, Occult, Opinions, Prejudiced, Rationalism, Reactionary).

Strengthened—The Reasoning Faculties Strengthened—♃ in good asp. to the ♃ and ♀; ♁ well-aspected by the ♃, and with ♁ in good aspect to the Asc.; ♁ free from the affliction of malefics. (See "Good" under Judgment; "Quickened" under Mental; "Strong Mind" under Mind).

Thought—Little Depth of Thought or Mature Reasoning—♀ afflicted in ♃.

(See "Void Of" under Learning; "Shallow" under Mentality; "Light In Mind" under Mind; Pretender).

Unsound Mind—(See "Unsound" under Mind).

Void of Reason—This condition is usually caused by prenatal conditions, and the afflictions during gestation, as in cases of Idiots, Imbeciles, Monsters, etc. Some important Prenatal causes are—The ☉ and ♃ at the time of the New or Full ♃ previous to birth forming no aspect to the Asc., and having no help from the Benefics ♃ and ♀, and also the angles, as the 1st and 10th H., occupied by malefics. Evil aspects to ♁ at the same time tend to unbalance the mentality, make void of reason, and the mind undefinable. If H., ♃, or ♁ give testimony in any of the foregoing positions, what is then generated will have ungovernable and irrational qualities. (See Foolish, Idiocy, Imbecile, Inhuman, Insanity, Monsters, Prenatal Epoch).

Weak Reasoning Faculties—(See "Mental Chaos" under Chaotic; Confusion; "Mind" under Erratic; Erring, Foolish; "Lack Of" under Forethought; Idiocy, Imbecile; "Mental" under Incompetency; Irrational; "Bad" under Judgment; "Weak Mind" under Mind; Precipitate; "Impaired", and the various paragraphs in this section).

(See Erring; "Fixed Signs" under Fixed; Intractable, Irascible, Irritable, Obstinate, Perverse, Rashness, Reactionary, Reformers, Refractory, Revolutionary, Sedition; "High Temper" under Temper; Ungovernable, Unruly, etc.).

RECEPTACLES—The ♃ governs all Receptacles in the body, and the fluids in them, as the Stomach, Bladder, Uterus, etc. (See Cavities).

RECEPTIVITY—Reception—Receptive—The principle of the ♃ is receptivity, and people born under the

strong influence of the ♃, the ♃ as ruler, or who have many planets in the negative and feminine signs of the Zodiac, are more receptive and susceptible to external and outside influences, and to environment. (See Environment, External, Hyperaesthesia, Influenced; "Influence Of" under Moon; Mutable, Negative, Susceptibility, etc.).

Semen—The Seed—The receptivity of the semen into the womb is ruled by the ♃. (See Fecundation, Fertile, Semen).

RECKLESSNESS—Wild—Hasty—Desperate—Foolhardy—Impulsive—Indiscreet, etc.—Caused principally by ♃ influences and afflictions; ♃ elevated above, and in evil asp. to the ruling planet; ♃ progressed to the ♃ or ill-asp. ♃, ♃, or ♃, or vice versa; ♃ afflicted in ♃, or afflicting the ☉, ♃, or Asc. from this sign; ♃ to the cusp the 11th H.; the ☉ in ♃ and afflicted by ♃, hasty and reckless at times; the ☉ to the ♃ or ill-asp. ♃ by dir.; the Prog. ☉ or ♃ to the ♃ or ill-asp. ♃; ♃ by transit to the ♃ ♃, ♃, or the ♃ in the radical map, or vice versa; ♃ to the ill-asps. ♃ by dir.; ♃ in ♃ and afflicted by ♃, hasty and reckless at times; ♃ afflicted at B., and to the ♃ or ill-asp. the Asc. by dir.; ♃ afflicted in ♃; ♃ ☉ or ill-asp. ♃ at B., or by dir.; the 4° = or ♃, or 3° ♃ on the Asc. at B. (See Anger, Choleric, Erratic, Erring, Excitable, Explosive, Foolhardy; "Lack Of" under Forethought; Fury, Hasty, Imprudent, Impulsive, Indiscreet, Irascible, Judgment, Perverse, Precipitate, Quarrelsome, Rashness, Reactionary, Riotous; "High Temper" under Temper; Vicious, Violent, etc.).

RECLUSE—Secretive—Solitariness—Fond of Seclusion—Aversion to Society—Reserved—Retiring—Separateness, etc.—Caused by ♃, ♃, and the 12th H. influences; ♃ or ♃ in the 4th H., a recluse in old age, and usually ends life in seclusion; ♃ in the 1st H., shy and fond of solitude; ♃ ruler of the Asc., or horoscope, and afflicted; ♃ strong at B., and rising, a confederate in secrecy; ♃ afflicted in ♃; ♃ in the 12th H. leads to a secluded life; ♃ is the author of solitariness; born under ♃; ♃ ☐ or ♃ ♃ at B., and by dir.; the ☉ in the 4th H., and afflicted by ♃, inclined to secrecy; ♃ rising in ♃ contemplative, fond of retirement, and to dwell alone; ♃ ☐ or ♃ ♃; strong ♃ influence at B.; ruler of the Asc. in the 12th H.; the 15° ♃, the 13th and 30° =, the 12th and 21° ♃, or the 2nd and 3° = on the Asc. at B.; the 1st Decan. of ♃, ruled by the ☉, on the Asc. How Long Before Recovery? Used in Hor'y Questions—Observe the lord of the Asc. Observe what benefic planet is applying to an aspect of the lord of the Asc. Note what Signs and Houses they are in, whether in angles, moveable Signs, etc., and then frame the measure of time according to the quality of the disease. If the planet be angular, and the sign moveable, judge the time of recovery as many days as there are degrees to complete the aspect. If the planet be succedent, and the sign common, judge recovery in as many weeks as there are degrees to complete the aspect. If the planet be cadent, and the sign fixed, judge recovery to take place in as many months as there are degrees to com- plete the aspect. If the sign be com- mon in which the application is, use discretion, according to the nature of the disease, and not by any fast rule of days, weeks, or months. The quick or slow motion of the D , the sign she is in, and her situation as to angles, often tends to hasten or retard the progress towards recovery. The patient often recovers very quickly when the lord of the Asc. quits the sign he is in, and enters one in which he has dignities. If a common sign be 28° on the cusp of the 6th H., judge that the disease will vary, or resolve itself in two weeks. (See Acute, Chronic, Con- tinuity, Course, Crises, Curable; "Argu- ments for Death", "Certain Death", under Death; Duration, Fatal, Incur- able, Linger- ing; "Long Diseases" under Long; "Short Diseases" under Short; Slow, Tedious, etc.).

RECTIFICATION—Of the Birth Hour and Moment of Birth—It is important in health matters to know, or determine, the exact moment of birth, as each degree rising upon the Eastern horizon at B. has a different meaning. Also the house positions of the planets at B. should be accurately known to give a proper prognosis or delineation. There are certain laws and rules, which if properly applied, make the science of Rectification practically certain and absolute, and the student should become familiar with these rules. Rectification is quite thoroughly discussed, and the principles given, in the various Textbooks and Dictionaries of Astrology. See the Articles on Rectification in Wilson's Dictionary of Astrology, and in Alan Leo's Dictionary of Astrology. Also the time of birth can be rectified by the Prenatal Epoch Method, as given in the book, "The Prenatal Epoch", by Mr. E. H. Bailey. When the time of birth is approximately known, the Prenatal Method is considered very accurate, as the Ascendant at conception is the degree and sign of the ☽ at B., and the place of the ☽ at conception is the sign and degree of the Asc. or Descendant at B. (See Prenatal Epoch).

REINCARNATION—Rebirth—Metempsychosis—The Doctrine that the Soul lives many times in a physical body upon the Earth Plane—This Doctrine is believed in by three-fourths of the people of the World today. In the New Testament, the doctrine is rather veiled, but is there. The Occult Masters teach the doctrine of Reincarnation, and that each life on Earth is but a day in School, and to gain experience, knowledge, and Soul-Growth. One life in a physical body is but a small time to learn, and to gain wisdom, and also one life would not account for the various inequalities between people, their many diseases, deformities, malformations, monsters, limitations, missing members, idiocy, deafness; born blind, deaf, or dumb, etc., or the death of children in infancy. Every Soul, in its Evolution, must travel in a Cycle, and alternately in the upper half of the Circle, which is the Heaven, or Astral World, and then again in the lower half of the Circle, which is the Physical, or Material World, and it takes repeated experiences in both Worlds to perfect the Soul, as well as to reach a more perfect body, and one which can be free from disease, suffering, and death. These matters, and the Secret Mysteries in general, are taught in the Theosophical and Rosicrucian Doctrines. Also in the books, "Cosmo-Conception", by Max Heindel; "The Key of Destiny", by Dr. and Mrs. Homer Curtiss, of the Order of Christian Mystics, and by many others. This subject would be too long to go into fully here, but if you are interested to know the Truth, you can find it. (See Baptism, Character, Conception, External; "Ripe Fate" under Fate; Heliocentric, Heredity; "Moment of Birth" under Birth, Moment; Nativity, Prenatal Epoch).

Zodiac Remedies—(See Zodiac).

REMISSION—The Remission of Disease—Abatement—Amelioration—The period of abatement in fevers is under the rule of ♀. The remission of dis-

ease is associated with the common signs, and disease tends to fall off, and to be alleviated, as the afflicting planets leave the cardinal signs and pass into the mutable signs. Cardinal signs show the intensity of the disease. (See Abatement, Amelioration, Cataphora, Continuity, Course, Crises; "Better" under Disease; Duration, Ease, Intermitent, Moderation, Modification, Recovery, Recuperation, Remittent, Resolution, Solution, etc.).

REMITTS—The Pulse Remits—(See "Slow" under Pulse).

REMITTENT—Alternately Abating and Returning—Remittent Fevers—The Daily Return of Fever—Intermittent—Irregular, etc.—These influences are discussed and given under the following subjects. (See Ague, Amelioration, Complications, Course, Crises, Ease, Epilepsy, Fever, Insanity, Intermitent, Irregular, Malaria, Moderation, Peculiar, Periodical, Quality, Quartan, Quotidian, Remission, Return, Semi-Tertian, Tertian, Various, etc.).

REMORSE—Remorselessness—(See Cruel, Gloom, Low Spirits, Merciless, Worry, etc.).

REMOTE ORGANS—A close relationship exists between the opposite signs of the Zodiac, as between ♀ and ♂, between ♁ and ♃, etc. Thus a disease in the Reproductive System, or the Genito-Urinary System, ruled by ♃, will be apt to affect the throat, voice, or neck, ruled by ♁. This is the cause of the shifting of disease. (See Ablation, Complications, Course, Crises; "Shifting" under Disease; "Ablation" under Ovaries, Tonsils; Relapse, Removal, Suppressions).

REMOVAL—Of Organs or Parts of the Body—Ablation—Suppression, etc.—Such organs as the Tonsils, Ovaries, or the Mammae, may be removed; suppressed, shrunken, or absorbed, by the influences in opposite signs of the Zodiac, and known as pairs of signs, such as ♁ and ♃, ♀ and ♁, etc. Afflictions in ♃ tend to affect the tonsils, throat, voice, and to cause defects in, loss of voice, abnormal changes in the voice, the shrinking up or loss of the tonsils, etc. Afflictions in ♁, by reflex action, may cause the shrinking up, ablation, loss of, or loss of function of the Mammae, the Milk Glands of the Breasts. Also afflictions in ♃, when not causing ablation, or removal of organs or parts ruled by ♁, may cause diseases in the parts ruled by ♁. Dr. Duz, the French Astrologer, in his book, "Astral Medicine", on page 80, discusses the theories of Ablation, and Removal of Organs by opposite sign influences. (See Remote, Suppression).

Operations—Removal of Organs or Parts by Surgical Operations, and Rules for Time of Operations, etc.—(See Operations).

REMOVALS—Changes of Residence or Location—(See Abroad, Foreign Lands, Location; "Native Land" under Native; "Place of Birth" under Place; Residence, Travel, Wanderer, etc.).

REOWN—Fame—Desire for Eminence and Distinction—Becomes Renowned—The ☉ Sig. in ♀, becomes famous; the ☉ strong at B., rising and elevated in the East, or in the M.C., and well-aspected; the ☉ Sig. in ♀, often becomes ennobled, or receives titles or honorary distinctions; ♃ approaching the Meridian at B., unless evil aspects counteract, the native becomes wealthy, and comes to distinction; ♃ Sig. ☐ or ♀ ☉, has a great desire to be distinguished, but rarely attains it; ♂ in ♀ tends to distinction; the ♁ and ♃ influences strong at B. (See Commanding, Famous; "The Great" under Great; Kings, Nobles, President, Princes, Rulers).

RENUNCIATION—Retirement from the World—Seclusion—Forsaking the World—A Recluse—The motive for renunciation should be considered. The afflictions of ♃ would cause retirement from a deep philosophical ambition, or disappointed ambitions. The influences of ♃ and the ✕ sign would tend to renunciation for religious reasons. Venus may cause retirement and seclusion because of failure to combat successfully with the trials or social conditions of life, or because of disappointment in love. The afflictions and influences of ♃ and ♂ tend to sudden retirement. Saturn afflicted in the 10th H. tends to downfall in business, loss of honour, and to seclusion and fondness for solitude. Scorpio influence tends to renunciation of the world due to some deep sorrow, or for emotional reasons, or in order to think deeply upon philosophical matters, and get at the root of things, and the truth about life and destiny. (See Aversions, Celibacy; "Anchorite" under Husband; "Recluse" under Old Age; Recluse, Reserved, Resignation, Retiring, Seclusion, Secretive, Solitude; "Release From" under Sorrow).

In choosing a location Abroad for the best of health, or to benefit the health, if the map indicates life Abroad, choose a Country ruled by the Signs of the Zodiac containing ♃ or ♀ at birth if such signs are free from the presence, or severe affliction of the malefics. The native should live Abroad, or away from the Native Place or Land, if at birth the ☉, ♃, ♀, or ♁ were in the 1st, 9th, 10th, or 12th H., or if the ☉ or ♃ were afflicted in the 4th H., or malefics in the 4th. RESTRAINTS—Restrictions—Limitations—To Hold In Check—Hindrances, etc.—Caused generally by the influences and afflictions of ♃.

Bodily Restraints—Physical Restrictions—The influence of ♃ over the body is confining, restrictive, hindering and retarding. Also the 12th H. influences tend to confinement, limitations and restrictions. Saturn tends to restrain the action of the nerves, circulation, stop bodily functions, and retard and obstruct the proper action of the organs of the body, hinder elimination, excretion, secretion, etc. For the details and influences, aspects, etc., causing these restrictions and disturbances, note carefully the paragraphs under each of the organs, and parts of the body, as given in the alphabetical arrangement of this book. Also the various evil aspects between the planets at birth and at conception, the house positions of planets, the influences of the fixed stars and Constellations at birth, and the Prenatal influences during gestation, play their

important part in bringing restrictions over both mind and body. (See Birth, Blindness, Circulation, Conception, Confinement, Congenital, Crystallization, Deafness, Deformities, Elimination, Excretion, Fluids, Fetus, Functions, Hardening, Hearing, Hindrances, Limitations, Malformations, Missing, Monsters, Mutes, Nerves, Obstructions, Organs, Parts, Prenatal Epoch, Prison, Retardation, Retentions, Saturn, Secretions, Senses, Stoppages, Suppressions, Twelfth House, etc.).

Lack of Restraint—The Evil Tendencies of the Temperament Unrestrained—The ♃ sepr. from ♃ and applying to ♃; ♃ rising, or in the 3rd or 9th H., and afflicted; ♂ ♂, ♀, ☐, or ♂ ♃, lack of restraint in almost everything. (See Anger, Conduct, Cruel, Debauched, Depraved, Drink, Drunkenness, Eating, Excesses, Free, Gluttony, Habits, High Living, Indiscretions, Indulgences, Lascivious, Lewd, Licentious, Loose, Love Affairs; "Low and Base" under Low; "Loose Morals" under Morals; Luxuries, Narcotics; "Passional Excesses" under Passion; Perversions, Pleasures, Rashness, Recklessness, Riotous, Self-Control, Sex; "High Temper" under Temper; Uncontrolled, Venery, Vices, etc.).

Mental Restraints—Restrictions Over the Mind—These are caused principally by afflictions to ♃ at birth, or before birth, the evil aspects to ♃, the house position of ♃, etc., as this planet is the general ruler of the mind. The afflictions of ♃ to ♃ tend to dull and retard the mind, and the afflictions of each of the planets to ♃ tend to affect the mind according to the nature of the afflicting planet. Also, ♃ weak and ill-dignified at B., and with no relation to the ♃ or Asc., tends to impair the action of the mind. (For influences along this line, see Chaotic, Confusion, Dull, Faculties, Fears, Foolish, Forethought, Idiocy, Inebile, Insanity, Intellect, Judgment, Memory, Mentality, Mind, Obsessions, Perception, Reason, Understanding, etc. Especially note the paragraphs and subjects under Mental, Mind).

Retarded Mental Powers—(See Arrested; "Fails In" under Examinations; Foolish, Growth, Idiocy, Inebile, Impediments, Inhibitions; "Arrested" under Mental; "Weak Mind" under Mind; "Mental Restraints" under Restraints; "Void Of" under Reason).

RETENTION—Retentive—Holding Back—**Stoppage**—In the body h is the planet of retention, and rules the retentive faculty. By nature, h is frigid, dry, and intropulsive, tending to retain and drive inward the wastes of the body. (See "Influences of Saturn", Qualities", under Saturn).

Faeces—Retention of—(See "Hardening" under Faeces).

Food—Retention of Difficult—(See "Retention" under Food).

Memory—(See "Retentive Memory" under Memory).

Poisons of the Body—Retention of—Retention of Wastes—Caused principally by the afflictions of h , the planet of retention; h ϕ the \odot or \sphericalangle in m ; h in \sphericalangle , ϕ , P , \square , or δ ϕ , due to spasmodic kidney action; caused by ϕ when the dominion of death is vested in her. (See Accumulative, Crystallization, Deposits, Elimination, Excretion, Filth, Gout, Hardening, Hyperacidity, Lameness, Local Parts; "Deposits Of" under Minerals; Poisons, Rheumatism, Stone, Stoppages, Suppression; "Lessened" under Sweat; Uric, Wastes, etc.).

RETINA—The Expansion of the Optic Nerve, and the Internal Membrane of the Eye—Ruled by the \odot and the Ψ Sign. The etheric vibrations sensed by the retina are often interfered with by the afflicted stellar rays from certain parts of the Zodiac, as from Nebulous Spots, the \odot or \sphericalangle in ϕ with Nebulous Stars and Clusters at B., and tend to blindness, or to impair the physical sight. (See Blindness; "Retina," under Eyes; Nebulous; "Optic Nerve" under Optic; Pleiades, Sight).

Blind Spot Or—This is blind because it is not responsive to the etheric Mercurial vibrations. However, the spiritual ray of Ψ makes this spot sensitive, and one who may be blind physically, or have weak sight, may have great spiritual sight under the influence of Ψ . (See Neptune, Spiritual).

RETIRING—Retirement—Quiet—Modest—

Retirement—The \sphericalangle P. h at B., with females.

Retiring Nature—Reserved—Quiet— h and ϕ influence strong at B.; δ rising in m ; ϕ Sig. * or Δ h , retiring in manner. (See Grave; "Retiring" under Manner; Quiet, Recluse, Renunciation, Reserved, Serious, Thoughtful, etc.).

RETRACTION—Retractive—Shortening—Drawing Backward—The retractive forces over the body are ruled by h . (See Contractions; "Retraction" under Eyeballs; Opisthotonos, Rigidity, Saturn Influences).

RETROGRADE PLANETS—A planet is retrograde (R) when it appears to be moving backward in the Zodiac, as seen from the Earth. In Astrology, this condition of a planet is considered a debility, and to weaken the action of the planet over disease and human af-

fairs. This is because it denotes a solution of continuity, interrupted sequence, the same as the direct motion of a planet indicates continuity of influence. In health matters, a planet turning R indicates a change in the disease, a possible breaking up and disorganization of the disease, while the disease may continue strong as long as the afflicting planet remains direct and rapid in motion. Planets are not as forceful over the life when R at B., and a person born with many planets R usually has a weaker constitution, more trouble in life, less energy, etc. It is said, however, that planets R at B. have a direct spiritual effect upon the life, which, in the end, often leads to greater success by Soul Growth than when the nature is more dominated by merely materialistic ambitions. Planets R tend to give the Intuitional Powers greater rule, rather than Reason and the Intellect. The \odot and \sphericalangle are never R in motion, as seen from the Earth, but the \sphericalangle is said to be equivalent to a R planet when she is slow in motion, and moving less than 13° in the 24 hours. By some Authors planets R at B. are said to bring poverty and sickness. (See Continuity, Direct; "Degree Of" under Disturbed; Interrupted, Poverty, Resolution, Sequence, Sickness, Solution, Stationary).

RETROGRESSIVE—The Cellular Retrogressive Metamorphosis is presided over by ϕ . (See "Alterations" under Cells; Metamorphosis).

Rheumatism is also brought on by worry, lowered vitality and nerve force, by over-eating, irregular habits, excesses, surfeits, and by breaking the laws of health. In Nature, there is a rhythmic movement throughout the Universe, and everything moves in cycles of more or less regularity, and the pendulum swings back and forth in human, and other matters, in rhythmic order. The Planets also have their rhythm. The student should make a study of the subject of Rhythm in the Occult and Metaphysical books, as such books go into various details as to the rhythm in the Universe. It is also ruled by heat, and the hot and dry elements, and has more heat than the left side, and the left side is ruled by cold, and cold and moisture. The even, negative, and feminine signs of the Zodiac correspond to the right side of the body in the male, and the odd, positive, and masculine signs to the right side of the body in the female. Thus in the male the right side is ruled by the 2nd, 4th, 6th, 8th, 10th, and 12th Houses, corresponding also to the δ , ϵ , η , θ , ι , and κ signs. These influences would rule the left side of the female. In the female the right side is ruled by the positive signs and houses, as the 1st, 3rd, 5th, 7th, 9th, and 11th Houses, and by φ , Π , Ω , α , ζ , and π , etc. However, the \odot and the masculine signs are said to rule the right side as a whole, regardless of sex, and the $\frac{1}{2}$ and feminine signs over the left side as a whole. However, in determining the degree of heat and cold in the different organs and parts of the right side of the body, it is well to be governed by the rules according to the sex of the nativity. The ☉ to the ☉ ♃ by dir., or the ☉ to the place of Antares, tends to hurts to the right eye of a male by blows, injuries, or falls. SATURN—The Planet Saturn—Also known as Kronos, or Cronos—Known as a malefic, and "The Greater Infortune." However, Saturn, in himself, is not evil, but is chastening, corrective, and untiring in his efforts to arouse Humanity to better and right living, and by bringing sorrow, suffering, sickness, trials, and tribulations upon people that they may learn by their experiences, and reap what they sow. To the Angel of Saturn has been given the great task of the Redemption of Humanity, and He was one of the first of the Hierarchies upon the field at the Creation, the "Serpent" of Eden, and He will be at his work until the last human Soul is redeemed and perfected, and able to master all Earth and material conditions when in physical incarnation. Saturn is a masculine planet, and of a cold, dry, and barren nature, and his influence is of a steady nature, and to restore the balance with those who need it. The afflictions of \mathfrak{h} usually force people on, and out of ruts in life, and to a better environment if they are living in the wrong place, or engaging in a wrong and illegitimate business, or are much tortured by the aggressions of enemies, relatives, or business associates. Such changes usually conduce to greater happiness and usefulness in life, greater success, and better health.

Saturn is known as "The Reaper", "The Tester", "The Chastener", "The Initiator", and also as the Planet of Death. (See "Periods of Bad Health" under Health). This Planet is much written about in the Textbooks of Astrology, and I have spent considerable time gathering up, and arranging these influences so that they will be more readily available to students. This Article will be arranged into three Sections, as follows: Section One—General Influences of Saturn; Section Two—Saturn Rules; Section Three—The Diseases of Saturn, and the Afflictions of Saturn. In any of these three Sections, when subjects are listed without comment, see the subject in the alphabetical arrangement.

— SECTION ONE —

THE INFLUENCES OF SATURN—

Action of Saturn—His action is principally binding, chastening, chronic, cold, crystallizing, denuding, hardening, depleting, hindering, limiting, magnetic, obstructing, retarding, suppressing, etc. Also centripetal, driving the blood inwards from the surface, thru chill and cold. To those who have the New Birth, his action is also very helpful, spiritual, and leads to attainment and advancement. (Note the various paragraphs in this Article).

Afflictions— \mathfrak{h} afflicts by the σ , P, \square , and ζ aspects. He afflicts any part of the map of birth, or by transit or direction, in which he may be located, and even when in his own signs \mathfrak{z} and Ξ , or in his exaltation sign σ , but to a less extent when in signs of his debility, as in \mathfrak{f} , Ξ , or Ω . His afflictions seem to be inimicable to the great masses of people of the Earth, due to their lack of self-control, spiritual sight and development, and materialistic tendencies, as they are as yet unable to respond to his higher vibrations. (See "Aspects" in this section).

Ameliorated—His afflictions are ameliorated and moderated when the benefics are favorably configured with him, or when the progressed \mathfrak{D} forms good aspects to him, or to \mathfrak{z} .

Angel Of—Casiel is known as the Angel of \mathfrak{h} . Also Orifel is mentioned by some Authors. Mikael is said to be the Regent of Saturn. Also by some Satan is said to represent \mathfrak{h} , and to try the hearts of men, discover their weak points, bring temptations and testings, which, if the native can successfully meet, makes him all the stronger in the end.

Ascending at Birth—Makes the native liable to falls, bruises, blows, accidents, fractures, debility, catarrh, rheumatism, nervous affections, melancholy, etc.

Aspects— \mathfrak{h} well-aspected and fortified in a map tends to have a beneficial influence over the planets he aspects, but afflicts the sign he is in, and the parts, or organs, ruled by such sign. The good aspects of \mathfrak{h} are physically inimicable, but may help mentally and spiritually. The evil aspects of \mathfrak{h} deplete and denude. (See Afflictions, Earth, Evil, Good, Jupiter, Mars, Moon, Sun, Venus, in this section).

Chronic— \hbar is chronic, enduring, and the principal cause of chronic diseases.

Church— \hbar evilly aspected at B. tends to an evil mind, and to make one an enemy of Society, the Church, and the State.

Cold— \hbar produces dryness and cold, being remote from the \odot and the vapors of the Earth, but he is more effective in producing cold than dryness. He causes excess of cold and dryness, and is malevolent. (See Cold, Dryness).

Colors—Black, Indigo, Green, Lead Color, Gray. In the Solar Spectrum \hbar rules Indigo. (See Colors).

Day and Night— \hbar is less malignant by day, as his cold is modified by the heat of the \odot , but he is more malignant at night, and adds his cold influence to that of the cold, dampness, and moisture of the night. (See Day, Night).

Death— \hbar Causes Death By—(See "Death" in Sec. 3 of this Article).

His good directions to the hyleg favor better health for the time, and more peace of mind, a better fate, etc. His evil directions are more pernicious and evil during old age, or during the period ruled by \hbar , as from the 63rd to 77th years of life, when afflicting the hyleg. (See Directions).

Distress— \hbar causes distress by colds, bruises, falls, and chronic diseases.

Dry— \hbar is dry and cold by nature, and his afflictions over the body tend to dry up the fluids and tissues. (See Cold, Dry).

Earth—His evil aspects and afflictions seem to be inimical to the inhabitants of the Earth, as the Earth is said to be the lowest in Materialism in our Solar System, and also the only planet where the sexes are separated, and where the Sex Problem, its control, and proper uses, are the great issues. (See "Afflictions" in this section).

Ends Life— \hbar tends by his afflictions to end life in the physical body, to weaken and lower vitality, and opposes the life-giving \odot . (See Opposites).

Endurance—A principal of \hbar , and strong \hbar people cling to life tenaciously in sickness, trouble, and adversity. (See Endurance).

Husbanding—One great influence of h is the husbanding of resources, and even to hoarding and miserliness. (See Miserly).

Hypocrites—In religious, and other matters, h tends to breed hypocrites. (See Hypocritical).

Ills of Life—The ill of life are ascribed to h and his afflictions, and to his chastenings. Saturn allows people to pursue their wicked courses, but calls them severely to account under his evil aspects, and to bring suffering, sorrows, disease, or death to those who are not living right. (See Affliction; "Afflictions" in this section; "Diseases" in Sec. 3 of this Article).

Infortune— h is classed as "The Greater Infortune", due to his severe and prolonged periods of affliction, while Mars is known as "The Lesser Infortune". However, h is not an Infortune to those who are living right, and striving to rule their lower natures, and the evils of life. The Planetary Hierarchy which rules over h , is one of the Elohim, one of the "Seven Spirits Before the Throne", a Messenger of God, and assigned to the work of uplifting humanity, and working out their ultimate salvation and perfection. No planet is evil, but only seems evil from our viewpoint when we come under his afflictions and chastenings, which are not given as punishments or retribution, but only to make humanity better. (See Benefic, Malefics).

Intropulsive— h is intropulsive, and tends to retain and drive inward the poisons and wastes of the body. By chilling the surface he drives the blood inward, causing internal congestions. Mars and Saturn— h is the negative of J , and the opposite of J action. Saturn is centripetal, and J is centrifugal; h is restrained, and J is intensive. Together h and J act as heat and cold, acute and chronic. Saturn tends to offset the active life given by J , and to check, delay, repress, and smother the fiery spirit of J . Saturn tends to depress, and J to enhance. What is given by J is overcome by h . One is sudden, and the other is tardy. Saturn draws from the circumference to a center, along lines of radii, drawing the blood inward, contracting, crystallizing, restricting, binding, hampering, consolidating, etc., while the action of J is the opposite. Saturn opposes the heat, life, energy, courage, and vital power given by J and the \odot . The mind is considerably improved by the good aspects of J to h . (See Mars).

— SECTION THREE —

THE DISEASES OF SATURN—The Afflictions of Saturn—Diseases Ruled by ♄—Diseases which proceed from ♄ are more permanent, and are generally regulated by the motion of the ☉. His influence is destructive in the human body, and he tends to afflict any sign he is in, and to disturb the organs or parts ruled by such sign. He especially causes distress by bruises, colds, chronic diseases, by mineral deposits, urea, and uric acid over the system. He causes hindrances, disturbances of function, stoppages, retentions, suppressions, suspensions, stagnations, lowered vitality, melancholy, etc., and finally death of the physical body. In normal conditions he furnishes the lime, minerals, earthy salts for the body, and in the proper proportions, but as age creeps on, the minerals and wastes of the body are deposited more unevenly, retained, not properly eliminated, until the body becomes acid, hardened, crystallized, and unable to further carry on its work, and death results. The three score and ten years are assigned to man, and it is the work of ♄ to see to it that people do not live too long on the Earth at one time. When in a fixed sign at B, and by dir., ♄ tends to be a very evil afflictor, and to lead to long, lingering, chronic and tedious diseases. Saturn is depressing, antipyretic, and opposed to the action of ☿ and the Luminaries over the body. The most of his diseases are brought on by cold, exposure to cold, chill, and he specializes in cold and dry diseases, which are more destructive to the body. His influence over the mind is worrisome, pessimistic, depressing, melancholic, etc., which states of mind tend to lowered vitality, and earlier death. Saturn in the Signs and Houses at B. shows the weak spots in our map, and where we are liable to go wrong, and what parts of the body are more subject to disease and permanent affliction, the vulnerable parts of the body. Saturn afflicted in the 6th H., or afflicting the ☉, ☽, Asc., M.C., or Hyleg therefrom, is very

evil in health matters. Also ♄ posited in the 12th H. tends to confinements, restraints, bodily defects, limitation of the five senses, and to chronic diseases. As it takes ♄ about 2½ years to pass thru one Sign or House, his afflictions tend to be prolonged, and people ignorant of Astrology, and of what vibration is working over them, causing worry and anxiety, fears, etc., usually begin to lose weight, vitality, and have no peace of mind, and to eventually go into some form of chronic disease until ♄ changes signs, and turns his affliction to other classes of people. It need not be so, however, if people knew of ♄ and his working, and the times of his increased afflictions over their lives, and then could relax, avoid worry, and go right along, and at the same time try to gain in Wisdom, Knowledge, and Spiritual Power.

Many of the influences of Saturn along the lines of disease and his afflictions are listed in Sec. 1 of this Article. The diseases and afflictions of ♄ are, perhaps, more numerous than those of any other planet, and more spoken of in the Textbooks of Astrology. In order to handle the great mass of material gathered about the afflictions of this planet, these subjects have been placed in the alphabetical arrangement of this book for quick reference, rather than to deal with them more fully here in this Article. Therefore, this Section is mostly an alphabetical Summary of the Saturn Diseases and Afflictions, to bring them to your attention, and you are requested to follow them up throughout the book. SCORPIO—The Scorpio Sign (♏)—The Eighth Sign of the Zodiac, and ruled by ♃. This Sign is affiliated with the 8th H., the House of Death. Scorpio is symbolized by both the Scorpion and the Eagle. Scorpio gives the death sting, and then the Soul soars away like an eagle into its airy home. This sign also gives features resembling an eagle. The Scorpion is the symbol of the lower mind, and the Eagle of the Higher Mind. This sign is the night sign, or house, of ♃, the exaltation of ♀, and the fall of the ♃, and the ♃ is most unfortunate in this sign, and especially with females, and tends to disturbed and irregular female functions. This sign belongs to the Fixed Cross, made up of ♃, ♀, ♀, and ♄, and is sympathetic with all the fixed signs, and planets in these signs tend to influence or afflict the parts, or organs ruled by all the fixed signs, and this thru sympathy or reflex action. Scorpio is a sign of long ascension and is classed as a cold, watery, feminine, fixed, negative, nocturnal, moist, fruitful, magnetic, vital, nervous, broken, hurtful, imperfect, mute, phlegmatic, unfortunate, obeying, southern, autumnal sign. The Scorpio people are said to be "The Salt of the Earth" when awakened, spiritualized, and living in

their Higher Minds, but when living in the lower mind, its influence is to make the natives of the sign more treacherous, deceptive, jealous, murderous, passionate, revengeful, deliberate in crime and evil, and to be selfish, and especially when the ♃ influence is involved. Taurus and ♀ are the strongest of the negative and feminine signs, and these signs when on the Asc. at B. give considerable vitality, and more strength than the other earthy or watery signs. Scorpio is known as the "Genital Pole of Paracelsus", while the other ♃ sign, ♀, is called the "Cerebral Pole of Paracelsus". This sign has to do with Procreation, Readaptation, and the Reproductive and Destructive Processes of Life. Scorpio tends to give an excess of magnetic power, and to attract disease, and especially infectious complaints, contagious diseases, and to fall easy victims to Epidemics. (See External). The ♃ in ♀ at B. gives the ♀ and ♃ personality, and often a very troublesome, warlike and combative nature, and if afflicted, to center the mind more upon passion and sex matters. Being a strong occult sign, and the exaltation of ♀, this sign when on the Asc. at B., or containing the ☉, ♃, and other planets, tends to make the native very fond of the Occult, Mystical, Metaphysical, and Astrological Sciences. The Sex Organs are ruled by ♀, and in the early stages of humanity, the opposite and complementary sign ♃ is said to have drawn the larynx and vocal organs from ♀, and this is the reason the larynx, throat, and vocal cords are so intimately related, and why the voice changes at puberty in males. (See Larynx). Scorpio has special affinity with the Nose, Nasal Bones, and the Bladder. When on the Asc. at B., ♀ gives a strong constitution, and the strongest of the watery signs. Excretion is a function of ♀ and ♃, and to burn out the wastes and poisons of the system by fevers and inflammation. This is a fruitful sign, but the least fruitful of the watery signs because of its ♃ influence. The Hebrew Letter "Nun", or "N", is connected with the ♀ sign, which rules the Generative Organs. The Pathological Qualities of this sign are Destructiveness, Reproduction, Tyranny, Worry. The Places denoted by ♀ are Drains, Sinks, Kitchens, Washhouses, Stinking Pools, Quagmires, Muddy Swamps, Marshes, Ruins near Water, and places where Reptiles and Vermin breed. Brown is the Color of ♀, and also red, and a reddish brown, as red is the color of ♃. Also rules dark brown color. People born with the ☉ in ♀, and especially if this sign, or ♃, are not in the Asc., often have very black eyes and black hair, and some of our most beautiful brunettes were born with the ☉ in this sign. (See "Black Hair" under Hair). The Star Antares, also known as "Cor Scorpio", or Scorpion's Heart, partakes of the nature of ♃ and ♃, and some Writers say of the nature of ♃ and ♃. (See Antares). Frons Scorpio is a fixed star in ♃. (See Frons Scorpio). The Zodiac Salt ruled by the ♀ sign is Calcium

Sulphate. SCORPIO DISEASES—The Afflictions of Scorpio—Scorpio attracts disease, and especially contagious and infectious diseases. Scorpio has special affinity with the Nose and Bladder. The principal causes of diseases ruled by μ are afflictions in the μ sign, the presence of malefics in this sign, or with μ upon the Asc. at B., or on the cusp of the 6th H., and afflicted. Planets in \mathcal{S} , the opposite sign, also tend to increase and aggravate μ diseases, as well as planets in \mathcal{Q} and \mathcal{X} , in evil aspect to μ . The Fixed Signs, or the Fixed Sign Cross, when containing a preponderance of planets at B. tends to afflict all parts and organs ruled by the fixed signs, and the afflictions are even greater, and more lasting, when the fixed signs are found upon the four angles of the map at B. The following is an Alphabetical Summary of Diseases and Afflictions caused and ruled by the Scorpio Sign. See these subjects in the alphabetical arrangement—

In material matters, rules Property, Wealth, and the Financial Condition of the Native. The Benefics in this house at B., and well-aspected, denote wealth and good business success. The Malefics here tend to losses, reversals of fortune, poverty, etc. Rules the Color

This House signifies all diseases in the throat and neck, quinsy, glandular swellings, sore throat, scrofula, etc., and malefics in this house at B. tend to affect adversely the neck and throat, the eyes, and to cause diseases in these parts. (See Finance, Neck, Poverty, Property, Riches, Taurus, Throat, Wealth).

SECONDARY DIRECTIONS—These are the Progressed Moon directions, counting each day after birth as a year of life, and the aspects the ♃ forms to the radical planets on each day after birth are very important to study in connection with health matters. Ill-health, and other dangers, are apt to attend the native when the progressed ♃ thus forms evil aspects to the radical planets. An evil secondary direction, when combined with an evil periodic direction, may frustrate the good of a fortunate primary direction. Directions, Transits, or Solar Revolutions, cannot bring anything to pass not shown in the radical map. The subjects of Primary and Secondary Directions are discussed, and the methods of calculation given, in the various Textbooks of Astrology. See Lilly's Astrology, Sepharial's Manual of Astrology, Pearce's Textbook of Astrology, Simmonite's Arcana of Astral Philosophy, and others. (See Directions, Lunations, Periodic, Primary Directions, Prognosis, Progression, Transits).

SETTING PLANETS—Planets setting in the West are less powerful than when rising, as a rule. Planets setting in an occidental quarter show disease, but setting in an oriental quarter indicates accidents and injuries. The health is not as good when the \odot and many planets are setting in the West, and also the nature is less forceful, and not as capable of leadership. Mercury setting also somewhat impairs the mind for hard study and school life, but tends to enhance the mind for success in commercial enterprises, and where the native learns in the school of experience rather than out of books. When the hyleg sets on the Western horizon, death usually results. (See Elevated, Majority, Occidental, Oriental, Rising).

SEVEN—Seven-Year Periods of Life—Seven Months Children—Life from the cradle to the grave is divided into periods of seven years, and certain and definite changes come into the life at every 7th year, as the 7th, 14th, 21st, 28th, 35th, etc. Every 7th year tends to be a more critical year, and especially in health and other matters, as every 7th year begins a new cycle in life. More deaths occur in these

cycle years, as a rule, than during the years in between them in the life of the native. The cycle of H is 84 years, and every seven years he changes signs of the Zodiac, thus tending to changes in the life of the native. Also every seven years the planet h is at the quarter points in his journey thru his orbit from the place where he was at the birth of the native, and at these seven-year places he forms the L, □, ♁, and ♀ aspects to his place in the radical map, and tends to bring on disease, worries, sorrows, anxieties, and to chasten the native who is not living right, and who may be living a life of sin and wickedness, until thru worry, disgrace, financial disaster, etc., he may weaken and go into some form of chronic disease, or even meet with death of the physical body. It is said also that the particles of the body are entirely changed and renewed once in every seven years. These 7th year places in life also correspond to the Quarters of the ♃, and are years of affliction, and correspond to the □ aspect and its divisions. The number 7 is said to be the number of Perfection, and is mentioned many times in the Bible, and in Occult Literature. There are the Seven Days of the Week, the Seven Planetary Angels, the Seven Churches in Asia, the Seven Spirits Before the Throne, etc. Read about the number "7" in the book, "The Key To the Universe" by Dr. and Mrs. Homer Curtiss. Also see the Seventh Card in the Tarot of the Bohemians. (See Cycles, Periods).

It is known as the House of Marriage, Partnerships, Agreements, Disagreements, Contracts, Litigation, Public and Open Enemies, the Marriage Partner, Sweetheart, Fiancee or Fiancee, the Husband in a female nativity, the Wife in a male horoscope. It denotes the Physician or Healer in health matters; gives the description, shape, and condition of the Sweetheart or Marriage Partner; indicates quarrels, contests, thieves, thefts, separations, divorce, losses thru business partners, the aggression of open and public enemies if afflicted by malefics. The Ingress of the ☉ into this house may be indicative of War, if War is threatened, or of Peace, if War is raging. This is a masculine house, and positive. The ☉ in this house is indicative of good health, but gives a good and honorable wife. Saturn in this house at B. tends to short life. Mars here, a bad wife and sickness.

Intensity and severity are associated with the cardinal signs, while remission is related to the mutable signs. It is said that the ♀ and ♂ signs were separated at the time of the separation of the sexes, and the ♀ sign inserted between them. and its conditions. In Hor'y Q. the Significators in fiery signs, and a fire sign on the Asc. and 6th H., indicate feverish and hot complaints, hectic fevers, erysipelas, etc. The Sigs. in earthy signs, and an earthy sign on the Asc. and 6th H., signify chronic, tedious and long diseases, intermittent fevers, ague, and such diseases as proceed from consumptions or melancholy. Airy signs on the Asc. and 6th H. at B., or decumb., or the Sigs. in airy signs, indicate cutaneous diseases, gout, corrupt blood, scrofula, etc. Water signs on the Asc. and 6th H. at B., or at decumb., or with the Sigs. in watery signs at the beginning of an illness, show coughs, stomach disorders, and diseases which proceed from moisture and cold. The planet from which the ♃ is sepr. at decumb. shows the nature and quality of the disease, the state of the sick, and also the cause of the sickness. The sign descending at B., or on the cusp the 6th H., shows the nature and quality of the disease. Thus if the sign be ♀, the head is affected; if ♁, the neck and throat, etc. The 6th H., its lord, and planets in the 6th H. at B., if any, describe the nature of the disease, and especially if they afflict the ☉, ☽, or lord of the Asc. The lord of the 6th H. afflicted indicates the nature of the disease. (See "Causes" under Disease; Directions, Events, First House, Hyleg, Malefics; "Disease" under Nature; Quality, Sixth House, Transits, Type, Virgo, etc.).

SIGHING—Yawning—A Prolonged Deep Inspiration—(See "Sighs" under Breathing).

SIGHT—Eyesight—Vision—The Sense of Vision—The Sight is ruled by the \odot , Δ , H , h , q and g , and is also under the internal rulership of the z sign. The ether, thru which light is transmitted, is ruled by H and z . The vibrations which give sight are originated by g , and the Blind Spot in the eye is blind because it is not responsive to the etheric Mercurial vibrations. The z sign has affinity with the sense of Sight, and it is the sign which corresponds to the etheric vibrations, and this sign when on the Asc. at B. is especially closely connected with Sight. The Nebulous Areas greatly afflict the Sight of Man, and the influence of Ψ is said to be largely with these Areas, as his vibration is very ethereal. The Pleiades especially are a Nebulous Cluster which tend to blindness, and many disorders of Sight, when with the \odot or Δ at B., or by dir. In the Hindu System of Astrology the 2nd H. rules the Eyes and Sight. (See Aquarius, Ether, Eyes; "Rays" under Light; Nebulous, Neptune, Uranus). The following subjects have to do with Sight, or Disorders of Sight, which see in the alphabetical arrangement when not more fully considered here—

Crystallization—Of the Muscles and Nerves of the Eyes—The \odot or Δ g Nebulous Stars, and at the same time in \square or g h , tends to, and to destroy the sight. (See Crystallization).

Danger to Sight—The \odot and Δ with Nebulous Stars at B., and especially in g or g Antares, Aldebaran, The Ascelli, or the Pleiades. The central degrees of the mutable signs afflicted, and when the Lights, or those areas are much involved by malefics, or with Nebulous Stars, and especially in angles, there is much danger to the sight. Afflictions to g tend to endanger the sight, as g is ruler of the nervous system, and also g originates the vibrations which give sight. The z sign on the Asc., and when the ruler of the Decan. on the Asc. is in the 2nd H. and afflicted by malefics. In the Hindu System of Astrology, the 2nd H. rules the eyes and sight. (See the various paragraphs in this section).

Day Blindness—Nyctalopia—Vision Best At Night—Caused by Ψ . (See "Day Blindness" under Blindness).

Defective Sight—Or Vision—Bad Vision—The \odot and Δ in signs of their fall, as the \odot in z , and the Δ in m , and afflicted; the \odot or Δ with, or near the Pleiades, Ascelli, or Antares, and afflicted by any planet, the cause differing according to the afflicting planet; the Δ unfortunate, and with Nebulous Stars; the Δ to the place of Praesepe, great defect in the sight, and often blindness, and especially if the Lights are with Nebulous Stars. Also caused by Subs at MCP (4C). Cases of Myopia—See "Sight Defective", No. 684, and "Spinal Curvature", No. 838, in 1001 N.N. Case No. 684 is Myopic in one eye, and Hyperopic in the other. Unequal Sight—Caused by the ☉ and ☌ in strong mutual affliction to each other. Also as the right and left eyes are under different planetary rulership, the planetary afflictions to these rulers may cause inequalities in the sight so that the two eyes do not focus in harmony. Thus there may be myopia in one eye, and hyperopia in the other. Case—See "Myopia" in this section. This is also caused by Strabismus, and where one eye loses its power for want of proper use. Can also be caused by decay of optic nerve, and various disease conditions which may affect only one side of the body. (See "Strabismus" under Eyes; "Eyes" under Left, Right; "Decay" under Optic).

SIGNATURE—Correspondences—The Law of—There are many resemblances in the Material World to parts and shapes in the human body, and also affinity between herbs, roots, minerals, metals, etc., and parts of the body. Thus the kidney-bean resembles the kidneys in shape. The convolutions of nuts resemble the convolutions of the brain. The coffee seed resembles the two cerebral lobes, etc. The bitterness of Nux Vomica is a good remedy in bile disorders. The subject of Signatures is considered quite fully in the book, "Astral Medicine", by Dr. Duz. (See Antipathy, Opposites, Remedies, Sympathy, Treatment, etc.).

SIGNIFICATORS—In the horoscope of birth the ☉, ☌, Asc., and Midheaven, are called Significators, as they are the vital points, or centers of the map, and afflictions to them mean more than to other places, and in the diagnosis and prognosis of disease the Significators should be examined first as to their strength or weakness. (See "Significators" under Disease, Form, Health. Also see Indicators).

SIGNS OF THE ZODIAC—There are twelve Signs of the Zodiac, as listed and divided today. In the early stages of Humanity, before the separation of the sexes, the ♀ and ♂ signs were united into one sign, but when the sexes were separated, these signs were separated and ♂ inserted between them. (See "Separation of the Sexes" under Sex). Each Sign of the Zodiac has a certain influence on the Mental and Physical Constitution of Man, and each sign rules a certain part, parts, or organs of the body, and with chief attention to the Sign rising upon the Eastern Horizon at B., which is called the Rising Sign. (See Ascendant, First House). The Signs are also closely affiliated with their corresponding Houses. Thus ♀ is in close sympathy with the First House; ♂ with the 2nd H.; ♀ with the 3rd H., etc. The following is a classified list of the Signs, showing their different qualities, characteristics, functions, and their various classifications, etc. Each Sign of the Zodiac is considered in an Article in the alphabetical arrangement of this book. SILVER—Argentum—Ruled by the ♃, and is a typical drug and metal of the ♃. (See Metals, Therapeutics).

Silver Cord—The Cord which connects the Soul to the body. When this Cord is snapped, disintegration of the physical body begins. This happens usually about 3½ days after the apparent death of the body, and during that time there is hope that the body may be revived. Therefore, the body should not be embalmed, disturbed, buried, or cremated until this period has elapsed. Saturn and ♂ cut the Cord. (See Death). What we call the death of the body is not death, as the body becomes more alive than ever when its Captain and Leader, the Ego, has left it, as the atoms and particles then begin their disorganized battle in earn-

est to free themselves in order to enter into new combinations. Cremation sets the particles free immediately, and without the long period of decay and disintegration. The physical body is but a wrapping for the Soul, a physical vehicle to work with and through on the Earth Plane, and when we have finished our "Day in School" here, we are thru with this body, and should forget it, burn it up, the same as we would do to some old worn out cloak or garment. By setting the particles of the body free by fire, the Soul also is more free to depart to the Heaven World, and to have nothing to hold it back, or worry about except the loved ones and relatives left behind. Graveyards are a menace to the health of a Community, and constantly give off foul vapors, and a stench of decaying bodies, and the Astral Shell, or counterpart of the physical body, haunts the grave about its corpse, and appears to those who are psychic enough to see them as an Apparition, or "Ghost", at times until the body is finally disposed of. The questions of the Silver Cord, of Cremation, and other subjects about Death, etc., are quite fully considered in the book, "Cosmo-Conception", by Max Heindel. In the Bible the Silver Cord is spoken of in Eccl. 12:6. (See "Astral Shells" under Astral).

Sagittarius is sincere unless ♃, its ruler, is ill-aspected by malefics. Also the 5th face of ♃, the 1st face of m, or the 6th face of ♃, when on the Asc. at B. tend to make the nature sincere. The afflictions of ♃ and ♃ to the mental rulers tend to Deception and Hypocrisy. (See "Corrupt Air" under Air; "Dog Days" under Dogs; "Death" under Soldiers; "Wild Animals" under Wild).

SITUATIONS—(See Ambition, Business, Employment, Fortune, Idle; "Ill-Fortune" under Ill; Improvident, Poverty, Reputation, Riches, Vocation, etc.).

SIXTH HOUSE—This is a feminine house, and is known as the House of Health, and also of Sickness, and is affiliated with the 6th Sign, Virgo. The 6th H. and m are indicators of disease, and the Sign on the cusp of this house indicates the part of the body more liable to disease and affliction. (See "Action of the Mind" under Mind; Virgo; "Principal" under Vital). Disease is apt to come from the 6th H. conditions, and this house shows the natural and ordinary state of the health. Benefic influences in and ruling this house show better health, while malefics in the 6th H. at B. tend to ill-health, and also indicate the nature of the disease most liable to afflict the body or mind. Malefics in the 6th H. indicate an evil end to the disease. This house shows disease, its cause and quality; it shows the principal humour or disease offending, and whether curable or incurable, and whether the disease will be long or short. The 6th H., in a broad sense, governs disease, and especially if there are planets in this house at B. (See Majority). Diagnosis is more remote, and less accurate, when considering only the lord of the 6th. Wilson in his Dictionary says, "Not to depend too much upon the 6th H. to judge of the disease unless it is very conspicuous in influence." The \odot in this house at B. tends to lower the vitality, and to cause mental diseases. The Δ here tends to diseases of the head. Jupiter, $\frac{3}{4}$, or $\frac{3}{4}$ here denote a good Physician. Also $\frac{3}{4}$ afflicted in this house at B. tends to Venereal Diseases. Mercury here tends to bad breath, and a disordered brain. Mars here tends to fevers, evil servants, and destruction of cattle.

Colors Ruled By—Dark, or Black.

Denotes—This house denotes the Lower Belly, the Solar Plexus, the Intestines, and the Rectum.

Diseases Ruled By—Signifies all diseases in the lower part of the Abdomen, in the Intestines, Liver, and Reins. Also tends to General Ailments. Rules the sicknesses of Servants, De-

pendents, and also malefic influences over this house tend to the destruction of the small cattle, and small animals of the native.

Rules—The Sixth House Rules the Abdomen, Belly, the inferior part of the Belly and the Intestines, even to the Rectum; the Womb; the Climatic and other conditions affecting the health; Food; Clothing; Ritual; the Colors Black or Dark; the physical Comforts of Life; the Common People and the relation of the native to them; the Mother's brothers and sisters in a male horoscope; Aunts and Uncles, and Kindred on the father's side; Aunts and Uncles in a female nativity, or the Father's brothers and sisters; Enemies (in the Hindu System); General Ailments; Healers; Physicians; Sickness, and the nature of the Sickness; rules the Health; Servants, Slaves, Dependents, Persons in employ; Small Animals, such as Ponies, small Cattle, Sheep, Hogs, Goats, Rabbits, etc. The Sixth House influences are referred to many times throughout his Book, and under the various diseases and conditions. See the Sixth House influences in the paragraph "Arguments for Death" under Death; "Indicators of Health", "Judging the Health", under Health; "Signs of Ill-Health" under Ill-Health; "Judgment of the Disease" under Judgment; "Nature of the Disease" under Nature; "Quality of the Sickness" under Sickness; the subjects and diseases under Virgo.

SKIN—Cutis—Derma—The External Covering of the Body—The Cuanteous Surface—Epidermis—Cuticle—Corium—The True Skin—Epithelium, etc.—The Skin is under the external rulership of the ν sign, and also ruled by η . The Skin is also largely influenced by the \sphericalangle sign, the exalted sign of η . By internal government the skin is influenced by all the cardinal signs, and planets in these signs. Cardinal signs denote the skin. The external layer of the skin is called the Epithelium, the Epidermis, the Cuticle, or Scarf Skin. The Derma is the deep layer of the Skin, known as the Corium, Cutis, or True Skin. (See Cutis, Derma). The principle of η is Limitation, and he, therefore, rules the skin and bones, as these tend to define and limit the corporeature. (See Capricorn, Saturn Influence). The planets tend to affect the skin according to their nature. Venus tends especially to affect the complexion, and the skin of the face, and to cause disorders thru the wrong use of Cosmetics. Mars causes inflammations of the skin. The afflictions of H and ϕ , disorders of the nerves of the skin. Saturn tends to hardening, thickening, scaling, dryness, and chilling of the skin, etc. (See Centripetal). This Article is divided into Two Sections. Section One—Characteristics of the Skin. Section Two—Diseases of the Skin.

In the hottest Countries the pigment is dark, or black, as black does not absorb the heat as readily, and gives a cooler body. (See Races). Saturn contributes Sulphur for the pigment of the skin. (See Sulphur). People born under h , and with $\frac{1}{2}$ or $\#$ on the Asc., or the \odot and many planets in the signs of h , tend to white hair earlier in life, and due to the influence of h in withdrawing the pigment, and also due to lower vitality. Immunity from Smallpox—There is little danger of taking smallpox unless ☉ afflicts the ☉, ♃, or Asc. at B., or in a train of evil directions. Vaccination is not needed in cases immune from this disease from birth. Also, in cases destined to fatality by the afflictions of ☉ to the ☉, ♃, Asc., or hyleg at B. vaccination is of little, or no avail. (See Immunity; "Epidemic" in this section).

Treatment—Of Smallpox—Red color, the color ruled by ☉, and to be confined in a red room, or have red rays and lights about the patient, is said to help alleviate the severity of the disease. This is on the theory of treatment by Similars and Sympathy. Also on this basis Vaccination often proves beneficial and preventive, which is the introduction of the lymph from the cow-pox vesicle into the human body, which lymph is under the rule of ☉, the same as ☉ rules the vesicle in the human. There is also a tablet remedy, known as "Double Sulphide", discovered and advocated by Dr. William Burgess, of the New Field Laboratory, Chattanooga, Tenn. Dr. Burgess is now deceased, and the address of this Laboratory is now P. O. Box 52, Lawrence, Long Island, New York. This remedy is a combination of Lime, Sulphur, and Magnesia, and quickly raises the resistance of the body, and overcomes the disease in a short time. Also, it is claimed, if these tablets are taken immediately after exposure to smallpox, the disease does not develop in the patient. Every family should have a box of these tablets in the house for emergencies in Chickenpox, Measles, Smallpox, Rashes, and Epidemic Diseases. This tablet is made up of materials ruled by ♃, ☉, and ♁, and represents a combination of both Antipathy and Sympathy in the treatment. The remedies of ♃ oppose the diseases of ☉. (See Antipathy, Opposites, Red, Remedies, Sympathy, Treatment).

SOCIAL RELATIONS—Social Life—Society—Social Diseases, etc.—The following subjects have to do with the Social Life, and the Social Relations of the native, his dealings with others, etc., and also with the dealings of the Social Classes with each other. The position, strength, power, weakness, and afflictions to the planet ♀ in the map of birth indicate to a large degree the kind and nature of the dealings of the native with the World socially, and his fate in such matters. A strong ♀ at B. also will help the native to be fortunate and well-received by the people. Each of the planets in their own sphere, and their positions, aspects, and strength in the radical map, will play their part in the conduct of the native, for better or worse, and in accordance with the character, attainments, conduct, morals, motives, purposes, and self-control manifested. SOCIALISM—Socialism is said to be under the rule of ♀ and the ♀ sign, and is one of the New Movements now being brought into manifestation for the establishment of the Aquarian Age, Fraternity, and Justice, and the overthrow of the old Political Bosses. The Movement seems to be peculiar, and somewhat misunderstood, due to its Uranian character. Some of the influences in the radical map which indicate Socialistic tendencies are the ☉♂ or ill-asp. ♀; ♀♂ or ill-asp. ♂; ♀ afflicted in the 9th H.; lord of the 10th a malefic, and afflicted in the 12th H. Mars strong at B., rising and elevated, and configured with ♀ and ♄, tends to make Extremists in any Cause of Reformation. (See Ideals, Ideas, Independent, Misunderstood, Politics, Radicalism, Reactionary, Rebellious, Reformers; "Fanatical" under Religion; Revolutionary).

SOCIETY—(See Social Relations).

SODIUM—Soda—Sodium is an alkaline metal, and the base of Salt. Being alkaline it is used internally to counteract over-acidity in the system, caused by the deposits, retentions, and suppressions of ♀. The Alkaline Salts in the body also help to keep the balance between acidity and alkalinity when they are normal. (See Acidity). Alkaline substances are under the rule of the positive planets, and the positive Signs of the Zodiac. The planet ♂ is, therefore, a strong ruler over Sodium, and tends to counteract the diseases of ♀ in the system, and to restore the balance of alkalinity in the body. The ☉, ♀, and ♃, being positive planets, also have a strong influence over Sodium, and its various forms. (See Alkalinity).

Sodium Chloride—Common Salt—Ruled by the ♀ sign, and is connected with the control of water in the system.

Sodium Hydrate—Caustic Soda—Is said to be strongly ruled by ♂, due to its caustic and escharotic qualities. (See Caustic).

Sodium Phosphate—The Salt ruled by the ♀ Sign, and is said to be connected with the acids of the body, and is a combination of Sodium and Phosphoric Acid. Libra is the exalted sign of ♀, and Sodium Phosphate is partly ruled by ♀, and also by ♁, negative planets which rule the acids in the body.

Sodium Salicylate—Partly ruled by ♀, due to the combination of Sodium with Salicylic Acid, and is strongly antipyretic, and opposes the fevers of ♂ when given internally in large doses. Also, due to its positive qualities, it is cholagogue and diaphoretic.

Sodium Sulphate—The Salt ruled by the ♄ Sign, and is connected with the elimination of water in the system. Internally Sodium Sulphate stimulates the liver, pancreas, and also the intestinal secretions, and acts as a purgative. (See "Salts" under Zodiac).

Solar-Lunar Activities—The combined influences of the ☉ and ☽ at B. represent the constitution and the health, and according to the harmony or adverse aspects existing between the ☉ and ☽ at B., so will the vitality, the efficiency of the functions, and the general health be. Dr. Duz. in his book, “Astral Medicine”, discusses the Solar-Lunar System, and the Solar-Lunar Chart, from quite a new and advanced standpoint, and somewhat different from anything seen in the regular Textbooks of Astrology, and every student should read this book by Dr. Duz. (See Constitution, Functions, Health; “Quarters of the Moon” under Moon; “Moon and the Sun” under Sun; “Depletion”, “Force”, under Vital; “Good”, “Low”, under Vitality).

Solar Plexus—(See “Solar” under Plexus).

Solar Revolution—This is the return of the ☉ each year to the same degree of Longitude as in at B. These times are important to note in connection with health matters, as the malefics falling upon the places of the radical ☉, ♃, Asc., or hyleg, at the Solar Revolution tend to many evils, disturbances in the constitution or mind, and in the general affairs of the native, according to the nature of the afflicting planet, or planets. Solar Revolutions, Transits, or Directions, cannot bring anything to pass which is not shown in the map of birth. Chapter XXXVI in Pearce's Textbook of Astrology gives a good Treatise on Solar Revolutions, their various influences and aspects, and as related to disease. (See “Birthday” under Birth). The influences of Solar Revolutions are mentioned many times under the various diseases and afflictions in this book. The following are some of the subjects in which the Solar Rev. influence is mentioned. At the Winter Solstice the ☉ passes into the ♋ sign, usually on Dec. 21st or 22nd. These Solstice Points constitute the beginning of Angles in the map, and the cusps of the 4th and 10th Houses, and have an important bearing in health matters over the World in General, and also over the individual whose map of birth they may strongly affect. SPASMODIC DISEASES—Spasms—Spasmodic Movements—Convulsive Movements—Erratic Movements—Increased Motility—Paroxysms—Motor Neuroses—Jerky and Irregular Movements—Involuntary Movements—Tonic Action—Spastic Action—Rigidity, etc. The planet H is spasmodic, and spasmodic action is largely ruled by this planet, and also by the ♃ sign, the strong sign of H. Uranus in any sign tends to spasmodic action over that part of the body, and its opposite. Both H and ♃, when afflicted, indicate spasmodic action. Uranus in signs which rule the arms, hands, legs, and feet tends to spasm and cramps in these parts. Spasmodic diseases are further caused by H in the 6th H., or afflicting the ☉, ♃, Asc., or hyleg from this house; the ☉ afflicted in ♃; ♀ afflicted in ♃, spasmodic action arising from debility, and called "Wind in the Blood" by the Ancients; ♃ diseases, and afflictions in ♃; ♃ on the Asc. or 6th H. For Death by Spasms see "Death" under Fits. Spasms and muscular contractions are directly the result of nervous disturbances, and dominated by H. A clonic spasm is alternating, while a tonic spasm is continued. Case of Spasms—See Fig. 20A in "Astro-Diagnosis" by the Heindels. The occasional, or alternating form of spasm, the clonic spasm, may be only temporary, and more easily remedied, as in twitchings, Saint Vitus Dance, etc. Also, in tonic spasm, the organ of coordination in 8 is more permanently afflicted, and which may be caused by H or h badly afflicted in 8. SPECIES—Kind—Nature of—Quality of—

Death—Species of the Death—This depends upon the one malefic planet which occupies an Anaretic Place. The quality of the death is indicated by the nature of the least prominent, or least powerful directions, in a train of directions to the hyleg, and by the nature of the sign, or signs containing them. These directions, even though benevolent, show the quality, and when acting with the major killing directions. (See Anareta; "Immediate Cause Of", "Quality Of", under Death; Directions; Dominion; Events; "Death" under Nature, Quality).

Disease—Species of Disease—Causes Every Species of Disease—Species of the Disease—The South Scale, a violent star, when joined to the ☉ or ☽, or afflicting the vital places of the map, is said to cause every species of disease. Mercury in δ especially rules and affects the nerves of speech, and H in δ rules and affects the motor nerves of speech. The Hebrew letter "He" (E) is connected with speech, and the φ sign, which sign rules the intellectual faculties, of which speech is the natural expression. Of the earthy and watery signs the ♋, ♌, and ♍ signs give good stamina when on the Asc. at B. STARS—Fixed Stars—Constellations—The Stars outside of our Solar System, and which are not our Planets, are called Fixed Stars. Only the Stars near the Ecliptic will be considered here. (See Planets). The Constellations make up a Group of Stars. These stars have much effect upon Humanity when in the Asc. or Angles at B, when near the ☉ or ☽, and also when directed to the Angles. Fixed Stars operate only by ☉, ♀, or ☿ aspects in the Zodiac, or Mundane, and not by ✳, ☐, or △. The Fixed Stars have various natures after the order of our Planets, and tend to cause good fortune, calamity, sickness, disease, pestilence, misfortune, accidents, injuries, blindness, eye troubles, drowning, disgrace, imprisonment, violent death, etc., according to their nature. Some Fixed Stars are of the nature of ☉, or of ☉ and the ☽ combined, of ☉ and ♀, or of ☉ and ♀ combined, etc. Other stars are of the nature of ♀, ♃, ♁, and ♁, and their various combined influences. Fixed stars of the nature of ☉ tend to fevers, accidents, injuries, violent death, etc. Those of the nature of ♃, chronic disorders, and ill-fortune. Those of the nature of ♃ and ♁, good fortune, etc. The violent fixed stars are of the nature of ☉ and ☉ combinations, and are the most dangerous to Humanity, and when joined with the ☉ at B, threaten a violent death or extreme sickness. (See "Violent Stars" in this section). Stars of the nature of ♃ and ♁, or ♃ and ♁ combined influences, are more fortunate in their influences, and tend to bring good fortune, good health, honors, renown, happiness, etc. Arista, of the nature of ☉ and ♁, is said to be one of the most fortunate of the fixed stars. Algol is said to be the most evil of all the Fixed Stars. Lists of the Fixed Stars are to be found in the various Textbooks and Dictionaries of Astrology. In this Article you will find an alphabetical list of the Fixed Stars referred to in the various Textbooks, as related to, and causing disease, and other conditions over Humanity. See

STATURE—Form—Shape of the Body—Figure—Height—Weight, etc. The Sign ascending, and the First House, have significance of the Stature of Man. The matter of determining the stature from the horoscope is not an easy task, and it requires considerable knowledge of the nature and qualities of the Planets, Signs, Houses, Aspects, etc., and of Synthesis, to form a reasonable judgment of the appearance, build, complexion, height, weight, etc., without seeing the native. However, the influences given in connection with the following subjects have proven very accurate along these lines. Planets ascending, the sign ascending, the degree ascending at B., the Ascendant, lord of the Ascendant, the nature and position of the majorities of the planets, the dignities of the planets, planets rising, setting, elevated, below the Earth, the combinations and aspects of the planets, and the general synthesis of the map, have to be carefully examined in order to form a judgment about the appearance of the native. These rules are further set forth in the Articles on Appearance, Complexion, Form, Height, Shape, Weight, etc. When the \odot or \mathcal{D} are ascending at B.,

judge from the quality of the sign they are in. When ♄ is ascending he gives a stature according to the lord of the Ascendant. In the Articles on each of the planets something is said about the kind of a form and stature such planet tends to give when predominant at B. By making a study of the following subjects the student will get a very good idea of the various causes and influences which tend to produce the different types of body and physique. Birth Stones—The following are the Birthstones of the various Signs of the Zodiac when these signs are rising upon the Ascendant at birth. This does not especially apply to the \odot in Signs unless you are born at Sunrise, and with the \odot in the rising sign. It is said that a birthstone which vibrates in harmony with your ruling planet, and when worn as a Talisman, is favorable for good health, good fortune, peace of mind, and also protection against dangers. The Birthstones of the Signs are as follows— P , Diamond and Amethyst; S , Emerald and Moss Agate; II , the Aqua Marine and Crystal; \sphericalangle , the Emerald and Black Onyx; Ω , the Diamond and Ruby; m , the Hyacinth and Pink Jasper; \sphericalangle , the Opal and Diamond; m , the Topaz and Malachite; f , the Turquoise and Carbuncle; W , the Moonstone and White Onyx; z , the Opal and Sapphire; X , the Chrysolite and Moonstone. (See Amulets). Considerable valuable information is given about Birthstones, Amulets, and Talismans, in the book, “Message of the Stars”, by Max Heindel.

Bladder—Stone In—Gravel In—Death from Stone In—The \odot , J , h , or S in the 6th H., and afflicted, in fixed signs; the \odot afflicted in m ; the J to the ill-asps. S by dir.; the J in m , and to the S , P., \square , or S h (or S if he be of the nature of h) at the beginning of an illness, or at decumbiture, is an indication of stone or gravel existing in the bladder; P , H , or h in m , and afflicting the \odot or J ; h in m in the 6th H., and afflicted; a h disease; caused by S afflictions; S in m and afflicting the J or Asc.; S denotes death from; S in S or m in the 6th H., and afflicted; a \sphericalangle disease, and afflictions in \sphericalangle ; a m disease, and with afflictions in m ; m on the Asc. and the J in z (Hor’v). People of the melancholic type, and who suffer from Hypochondria, a h disease, are more subject to Stone or Gravel, as h tends to crystallize and deposit the solid substances of the urine in such subjects. Cases—Of Stone In the Bladder—See Chap. XIII in Daath’s Medical Astrology. (See Gravel; the various paragraphs in this section).

Body Turns Into Stone—(See “Petrification” in this section).

Calces—(See Chalk).

Calculus—A stone-like concretion in the body, and usually formed by the mineral deposits of the body as thrown down, deposited, and accumulated by the work of h . (See Concretions; the various paragraphs in this section).

Causes of Stone—In the Body—Stone, Sand, Gravel, and Concretions in the body, are principally the work of h , and his afflictions to the \odot and J , or to both at the same time, and where the signs of h may also be strongly occupied, or many planets in the earthy signs at B.; h afflicted in m ; the J to the \square or S S by dir. tends to the formation of stone if other conditions in the radical map concur. Also the afflictions of H to the \odot and J , from a h sign, tend to stone formation. Stone in the kidney is usually the result of afflictions from cardinal signs. In Gall Stones, the afflictions are from mutable signs. Lilly says Stones in the body are mostly limited to diurnal maps. These Causes are further discussed in the Articles on Concretions, Deposits, Minerals, and also in the different paragraphs of this Article.

Flying Stones—Injury or Death by Flying Stones In Mob Violence— S afflicted in II or m , and S , P., \square , or S the Asc. by dir. (See Mobs). Wounds by wood or stones are indicated in Hor’v Q. when h is in the 1st H. at B., and a malefic planet with the lord of the 1st. When S is lord of the year at the

Vernal, and afflicted, many people tend to be injured by flying stones and mob violence.

Kidneys—Stone, Sand, or Gravel In—Renal Stones—Nephrolithiasis—Stone In the Reins of the Back—Death from Stone In Kidneys—Gravel and Renal Stones are formed in the peduncles, or pelvis of the kidneys, which part is ruled by μ , and the μ sign has more to do with stone in the kidneys than the \sphericalangle sign for this reason. However, the \sphericalangle influence is also responsible, as the stone is crystallized in the kidney by h , and by virtue of his exalted power in \sphericalangle . Stone in the kidney is ruled principally, or fundamentally, by μ and the 8th H. Is caused by the \odot afflicted in μ ; the \odot or \sphericalangle afflicted by h or H from a h sign; the \odot afflicted in Ω , \sphericalangle , or \sphericalangle ; the \sphericalangle afflicted in μ or f , or afflicting the hyleg therefrom; the \sphericalangle afflicted in ψ ; the \sphericalangle to the δ , P., \square , or δ δ by dir.; the \sphericalangle in Ω , δ , P., or ill-asp. h (or δ if he be of the nature of h) at the beginning of an illness, or at decumbiture, and the patient may die when the \sphericalangle comes to the δ aspect of h , and if no good aspect prevent it (Hor'y); the \sphericalangle in \sphericalangle , and afflicted by the \odot or δ when taken ill (Hor'y); ψ , H , or δ in μ , \sphericalangle , or μ , and especially in the 6th or 8th H., and afflicting the \odot or \sphericalangle ; h afflicted in the 6th H. in a fixed sign; h afflicted in ψ , μ , \sphericalangle , or μ ; h in μ tends to stone by obstructing the elimination of urine, and causing calcareous deposits; h in the Asc. in \sphericalangle ; δ in δ or μ , and afflicting the hyleg at B.; caused by δ afflictions; δ afflicted in ψ , δ , \sphericalangle , or μ ; δ in the 6th H. in a fixed sign, and afflicted, and this influence also denotes death by stone; a \sphericalangle and μ disease, and afflictions in these signs; Subs at KP (11D). (See Deposits, Elimination; Back, Bladder, and the various paragraphs in this section).

Also the earthy and mineral signs, as δ , μ , and ψ , when well-filled with planets at B., and such a sign on the Asc. also, may cause, and with other stone-forming conditions concurring. Some Physicians attribute Petrification to disorders of the Ductless Glands, which are largely ruled by the μ sign. STOUT—Stoutness—A Stout Person—Corpulent—Fleshy—Lords of Nativity of stout people have great Latitude as a rule. Oriental planets in their first orientation cause large, stout bodies. The Quadrants from the Summer Tropic to the Autumnal Equinox, and from the Winter Tropic to the Vernal Equinox, tend to give stout bodies, and with the \odot , \sphericalangle , and many planets in these Quarters at B.; h ori. at B. makes the body more stout, tall and hairy than when he is occi., and also gives a stout chest; γ Sig. in δ , m , π , or \times ; γ in δ , partile the Asc., stout, well-set, but not handsome; γ Sig. in δ , compact and well-set; γ in m , partile the Asc., or γ Sig. in m , stout and compact, γ in the Asc., stout, and with a stout chest; γ in π , partile the Asc., stout, compact, and of middle stature; σ in Ω , partile the Asc., stout limbs; ρ Sig. in m ; ρ in m , partile the Asc., stout, corpulent, and well-set; δ , m , or π on the Asc.; the last few degrees of \approx on the Asc. give a shorter and stouter body, but the most of the sign tends to a tall, graceful, and slender body; f on the Asc., a stout, athletic frame. STRAIN—Stress and Strain—Tension—

Body—The Constitution—Over-Straining of—Physical Strain—Muscular Strain—Stress and strain of the body are caused by σ activities, and often from anger, which stress is relieved by the release of Glycogen in greater quantity by the Adrenals to restore the equilibrium. Physical strain is harmful when h is in Ω at B., and afflicting the \odot , \sphericalangle , Asc., or hyleg, due

to weakened heart action at times, and unsustained circulation of the blood during severe exercise. When the airy signs are upon the Asc. at B. the constitution becomes easily run down under strain, and subject to nervous disorders. STRUCTURAL—Organic—The ☉ rules the structural organization of the parts and organs of the body, while the ♃ rules the functions, habits, and general health. The ☉ afflicted, therefore, tends to structural deterioration, and to inherent, hereditary, and constitutional diseases. The ♁ on the Asc. at B. rules the structure of the part, or organ signified, both internally and externally. The nature of structural and functional disorders can be inferred from the combination of Sign, Planet, House, and Aspects. The bones of each part of the body come under the structural rulership of the Sign ruling such part. Thus ♀, in a structural way, would rule the Cranium, the Facial Bones, bones of the skull, etc. Externally ♀ would rule the skin, face, muscles, hair of the head, etc. Internally ♀ rules the Brain, and the contents of the skull, etc. The structural rulership is given under each of the Signs. The question of Structural Influences is further considered in the Article on Organic. (See Organic).

SUBLUXATIONS—A Partial Dislocation of a Vertebra, or a Partial Dislocation in a Joint in any Part of the Body. Under the pull and pressure of the planetary vibrations and afflictions, the vertebrae are easily diverted from their normal positions, become partially dislocated, and impinge upon the nerves passing thru them, tending to

shut off the nerve supply to the various organs and parts of the body, and leading to disease and discomfort in the body. The Spine is the central keyboard of the body, and if the nerve currents to the different parts of the body are to be kept free, open, and unimpeded, the vertebrae must be kept in proper line. Palpation and X-Ray examinations discover these deviations, but there are other ways also of knowing when and in what part of the spine these subluxations exist, and that is by Astrology, as each vertebra is ruled by a Sign of the Zodiac, and the planets in the various Signs at B., and along thru life, tend to afflict the vertebra, or vertebrae, ruled by such sign, and to cause it to deviate. Thus, these subluxations are coming and going constantly in every human being, and many of the partial dislocations adjust themselves at night during sleep. Some subluxations are more serious and prolonged, and especially the vertebra ruled by the Sign in which ♀ is found at B., and if ♀ is also afflicting this sign by direction and his position in the Zodiac at the time of a chronic illness, and which also may involve and cause a major subluxation. Such subluxation tends to be the major one throughout life, and occurs about every seven years, and may endure for two years at a time. The ♁ sign rules the Kidneys, and if ♀ is in ♁ at B. the kidneys become the weakest and most afflicted organs of the body, and are subject to severe affliction when ♀ along thru life is passing thru any of the cardinal signs, for a period of 2½ years to a sign, as thru ♀, ♁, ♂, and ♃, but the most severe when ♀ is again passing thru the kidney sign ♁ in the 28th and 29th years of life, and again in the 56th, 57th, and 58th years of life when ♀ finishes his second cycle, and is back in the ♁ sign again, and considering that he was in ♁ at B. Thus we know in what years of life the Kidney Place (KP) in the spine is under affliction by ♀, and we know this without palpation or examination of the patient if we have his birth data. Also the ☽ in ♁ at B., or ♄, tend to afflict the kidneys, and the vertebrae thru which the nerves pass to the kidneys, and you can usually set it down that a person born with the ☽, ♀, ♄, ♃, or any planet in ♁ at B., or with ♁ rising upon the Eastern horizon, the Ascendant, that they are a kidney subject, and that from the standpoint of the vertebrae, the kidney place in the spine should be the first place to be adjusted. This rather lengthy illustration can be applied to any sign of the Zodiac. The ☽, ♀, or ♄ in the ♁ sign at B. would affect the stomach, and SP in the spine. If the ☽ and malesics are in ♁. the lungs would be affected, and the Lung Place (Lu.P.), the 3rd Dorsal vertebra, would be the major subluxation, and need constant attention for a time, and during the time the afflicting planet is afflicting the Lung vertebrae. The major subluxations tend to be brought on by the major planets, as ♃, H, ♀, and ♄, and also the ☽, and with several planets afflicting one vertebrae at the

same time. The minor subluxations are caused usually by the minor planets, ♀ and ♂, and also by the less severe aspects of the other planets. Every Physician, Chiropractor, Osteopath, or Healer, who would understand his patients, what vertebrae and parts of the body, or organs, are afflicted, should understand Astrology, and how to erect a star map of birth, and to know the planetary influences that are working over his patient at birth, and at the time of illness. The subluxations caused by the slower moving planets are more prolonged. It takes ♃ over two years to pass thru one Sign of the Zodiac, and his afflictions last longer, and tend to a chronic disease. Mars will pass thru one sign usually in about six weeks, and tend to bring on an acute disease, or high fever during this period if the afflicted vertebra is not adjusted frequently. The ☉ passes thru one sign in about one month, and his afflictions tend to last for a month, by his transits. It takes ♃ seven years to pass thru one sign, and during this period he may cause frequent subluxations of the vertebra he is afflicting. By knowing these laws, the Physician, Chiropractor, or Healer, can have a proper knowledge of what vertebrae are afflicted, when they began to be afflicted, and when to stop giving adjustments. This subject is further discussed in the Article on Vertebrae, and each of the Vertebrae given, the parts and organs they supply, etc. At the end of the various Articles on the diseases throughout this book, the subluxations tending to cause the disease have been listed as an aid to Chiropractors who may be using this book. The writer of this Encyclopaedia is a graduate Chiropractor, with the degree of D.C., having taken a resident course at the Palmer School of Chiropractic, at Davenport, Iowa. Also later, in recognition of his Writings, and research work along the lines of Chiropractic, and the Spine, as related to Astrology, he was given the Honorary Degree of Ph.C. by the Mecca College of Chiropractic, located at 143 Roseville Ave., Newark, New Jersey, of which Dr. Frederick W. Collins, A.M., M.D. is the Dean and President. Also the Mecca College of Chiropractic has had a chair of Medical Astrology for some years now, and instructs its students in the Astrological Analysis of the Spine. SUBNORMAL—Subnormalities of the Mind and Body—Below Normal—Almost every subject in this book is dealing with some subnormal, or abnormal condition of the mind, or body, and will ask you to look in the alphabetical arrangement of the subject you have in mind. The planet ♃ tends principally to subnormal conditions by his inhibitions, retentions, and suppressions. Also the afflictions of ♃ tend to subnormal conditions, as lack of development, undersized body, or organs. The ☉, ♃, ♂, and ♀ tend, by

their good aspects, to keep the body and mind at normal. Afflictions during Gestation tend to subnormal conditions, and defective births. See the following subjects, which are suggestive along the lines of subnormalities, and the weaknesses and defects of body and mind. See Abeyance, Abnormal, Adynamia, Anaemia, Apathy, Arrested, Asthenia, Atonic, Atrophy, Aversions, Birth, Blemishes, Body, Congenital, Defects, Deficient, Deformities, Deviations, Diminished, Disease, Dull, Dwarfed, Enervation, Feeble, Foolish, Heredity, Idiocy, Ill-Health, Imbecile, Impairments, Imperfections, Impotent, Inactive, Inertia, Infirm, Insanity, Intellectual, Lack Of, Lethargy, Listless, Loss Of, Malformations, Mind, Missing, Monsters, Perversions, Prenatal Epoch, Sickness; "Subnormal" under Temperature; Undersized, Understanding, Unnatural, Void Of, Weak, etc.

SUCCEDENT HOUSES—The Houses Between the Cardinal and Cadent Houses—The Succedent Houses correspond to the Fixed Sign influence, and many planets in them tend to give a strong constitution. The qualities of these houses are much the same as those of the Fixed Signs. (See "Fixed Signs" under Fixed; "Succedent" under Houses).

SUCCESS—The benefic planets ♃ and ♀ when rising, strong, and well-aspected at B. tend to bring material success, honors, and good health, and especially when in the M.C. in an otherwise fortunate map. (See Ambition, Famous, Fate; "Fortunate" under Fortune; "Good Health" under Health; Optimism, Power, Prosperity, Renown, Reputation, Riches, etc.).

SUCCUMBS—

Disease—Succumbs Easily to Disease—♃, ♀, or ♃ on the Asc., and the hyleg heavily afflicted by malefics; afflictions in fixed signs, and with mutable signs on the angles. The ♃ people become easy subjects to contagions and infectious diseases. The ♃ people court disease, and give up easily to it, and bad suggestions along health lines should not be made to the ♃ people. The ♃ people, by their excess of magnetic power, attract disease, and especially contagious and infectious diseases, and fall easy victims in epidemics. (See Contagions, Directions; "Succumbs Easily" under Disease, Sickness; "Ill-Health All Thru Life" under Ill-Health; Infectious Diseases, Influenced; "Negative Nature" under Negative; Receptive; "Low" under Recuperation, Resistance, Vitality; "Much Sickness" under Sickness; Susceptibility, Virgo; "Weak Body" under Weak).

SUFFERING—Suffers—Distress—Painful Experiences—Pains in the Body—Anguish of Mind—Anxiety—Sorrow—Trouble, etc.—Suffering is produced principally by the 12th H. influences, as this is the house of sorrow and self-undoing, of hindrances, limita-

tions, and confinements. Suffering is also brought on by the ☐ and 8 aspects of ♃, as ♃ is known as "The Chastener", and the Angel of Saturn is ever working with Humanity to right the wrongs, establish justice, and it is often necessary for the Gods Above to bring many afflictions, troubles, sorrows, suffering, or even death, to awaken and arouse the individual to a better life, more spiritual discernment, and to attainment. (See Punishment). The greater part of the suffering brought upon mankind is due to the abuse and improper use of the sex forces, and to use them for sensuous gratifications, lust, and venery, which brings on disease, and an earlier death. (See Passion, Sex). Nearly every subject in this book deals with the sufferings of Humanity in one form and another, and it will not be advisable to list in this Article all these subjects, but you can find them in the alphabetical arrangement. The following subjects will be listed here, however, which see in the alphabetical arrangement when not more fully considered here—

SULPHUR—Brimstone—Is one of the Twelve Polycrest Remedies, and corresponding to the ♃ sign. It is ruled by both ♀ and ♂. Daath mentions sulphur as a typical drug of ♂. The ♃ sign is the sign of ♀, and also ♂ has his exaltation in this sign. The hair is darkened by sulphur, and ♀ rising at B. tends to produce dark and black hair. (See Hair). When in aspect to the ascending degree ♀ contributes sulphur pigment to the skin, and makes the complexion dark and sombre. (See Complexion, Mucous; "Pigmentation" under Skin; "Polycrest" under Zodiac).

SUN—The Sun (☉)—Solar Influences—The ☉ is the central body of our Solar System, and around which the planets move. The ☉ is the source of the vital power, and is the regulator and principal source of the life forces. The ☉ stands at the head of the Vital Group. The ♀ Sign is the home Sign, and the only Sign of the ☉, and the ☉ and the ♀ Sign are closely affiliated with the 5th House, as ♀ is the 5th Sign of the Zodiac. The ☉ when strong and powerful at B. tends to make the life and general fate of the native much more favorable, and when weak, ill-dignified, and badly aspected, the health, vitality, fate and destiny of the individual are very trying, and unfavorable. The ☉ is typical of Spirit, and the ♃ of Matter. The ☉ is hot, dry, fiery, inflammatory, electric, positive, barren, masculine, diurnal, life-giving, constructive, expansive, tonic, variable, and vital in action. Much has been written in the Textbooks of Astrology about the various influences of the ☉, and in order that the student may have quicker and more systematic access to these influences, this Article will be arranged into three Sections, as follows: Section One—Influences of the Sun. Section Two—The Sun Rules. Section Three—Diseases Ruled by the Sun.

— SECTION ONE —

INFLUENCES OF THE SUN—The ☉ is a physiological planet (classed as a Planet in Astrology), and is called "The Light of Time". He gives principally the Brain and Heart in Man.

Above the Earth—The ☉ is more powerful in health matters when above the Earth, or horizon at B., and weaker when below, as the ☉ rules by day, and the ♃ by night. (See Elevated, Majority, Rising).

Action Of—The ☉ is hot, electric, vital, and positive in action, and acts upon the whole substance of the Globe, and not upon just any one part or element. (See "Qualities", and the various paragraphs in this section and Article).

Affinity—The ☉ has affinity with all the Planets.

Afflictions Of—Tend to Fevers and Inflammations.

Anareta—The ☉ may become Anareta when the ♃ or Asc. are hyleg. (See Anareta).

Angel Of—Michael.

Angular and Diurnal—The ☉ angular and diurnal exerts his strongest influence in health and other matters.

Ascendant—The ☉ tends to cause death by his evil aspects to the Asc. or ♃ if they are hyleg, in which case he acts like ♂, and produces death by fire if other testimonies concur.

Aspects—Aspects to the ☉ are necessary to give zest to life, and bad aspects are better than none at all. Planets in ♀ the ☉ are known as in Combust, and the ☉ in such an aspect tends to destroy the nature and influence of such planet, and appropriate its qualities to himself. In other aspects the ☉ afflicts only by his ♁ and ♂.

Beams Of—(See "Rays" in this section).

Below the Earth—(See "Above" in this section).

Benefic—The ☉ is reckoned as benefic, and a Fortune, when with, or in good aspect the Benefics, and not afflicted by malefics.

Blood—The ☉ supplies oxygen to the blood, and also presides over Blood Making. (See Haematopoiesis).

Body—In the body the ☉ concerns itself with the Brain, Heart, Circulation of the Blood, and the Vitality.

Bondage—The ☉ influence is ever clamoring for deliverance and freedom from the thralldom of matter and the flesh, the opposite to the ♃ influence, which gives bondage.

Brain—The rays of the ☉ feed the nerves of the Brain.

Caloric—(See "Heat" in this section).

Capricorn—The ☉ in the ♀ sign ♃ tends to give longevity, and great tenacity of life. (See Endurance).

Cellular Excitation—The ☉ presides over. (See "Excitation" under Cells).

Chronic Type—The inflammatory action of the ☉ is of the chronic type. Also the motion of the ☉ regulates Chronic Diseases. (See Chronic).

Circulation of Blood—(See "Body" in this section).

Dignities Of—The ☉ is at home and strongest in his own sign ♌; has his exaltation in ♍, his fall in ♎, and his detriment in ♏. (See Antipathy, Opposites).

Directions—The evil directions of the ☉ are more critical during the ☉ period of life, from the 18th to 37th years of life. (See "Life" under Periods). When the ☉ is afflicted at B. he becomes a malefic in nature, and his evil directions to the ♀ or Asc., if they be hyleg, tend to destroy life. (See "Anareta" in this section; Directions).

Disease—The ☉ is an Indicator of Disease, and his position, strength, and aspects should always be noted when forming a judgment of disease. (See

"Significators" under Disease; "Indicators of Health" under Health).

Diurnal—(See "Angular" in this section).

Drugs—Of the ☉—The general action of Drugs and Herbs ruled by the ☉ are Stimulant, Tonic, and Preservative. By their physiological action they act upon the Cerebral-Spinal Nervous System, the Circulatory System, the Tonacity, and the Vital Force. Typical Drugs of the ☉ are Aurum (Gold), Chamomilla, and the Sun Flower (Helianthus). The Therapeutic Properties of ☉ Remedies are Anticachectic, Cardiac, and Sudorific. (See Gold; "Sun Group" under Herbs, and the other subjects mentioned in this paragraph).

Dryness—The ☉ produces heat and moderate dryness. The ☉ is classed as dry and hot.

Electric—The ☉ is identified with the positive, masculine, electric, active, and constructive forces of Nature. The ☉ is a positive and electric body, and tends to heat and expansion in the body, and a confident, forceful, and positive mind. The ☉ influence is electric, strong, fearless, inflammatory, vital, fiery, sanguine, dry, hot, and the rays rather fruitful. (See Electric).

Expressive Of—The ☉ is expressive of Infinity, Continuity, Life, and Enlargement of Experience.

Fall Of—(See "Dignities" in this section).

Father—The ☉ signifies the father and his affairs. (See Father).

First House—The ☉ well-aspected in the 1st H., and especially when in a fiery sign, gives a strong constitution. (See Constitution).

Foetus—(See Quickening).

Force—The ☉ in the Solar System has to do with the renewal and interchange of Force, Circulation, and the Conservation of Matter.

Forces—Of the ☉—The Forces of the ☉ are made of use to us by the reflective and refractive powers of the encircling planets, and the rays of the

planets are combined in the Solar Orb, the same as white contains all the colors of the Solar Spectrum. The Spleen is the gateway of the Solar Forces which enter the body. The ☉ in the 4th H. at B. tends to deprive the native of the Solar Forces during a greater part of life, but is good for old age. The Solar Life Currents in the body are diminished when the ☉ is in ζ \bar{h} at B. (See Forces, Solar; "Force" under Vital).

The rays of the ☉ are dry, hot, and rather fruitful, and sunlight is beneficial to growth, health, and vitality. Without sunlight and Solar Forces none could live. The ☉ and σ , being hot by nature, tend to fevers and inflammations by their afflictions. The ☉ disseminates heat over the body, and gives heat to the part of the body ruled by the sign he is in at B. (See Dry, Electric, Sunlight, in this section).

— SECTION THREE —

DISEASES RULED BY THE SUN—Afflictions and Disturbances Caused by the Adverse Aspects and Influences of the Sun—Here are a few axioms, or concise statements, about the influences of the ☉ as related to health and disease, which the student and Diagnostician should keep in mind when

forming judgment. The diseases of the ☉ are organic, constitutional, and structural. The chief diseases of the ☉ are of the Brain, Eyes, and Heart, and the ☉ has special affinity with the Eyes. The ☉ especially rules health matters in the male. The ☉ is more powerful in health matters when above the horizon, or hyleg, and weaker when below the horizon, and not hyleg, or dignified by sign and aspect, as the ☉ rules the day, and the ☉ the night. The sign the ☉ is in at B. indicates an internal part of the body which is very sensitive, and if the ☉ is also afflicted, complaints of such organ, or part, usually result, and according to the sign and nature of the afflicting planet. The ☉ angular and diurnal exerts his strongest influence in health matters, and gives greater resistance to disease. Chronic diseases are regulated by the motion of the ☉. Fevers and Inflammations produced by the ☉ are slow, but severe, while those of ♀ are quick, destructive, and contagious. The ☉ in whatever part of the map largely determines the strength of the constitution in both males and females. The ☉ joined with ♀ causes the same diseases as ♀ in the Asc. at B. In judging of the importance of the disease, note whether the ☉ is weak by sign and house. The ☉ cadent, and in a common sign, tends especially to ☉ diseases, but less so when the ☉ is in the 9th H., or in the ♀ sign. There is less liability to sickness and disease when the ☉ is angular, and the powers of immunity and resistance to disease are greater. As the ☉ is the source of the vital powers, his position, aspects, house position, and dignities in the map should be looked to first in determining the nature and prognosis of the disease, as a weak ☉ at B. usually means an earlier death, short life, while a strong and dignified ☉ at B. promises long life, stronger vitality, and good health. The following are classed as diseases of the ☉. See these subjects in the alphabetical arrangement when they are merely listed here—

SYMMETRY OF FORM—(See Beautiful, Comely, Handsome, Harmonious, Well-Formed, Well-Proportioned, etc.).

SYMPATHY—Sympathetic—

Cured by Sympathy—Paracelsus was the first Physician to suggest giving Similar, and drugs to produce symptoms similar to those of the malady. Hahnemann afterwards demonstrated this principle in Homeopathy. Hippocrates also observed that diseases were sometimes cured by similars. The Astrological selection of remedies was based principally upon Sympathy and Antipathy. The diseases of ♃ were treated by the remedies of ♂, which is by sympathy, or ♂ diseases by ♃

remedies, as ♃ and ♂, both being malefics, work together in greater sympathy. Also ♃ diseases are treated by ♃ remedies; ♂ diseases by ♂ remedies; ♃ diseases by ♃ or ♀ remedies, etc., which is treatment by sympathy. It was also believed by the Ancients that every planet was capable of curing its own diseases, and by its own remedies. Thus remedies of the ☉ and ☽ were used to cure Eye Diseases. Diseases of the Spleen were cured by ♃ remedies; of the Liver, by ♃ remedies, etc. Dr. Broughton, in his book, "The Elements of Astrology", on page 241, gives a Table of the Friendships and Enmities of the Planets. Planets which rule opposite Signs of the Zodiac are not in sympathy. Thus ♏, ruled by the ☉, is in ♂ to ♃, ruled by ♃; the ☐, ruled by ♃, is in ♂ to ♃, ruled by ♃, and by this rule we can know that ♃ is opposed to the ☉ and ☽, and not sympathetic with them, and that the diseases of ♃ can be mitigated by remedies of the ☉ or ☽. The ♃ and ♏ signs are in Δ aspect, and in harmony, and ♂, the ruler of ♃, is friendly with the ☉, and the ☉ has his exaltation in ♃, the sign of ♂, etc. Thus when the diseases of the ☉ are treated by ♂ remedies, it is by sympathy, or vice versa. (For further influences along this line see Antipathy, Colors, Cure, Drugs, Harmony, Herbs, Hippocrates, Homeopathy, Medicines, Ointments, Opposites, Paracelsus, Polarity, Praelicipients, Remedies, Rhythm, Signature, Treatment, etc.).

Disease—Disease Caused by Sympathy—There is an analogy and sympathy between each Sign of the Zodiac and some definite zone of the body. If the afflicting planet governs the part diseased or afflicted, it is caused by sympathy. If the disease is in the bones, and ♃ is the cause of it, it is by sympathy, as ♃ rules the bones. If the disease is in the Arteries, Veins, and Circulation, it is usually caused by ♃ or ♀, the rulers of these matters, etc. If by the ☉, diseases of the Brain, Eyes, or Heart, with which the ☉ has affinity. (See Attracts, Complications; "Complications" under Disease; Magnetic, Polarity, Relapses, Zones).

Disposition—Sympathetic Disposition—(See "Nature" in this section).

Signs of Zodiac—The Signs In Sympathy with Each Other—The Signs in * and Δ relation to each other are in sympathy, or harmony. In matters of health and disease all the fixed signs

are in sympathy, and form the Fixed Cross of δ , Ω , μ , and π , and afflictions in any of these signs tend to affect by sympathy all the parts, or organs, ruled by these signs, which is the fundamental cause of complications in disease. Thus afflictions in δ or μ tend to affect the throat and sex organs. So with the Cardinal and Common Signs. Afflictions in φ , π , \sphericalangle , and ψ tend to affect the Head, Stomach, Kidneys, and Skin. Afflictions in the Common Sign Cross, Π , μ , γ , and χ , to affect the Lungs, Bowels, Thighs and Feet. (See Complications).

Sympathetic Nervous System—This System is ruled by the Δ , h , δ , and the μ Sign. It automatically takes care of the process of digestion ruled by μ , and also pertains to the care of individual preservation. It begins with φ , the Cerebral Pole of Paracelsus, and ends with μ , the Genital Pole of Paracelsus. The Peripheral Sympathetic Nerves are ruled by h and ψ . (See Cerebral, Genitals; "Pathological Action" under Mars). The Δ Group of Herbs, by their physiological action, tend to act upon, and to especially affect the Sympathetic Nervous System. This system is also called the Involuntary Nervous System, and rules over the involuntary functions and actions of the body, such as Digestion, the Heart Action, etc. (See Cardia).

SYMPTOMS—Symptoms In Disease—The word "Symptoms" is not mentioned much in the Textbooks of Astrology, as Astrology deals more with the Causes and Philosophy of Disease rather than Symptoms. However, I have run across the following influences, which have been referred to as Symptoms—

Consumption—(See "Symptoms Of" under Consumption).

Peculiar Symptoms—In Disease—The Δ δ , \square , or δ h , H , or δ , or passing their place at B, or at the beginning of an illness, and especially when the Δ is afflicted by H . (See "Course of Disease" under Peculiar).

The Synovial Serum is connected with the χ Sign, and the \odot and Δ acting thru χ tend to affect the Synovial System. (See Ligaments).

Bursitis—In the Knee Joint—(See Bursa).

TAURUS—The Second Sign of the Zodiac, and ruled by φ , and also affiliated with the 2nd H. This is the night Sign of φ , and \approx is the day Sign of φ . The μ has her exaltation in δ , and ζ his detriment. Taurus is the Sign opposite to μ , and is supplemental to the μ sign, and for this reason planets in either of these signs tend to affect the throat and sex organs, as this sign represents the sex organs, along with the μ sign. Taurus is the sign of "The Bull", and is symbolized by the Bull, and the sign partakes much of the animal nature of the Bull, being stubborn, obstinate, and easily maddened, as a rule. Also being the sign of φ , the δ people have their artistic and musical side, and also strong desires for pleasure, gluttony, and excesses, which makes this the sign for Gout, Rheumatism, and earlier death thru over-eating, and the excessive use of rich foods. Statistics show that δ people are averse to taking baths, and cold baths especially. Taurus is a fixed sign, feminine, negative, cold, dry, bestial, brutish, hurtful, four-footed, animal, commanding, crooked, earthy, even, fruitful, hoarse, luxurious, melancholic, nocturnal, northern, vernal, vital, unfortunate, and a sign of short ascension. It is rather fruitful, belonging to φ , one of the Givers of Children. The δ and μ signs are the strongest of the negative signs, and these signs upon the Asc. at B. give considerable vitality, and are next to the fiery and airy signs in degree of vitality. Being cold and dry the δ sign requires some energizing from without. Taurus is influenced by all the Fixed Signs, and belongs to the Fixed Sign Cross of δ , Ω , μ , and \approx , and planets in these signs at B. tend to affect all the organs and parts ruled by these signs, as the Throat, Heart, Sex Organs and Nature, and the Blood. Planets in these signs also tend to make disease more stubborn, enduring and permanent, and an afflicting planet in one of these signs at the beginning of an illness tends to keep the disease going until the planet changes signs, and enters a common sign. The δ people have a great fear of disease, and should never be told anything discouraging about their case when sick, as they are very susceptible to suggestion. They hold onto disease, and also tend to bring disease upon themselves due to their strong animal appetites, and tendency to excesses, and to suffer from Impure Blood, Gout, Rheumatism, and end with Paralysis or Heart Trouble. They are usually a materialistic class of people, earth-bound, covetous, of good business abilities, and the wealth of the world is largely in their hands. The μ well-aspected in δ is strong, and tends to regular functions, method-

ical habits, and good health. This sign has affinity with the Ears, Tongue, Bladder, and Sex Organs. The body given by 8 is much like that of the ♀ sign. Taurus gives a strong neck and shoulders, and often stooped; full nostrils and thick lips, pensive brows, wavy or curling hair, dark eyes, full and broad forehead, heavy jaws, and a thick neck. The Colors ruled by this sign are red, and red mixed with citrine, and white mixed with lemon. For Countries ruled by this sign see "Taurus Sign" under Nations. The Pathological Qualities of this sign are anger, brooding, love of luxury, excessive stubbornness, and uncontrolled emotions. The Organ of Coordination is situated in 8. (See Coordination). Also the Larynx, situated in 8, was originally built up by the ♀ sign, and taken from ♀, and this is the reason why the voice and throat are so quickly affected by sex changes, as at puberty, or by sex diseases, as in the throat ulcers of syphilis. (See Larynx, Puberty, Voice).

(See "Bad Teeth" in this section).

Treatment—The decay of the teeth is due to the over-acid conditions in the body, due to h influence. (See Acidity, Decay, Hyperacidity). A diet which keeps the body more alkaline tends to preserve the teeth, or to take an alkaline preparation daily, such as Upjohn's Citrocarbonate Effervescent drink. Natives on Islands, or in Countries where the drinking water is largely dominated with Lime and Alkali, usually have good teeth to old age, and rarely ever see or use a toothbrush. The cure for decaying teeth must be from within, and keeping down the acidity of the system, and tooth pastes and mouth washes do not remedy the trouble, altho they assist in keeping the mouth in a more antiseptic and clean condition, and to prevent Sordes. The planetary influences at birth largely determine the nature and life of the teeth regardless of treatment. People who have the positive Signs of the Zodiac prominent at birth, and well-filled with planets, are more alkaline, and have better teeth. (See Alkalinity).

Ulceration Of—Erosion of—(See "Carious" in this section).

TEMPERAMENT—Temperaments—The Bodily Temperaments—In the matter of health, and in the diagnosis of disease, the subject of Temperament is

an important one, as people born with a predominance of planets in the different Signs of the Zodiac, as in the fiery, airy, earthy, and watery signs, the cardinal, fixed, or mutable signs, etc., are subject to different classes of diseases, and each temperament tends to furnish its own list of diseases. Temperament is judged according to the grouping of the planets in the Chart of Birth. The four fundamental Temperaments are determined by the predominance of the planets at birth in the Temperamental Signs, the Fiery, Airy, Earthy, and Watery signs, and known as the Choleric, Sanguine, Nervous, and Lymphatic Temperaments respectively. The Constitutional, or Conditional Temperament, is determined by the predominance of planets in the Constitutional Signs, the Cardinal, Fixed, or Common Signs at birth. The Natural, or Bodily Temperaments, are determined by the Decanate of the Sign rising upon the Ascendant at birth. If the \odot , \sphericalangle , and \mathfrak{h} were in Ω at birth, \mathfrak{h} and σ in \mathfrak{P} , \mathbb{H} and \mathfrak{h} in \mathfrak{z} , and with a fiery sign on the Asc. at B., the predominating influences would be fiery, and indicate the Choleric, or Bilious Temperament. If the planets predominated in the earthy signs, and also with an earthy sign on the Asc., the temperament produced would be the Nervous Temperament, etc. If the majorities of the planets at B. were in the fiery and fixed signs, the temperament would be that of the Fixed-Fire Combination. If the majorities of planets at B. were in the cardinal and earthy signs, the combination would be Cardinal-Earth, etc. It is very difficult to determine the Temperament from any one group of Signs, but the majorities and combinations of the Temperamental and Constitutional Signs must be considered, along with the nature of the Sign and Decanate rising on the Ascendant at birth. The Ascendant, the sign on the Asc. at birth, rule and determine largely the nature of the physical body, and whether it is hot or cold, cold and dry, cold and moist, hot and dry, hot and moist, etc., and each of the four fundamental temperaments correspond to one of the bodily temperaments. Thus the Choleric Temperament has a hot and dry body. The Nervous Temperament, a cold and dry body. The Sanguine Temperament, a hot and moist body. The Lymphatic, or Phlegmatic Temperament, a cold and moist body, etc. The best balanced temperaments are those wherein the planets at birth are more equally divided between the different groups of signs, as to have all the planets in fiery signs at birth, would greatly unbalance the native. Thus the \odot in a fiery sign, and the \sphericalangle in a watery sign, help to balance the nature, and avoid extremes, as the fiery and watery elements oppose each other, etc. The Choleric Temperament produces anger, excitement, haste, fevers, etc., and is fiery. The Nervous Temperament leads to increased nervousness, neurasthenia, but with good mental abilities. The Sanguine Temperament is refined, artistic, intellectual, and also known as the Artistic

Temperament. The Lymphatic Temperament is dull, idle, lethargic, slow, slovenly, and with less vitality. (See "Air Signs" under Air; Ascendant, Cardinal; the Introduction under Constitution; Decanates; "Earthy Signs" under Earth; "Fire Signs" under Fire; First House; "Fixed Signs" under Fixed; "Mutable Signs" under Mutable; "Signs" under Water). As a pathological condition, persistent subnormal temperature may be present in cases of Consumption, Wasting Diseases, Tuberculosis, during convalescence from Fevers, in cases of Acute Alcoholism, poisoning from Carbolic Acid, or some other drug, Opiate, or Intoxicant; from loss of blood in Hemorrhage; from Melancholy, Cretinism, or Myxoedema; occurs during the intervals in Intermittent Fevers, and occurs in some cases of Starvation. See these subjects, and note the planetary influences causing them. The influence of ♃ tends to depress and suppress the heat of the body, and in most cases of subnormal temperature the ♃ afflictions are the fundamental causes of the disorder.

TEMPESTS—Danger, Injury, or Death In—(See Blizzards; "Tempests at Sea" under Sea; "Storms at Sea" under Shipwreck; Storms; "Tornadoes" under Wind).

Also the σ afflictions to the \odot , D , h , δ , or the Asc. tend to criminal acts. The afflictions of h and σ to δ tend to dishonesty. The afflictions of Ψ tend to deceit. TENACITY—

Tenacity of Life—(See Endurance; "Good Powers of Resistance" under Resistance; "Good" under Vitality; Wear and Tear).

Tenacious Nature—(See Obstinate).

TENDENCIES—The tendencies of each individual are largely shown and indicated by the Map of Birth, and also the Prenatal Epoch Map for the time of Conception. The tendencies of the Mind, the talents and abilities of the native, and the line of work most fitted for, and the various relationships he will have with the World, are indicated by the map of birth. The real inner character is indicated more by the map for the time of conception. The radical map also indicates the tendencies to disease, what diseases, and what parts of the body are more subject to affliction. The influence of the \odot in the map shows the innate, hereditary, organic, and structural disorders to which the native is subject. The D influence denotes acquired tendencies. It would take too much space here to list all the tendencies of mind and body, for good or ill, which are mentioned in this book, but will give a few suggestive subjects, and for

other subjects not listed, look for it in the alphabetical arrangement. See Acquired, Animal Instincts, Attracts, Character, Conduct, Congenital, Constitution, Criminal, Depravity, Desires, Diathesis; "Tendency To" under Disease; Dishonest, Evil, Good, Habits, Health, Heredity, Honest, Idiosyncrasies, Inclined, Innate, Instincts; "Low and Base" under Low; Magnetism, Melancholic, Mind, Morals, Motives, Murderous, Nativity, Natural, Nature, Noble, Organic, Predisposition, Prenatal, Propensities, Purposes, Sickness, Sincere, Spiritual, Strong, Structural, Susceptibility, Temper, Temperaments, Violent, Vitality, Weak, Wicked, etc.

Axillae—Tenderness In—(See Axillae).

Feet—(See "Tender" under Feet).

Skin—(See "Delicate", "Tender", under Skin).

TENDONS—The Attachments of Muscles—Ruled by σ . Are also ruled by h , as h tends to harden, strengthen and solidify them, but σ brings them into action in connection with muscular activity. The Tendons are crystallized by h . The tendons and sinews should not be strained when H is in \sphericalangle at B. (See Achilles, Cartilage, Fiber, Ligaments, Muscles, Sinews).

TENIA—(See Taenia, Worms).

TENOR VOICE—(See "Tenor" under Voice).

TENSION—Tensity—Strain—

Fluids and Liquids—High tension with the fluids and liquids of the body is reached at the time of the Full Moon. (See "Full Moon" under Moon).

Mind—Mental Strain—The influences of H and δ tend to bring the mind and nervous forces under greater tension. (See "Strain" under Mental, Mind; "Strain", "Stress and Strain", "Tension", under Nerves).

Muscular Strain—(See "Body" in this section; "Body", "Muscular Strain", under Strain).

Nervous Tension—High Nervous Tension—(See "High Strung", "High Tension", under Nerves; "Mind" in this section).

TENTH HOUSE—The House of the Midheaven—The M.C.—The Meridian—Medium Coeli—The Zenith, etc.—This House corresponds to the D Sign, and is a feminine house, and is also the house of h . Planets culminate in this house, and are strong by accidental dignity if not otherwise in a strong sign, or dignified. This House rules the Knees, Hams, and Thighs, and signifies all diseases in the knees, and the upper part of the leg behind the knees. Planets in this house have a powerful influence in matters of health and disease, and especially malefic planets here, and which may be elevated above the Lights, or afflicting the hyleg from

this position. This house signifies Kings, Rulers, Presidents, Princes, Judges, Magistrates, the Profession, the Employment, Vocation, Business, Honors, Preferment, Fame, Renown. Also signifies the Medicine given in sickness, the credit and honor of the native, and his business standing. In a male nativity, it rules the father, and in a female nativity, the mother, and the affairs of the mother. It also governs the hidden and Occult side of life. Saturn afflicted in this house at birth, or ruler of this house, tends to bring ruin, disgrace, self-undoing, sudden downfall, imprisonment, or an ignominious death. Also ♃ or ♃ here bring disgrace and ruin to Great Men. Mars afflicted in this house, or ruler of, tends to bring trouble with Judges, Magistrates, great misery, and also causes sickness, danger of accidents, a violent death, and much evil to a parent, according to the sex of the nativity. The malefic planets when coming to the ☉ the M.C., or the cusp of this house, and especially ♃ or ♃, indicate the danger of death, violence to the native, falls, blows, injury, or the death of a parent, as the cusp of this house is one of the very sensitive places of the map of birth, along with the Ascendant, and the ☉, ♃, and the Hyleg. The M.C. and the Ascendant are considered passive points in the map, and very strong for good or evil according to the aspects formed with them at birth and by direction. The Colors ruled by this house are Red and White. (See Nadir). For a list of the various influences of the Planets in this House, see Chapter VI in Sepharial's Manual of Astrology.

TERATOLOGY—The Science of Monsters—(See Monsters).

TERMINAL HOUSES—Terminal Signs—The Terminal Triangle—The triangle formed by the Fourth, Eighth, and Twelfth Houses have a close relation to death, the cause of death, the manner of death, the end of life in the physical body, and to old age. The 8th and 12th Houses have no affinity with the Ascendant. The Fourth House, which is affiliated with the ☿ sign, shows the death of the physical body, the end of life, and the fate in old age. (See Cancer Sign, Fourth House). The Eighth House, known as the House of Death, and which is affiliated with the ♀ sign, shows the transition from the physical body to the spiritual. (See Eighth House, Scorpio). The Twelfth House, the last of the Houses, and affiliated with the ♁ sign, and last of the 12 Signs, is the house of privation, suffering, and limitation, and shows the death of the psychic nature. (See "Arguments For Death", "Certain Death", under Death; "End of Life" under Life; "Kind of Death" under Old Age; Pisces Sign; "Death" under Psychic; Twelfth House).

Terminal Signs—☿, ♀, ♁.

TERMINATION—The End—

Disease—Termination or the Disease—The last degrees of a sign on the cusp of the 6th H. during a sickness denote that the disease will soon end,

and when the sign on the cusp changes. The lord of the Asc. changing signs, and entering a sign in which he has dignity, also indicates the speedy termination of the disease. Benefics in the 6th H. help to end the disease, if they are free from affliction, and also not afflicting the hyleg. Malefics in the 6th H. tend to prolong the disease, or bring an evil ending to the disease. The lord of the 6th H. in the Asc., or lord of the Asc. in the 6th, the disease will continue until one of the Significators changes signs. When the ☽, or cusp of the 6th H., are in a cardinal sign, the disease tends to terminate quickly. When the afflictor is in a cardinal sign, the disease is severe, but soon over. (See Acute, Amelioration, Chronic, Complications, Continuity, Crises, Curable; "Certain Death" under Death; "Better", "Worse", under Disease; Duration, Ease, End, Fatal; "Disease" under Force; Increase, Incurable, Lingerer, Long Diseases, Minimizing, Moderation, Modification, Prognosis, Prolonged, Quick Diseases, Recovery, Recuperation, Relapse, Resolution, Short Diseases, Tedious, Worse).

Life—Termination of In the Physical Body—The Terminus Vitae—(See "Arguments for Death", "Certain Death", "Time of Death", under Death; Fatal; "Terminal Houses" under Terminal).

TERMINUS VITAE—(See Death; "Life" under Termination).

TERMS—There are certain degrees of the Zodiac, which are supposed to alter the nature of planets when they are in these degrees. Thus, a malefic in the terms of ♃ or ♃ is modified for good, and the evil of the malefic mitigated. The word "Term" is mentioned much in Astrological Literature, and the student should be familiar with the subject. In the Article on "Terms" in Alan Leo's New Dictionary of Astrology, and also in Wilson's Dictionary of Astrology, there are Tables of these Terms, and showing in what degrees each planet is more powerful. A study of this subject will help students to understand better why a malefic in a sign does not always act in the same way in disease. (See Degrees).

TERRESTRIAL—Of the Earth—Pertaining to the Earth—

Terrestrial Magnetism—Is ruled by ♃. (See Magnetism).

Terrestrial Signs—(See "Signs" under Quadrupeds).

TERRIBLE—Dreadful—Horrible—

Terrible Death—(See "Dreadful Death" under Death; Execution, Guillotine, Hanging, Judges, etc.).

Terrible Diseases Prevail—If ♃ and ♃ be in ☉, and ♃ have higher Latitude than ♃, terrible diseases, and Influenza prevail, but if the Lat. of ♃ be more Northern, the evil will be mitigated. (See Carcinoma, Cholera, Dreadful, Epidemics; "Portentous" under Fever; Influenza, Leprosy, Malignant, Outrageous, Pestilence, Plague, Smallpox, Sores, Syphilis, Ulcers, etc.).

Castration—Should not be done when the ☽ is passing through the ♀, ♄, or ♀ signs. The ♀ and ♀ signs, being opposite and supplemental, castration affects the voice, and tends to make the voice effeminate, or into a tenor. (See Effeminate, Eunuchs, Voice).

Also caused by Subs at AT, AX, MCP, and CP. This disease sometimes occurs as a result of a deficiency of the Mineral Salts in the Blood, and caused by ♀ afflicted in ♀, obstructing intestinal digestion and assimilation. Case of Tetanus—See Fig. 13G in the book, "Astro-Diagnosis", by the Heindels. (See Incoordination; "Blood" under Minerals; "Tonic Spasm" under Spasmodic).

Fingers and Toes—Tetanic Spasm In—Tetanilla—♀ afflicted in ♀ or ♀.

TETTER—Tetters—A form of Ringworm, Herpes, Eczema—Dry Tetter—Scaly Tetter—Caused by the ☽ in the sign of the Summer Tropic at birth; the ☽ in ♄, ♀, or ♀; ♀ and ♂ in an angle, occi. of the ☉, and ori. of the ☽, and ♀ in familiarity with ♂; ♀ or ♂ in the 1st or 7th H. in ♄, ♀, or ♀, and signs ascribed to animals and fishes; ♂ or ♀ holding dominion at birth, and in familiarity with each other, and ♂ afflicting the hyles, and elevated above the Luminaries, Tetters are increased. The Dry and Scaly forms of Tetter are caused more by ♀ and the earthy sign influences, and the

moisture forms where the ☽ and moist signs are involved. (See Eczema, Herpes, Psoriasis, Ringworm, Scales; "Dry Skin" under Skin).

TEXTURE—Of the Tissues of the Body—Ruled by ♀. (See Tissues).

(See Highwaymen, Piracy, Rapine, Robbers, Thieves).

THERAPEUTICS—The Science of the Application of Remedies and the Treatment of Disease. The word Therapeutics means literally, "The Worship of the Gods, or Cure by Faith in the Divinities of Certain Planets." The seven Therapeutical Pioneers for the treatment of disease are Gold (☉), Silver (☽), Lead (♁), Tin (♃), Iron (♄), Copper (♀), and Mercury or Quick-silver (♃). (See Fixed Signs, Second House, Taurus, Venus). Planets when in signs immediately following their own home signs affect the throat, and influence the 8 sign. The ☉ is at home in ♈, and thus when he is in ♀ he affects the throat, and so on with all the planets. The ☉ also in 8, ♈, ♀, or ♋, the fixed signs, affects the throat, in addition to his other sign influences, according to this rule. Table 196 in Simmonite's Arcana is worked out along this line. ible material bodies, or vehicles, thru which the Archangels of God work to carry out His Orders, and to administer, direct, and supervise Human Affairs on our Earth, and in other parts of our Solar System. (See "Causes of Birth", "Delayed Birth", "Moment of Birth", "Premature Birth", "Time of Birth", under Birth; "Birth of a Child", "Born", "Delayed Births", "Time of Advent", under Children; "Moment of Birth" under Moment; Premature, Prenatal Epoch).

Death—Time of Death—In the ordinary course of events in the life of an individual, the planetary influences and directions, or progressions, reach a point where there is a checkmate, and when the game of life in the physical body must cease. This time can be ascertained if the student cares to work long enough, and hard enough to determine all the influences which may be afflicting the Hyleg in the train of fatal directions. However, it is unwise, and unethical for Astrologers to predict the time of death of people, even if they know, or to state openly when noted and famous people will die, due to the worry it might cause. The time of death, or what may seem to us to be the apparent time of death, can sometimes be put off, or prevented for the time, by right living, right thinking, spiritual attainment, and by obtaining wisdom and knowledge of the plan of things. However, most people die on scheduled time, and fit right into the scheme of things by drifting along with their stars, and by following their natural, or evil tendencies. The only proper way of discovering the probable time of death is by directing the Hyleg to the Anareta, and this can only be done when the true hour and moment of birth are known. One fatal direction to the Hyleg ordinarily does not kill, and death by disease is usually the result of the afflictions of a train of evil directions to the hyleg. When the hour of birth is not known a Horary Figure may be erected at the strong desire of the Querent, which figure

tends to answer the purpose of a true map of birth for judgment in the matter. These rules for working out the time of death in Hor'y Questions would be too lengthy to list here, but they are given quite fully in Lilly's Astrology. Also a smaller and handy book is "Raphael's Horary Astrology." There are a number of standard books on Horary Astrology, and the student should own them, and make a study of this subject. For further rules and influences along this line in this book, see Anareta; "Death During Childhood" under Childhood; "Death of Children" under Children; Crises; "Arguments for Death", "Certain Death", "Day of Death", "Hour of Death", under Death; Directions; "Early Death" under Early; Events, Fatal, Hyleg; "Death In Infancy" under Infancy; "Long Life", "Probable Length of Life", "Short Life", under Life; "Death At Middle Life", under Middle Life; "Dies In Old Age" under Old Age; "Death In Youth" under Youth, etc.

(See "Disturbed" under Puberty). The ♀ when in 8 strongly rules over, and affects the tonsils for good or ill, according to her aspects.

Operations—For Removal of Tonsils—Do not operate when the ♀ is passing thru the ♃, 8, or ♃ Signs. Removal of the Tonsils by an operation tends to affect the voice, and to interfere with the proper modulation and tone of the voice. Also as the ♃ and ♃ signs are opposite and supplemental signs, removal of the tonsils adversely affects the sex functions, disturbs the puberty, and also makes child-bearing more difficult. In reality, the tonsils should never be removed, but can be

shrunken, diminished, and rendered of little trouble, by the application of strong nitrate of silver solution, or the nitrate of silver stick as a cautery. It is better to snare and pinch them off with a wire snare, than to cut them off suddenly, as extreme and dangerous hemorrhage often results, or even death, from the sudden severing of the blood vessels which supply the tonsils. (See "Rules" under Operations; "Disturbed" under Puberty).

TRANSITS—Of the Planets—The transits of the planets are not, in themselves, as dangerous as the Progressed influences, or Primary Directions, but transits assist in bringing an evil direction into action. It is important to watch the evil transits of the ma-

leficis, especially in passing judgment upon a disease, and when it will tend to be worse, or get better, according to the nature of the transiting planet, whether it be benefic or malefic. When there are some very evil directions culminating over a person, the transit of ♀ or ♂, or other maleficis, which may add their evil force to the directions, can usually be depended upon as causing a time of misfortune, accident, disaster, or ill-health in the life of the native, even though the life seemed to be moving along quietly until the transit came upon the scene. Also the transit of a malefic over a Stellium of planets in a sign is bound to cause considerable disturbance for the time, and also a transit by ☐ or ☿ is evil in its effects, and helps to intensify other evils which may be culminating over the native, if a malefic, or to bring some great good if the transit of a benefic unites its force to that of good directions, or progressions. The transit of ♀ thru any sign tends to bring disease, lowered functions, and suppressions in the part ruled by the sign he is in for the time, and especially if he is passing his own radical place, or in signs in ☐ or ☿ to his place in the map of birth. The transit of ♂ thru the signs tends to bring injury, fever, or inflammation to the part ruled by the sign he is transiting, and to draw more heat to that part for the time. And so on with each of the planets, as they all tend to carry their special benefits or afflictions along with them, according to their nature, and aspects for the time, and to affect each sign they pass thru for good or ill. Chap. XXXIX, in Pearce's Text-book of Astrology is devoted entirely to Transits, and the effects of each planet by transit. (See Directions, Primary Directions, Secondary Directions).

TRAVEL—The 3rd H. rules Short Journeys, Inland Journeys, as by Rail, Automobile, Bus, or Vehicle. The 9th H. rules Long Journeys, Ocean Voyages, and Travel Abroad. The conditions ruling these two houses in the map of birth, and also how the present planetary positions affect these radical houses and the hyleg by transit, direction, or progression, should be consulted before engaging in travel, and to know whether the native would be fortunate or unfortunate in these matters. It is better for the health and general affairs for some people to travel and seek change of location, while others should keep quiet, remain in one locality, or at their place of birth, and avoid travel. This subject of Travel is largely considered in the Articles on Abroad, Journeys, Rail-

roads, Ships, Vehicles, and Voyages, and will be further considered here. See the following subjects, and the paragraphs under them, when only listed here—

TREATMENT—The Treatment of Disease—This book is not intended to be a Treatise on the Treatment or Cure of Disease, but rather to go into the Planetary Causes of Disease. However, the true treatment of disease is based upon the planetary influences, and upon the Antipathy and Sympathy between the Planets, and what they rule. The Planets cause disease by their afflicting aspects, and according to their nature, and the diseases of one planet are combated by the forces, herbs, and remedies of an opposing planet, or by the remedies of the afflicting planet itself. Thus arose the theories of Antipathy and Sympathy in the treatment of disease. The Allopathic School is based upon Antipathy, or contrary influences, in the treatment of disease. The Homeopathic School is based upon Sympathy, and Similar, in the treatment of disease. These Principles are discussed in the Articles on Antipathy, Cure, Healers, Homeopathy, Medicines, Opposites, Polarity, Praeincipients, Remedies, Sympathy, Therapeutics, etc. While there is in Nature a remedy for every disease in its locality, an Herb, Mineral, Root, or Plant, there are also various ways and means which Man has discovered to combat disease, and neutralize the afflicting forces. These are represented in the various Schools of Healing, and all are good, have their strong points, and their place in the cure and treatment of disease. This book is not intended to go into the merits of any School of Healing, but rather to give to all a Scientific explanation of the Philosophy and Causes of Disease, and they are left free to apply whatever treatment they desire, and in which they have faith, and in which the Patient also has faith. Wrong thinking and adverse mental states, are also the cause of many diseases, due to the afflictions in the Map of Birth, which often lead to Imaginary Diseases at first, and then to real ones, and lower the vital forces of the body. These can be combated by the Mental, Psychic, and Spiritual Schools of Healing, to a large extent, for when the Mind is once set right, many of the evils of ill-health soon take their exit. (See "Treatment" under Melan-

choly). Good Health should be Man's heritage, and he should be taught to think in terms of perfect health, and avoid thinking in terms of disease. In Ancient Times all Physicians were required to be Astrologers before they were allowed to Practice Medicine, or the Healing Art. They were required to know the Philosophy of each case, and how to go at the treatment on a planetary basis, and to properly combat the disease with the remedies at hand. But in the Middle Ages the Science of Medical Astrology was more or less suppressed by those in Authority, and this knowledge became a Lost Science, but it is now being revived, and soon should be a required study in the Curriculum of every School which teaches the Art of Healing. Each Physician, or Healer, should know something of the Elements of Astrology, and how to draw up a Star Map of Birth for his patients, or at least look up the Signs in which the planets were at birth, to know what parts of the body are most afflicted, and the vulnerable parts, or organs, be sure of your diagnosis, and then proceed with the treatment intelligently. The Temperament of the patient also should be studied from the star map of birth, as every patient is under one of the fundamental Temperaments, the Choleric, Nervous, Sanguine, or Lymphatic, and each of these Temperaments requires a different handling. Also Location plays an important part in treatment, and the Map of Birth shows the proper location, whether it should be in a high or low altitude, at the birthplace, in the Native Land, or to go Abroad, and in what direction to travel, and which Nation or Country will give the patient the best vibrations for healing. Also the compatibility, or incompatibility between Healer and Patient should be looked into, and the Radical Maps of each show this, as the wrong Healer often unknowingly kills his patient, and the right Healer sees him get well. Also the Map of Birth should be studied to know what the nature of the trials of the patient are, his peculiar weaknesses, his besetting sins, his wrong tendencies, which may be causing the disease, so as to give proper advice. A volume in itself could be written along these lines as to how to treat patients Scientifically, and according to the leadings and indications of Astrology, which shows God's Plan over each individual, and the relation of every one to Nature.

For further study along this line, see the following subjects in this book—Abroad, Acquired Diseases, Altitude, Antipathy, Aspects, Attraction, Character, Colors; "Compatibility" under Healers; Correspondences, Course of Disease, Crises in Disease; Death (Arguments For); Diagnosis, Diathesis, Directions, Disease, Drugs, Duration of Disease, Electricity (Healing By); Environment, Events, External Influences, Fate, Galen, Habits, Harmony, Healers, Health, Herbs, Heredity, Hippocrates, Homeopathy, Horoscope, Hypnotism, Idiosyncrasies, Ill-Health; "Incompatibility", "Injured By", under

People born with the majority of the planets in any one of these Triplicities, as many planets in ♀, ♀, and ♀, have better balance, a more even temper, whereas a mixture of planets, and occupying several of the Triplicities at B., tend to unbalance the native, cause more discord, strife, inharmony, and ill-health, as such mixtures involve the ♀ and ♂ aspects in the Map of Birth. TUMEFACIONS—(See Swellings).

TUMORS—A Swelling—Abnormal Enlargement—Lumps—Neoplasm—A New Growth Not the Result of Inflammation—Tumors are mostly the work of ♀ and ♀, and result from excesses of various kinds, over-eating, sedentary habits, lack of exercise, poor circulation, stomach disorders, indiscretions, dissolute living, kidney trouble, etc., and are diseases resulting from an ill-dignified, weak, and afflicted ♀ or ♀ at birth. Tumors are of various kinds and types, and may occur in any part of the body wherever there is weakness, deposits, accumulations, and increase of leukocytes. The ♀ and ♀ afflictions pile up the excesses and accumulations, and then ♀ takes them up and does his work by impeding elimination, stopping of functions and secretions, and excess of mineral deposits in the weak and afflicted parts of the body, as shown by the Chart of Birth. Tumors are also a ♀ disease, a ♀, ♂, and ♀ disease. Recent Writers also say that ♀ causes tumors. The action of ♀ conduces to blood changes, and the accumulation of fluids, either in the form of a tumor, or obesity. Tumors follow a Solar Periodicity, and increase in size in proportion to the Sun's Declination towards the West. (See "Periodicity" under Sun). Tumors tend to decrease in size during the decrease of the ♀. (See "Decrease" under Moon. Also see Deposits, Excesses, Hardening, Leukocytes, Retentions, Stoppages, Suppressions, Wastes, etc.). The following subjects have to do with Tumors and Enlargements in the body, which see in the alphabetical arrangement when only listed here—

TWELFTH HOUSE—This is the last of the 12 Houses, and is affiliated with ☿, the 12th Sign of the Zodiac, and also with ♀. This house is a part of the Terminal Triangle, and is a terminal house, showing the end of life, the death of the Psychic Nature, and refers to the sundering of Soul and Spirit, and is what is called the "Second Death". The 8th and 12th Houses are bases of the Occult Triangle, with the 4th H. as the apex. (See Pisces, Terminal). This House was formerly supposed to be connected with the Elementals, the Evil Spirits, and obsessions by them, and is said to be the House of Witchcraft. The confining influences of life, the restraints, limitations, and restrictions, are ruled and represented by this house, and its influences tend to bring trouble, sorrow, privation, confinement, self-undoing, folly, grief, anxiety, suffering, impaired senses, anguish, affliction, mis-

ery, misfortune, distress of every kind, persecution, imprisonment, secret enemies, malice, assassination, suicide, treason, sedition, and every evil that can befall humanity, and especially when there are afflictions and malefics in this house at birth. Saturn delights in this house, and has his joy here, being the Author of Mischiefs. Saturn and ☿ in this house tend to bring every evil, except death, that Mankind can suffer. The planet ♀ also delights in this house, and when afflicted here tends to Obsessions, Spirit Controls, Involuntary Mediumship, and to unusual and detrimental Psychic and Spiritual conditions, unless the native is awakened, and can respond to the higher influences of ♀. The ☉ ☿ in this house tends to deafness, and to hinder and limit the Soul in its manifestations in the physical body, by deprivation or destruction of the five Senses, thus thwarting the Soul in its search for knowledge. This is one of the evil houses, along with the 6th and 8th H., and people born with many planets in these houses at B., or the lord of the Asc. in them, and afflicted, are considered quite unfortunate in life, and subject to many diseases and troubles, and to have a less favorable fate. Being an evil house, evil in a human sense, this house is also a favorable place for the Anareta, or killing planet, and the 12th H. also, when badly afflicted, can act as Anareta. (See Anareta). This is a feminine and passive house, and its conditions at B., and especially when malefic, tend to greatly affect negative and passive people, and to cause much worry and brooding, and often resulting in suicide in a moment of despair and despondency. This house denotes the feet, ankles, and toes, and all hurts and diseases incident to them.

Color—Green is the Color ruled by this house.

Denotes—The 12th H. denotes the ankles, feet, and toes, and all diseases and hurts incident to them.

Diseases Of—Diseases, Hurts, Injury, and Affliction to the Ankles, Feet, Toes, and also to impaired Senses, as Deafness, and other physical and mental limitations. Also Chronic Diseases in general are ruled by this house.

Rules—The 12th House rules Afflictions, Anarchists, Anguish of Mind, Animals (Large); Ankles, Anxieties, Assassinations, Asylums, Aunts and Uncles (On the father's side in a male nativity, and on the mother's side in a female nativity); Backbiters, Banishment, Bondage, Captivity, Cattle (Great and Large); Chronic Diseases, Clairvoyance, Color (Green); Confinements, Desert (The); Desolate Places, Distress, Enemies (Secret and Private); Envy, Exile, Feet, Folly, Great Cattle, Green Color, Hermits, Hospitals, Imprisonment, Insane Asylums, Institutions where people are confined; Invalids (Bed-ridden); Kidnappings, Large Animals, Limitations, Mediumship, Miseries, Misfortunes, Morgues, Obsessions, Oxen, Persecutions, Plots,

Prisons, Private Enemies, Psychic Powers and Experiences, Recluses, Relatives (see "Aunts and Uncles" in this paragraph); Revenge, Secret Enemies, Seditious, Seduction, Self-Undoing, Servitude, Sleep, Solitary Vice, Solitude (Desire for); Spiritual Powers and Experiences, Suffering, Suicide, Toes, Treachery, Treason, Trouble, Wilderness (The); Witchcraft, etc.

Stellium—In the 12th H. at birth—Case—Six Planets in M in the 12th H.—See "Idiot from Birth", No. 742, in 1001 N.N.

TWINS—Double Births—Multiple Births—Triplets—Quadruplets—Twins are especially produced and given by the Π Sign influences, a double-bodied sign, and which is also known as the Sign of "The Twins", and of Castor and Pollux. When Twins are conceived, the bicorporeal Signs Π , \uparrow , or \times , are prominent at conception, and also usually at B., and contain the \Downarrow , and planets dominant in the giving of children. A study of the Prenatal Epoch Map, the map for the time of conception, is very important to understand the causes of multiple conceptions, and to determine the facts as to sex and number, etc. (See Predetermination, Prenatal Epoch, Triplets). The Planets at B. are in harmony with Prenatal conditions, normally, and help to account for single or multiple births, but it must be understood that it is not altogether the positions of the planets at B. which produce children, but those at conception also play their part. There is a close dependency between the time of conception and the moment of birth, and when one of these times is known, the time of the other can be mathematically calculated, as is proven in the Prenatal Epoch work. The influences at the time of conception work with, and concur with the influences in the natal map, and that is why there is often much similarity in the planetary positions at conception, and at birth. The influences in the radix bring the child into the world at the time predetermined at conception, and concur with those at conception under normal conditions. Twins may be conceived near the same time, or as much as a month apart. When conceived several weeks apart, the older twin, being at maturity, forces the younger twin away, which may be only at eight months. In such a case the last one born is considered the older of the two, and for this reason it was the belief of the Ancients that Jacob was older than Esau, altho born after him, and this is, no doubt, the Occult reason why the father Isaac bestowed the blessing upon Jacob instead of the first-born Esau. Twins are very much alike in appearance when the same Sign is rising upon the Eastern Horizon, or Ascendant, but if the rising Signs differ, as when the first twin is born with \times upon the Asc., and the second one with \uparrow rising, they will be under different rulerships, and differ much in form and disposition. The one born under Pisces will be shorter, and of less vitality, and if either of them die soon after birth, or

in infancy or childhood, it will be apt to be the \times one, as \uparrow rising is one of the very strong and vital signs, and also produces a taller body than \times . Thus one of these twins may be short, fleshy, and flabby in early life and youth, while the other will be tall, thin, and wiry, and possibly not as plump and handsome as the first-born, or \times -born child. (See Appearance). Noting the influences at the time of conception, the planet which is connected with the ruling places indicates the number generated, and the planets which are configured with the \odot , \Downarrow , or Asc., determine the sex, or sexes. This subject of the number and sex of multiple conceptions is discussed in the Article on Predetermination, and also in the Article on Triplets. (See these Articles). The following are the general influences which tend to produce Twins, influences which predominate at conception, and also those which are known to exist at birth in cases of multiple births.

Birth of Twins—Twins Conceived—When only two of the Significators of children behold the \odot , \Downarrow , or Asc. at conception, only two are conceived. If these Sigs. both be masculine planets, two males will be conceived. If they both be feminine planets, two females will be conceived. If one of the Sigs. be masculine, and the other feminine, one male and one female will be conceived. The masculine Significators are the masculine planets \uparrow , \uparrow , and δ . The feminine Sigs. are the \Downarrow , \Downarrow , and \Downarrow , if they behold the \odot , \Downarrow , or Asc. at conception. (See "Three Males", "Three Females", and the other paragraphs in the Article on Triplets). If the planets which promise progeny be in feminine, or bicorporeal signs, double offspring is granted, and if in the prolific and seminal signs, as Ξ , μ , or \times , they will grant twins, and even more. If the \odot , \Downarrow , or Asc. or planet aspecting them, be in bicorporeal signs at conception, there will be twins, or more, and the same if both the \odot and \Downarrow are in the South Angle; the \odot , \Downarrow , and Asc. occupied by double-bodied signs, as Π , \uparrow , or \times , or many prolific stars cast a good aspect to them; twins occur when both the \odot and \Downarrow are in the Midheaven in a bicorporeal sign; the \odot and \Downarrow in bicorporeal signs, or lords of the Asc. or 5th H., in such signs; the \Downarrow in the 5th H. in \times ; \uparrow , \Downarrow , or the \Downarrow in the 10th, 11th, 4th, or 5th H. in double-bodied or feminine signs; \Downarrow with \uparrow , \Downarrow , or the \Downarrow , and all of them in double-bodied signs; a double-bodied sign on the Asc. or 7th H., or their lords, or the \Downarrow , in these signs, as in Π , \times , or the first half of \uparrow ; if the 1st or 5th H., or their lords, be in bicorporeal signs, twins are denoted in Hor'y Questions; a fruitful planet, or planets, in the 10th, 11th, 4th, or 5th H. in fruitful, feminine, bicorporeal, or water signs, there are two, or more, at a birth; a double-bodied sign on the Asc. or 5th H., and with \uparrow or \Downarrow therein. (See "Single Births" in Sec. 1 in the Article on Children. Also see Birth, Conception, Foetus, Fruitful, Gestation, Parturition, Pregnancy, Prenatal Epoch).

TWISTINGS—Torsion—A H disease and affliction, and due to incoordination, or lack of proper nerve supply to a part, or organ. Twisting may occur in any part of the body, and especially in the part ruled by the sign H is in at B. This is classed as a Spasmodic disorder. If the contraction and twisting become chronic, a deformity may result, lameness, or disability. (See Contortions, Contractions, Deformities, Distortions; "Wry Neck" under Neck; Spasmodic Diseases, Torsion, Torticolis).

TWITCHING—An Irregular Minor Spasm—A H disease and affliction, and where H may not be as severely afflicted as in twistings. Twitchings are an indication that the nerves are being overworked, or affected by systemic disorders, and are a signal that something is wrong, and that habits, or the manner of living are wrong, and that it is time to slow up a bit before the vital forces become lowered or dissipated. (See Contractions; "Movements" under Erratic; Jerkings, Saint Vitus Dance, Spasmodic Diseases, Tics, Tremors, etc.).

TYPANIES—Tympanites—Gaseous Distention of the Abdomen—Caused by the ☉ afflicted; the ♃ affl. in ☍ or ♀; also a ♂ disease. (See "Gas" under

Bowels; Distentions, Flatulence; "Abdomen" under Gas; Inflation).

TYPANUM—Tympanitis—(See "Drum" under Ears).

TYPE OF THE DISEASE—The Time and Type of the disease are indicated by the nature of the Direction, or Directions, operating at the time, and the nature of the afflicting planet, or planets, but only such disease can be predicted, or consummated, as is contained, or foreshadowed in the radical map. (See "Disease" under Nature, Quality, Species).

TYPHLITIS—Inflammation of the Caecum—(See Caecum).

TYPHOID FEVER—Enteric Fever—Intestinal Lesions and Eruptions—A ♀ disease, and caused by afflictions in ♀; the ☉ afflicted in ♀ or the opposite sign ♃; a ♂ disease, and ♂ is usually the afflictor; ♂ affl. in ♀, and especially in the 6th H.; ♂ affl. in ☍ in the 6th H.; ♀ affl. in ♀; afflictions in ♀; occurs mostly when ♀, ☍, or ♀ are on the Asc. (See "Fever" under Bowels; "Epidemics" under Cholera; Epidemics). Case—Death by Typhoid Fever—See "De", No. 226, in 1001 N.N.

Typhoid Pneumonia—(See "Typhoid" under Pneumonia).

TYPHUS FEVER—Camp Fever—This fever is more prevalent when the major planets, and especially ♃ and ♃, are in perihelion. Is caused by the vitiated and disturbed atmospheric conditions by planetary influence. Caused by ♂ and ♀. Venus denotes death by when the afflictor in the disease. (See "Corrupt Air" under Air; Epidemics, La Grippe, Perihelion).

Typhomania—The Delirium of Typhus—Caused by ♀, and ♀ afflicted at B., or afflicting the hyleg.

TYPICAL DRUGS—Of Each Planet—(See "Typical Drugs" under each of the Planets).

TYRANTS—(See Cruel; "Shows No Pity" under Pity).

U

UGLY—An Ugly Person—Not Handsome—Not Attractive—Ugliness is usually caused by malefics afflicting the Asc., causing defects in the features, complexion, and form of the body, and according to the nature of the planets and signs involved. The signs ☍ and ♃, when prominent at B., or upon the Asc., are said to give the least beauty of all the signs, and especially ♃. The ♃ sign especially causes a crooked, raw-boned, ill-shaped body, knock-knees, bow legs, and usually a pale and swarthy complexion. The ☍ and ♃ influences, and the ♀ influences, tend to give the most beautiful and comely bodies when upon the Asc. at B., or ♀ dignified in the Asc.

Ugly Disposition—Given especially by the afflictions of the malefics ♃ and ♂, and when these planets are prominent at B., in angles, and afflicting each

other. (See Cruel; "Cross", "Rough", under Manners; "High Temper" under Temper).

Ugly Face—(See "Ugly" under Face).

Ugly In Person—Ugly Body—Not Handsome—The ☉ Sig. in 8, a rather ugly person; the ☉ in 8 in partile asp. the Asc., short, well-set, and rather ugly; the ♃ ill-dignified at B., not handsome, but a mudding creature; the ☍ and 8 aspects of the ♃ tend to give an ugly, crooked, and badly made body; ♃ Sig. in 8, in no wise comely; in Hor'y Q. ♃ Sig. in 8, ☍, ♃, or ♃; ♃ Sig. in ♃, thin and ungainly; in Hor'y Q. ♃ denotes a person of a lean, crooked, and ill-made body; ♃ indicates a person of a black, earthy, brown complexion; ♃ Sig. in 8 or ♃; ♃ in ♃, partile the Asc., generally very ugly; ♃ Sig. ☍ or 8 ♃, not of a genteel form; ♂ Sig. in ♃, far from handsome;

♂ in ♀, partite the Asc., generally ugly; ♀ Sig. □ or ♂ h, not very handsome; ♀ Sig. in m, not in any way elegant or pleasing; ♀ on the Asc., a crooked body. Also note the influences in the Introduction to this Article. (See Awkwardness, Bloating, "Raw-Boned" under Bones; "Bad" under Complexion; Commonplace, Crooked, Deformed, Distortions; "Ugly" under Face; Freckles; Ill-Formed" under Ill; Lean, Lumpish, Marks, Pimples, Scars; "Pock-Marked" under Smallpox; Spare, Thin, etc.).

UMBILICUS—(See Navel).

UNBALANCED MIND—(See "Unbalanced" under Mentality, Reason).

UNBRIDLED PASSION—(See Nymphomania; "Passional Excesses", "Unbridled", under Passion).

UNCERTAIN—

Uncertain Action—To the Body—✕ on the Asc.

Uncertain Health—(See "Uncertain" under Health).

Uncertain Mind—(See "Uncertain" under Mind).

UNCHARITABLE—♂ influence. (See Miserly).

UNCHASTE—(See "Chaste" under Females; "Adultery", "Liaisons"; under Love Affairs; "Loose Morals"; under Morals; "Unbridled" under Passion; "Clandestine" under Sex; "Unchaste" under Women).

UNCLEANLY—Filthy Habits of Body and Mind—Dirty—Slovenly—Untidy—Careless About the Body—The ♀ affl. ♀ at B.; ♀ ill-dignified at B., and affl. in Horary Questions ♀ Sig. denotes a dirty person; ♀ ♂ ♀; ♀ and ♂ in the Asc., and affl. the ♀ and ♂ prominent at B., with many planets in earthy and watery signs, and ♂ without the strong support of the ☉, ♀ or ♀; ♂ affl. in ✕, slovenly in habits; ♀ weak and ill-dignified at B.; ♀ affl. the ♀; ♀ to the bad asps. ♀ by dir.; ♀ ♂ ♀ ☽, and ☽ ☽; ✕ on cusp 6th, or in the 6th H., tends to carelessness in personal cleanliness; ✕ when afflicted produces ailments thru carelessness and forgetfulness. These afflictions existing at B., often tend to ill-health thru lack of proper care of the body. (See Carelessness, Cleanliness, Filthy, Habits, Knavish, Leprosy, Neglect, Slovenly, Untidy, etc.).

Unclean Mind—(See Lewd, Lust; "Loose Morals" under Morals; Obscene, Profane, Shameless, Vile, Wanton, etc.).

UNCLES—The Aunts and Uncles on the father's side, when considering a female nativity, are ruled by the 6th H., but in a male nativity, they are ruled

by the 12th H. The Aunts and Uncles on the mother's side, in a female nativity, are ruled by the 12th H., and in a male nativity, by the 6th H. By noting these distinctions, and the nature of the planets in, or influences affecting the 6th and 12th houses at birth, the native can get some idea of the events, destiny, health, illness, early or late death, etc., which are apt to overtake an Aunt or Uncle on either side of the house. The Uncles on the father's side are ruled by ♀, and on the mother's side, by ♂. Thus ♀ badly afflicted at B., and by direction, tends to affliction or trouble to an Uncle, on one side of the house, according to the sex of the native, and the transits, progressions, and arcs of direction of afflictions to ♀ will give the time of the events and afflictions. Also ♂ is to be treated in the same way to determine the time and nature of events and afflictions to Aunts and Uncles on the mother's side. (See Aunts, Brethren, Sixth House, Twelfth House).

Maternal Uncles—And Aunts—Death or Suffering To—(See "Aunts and Uncles" under Maternal).

Paternal Uncles—And Aunts—Death or Suffering To—♂ ruler of the 6th or 12th H. at B., and ♀ ♂ or ill-asp. the Asc. by dir., according to the sex of the native, and especially as related to the aunts and uncles on the father's side. On the mother's side, if ♀ should rule the 6th, or be in the 6th, and be much affl. at B., and by direction by ♀, and other malefics, or by an Eclipse, then judge that the affliction will occur to an aunt or uncle on the mother's side, and according to the sex of the native, as to whether the affliction is to be judged as from the 6th or 12th H. Some Authors ignore these finer distinctions, and others lay great stress upon them, the same as in the finer distinctions concerning the 10th and 4th houses, in the cases of the father and mother in a male or female nativity. Most Writers just take the general rule that the 6th H. rules the aunts and uncles on the father's side, in either a male or female nativity, and the 12th H. on the mother's side, and that afflictions in these houses, or to the Asc. by dir., whether they be of ♀, ♂, or any planet, tend to afflict an Uncle or Aunt accordingly. (See Aunts; "Relatives" under Father; Grandparents, Maternal, Mother, Parents, Paternal, Relatives).

UNCOMELY PERSON—♂ in 8, partile the Asc. (See Crooked; "Ill-Formed" under Ill; Stooping, Ugly, etc.).

(See Extraordinary, Mysterious, Obscure Diseases, Peculiar Diseases; "Diseases" under Psychic; Strange Diseases, Unusual).

Uncommon Occurrences—(See Phenomena).

UNDERSTANDING—Apprehension—Comprehension—Discernment—Perception—Reason—The Understanding of every one depends much upon the strength, and distance of ♀ from the ☉ at B., and the further ♀ is from the ☉, the better the understanding. People born under these Signs tend to worry and brood more, invite ill-health, and the general events of their lives tend to be more unfortunate than is the case with the positive, and more individualized classes of people. The ♃ sign is said to be the most unfortunate of all the Signs, being the Sign of h. (See "Negative Signs" under Negative).

Such maps are considered unfortunate with the average person who is not awakened or spiritualized, as such maps usually tend to more sorrow, trouble, and ill-health, or an earlier death, and often result in crime, murder, suicide, and an untimely or tragical end. (See Character, Fate, Horoscope, Map, Nativity).

The ♁ and ♃ signs are the weakest signs when upon the Asc. at B., and tend to the weakest bodies, and to be pale, sickly, and unhealthy. Also the ☉ in ♁, in partile asp. the Asc. tends to give an unhealthy countenance, pale and white. (See "Unhealthy" under Complexion; "Weak" under Constitution; Emaciated, Feeble; "Bad" under Health; "Ill-Health All Thru Life" under Ill-Health; Infirm, Invalids, Pale, Sickly; "Much Sickness" under Sickness; "Low" under Vitality; "Weak Body" under Weak).

URANUS—The planet ♅—Also called "Herschel", in honor of its Discoverer. Also called **Georgium Sidus**. This planet was discovered on March 13th, 1781, by Sir William Herschel. By careful observation of the workings and effects of this planet over human affairs, much has been written about it, and especially in recent years. This Article will be arranged into three Sections, as follows: Section One—Influence of Uranus. Section Two—Uranus Rules. Section Three—Uranus Diseases and Afflictions. For the special Characteristics and Qualities of ♅, see "Qualities" in Sec. 1 of this Article.

— SECTION ONE —

INFLUENCE OF URANUS—Uranus is said to be a Ruler Among Planets. His influence is of a sudden and spasmodic nature, and fundamentally has been observed and determined to be more Psychic and Mental than Physical. In the Brain he rules the Pituitary Body, one of the Spiritual Centers, and closely associated with the Pineal Gland, ruled by ♀, in Spiritual and Psychic Development. (See **Neptune**, **Pineal**, **Pituitary**). Very few people as yet are able to respond to his higher vibrations, and it is asserted that the influences of ♅ and ♀ will be more positive over Races yet to come in the distant future, as the Sixth Sub-Race, and the Sixth Race itself. The Occult Significance of Uranus is well set forth in the book, "Message of the Stars", by the Heindels.

Affinity—♅ has affinity with the Eyes, as this planet rules the Ether, and transmits the rays of Light. Also ♅

has affinity with the ♁ sign, which is a strong sign of this planet.

Afflicts—♅ afflicts by his ☉, ♀, ☐ and ☿ aspects.

Alchemistry Of—(See **Pituitary**).

Anareta—♅ may be Anareta, altho he does not kill by himself, but usually in with a train of evil directions to the hyleg. (See **Anareta**).

Aspects—(See "Afflicts" in this section). His favorable aspects to the ☉, ♃, ♀, and other planets, and to the Asc., tend to elevate the mind and nature, expand the Intuitions, make the native Altruistic and Humane, give a love of Truth, and to greatly increase the Spiritual Foresight and Perceptions.

Changes—The ♅ influence, and especially his afflictions, tend to many changes, removals, journeys, and to be restless and unsettled until the native becomes awakened to the Higher Things in life.

Colors—Deep Rich Blue.

Denotes—(See "Spasmodic" in this section).

Directions Of—(See "Directions" in Sec. Three of this Article).

Discovery Of—(See the Introduction to this Article).

Drugs Of—(See **Metals**, **Typical Drugs** of, in this section).

Ether—♅ rules the Ether. (See **Ether**).

Events—Tends to sudden and unexpected events.

Evils—His evils come suddenly, as well as the good he brings.

Eyes—♅ has special affinity with the Eyes, as he rules the Ether, thru which Light Rays are transmitted. (See **Blindness**, **Ether**, **Eyes**; "Rays" under **Light**).

Free Love—(See "Free Love" under **Free**).

Higher Rays Of—Not many respond to the higher rays of ♅, and tend to be adversely affected by his vibrations.

Horoscope—♅ affects the horoscope mostly by his influence upon the other planets, as he is a Ruler among Ruling Planets.

Impulses—(See "Sudden" in this section).

Indicates—♅ indicates eccentric and uncommon people, Bohemians, and those who are abrupt, original, and not of the ordinary type. (See **Eccentric**, **Independent**, **Misunderstood**, **Occult**).

Intuition—The Principle of ♅ is Intuition.

Journeys—Causes Many Journeys, Changes, and Removals. (See these subjects).

Laws of Society—♅ people rebel against these Laws, and desire freedom. They also tend to chafe under the vows and restraints of marriage.

Love Affairs—The afflictions of ♅ to ♀, or with ♅ in the 5th or 7th H., tend to much trouble in love affairs and marriage, and to separations and estrangements.

Magnetism—H has influence over the Animal Magnetism, and the Impulses. (See Impulses, Magnetism).

Marriage Happiness—(See "Love Affairs" in this section).

Mental Effects—Mental and Psychic effects are shown by H rather than physical.

Mental Qualities—Eccentric, Unconventional).

Metals and Minerals Of—(See Sec. 2 of this Article).

Metaphysics—Gives a great love for, and of the Occult, and of Truth, and especially by his Higher Vibrations, and to those who are awakened and ready for it. (See Metaphysics, Occult, Science).

Moral Lapses—His afflictions, and especially to ♀, tend to moral lapses, free love, clandestine love affairs, disregard of conventionalities, and to sex perversions.

Occult—His higher vibrations give a love of the Occult, the Metaphysical, and Truth.

VEINS—The Veins—The Venous System—The Venous Blood—The Venous Circulation—Ruled by ♀, the ♃ Sign, and the 7th H. Dr. Broughton says ♃ rules the Veins. Ptolemy says ♂ rules them. All three of these planets have their part to play in the activity and functioning of the Veins. The Airy Signs are also connected with the veins, and especially the ♃ Sign. However, ♀ bears strong rule over the veins in any part of the body. Thus ♀ in ♂ rules the veins of the throat. ♀ in ♍ rules the veins of the bowels, etc. In some instances, as will be noted in this article, ♃ rules both the arteries and veins of the part, and assumes a co-rulership along with ♀. It is to be noted that ♃ rules the blood, as a whole. Mars rules over blood-making, and fibrous tissue building, and thus has his part in building up the tissues of the veins, and giving strength and quality to the blood which flows thru them. Note the following Diseases and Afflictions of the Veins, the Venous System, the Venous Circulation, and the rulership of the more important Veins.

All Diseases in Veins—All diseases lying in the veins are classed as diseases of ♃ and ♀, the two planets which rule the circulation of the blood.

In matters connected with the nutrition of cells, tissue building, etc., ♃ and ♀ both take part, and also ♀. (See Jupiter; "Cell", "Functions", "Nutrition", "Storing", "Tissue", "Transformation", in Sec. 2 of this Article; "Nourishing" in this section).

VERNAL EQUINOX—The Spring Equinox—The entry of the ☉ into the ♀ Sign. The Vernal Signs of the Zodiac are ♀, ♄, ♀. The entrance of the ☉ into ♀ is a very sensitive time in World Affairs, and the planetary influences operating at the time tend to make the year a good, healthy, and fortunate one for the People, or for individuals who may be affected by it,

or an unfortunate year, and tend to distress, evils, public ill-health, strife, etc. The Vernal Equinox is mentioned many times in this book, and in connection with various diseases, afflictions, the weather, World Conditions, etc. (See Air, Aries, Dry; "Inflammation" under Ears; Epidemics, Equinoxes; "Prevalent" under Eyes; "Eruptions" under Face; "Extreme Heat" under Heat; Ingresses, Lightning, Pestilence, Prevalent, Solstices, etc.).

VERSATILE—(See Genius, Learning, Metaphysics, Occult, Philosophy, Reading, Science, Study, etc.).

VERTEBRAE—The Bony Segments of the Spine. The Nerves which pass thru the Vertebrae supply the various Organs, and parts of the Body, from the Brain to the Feet. By making a study of the Signs of the Zodiac which rule the various Organs and Parts, and by knowing which Signs rule the different Vertebrae, it is a comparatively easy matter to know what Vertebrae, or Vertebra, are affected, or subluxated, when the symptoms of the various diseases of the Mind and Body manifest themselves. (See Subluxations). The Spinal Column is made up of seven Cervical Vertebrae, twelve Dorsal Vertebrae, and five Lumbar Vertebrae. The Sacrum is classed as No. 25, and the Coccyx as No. 26. (See Spine). The Vertebrae are also called the Zones of the Spine.

Cervical Vertebrae—Taken as a whole, these Vertebrae are ruled by the ♄ Sign, the Sign which rules the throat and neck and the upper Cervicals, and are also strongly dominated by the ♀ Sign, the Sign which rules the Brain and Head. Also planets and afflictions in the opposite signs, ♀ and ☽, and also in any of the Fixed Signs, as in ♄, ♀, ♀ or ♃, tend to affect the Cer-

vical Vertebrae. The δ and μ signs, being opposite and supplemental to each other, both strongly influence the throat and sex organs. The Larynx and the Sex Organs are so closely related that the voice in the male changes at Adolescence. (See Puberty). Any of the planets when in δ , afflicted in this sign, or afflicting the δ sign by their evil aspects, tend to subluxations of these vertebrae. Planets when in the first third of the δ sign will afflict the upper Cervicals; when in the middle part of δ , will afflict the middle Cervicals, and when in the latter third of δ at birth, or by direction, transit, or progression, will afflict the lower Cervicals. (See Cervical, Lower, Middle, Upper).

First Cervical—Atlas—Ruled by φ and δ . The tissues and organs affected by the nerve supply passing thru this vertebra are the Brain, Scalp, Atlas, Optic Tract as far as the Commissure, the Cranial Bones, the Upper Ear, Ossicles, and the Upper Forehead. Subluxations at the Atlas tend to diseases which affect the substance of the brain; to diseases of the Brain which affect the Mind, the Motor Functions; to cause Spasmodic Diseases, diseases of the Head, Scalp, Ears, Eyes, Spinal Cord, etc. (See these subjects in the alphabetical arrangement).

Second Cervical—Also called the Axis. Ruled by φ and δ . The nerves passing thru this vertebra supply the Brain, Ears, a part of the Face, and the back part of the Neck, and planetary afflictions in φ or δ , or the opposite signs, \sphericalangle or μ , tend to disorders in these parts. (See these subjects. Also see "Diseases of Aries" under Aries; "Diseases of Taurus" under Taurus).

Third Cervical—The 3rd, 4th and 5th Cervicals are called The Middle Cervical Place (M.C.P.). Ruled by φ and δ . The nerves which pass thru the 3rd Cervical vertebra supply the Retina, the Teeth, Cheeks, Nasal Passages, the Face, and planetary afflictions in φ and δ tend to subluxations of this vertebra, and to disease in these parts. (See these subjects).

Fourth Cervical—Ruled by φ and δ . Nerves passing thru this vertebra pass to the Eyes, Cornea, Retina, Mouth, Gums, Teeth, Bones and Tissues of the Face; the Jaw, Eustachian Tubes, the Outer Ear, the Posterior Nares, Nasopharynx, and the Hyoid Bone, and afflictions in these signs at birth tend to subluxations of this vertebra, and to afflict these parts of the body. (See these subjects).

Fifth Cervical—Ruled by φ and δ . Also strongly influenced by the μ sign. The nerves which pass thru this vertebra go to the Face, Nose, Eyes, Lower Jaw and Teeth; the Hyoid Bone, and to the Lateral and Posterior Muscles of the Neck, and planets afflicted in these signs tend to disturb these parts of the body, and cause subluxations of this vertebra. (See these subjects).

Sixth Cervical—Ruled by δ , and especially affected by planets in the last Decanate of δ . The 6th and 7th Cer-

vicals, taken together, are known as the Lower Cervical Place (L.C.P.). Nerves passing thru this vertebra supply the Larynx, Vocal Cords, and the surrounding tissues; the Thyroid Gland, Palate, Posterior part of the Mouth, Tonsils, upper parts of Shoulders, Anterior parts of the Arms, Lower parts of the Neck, Sterno-Mastoid Region, and Upper Parts of the Bronchii, and afflictions in δ , μ , and fixed signs, tend to subluxations of this vertebra, and to cause Throat, Sex, and Uterine Disorders. (See these subjects. Also see Puberty).

Seventh Cervical—Ruled by δ , and also the first part of Π . The 7th Cervical, and the 1st Dorsal, are called The Arm-Place (A.P.). The Nerves passing thru the 7th Cervical vertebra pass to the Trachea (Windpipe), Radius, Upper Part of Arms, Muscles on back of Neck, and to Deltoid Muscles of the Shoulders, and afflicting planets in δ tend to subluxations of this vertebra, and to cause disorders in these parts. (See these subjects. Also see Cervical).

Coccyx—The Coccyx consists of four or five rudimentary vertebrae coalesced into one, and articulates with the apex of the Sacrum above. The Os Coccyx is ruled by the μ Sign, and the Coccygeal Region also influenced by the ζ sign, and afflictions in these signs tend to Pain, Inflammation, or disease in this region, or to deviation of the Coccyx. (See Coccyx).

Diseases of the Vertebrae—Ankylosis, and the drying up of the Synovial Fluid, are the principal diseases of the vertebrae. Ankylosis is caused by the combined heat of the \odot and δ in δ in the Ω sign principally, as Ω is also a hot sign. The Synovial Fluid is dried up by the presence of the cold and dry planet η , and especially η affl. in Ω . (See Anatomical Changes, Ankylosis, Fractures; "Diseases of the Spine" under Spine; Synovial).

Dorsal Vertebrae—The Ω Sign rules the Dorsal Region of the Spine. The Dorsal Vertebrae are under the structural rulership of Ω . They are also ruled by the Π Sign. However, as these Vertebrae cover a wide field of the vital organs, their range of rulership includes the last part of δ , all of Π , Ξ , Ω , μ , \sphericalangle , and the first degrees of μ , according to the parts, or organs supplied by nerves passing thru these vertebrae.

First Dorsal—The 7th Cervical, and the 1st Dorsal are called the Arm Place (A.P.). The 1st Dorsal is ruled by δ and Π . Nerves which pass thru this vertebra supply the Muscles of the Arms, the Humerus, Ulna, Bones of the Hands; the Clavicle, Scapula and Shoulders, the 1st Rib, the Manubrium, and the Upper Bronchii, and afflictions in the last degrees of δ , and in Π tend to cause subluxations of this vertebra, and to bring diseases in these parts, and to tend to Aneurism of the Aorta, Asthma, Dyspnoea, Hay Fever, Bronchial Disorders, Disorders of the Sternum, and also Diseases in the Shoulders, Arms, Hands and Fingers. (See these subjects).

Second Dorsal—Ruled by Ω and the \odot . The 2nd and 3rd Dorsals, taken together, are known as the Heart Place (H.P.). Nerves passing thru this vertebra supply the Heart, its Vessels and Covering, the Pericardium, the Aorta, the Bronchii, 2nd Rib, Hands, and Muscles of the Lower Arms, and planetary afflictions in Ω at birth tend to subluxations of this vertebra, and to all Heart Disorders, Bronchial Disturbances, and to various diseases and afflictions to the Arms and Hands. (See these subjects).

Third Dorsal—Ruled by the last degrees of Ω , and by the Π Sign. The 3rd and 4th Dorsals taken together, are known as Lung Place (Lu.P.). Nerves passing thru this vertebra supply the Chest, Breast, Nipples, Lower Sternum, the 3rd Pair of Ribs, the lower Heart, the Lungs and Pleura, and subluxations at this vertebra tend to diseases in these parts, and to Consumption, Tuberculosis, Chest Deformities, and to various diseases of the Breasts, Heart and Lungs. (See these subjects).

Fourth Dorsal—Ruled by the last degrees of Π , and by Ξ , μ , \triangle and ν . This vertebra has a wide field of action, as the nerve supply passing thru it goes to the Lower Lungs, the 4th Pair of Ribs, and to the Liver, Gall Bladder and Bile Ducts. The 4th and 5th Dorsals are known as the Liver Place (Li.P.). Planets in these signs at birth tend to diseases in these parts and Organs, and to all Diseases of the Liver especially. (See these subjects).

Fifth Dorsal—A part of the Liver Place, and is also known as Center Place (C.P.). Under the strong rule of the Ω Sign. Nerves passing thru this vertebra supply the 5th Pair of Ribs, and being the General Heat Center, subluxations of this vertebra tend to Diseases of the Brain and Spinal Cord, to Nervous Diseases, High and Burning Fevers, Impaired Nutrition, Cold Diseases, Cold Feet, Gout, Rheumatism, Dropsy, Influenza, Rashes, Scarlet Fever, Anaemia, Chills, Obesity, and a variety of Diseases. (See these subjects. Also see "Center" under Heat).

Sixth Dorsal—The 6th, 7th and 8th Dorsals are grouped together, and known as Stomach Place (S.P.). Is ruled principally by the Ξ , or Stomach Sign, and also, in conjunction with the 7th and 8th Dorsals, influenced by the μ Sign. Subluxations at this vertebra tend to disorders in the upper part of the Stomach, and in the Oesophagus, in and about the 6th Pair of Ribs, and being nearly identical with the 7th Dorsal, tends to nearly all the same diseases as caused by subluxations at the 7th Dorsal. (See Oesophagus, Stomach).

Seventh Dorsal—Ruled principally by the Ξ Sign. The following Organs and Parts of the Body receive nerve supply and impetus thru the opening in this vertebra, namely, the Stomach, Oesophagus, the Mucous Membrane of the Mouth and Stomach; the Tonsils, Uvula, Pharynx, Palate, Throat,

Tongue, Gums, Salivary Glands, Glands of the Mouth and Stomach; the 7th Pair of Ribs; the Omentum, and also the Eyeballs, Pupils, Iris and Cornea of the Eyes, and afflictions in the Ξ Sign tend to subluxations of this vertebra, and to cause diseases in these parts and organs. (See these subjects).

Eighth Dorsal—A part of the Stomach Place in the Spine, and ruled by the Ξ sign, and also by μ . The nerve supply thru this vertebra passes to the lower parts of the Stomach, the Pylorus, Duodenum, the Upper Spleen, the Pancreas, Diaphragm, and the 8th Pair of Ribs, and subluxations of this vertebra tend to diseases and ailments in these parts. (See these subjects).

Ninth Dorsal—Ruled by μ Sign, and also strongly influenced by the ν Sign. Is known as Spleen Place (Spl.P.). The nerve supply passing thru this vertebra goes to the Spleen, Omentum, Duodenum, and the 9th Pair of Ribs, and subluxations at this vertebra tend to diseases in these parts and organs, and also to Intestinal Worms. (See these subjects).

Tenth Dorsal—The 10th, 11th and 12th Dorsals are called the Kidney Place (K.P.). This vertebra is ruled by the \triangle Sign. The nerve supply passing thru this vertebra goes to the Upper Kidneys, the Supra-Renal Capsules, the 10th Pair of Ribs, and also to the Eyeballs, and subluxations of this vertebra tend to diseases in these parts. (See these subjects).

Eleventh Dorsal—Ruled by the \triangle Sign. The nerve supply passing thru this vertebra is to the same parts and organs as mentioned under the 10th Dorsal, but this vertebra when subluxated, and being the middle one in the Kidney Place, tends to the more serious Kidney Diseases, and to a greater variety of them, such as Bright's Disease, Diabetes, Nephritis, Stone, Gravel, the Suppression of Urine, Oedema, Blepharitis, Granulated Lid, and also to Skin Rashes, Dropsy, Dysentery, Rheumatism, etc. (See these subjects).

Twelfth Dorsal—Ruled by \triangle . Also the ν Sign influence begins to be felt at this vertebra. The nerve supply passing thru this vertebra goes to the lower portion of the Kidneys, the Ureters, the 12th Pair of Ribs, the end of the Spine, and also rules the Serous Circulation, and subluxations here tend to diseases and disorders of these parts and functions. (See these subjects. Also see Dorsal).

Lumbar Vertebrae—In the Astrological Textbooks, the \triangle Sign is given as general Ruler of the Lumbar Vertebrae, and Lumbar Region of the Spine. However as the Sex Organs, the Reproductive Nature, the Bladder, Rectum, Lower Limbs, and Feet, get their nerve supply thru the Lumbar Vertebrae, the rest of the Signs of the Zodiac after \triangle must also have their influence over these vertebrae, and especially over those below the 1st Lumbar.

First Lumbar—This vertebra is ruled by the ν , \triangle and ν Signs, and together

with the 2nd Lumbar is known as the Upper Private Place (U.P.P.). The nerve supply thru this vertebra, passes to the Ureters, Loins, Peritoneum, and to the Upper Small Intestines, and planetary afflictions in these Signs tend to subluxations of this vertebra, and to diseases in these parts. (See these subjects).

Second Lumbar—The 2nd, 3rd and 4th Lumbar Vertebrae, taken together as a unit, are known as the Private Place (P.P.). Considering the parts and organs supplied by nerves passing thru this vertebra, it is ruled by the middle third of the \mathfrak{m} sign, and also by \mathfrak{m} , \mathfrak{f} , \mathfrak{v} , and the \mathfrak{z} sign, as the nerve supply passing thru this opening goes to the Small Intestines, the Vermiform Appendix, the Ovaries, Caecum, Peritoneum, and the Muscles of the Legs, and subluxations of the vertebra must necessarily lead to diseases of these parts, and cause Abdominal Diseases, Bowel Disorders, Peritonitis, Varicose Veins in the Leg, Lameness, and various other disorders.

Third Lumbar—According to the organs supplied by nerves passing thru this vertebra, it is ruled by the latter third of \mathfrak{m} , and by \mathfrak{m} , \mathfrak{f} , and \mathfrak{v} , as the nerve supply goes to the Abdominal Muscles, to the lower Small Intestines, the Caecum, Colon, Appendix, the Hepatic and Splenic Flexures, the Ovaries and Broad Ligaments, the Bladder, Testicles, Sexual Organs, the Anterior Muscles of the Thighs, and to the Knees, and subluxations of this vertebra will tend to diseases and afflictions in these parts and organs. (See these subjects).

Fourth Lumbar—The 4th and 5th Lumbar, taken together, are known as the Lower Private Place (L.P.P.). This vertebra is ruled and influenced by the \mathfrak{m} , \mathfrak{f} , \mathfrak{v} , \mathfrak{z} and \mathfrak{x} Signs, as the nerve supply going thru it passes to the Womb, Vagina, Bladder, Prostate Gland, Large Intestines, Colon, Rectum, Pelvis, Hip Bone, Buttocks, Femur, Posterior Thighs, Tibia, Fibula, and the Feet, and subluxations of this vertebra tend to ailments and afflictions in these parts. (See these subjects).

Fifth Lumbar—Astrological writers give \mathfrak{v} and \mathfrak{f} as rulers of this vertebra, but \mathfrak{m} should also be included, as the nerve supply thru this opening goes to the Uterus, Rectum, and the Buttocks, and planetary afflictions in these signs tend to subluxations of this vertebra, and to ailments and diseases in these parts, and in the lower abdominal region, and especially to Piles, Falling of the Womb, and Menstrual Disorders. (See these subjects. Also see Lumbar).

Sacrum—The nerve supply going out thru the foramen of the Sacrum passes to the Womb, Buttocks, the Posterior parts of the Thigh, and to the Anus and Rectum, and therefore this vertebra is ruled and influenced by the \mathfrak{v} , \mathfrak{m} and \mathfrak{f} Signs, and planets afflicted in these Signs tend to disorders in these parts and organs, and to deviations of the Sacrum. (See these subjects. Also see Sacrum).

VERTIGO—Giddiness—Dizziness—Lightness In the Brain—Swimming In the Head, etc.—The \odot affl. in \mathfrak{F} ; \odot \square , \mathfrak{g} \mathfrak{v} or Asc. at B. or by dir.; \odot in 6th H. in a cardinal sign, and afflicted; a disease of the \mathfrak{v} , and afflictions to the \mathfrak{v} , as the \mathfrak{v} causes diseases which return after a time, such as Vertigo; \mathfrak{v} affl. in \mathfrak{F} or \mathfrak{v} ; \mathfrak{v} affl. in Π or \mathfrak{m} , and \mathfrak{v} or evil asp. the Asc. by dir.; a \mathfrak{v} disease; \mathfrak{v} affl. in \mathfrak{F} , and in \mathfrak{v} by reflex action; \mathfrak{v} in \mathfrak{F} , \mathfrak{v} , or ill-asp. any of the malefics as Promitters; \mathfrak{h} \mathfrak{v} \mathfrak{v} in the Asc.; \mathfrak{h} \mathfrak{v} \mathfrak{v} or \mathfrak{v} in \mathfrak{F} ; an \mathfrak{F} disease; Subs at Li.P., SP. (See Aneurysm, Bladder, Blisters, Carbuncles, Cavities, Cysts; "Foot and Mouth Disease" under Feet; Herpes, Hives, Malignant, Pustules, Receptacles, Sacs, Seminal, Serum, Varicose, Vesicant).

ing, while the Δ aspects to the Significators at B. tend to be benevolent and expanding. Disease and suffering are but rates of vibration, and a change to the proper vibrations in mind and body often cures the disease. (See Antipathy, Aspects, Attracts; "Vibration" under Colors; Compatibility, Discord, Ether, Harmony; "Compatibility", "Incompatibility", under Healers; Hearing, Hyperaesthesia, Lethargy, Life; "Rays" under Light; Motion, Movement, Opposites, Planets, Polarity, Repulsions, Rhythm, Sympathy, etc.).

Healing by Vibration—In disease, when the rates of vibration are weakening and detrimental, any means, or remedy, to restore the normal rate of vibration is beneficial. This may be done by the use of drugs, by suggestion, by diet, natural means and remedies, by massage, adjustments of the spine, by electricity, baths, and in a thousand various ways as used and practiced by the various Schools of Healing. From the planetary standpoint, when a patient is suffering from a σ disease, the remedies of h , which oppose the fiery action of σ , tend to slow down the σ vibrations, and bring ease, relief, or a cure to the patient, and the vibration of the disease or affliction has been changed. (See Antipathy, Opposites, Sympathy). Also if the rates of vibration of the Healer blend with those of his patient, the patient will benefit, and make a quicker cure, but if the innate vibrations of the Healer antagonize and worry the patient, and their Star Maps of Birth are not in harmony, the patient may weaken, die, or make slow progress unless he changes Healers, and gets one who is fortunate for him. (See "Compatibility", "Death", "Enemies", "Incompatibility", "Poisoned", under Healers).

VICARIOUS—The Assumption of the Functions of One Organ by Another—(See "Vicarious" under Menses; "Blood" under Vomiting).

VICE—Vices—

Addicted to Vices—Given to Many Vices—Inclined to Vice—The \odot ill-dig. at B., and afflicted, prone to many vices; the \searrow sepr. from the \odot and apply. to φ in a day geniture; the \searrow to Capella, ruins himself by vices and with infamous women; the \searrow to the σ or ill-asp. σ by dir., addicted to vices, according to the sign σ is in; h σ or ill-asp. φ , secret and solitary vices; γ affl. in \aleph ; σ prog., σ , or ill-asp. the radical h , or vice versa, all the vices of the character tend to be prominent and active; φ affl. by h ; φ by Periodic Rev. to the ill-asps. the radical \odot ; Ψ affl. in the 5th H., dissolute vices. the \searrow in m in the 6th H., and espec. when Ψ is in δ ; Ψ affl. in m ; Ψ affl. in the 6th or 12th H., sex activity and abuses during adolescence; Ψ afflicted at B.; H σ h in m , or these two planets otherwise afflicted in m ; h σ or ill-asp. φ ; σ σ φ , an inflammatory sex condition; σ affl. in m ; φ or δ in bad asp. to h ; δ or m on the cusp of the 6th or 12th H.; a 12th H. influence. (See Aversions, Deviations, Passion, Perversions; "Secret Bad Habits" under Secret; Self-Indulgence). Case of Insanity From Self-Abuse—(See "Self-Abuse" under Insanity).

VICIOUS—Depraved—Wicked, etc.—The influences of the malefic planets h and σ , when these planets are strong at B., rising in the Asc., or M.C., and afflicted, and espec. when h is σ or δ σ in angles, tend to make the native vicious, high tempered, unruly, and violent at times, and apt to do some desperate things in life until he becomes awakened. (See Anarchists, Anger, Conduct, Dangerous, Depraved, Destructiveness, Evil, Hatred, Infamous, Irascible, Jealousy; "Low and Base" under Low; Malevolent, Malicious, Murderous, Plots; "Poisoner" under Poison; Rebellious, Revengeful, Riotous, Treachery, Unruly, Vile, Violent, Wicked, etc.).

VIGOR—Vim—Force—Energy—

Vigorous Body—The fiery signs φ , Ω , or γ upon the Asc. tend to give the most vigorous bodies, and the greatest vitality; given by the \ast and Δ aspects of σ to the \odot , hyleg and Asc.; the \odot or \searrow in the signs of the Summer Quarter, as in Ξ , Ω or m , or when these signs are upon the Asc., and well-aspected, tend to give a vigorous body, but the Ξ sign on the Asc., if badly afflicted, and the map otherwise weak, would tend to a low vitality. The vigor and force of the constitution tend to become weakened and unbalanced when there are many evil aspects to the \odot , \searrow , hyleg, or Asc., and the planets at birth at variance with each other by their \square and δ aspects. The Δ aspects between the planets tend to give the best vigor, and espec. when the \odot and σ favorably aspect each other. (See Action, Active; "Good Constitution" under Constitution, Females; "Abundance Of" under Energy; "Good Health" under Health, Males; Immunity; "Males Nearly Impotent" under Impotent; Invigorated; "Vigor and Strength" under Males; "Good" under Recuperation, Resistance, Stamina, Tone, Vitality; Robust, Ruddy; "Body" under Strong, etc.).

VIOLENT—Violence—Forcible—Severe—Sharp—Fierce—Vehement—Furious, etc.—Mars is the planet of violence. Also sudden violence, as in explosions, is caused by ♃. Violence by bruises, falls, etc., is caused by ♁. Any of the malefics, when afflicted, or even the ☉, and other planets, may cause violence; accidents, injuries, wounds, etc., by their evil aspects and directions, but ♃ is the principal planet causing violent diseases, violent, sharp and fierce fevers, or a violent death. See the following subjects in the alphabetical arrangement, which subjects have to do with violence in its various phases, whether it be violence and hurts to the body, or violent actions. Under these subjects look for such paragraphs as "Accidents", "Danger", "Death", "Hurts", "Injuries", "Violent", "Wounds", etc.

In Countries where Wars and Violence are unknown, people born with maps indicating a violent death usually die a natural death, but in Countries where Wars and Violence predominate, they usually meet an untimely death, and even under slight afflictions. The most desperate men and worthless of people are generally the most anxious to engage in violent, hazardous, and dangerous enterprises. The ☐ and ☿ asps. of the ☉ to the Significators are the aspects of infamy and contempt, and lead often to a violent death, suicide, or public execution. The ☐ and ☿ asps. of the ♃, to a violent death by mobs, riots, etc. The following influences tend to a violent death—The SUN or ♃ to the ☉ or ill-asp. ♁ by dir., and the radix be a violent one, and the Lights affl. by ♁ at B.; the ☉ or ♃ to the ☉ or ill-asp. ♁ by dir., and affl. the hyleg, or ♁ affl. the ☉ or ♃ at B.; the ☉ or ♃ ☐ or ☿ ♁ from angles, and espec. from the 10th or 4th; the ☉ and ♃ affl. by a malefic, and with no assistance from ♃ or ♁; the ☉ affl. by one malefic, and the ♃ by another; the ☉ or ♃ in violent signs, as in ♃, ♁, or ♃, or the afflicting planets be in violent signs; the ☉ or ♃ alone affl. by more than one malefic, and no assistance from the benefics; ☉ Sig. ♂ ♁ or ♁, and these malefics ill-dig. at B.; ☉ Sig. ☐ or ☿ ♁; the ☉ near violent fixed stars, or having their declination, and affl. at same time by ♁ or ♁, great danger if the benefics do not interfere; the ☉ or ♃ affl. by malefics in the 1, 4, 6, 8, or 10th houses; the ☉ or ♃ affl. by one or more malefics, and one of the Luminaries, or one of the malefics be in a violent sign; both the ☉

VIRGIN'S SPICA—(See Arista).

VIRGO — The sixth Sign of the Zodiac, and the second of the Common, or Mutable Signs. Ruled by ♍. This sign is affiliated with the 6th House, and is the sign which rules principally over Health Matters, Diet, Hygiene, Sanitation, and also over Servants, Small Animals, etc. (See Sixth House). This Sign is classed as a cold, dry, barren, earthy, feminine, common, mutable, nocturnal, mental, human, speaking, critical, melancholic, unfortunate, petulant, estival, northern, changeable, nervous, commanding sign, and a sign of long ascension. It is especially associated with the Bowels, Duodenum, Jejunum, Ileum, and Chylification. (See "Organic Functions" under Functions). Its functions are Assimilation, Absorption, Selection and Utilization of food products. The sign is commonly spoken of as the "Virgin Sign", and is considered a sign of great virtue and chastity. The Symbol of this sign is a Virgin. It is identified with Argo, the Ship, and with Zebulon, one of the sons of Jacob, of whom it was written in Scripture that he "Shall be a Haven for Ships". Being the sign of Health, the natives of this sign tend to center

their minds much upon matters of health, diet, and disease, and even to court disease, and to give up more easily to disease, being a negative and susceptible sign. (See Mutable, Negative). They tend to take on the disease conditions of others, and for this reason should not be Physicians or Nurses. They often become chronic invalids, and imagine they have all kinds of diseases, and Healers, in dealing with them should avoid any adverse suggestions about their health, or impending crisis, as they are greatly weakened by fear. This sign acts strongly upon the mind and digestive organs. As a class, they seem to enjoy bad health, and to be always looking for sympathy, and to tell others of their many diseases. Simulation of disease is also a ♀ trait. (See "Unfortunate" under Healers). However, the ♀ people, as a class, should enjoy good health, if they will think properly, and it is said of them that they should never take medicines, and especially physics, as their bowels are more tender and susceptible to drugs. (See Eczema). When once sick, and in the grasp of disease, and poor thinking, they are usually very difficult to treat, or to see a cure effected. They should early be taught to think in terms of health, and not in terms of disease, and also to obey the laws of health. Virgo is said to be the most critical of all the Signs, and people born under ♍, with ♀ rising, or the ☉, ♃, and ♀ in this sign, are much given to criticism, fault-finding, and intolerance of the views and opinions of others, which often tends to adversely affect the health thru worry, fretfulness, and peevishness. This sign gives very thin, delicate and tender skin. The Colors ruled by this sign are Amber, Black or Brown Spotted with Blue. The Qualities of this sign are as follows—Barrenness, Changeableness, Chastity, Cold, Commanding; Common, Critical, Dry, Earthy, Fault-Finding, Feminine, Human, Intolerant, Long Ascension (one of the Signs of); Melancholy, Mental, Mutable, Negative, Nocturnal, Northern, Receptive, Selfishness, Speaking, Summer (a Summer Sign); Susceptibility, Unfortunate, Unsympathetic, Vituperative, etc.

It is an invisible, rose-colored fluid, the vitalizing force of the body, and corresponds to the electric current going over the wires. This occurs largely thru the 6th House, known as the house of health, and ruled by ♄, a mental ruler, and it is thru this house that matter acts upon mind, and mind upon matter, thus tending in the unenlightened, and the unawakened native to generate diseases of both the mind and body. (See "Action of Mind" under Mind; Sixth House).

The indications of the 10th H. at B. show the natural Calling, and which, if the native follows it up, will tend to bring him success, happiness, and usefulness in life. For this reason every young person should have his, or her, horoscope cast early in life, to know what they are fitted for, and what the Higher Powers have ordained for them, so that they will not waste many years drifting, and trying to get into their right calling, after, perhaps, many failures and loss of time, effort and money. Many of the various Vocations are listed throughout this book, and the planetary influences which tend to bring success in them. See such subjects as Chemists, Healers, Nurses, Surgeons. The subjects concerning the Voice and Vocal Organs are also largely considered under Larynx, Speech, Tongue, and if the subject you have in mind is not

Seas; Ships; Shipwreck; Signs—The Water Signs of the Zodiac—♁, ♀, ♁. The watery signs dispose to drowning, scalds, fluxes, colds, dropsy, catarrh, hydrocephalus, and to excess of fluid in the body. They give the Lymphatic, or Indolent Temperament. They rule and influence the Blood, and are connected with fluids, both in the body, and outside. The watery signs have much to do with the emotions, desires, romance, the physical sensations, self-protection, and self-preservation, and along emotional and sensational lines are excitable. (See Desires, Emotions, Excitable, Feelings, Imaginations, Romance, Sensation). They are also fruitful, and have much to do with reproduction, the sustaining and preservation of the Race. The ♁ sign has to do with the stomach, assimilation, and digestion. The ♀ sign with elimination, excretion, sex, and reproduction. The ♁ sign with the Lymphatics, and the Lymphatic Temperament. These signs are related to Hydrogen. (See Hydrogen). The ☉ in water signs tends to give a weak constitution, and lowered vitality, except when in ♀, or

rising in the Asc. in a watery sign, and also tends to diseases of the glands, fluids, and Lymphatic System. Also the Ξ and \times signs when upon the Asc. tend to give low vitality. The μ sign gives both vitality and constitutional power, but attracts disease, and infectious diseases. When upon the Asc. at B., the μ sign gives the strongest vitality of the water signs, and a hardy and ruddy constitution. The μ sign is the worst position for the μ , having her fall in this sign, which tends to painful and irregular functions, espec. in females, and to lower the natural powers, the vitality, and the whole tone of the body. The μ is very strong in Ξ and \times , and in these signs tends to good and regular functions, and also the absorbent and lymphatic systems and vessels are regular in their respective functions and actions. These signs are also called the Dumb, or Mute Signs, and are said, under certain conditions, to cause impediments of speech, and espec. when ϕ is also afflicted at the same time. The Water Signs are also known as the Terminal Signs, being related to the 4th, 8th, and 12th Houses. (See Cancer, Events, External, Introspection, Lymphatic, Majority, Pisces, Pity, Plastic, Scorpio, Seas, Terminal; "Low" under Vitality. Also see the various subjects mentioned in this paragraph).

WEDNESDAY—The day of the week ruled by ♃. The first hour at sunrise on Wednesday is ruled by ♃. (See "Hours" under Planets; Weak).

WEEK—Days of the Week—In considering matters of health and disease, it is an advantage to know something of the planetary rulership of the days of the week, and of the planetary hours of each day.

Sunday—Ruled by the ☉. Patients suffering from slow and lingering ♁ diseases benefit most by treatments on Sunday, as the ☉ and ♁ rule opposite signs of the Zodiac, as ♀ and ♃. Sunday is named after the Sun, being "Sun's Day". The first hour at sunrise on Sunday is a ☉ hour, and treatment given in the three ☉ hours of Sunday are more beneficial than in other hours. (See "Hours" under Planets).

Monday—The day ruled by the ♃, being "Moon's Day". Monday is also a good day to treat ♁ diseases, and in the ♃ hours of this day, as the ♃ opposes ♁, the ♃ ruling ♁, and ♁ the opposite sign ♁. The ♃ moves fast, and people born on Monday tend to be restless, and fond of travel and change, and also to be more subject to ♁ diseases, and to be strongly affected at the Quarters of the ♃.

Tuesday—Ruled by ♃, and people born on Tuesday tend to be more hasty, excitable, and impetuous, and also to be more susceptible to accidents, injuries, wounds, fevers, inflammations, and to quarrels. Tuesday is a good day to give the remedies of ♃, as tonics and stimulants, and espec. in the three ♃ hours of the day, as at sunrise, the 8th and 16th hours after sunrise. Tuesday is a good day to apply poultices to draw out suppurations, or to draw boils to a head, as pus is a ♁ formation.

Wednesday—The day ruled by the planet ♃, the mental ruler. Wednesday people tend to be studious, and to suffer more from mental disorders,

brain-fag, fatigue from over-study, or too much reading. They need periods of mental rest, and to relax the nerves. Mercury rules the ♃ and ♁ signs, and opposes the ♃ signs ♁ and ♁, and the diseases of ♃ tend to be benefited on Wednesday, and to be treated by the Herbs and remedies of ♃, and to apply such in the ♃ hours of Wednesday. (See "Mercury Group" under Herbs).

Thursday—Ruled by ♃, and Thursday people tend to partake of the ♃ qualities, and to be more kindly and generous, or religiously inclined. Mental, nervous, and chronic disorders tend to rapid relief when treated on Thursday, in the ♃ hours of this day, and to be treated by the remedies of ♃ or the ♃, as the ♃ signs ♁ and ♁ oppose the ♃ signs ♃ and ♃, and also the ♃ sign, the exalted sign of ♃, opposes the ♁ sign ♁. Thursday is a good day for religious devotion, quietude, peace of mind, relaxation, etc.

Friday—The day ruled by ♃. A good day for pleasure, recreation, amusement, travel, etc. Also a good day to treat the diseases of ♃, as the ♃ and ♃ signs in the Zodiac are in ♃ aspect, as ♃ and ♃, or ♃ and ♃. Friday is a good day, and in the ♃ hours of Friday, to treat diseases of the head, ruled by ♃, and sex disorders, ruled by ♃ and ♃. The diseases of ♃ are apt to be more aggravated on Friday, or to have their incipency thru dissipation, excesses, pleasures, or venery.

Saturday—Ruled by ♁, being "Saturn's Day". Is the day of rest in Nature, or the Sabbath Day. Is also the day of death, relaxation of tissue, of decay and degeneration. People born on Saturday tend to be more melancholic, serious, and grave, and to have delays, disappointments, and misfortunes in life. The inflammations and fevers of ♃ are greatly benefited when treated on Saturday, and by the remedies of ♁, and by cold applications, as ♁ opposes ♃, one being cold by nature, and the other hot and inflammable. Poultices and applications to reduce a swelling, as from an injury caused by ♃, have greater effect when used on Saturday, and in a ♁ hour. (See the ♁ hour in the paragraph, "Hours" under Planets).

In prolonged and lingering diseases, the patient also tends to make more rapid progress when treated on the day, or days, ruled by the planets which have the best aspects in the map of birth, for to treat a patient on the days, or in the planetary hours, ruled by planets which are badly afflicted at B., not much progress is made, and even harm may be done, or a relapse occur. (See Antipathy, Opposites, Remedies, Treatment).

WILL—The Will—Will Power—Volition—The Power of Willing—The Stars do not rule the Will, and the powers of the Will, and what people will do, is not always revealed in the horoscope. The Will is Divine, and by taking control of the life can, by the proper efforts, largely change the limitations and afflictions indicated in the map of birth, and the Will can be asserted to such an extent as to largely overcome the indications of the birth map. However, it takes knowledge, and an increased consciousness of power to do this, a realization of your own Divinity, of your Higher Self, of the God within you. Many people are endowed with great powers, but are unconscious of them, and drift along thru life half asleep, and then when awakened, the Will Power can lead them on to new achievements, to good health, to greater usefulness, even tho they were passive and negative by birth. Astrology is a good study to show and explain the causes of things, the philosophy of life, but it may not teach you how to think, and for this you need Metaphysics, Philosophy, Religion, Psychology, and the Mental and Spiritual Sciences. We are not here upon this Earth Plane merely to hunt for happiness, worldly pleasures, but to overcome the world, to achieve, and to gain Soul Growth from the experiences of life, and our Will Power is given us to help us to do these things, rather than to go thru life as weaklings, sufferers, invalids, failures, misfits, etc. The study of your star map will show you your natural fitness, your tendencies, the lines of least resistance for you for the best success, and then it is within your power to follow up these leadings, and make a success of your life, talents and powers.

Disorders of Volition—Affl. in ♃; ♀ affl. in ♃ or 9th H.

Free Will—The stars do not rule the human Will, and Man is a free moral agent to do and act according to his degree of advancement, enlightenment, knowledge, and self-control. Man is held responsible for the influences stamped upon him at B., and if his Chart of Birth predominates in evil aspects and tendencies, he is expected to master the evils, transcend, and allow the good to predominate, and to seek to perfect his nature and character, as perfection is the ultimate goal of all life on Earth. We are all Gods in the making, all Children of God at various stages in our Evolution. Some cannot keep up with the procession, and fall out of line, become laggards, stragglers, all because in the use of

their free will they have chosen the downward path of sin, wickedness, debauchery, and dissipation, instead of the upward path which leads to God. The Higher Mind is The God, or The Christ within us, and when this Super Mind is awakened, and we become conscious of our Inner Divine Powers, then we direct the Free Will within us to higher attainments, self-control, and the attainment of knowledge, wisdom, discretion, discrimination, spiritual power, and to conquer and overcome the World. Be careful how you use this gift of Free Will. The Animals do not have free will, but are under the power and direction of Group Spirits, and act according to Instinct. Man is above Instinct, and can be ruled by his own Spirit, his Higher and Divine Mind, when he allows his Mind and Body to be used for good and high purposes, and not to live just for the gratification of his animal nature, or to carry out selfish and unholy purposes. (See Elevated, Majority; "Positive Nature" under Nature; Rising, Rule; "Strengthened" in this section).

Weak Will—Spasmodic Will—Planets in ♀, and opposed by malefics in ♀, the Will is weak or spasmodic; ♀ on the Asc., devoid of much will-power; the 3° of ☉ on Asc. The weakest-

willed signs are ☉ and ♀. The mutable signs tend to indecision, and the watery signs to emotion, susceptible to external influences, to environment, and to be more easily influenced. Courage, self-confidence, and determination, are given by ♂ rising and strong at B. disease turns to run higher. Also the afflictor passing into the 4th, 6th, 8th, or 12th Houses, the disease may take a turn for the worse, or prove fatal. This subject is more fully discussed in paragraphs in the following Articles. X

The subjects in "X" have been very much neglected in Astrological Literature, and in all my reading of the Textbooks of Astrology, I have not been able to record a single subject for the "X" Section of this book. However, by a careful research thru the Dictionaries, and the Medical Dictionaries, some very important subjects have been discovered which should be recorded in this book, and their Planetary relationships and correspondences given. This section of the book, therefore, is entirely creative on my part, and if I make mistakes, or assign wrong planetary influences to any subject, the student will bear with me, and suggest the proper influences, and also further subjects, for later Editions of this Encyclopaedia. This Section of the book has not been correlated with the rest of the book, as it has only recently been prepared, and after the entire manuscript has been finished, and for this reason there will not be many references in the first half of this book to see subjects in the "X" Section, as the first

half of the book at this writing has already been set up by the Linotyper. The following subjects are herewith submitted for your study.

XANTHALIN—Xanthaline—An Alkaloid from Opium—Ruled by ♄, and also may come under the rule partly of ♃, as Opium products are very depressing. (See Narcotics).

XANTHELASMA—(See Xanthoma).

XANTHIC—Yellow Color—Having a Yellow Color, and In Which Yellow Predominates—The Yellow Color is ruled by the ☉, and the Sun Fruits, such as the Orange, etc., have a yellow, or golden color, and are life-giving. Saturn also rules yellow in disease conditions, as in Jaundice, Stone, and the yellow skin of sickness, due to uric acid and urea deposits, hyperacidity, etc. In the Solar Spectrum the yellow ray is ruled by ♃. (See Yellow).

Xanthic Calculus—A Urinary Calculus composed of Xanthin—A ♃ disease and affliction. (See Stone, Xanthin).

Xanthic Oxide—(See Xanthin).

XANTHIN—Xanthine—Xanthinine—A thin, white, crystalline, nitrogenous compound, contained in blood, urine, and other secretions, and also present in the liver, spleen, pancreas, urinary calculi, and is closely related to uric acid. The nitrogenous element is ruled by H. (See Nitrogen). Also being a poisonous mineral deposit, when in excess, it also partakes of the h nature. (See Uric).

XANTHINURIA—An Excess of Xanthine in the Urine—A h disease and affliction. It is also undoubtedly true that the tonic action of H in the ∞ sign, or H δ δ in ∞ , will tend to an excess of Xanthin in the urine, and to a pathological and unbalanced kidney action. (See "Calculi" under Urine; Xanthin).

XANTHOCHROIA—Xanthochroous—Xanthocroid—A Yellowness of the Skin—Under normal conditions the \odot gives a yellowish tint to the skin, as in the Mongolian Races, as the Sun Color is yellow and golden, as indicated also in the fruits ruled by the \odot . In pathological and disease conditions a yellowish skin, and resembling Jaundice, is generally the result of h action, and from hyperacidity, and excess deposits of Urea and Uric Acid. (See Jaundice, Yellow, Xanthin, Xanthochromia, Xanthoderma).

XANTHOCROID—Having a Yellowish or Fair Complexion, and with Xanthocroid Traits—(See Xanthic, Xanthocroia).

XANTHOCHROMIA—Yellowish Discoloration of the Skin, Resembling Jaundice—Also caused by a yellowish discoloration of the Cerebro-Spinal Fluid, from hemorrhage of the Spinal Cord. May be caused by h and δ affl. in Ω , and espec. h δ δ in this sign, or the δ of these planets in the 5th H, the house of Ω , the sign which rules the Spine, the Heart, and Circulation. (See "Spine" under Hemorrhage).

XANTHOCYANOPSIA—Color Blindness in which only Yellow and Blue can be distinguished. (See "Color Blindness" under Blindness).

XANTHODERMA—Xanthoderma—A Yellowness of the Skin, and no doubt a disease condition caused by the afflictions of h, and excess of mineral deposits, and espec. of the Xanthin variety. (See Xanthin).

XANTHODONT—Xanthodontous—Yellow discoloration of the teeth, and espec. of the Incisors—Caused by the afflictions of h or γ in \mathbb{P} or \mathbb{S} . The Incisors come especially under the rule of γ , and γ afflicted by H or h may cause an excess of yellow mineral deposits in the teeth, of the yellow and Xanthic variety. (See "Fore-Teeth" under Teeth).

XANTHOMA—Xanthelasma—Xanthomatous—Yellow Tubercles of Neoplastic Growths—Yellowish Patches On the Skin and Eyelids—A Disease often associated with Diabetes Mellitus. On the Eyelids it may occur with h affl. in \mathbb{P} . When on the skin, or appearing as a tubercle, or neoplastic growth, h is found strong at B., or affl. in a car-

dinal sign, and espec. in ∞ or \mathbb{W} . (See Diabetes, Neoplasm, Tubercles, Xanthoderma).

XANTHOPATHY—A Morbid Yellowness of the Skin—Caused by h, and due to excess of mineral deposits, excess of Urea and Uric Acid over the body, torpid liver, and usually accompanied with lowered vitality. (See Deposits, Minerals, Saturn, Urea, Uric, Wastes, Xanthin, Xanthoderma).

XANTHOPICRINE—Berberine—A form of bitter yellow crystals from the root of the Barberry, Goldthread, and used as an antiperiodic and tonic, and is ruled by δ . (See "Mars Group" under Herbs; Mars, Stimulant, Tonic).

XANTHOPSIA—Yellow Vision, as In Jaundice—Objects Appear Yellow—A h disease and affliction; h affl. in \mathbb{P} . (See Jaundice).

XANTHOPSYDRACIA—A Skin Disease, and attended with small Yellow Pustules—h and the \mathbb{W} sign rule the skin, and skin diseases with yellow pustules are the work principally of h. Caused by h in \mathbb{W} , ∞ , or in the Asc. or 6th H. in these signs; \mathbb{W} on cusp the Asc. or 6th H. Mars and \mathbb{Q} also aid in causing pus, and pus diseases, and these planets entering into the configuration with h, or being with h in \mathbb{W} , would lend aid to the disease. (See Pus, Skin Diseases).

XANTHOSIS—Yellow Discoloration In Cancerous Tumors—Carcinoma (Cancer) tends to result in that part of the body ruled by the Sign h is in at B., and the excess deposits of Urea, Uric Acid, and Xanthin, are brought to this part of the organism, tending to the yellowish discoloration which is so frequently seen in Carcinoma. Also h δ γ or \mathbb{Q} , the rulers of the circulation, tends to such discolorations, and to cause stoppage of the circulation, lack of proper elimination, and unusual yellowish and poisonous deposits in the part ruled by the sign containing h at B. (See Carcinoma).

XANTHOUS—Having a Yellow Skin—The Mongolian Races—People with Yellow, Red, Auburn, Blonde, or Brown Hair—Given principally by the \odot . If the δ influence is also strong at B., there is auburn, or red hair. (See Blondes, Light, Saffron, Yellow, under Complexion; "Light", "Yellow", under Hair; "Yellow" under Skin; "Complexion" under Yellow, Xanthochroia).

XANTHOXYLUM—Xanthoxylin—The Ash Tree—Prickly Ash—A Stimulant and Aromatic Bitter, and ruled by the \odot . Extracts from the Powdered Bark of this tree are used much by Physicians as a tonic, diuretic, and stimulant, and in the treatment of Chronic Rheumatism.

XENOGENESIS—Monsters—The Generation of Something Foreign—The Offspring Varying In Character and Life-Cycle from the Parents—Caused by Prenatal conditions, and afflictions to the \mathbb{D} at the monthly periods during Gestation. The afflictions of H, the ruler of the Pineal Gland, to the \mathbb{D} and other vital centers during the prenatal period, is assigned as a predomi-

nating cause. In such cases also, the past, the stage in Evolution, and many things, would have to be considered. (See Heredity, Inhuman, Monsters, Prenatal Epoch).

XENOMANIA—Attachment to Foreign Customs and Institutions— \mathbb{H} well-ascertained in the 9th H. at B., and also this house containing benefics, and free from the influences and afflictions of \mathbb{h} and \mathbb{c} . (See Abroad, Foreign Lands, Location, Ninth House, Residence).

XENOMENIA—Xeromenia—Vicarious Menstruation—(See "Vicarious" under Menses).

These Rays are produced by passing a high voltage of electricity thru a vacuum tube, and thru resisting substances, causing efflorescence. These Rays have the power of penetrating opaque substances, such as the bones and interior of the body, and from which Photographs, Shadowgrams, Skiagrams, etc., can be produced. YEARS—Year—

Critical Years—Critical Periods of Life—These are the years when the η by progression finishes her first cycle, as at the 28th to 30th years of life, and also when by progression the η is at her Quarters, or \square and δ aspects to her place at B. These times of the η also nearly correspond to the evil aspects of h_2 every seven years over the life, and tend to be evil, critical, and changing years for the native, and also when ill-health may come, or some calamity, or misfortune, unless the native is forewarned, relaxes, keeps quiet, and avoids worry, anxiety, and despondency. (See Climateric, Crises, Critical; "Periods of Bad Health" under Health; Periodic, Periods, Square).

Favorable Years of Life—These years, or periods, are based upon the trine (Δ) aspects of the progressed η , and are multiples of the No. 9, as the 18th, 27th, 36th, 45th years, etc. Also the years in life when h_2 and other plan-

ets, form their Δ aspects to their radical places tend to be fortunate years if not offset by a train of evil Directions to the Hyleg. (See Aspects, Climateric, Critical; "Periods of Good Health" under Health; Periods, Sextile, Trine).

Lord of the Year—The nature of the ruler of the year at the Vernal Equinox has much to do with the health of the Public during the year. Much mortality, and a prevalence of chronic diseases, are indicated when h_2 is lord of the year. When δ is lord of the year, many accidents, injuries, much bloodshed, and danger of War, and especially in Countries ruled by the Sign rising, etc. (See Vernal).

Public Health Good—Public Health Bad—Good and Bad Years for the Health of the People—(See "Public Health Bad", "Public Health Good", under Public. Also note the various paragraphs and subjects in the Article on Prevalent).

Quarters of the Year—Those born in the First Quarter of the year, between

the times of the Vernal Equinox and the Summer Solstice, and especially in March, when the ☉ is passing thru his exalted sign ♈, have a stronger constitution, and are of longer life than those born in the Winter months when the ☉ is in the South and passing thru the ♁ Signs ♄ and ♃, and the 12th House sign ♁. The two Northern Quarters of the year, from the Vernal Equinox to the Autumnal Equinox, tend to give greater vitality when the ☉ is passing thru these Northern Signs, and especially if the fiery signs ♏ or ♎ are also upon the Asc. at B., while the Southern Signs, below the Equator, are not as strong for vitality unless there is a strong and vital sign rising on the Asc. at B., such as ♏, ♎, ♍, or ♌. (See Quarters).

YEAST—(See Fermentation, Zymosis).

YELLOW—Yellow Color—Yellowish—Xanthic—The ☉ denotes Yellow, or inclined to purple. Yellow color is ruled by the ☉, ♀, ♄, the 3rd H., and by the ♀ Sign. In the Solar Spectrum the Yellow Color is ruled by ♄. Deep Yellow, and Saffron, are ruled by the 11th H. (See Colors). The Sun-Kissed fruits, with the yellow, or golden yellow skin, such as the Orange, are ruled by the ☉, and denote strength, vitality, and health. In disease conditions the skin may have a yellow tinge due to the pathological action of ♄, and the deposits of poisons, wastes, minerals, Uric Acid, Urea, and Xanthin. Also in Jaundice, the skin may be yellow. (See Jaundice, Xanthin, Xanthoderma).

Bowel Disorders—The yellow color acts as an opening medicine in bowel disorders, and is somewhat of a Physic. Cathartic tablets should be coated with yellow color. (See Physic).

(See "Yellow" under Complexion; Jaundice, Xanthous).

Perpetual Youth—There is no such thing in the human body, and such is not intended by the Higher Powers for the masses of Humanity. The Adepts and great Masters, however, have learned the secrets of keeping the body young, or to take on, or throw off, a physical body at will, which matters are discussed in the Occult Books, and in the Rosicrucian and Theosophical Societies. After middle life, ♀ begins to get in his work, deposit wastes and excess minerals over the body, hardens the arteries, the muscles and tendons become less tense and more brittle, the functions of the body become lowered, and Man's time comes to pass out of

the physical body. It is not so much how long we live in the physical body, but how we use it, how we occupy our time for the good and uplift of Humanity, and for our own growth, advancement, spiritual attainment, etc. Some physical bodies are not destined to endure very long, due to low vitality, and a very afflicting map of birth, while others are endowed with great vitality, and powers of endurance. (See "Youthfulness" in this section).

Planetary Periods—Of Childhood and Youth—(See Childhood, Periods).

Youthfulness—Youthful Looking—Boyishness—Given by the ♃ sign when this sign is strong, upon the Asc., well-aspected. Also given by the ♀ sign, the opposite and complementary sign to ♃, when well-placed and aspected. Venus tends to give prolonged youthfulness if dissipation and excesses are avoided. Saturn when strong and well-placed at B., and not severely afflicting the hyleg, tends to keep the native younger looking for some years in late life, and to give tenacity of life. (See Juvenility, Well-Preserved; "Perpetual Youth" in this section).

Z

ZEAL—Intemperate or Irrational Zeal—(See Ideals, Intemperate, Irrational, Reactionary; Reformers; "Fanatical" under Religion; Revolutionary).

ZEST—Given by planets in cardinal signs, and such signs on angles; planets rising and elevated in masculine signs. Aspects to the ☉ and ♂ are necessary to give zest, activity, and energy, and even bad asps. to the ☉

and ♂, or of ♂ to the ☉, are better than no aspects at all. (See Active, Energy, Exercise, Stamina, Tone).

ZINC—Ruled by ♀. A good Skin Remedy in Ointments. (See Actinium).

ZINZIBER—Zingiber—Ginger—Ruled by ♂. Is Tonic, Stimulant, and Counter-irritant.

from the head to the feet, ♀ ruling the head, ♂ the throat and neck, ♀ the lungs, shoulders, arms; ♀ the breasts; ♀ the heart; ♀ the bowels and abdomen; ♀ the kidneys; ♀ the sex organs and reproductive system; ♀ the hips, thighs; ♀ the knees; ♀ the calves and ankles; ♀ the feet. The planets in the signs tend to affect, for good or ill, the parts of the body, organs, or functions, ruled by such signs, and by knowing what signs were occupied by planets, and their nature, at the birth of a person, the diagnosis of the possible diseases of the native are made easier. (See Diagnosis, Prognosis, Subluxations, Vertebrae).

Aspects—Zodiacal Aspects—(See Aspects).

Azimene Degrees Of—(See Azimene).

Body—Zodiacal Rulership Over—This is three-fold, and is external, internal and structural. The external rulership relates to the external organs, the external parts and anatomy. The Internal rulership relates to the internal construction and internal organs. The structural rulership relates to the skeleton and bony structure. (See the various signs, as Aries, Taurus, etc., and also the various organs. Also see External, Internal, Structural).

Dark Degrees—Of the Zodiac—♂ 3, 16; ♀ 3, 30; ♀ 7, 27; ♀ 14; ♀ 10; ♀ 5, 30; ♀ 10, 21; ♀ 3, 30; ♀ 12; ♀ 7, 22, 30; ♀ 13; ♀ 6, 18, 30. If the Asc. or its lord, be in any of these degrees at B, the native is more dark of complexion. (See "Dark" under "Complexion"; Dark).

Degrees of the Zodiac—(See Azimene; "Zodiac" under Degrees; "Dark", "Sensitive", in this section).

Food—The Food Adapted to People Born under Each Sign of the Zodiac—(See "Signs of the Zodiac" under Food).

Monsters of the Zodiac—Many of the Signs of the Zodiac have Animals as Symbols, and the forces of the Zodiac which work over Humanity are intended to try, test, and examine into every trait of human character, and until Man is able to conquer these forces, and not allow his lower nature to dominate him, he is far from perfection. In the Writings of the Occult Masters, we are admonished to conquer these "Monsters of the Zodiac", rule and control them, otherwise they will rule us, and lead us astray for a time, and into many difficulties and trying situations. (See "Periods of Bad Health" under Health).

Negative Signs—Of the Zodiac—The Feminine Signs, as ♀, ♀, ♀, etc. (See "Signs" under Feminine; "Negative Signs" under Negative; "Negative" under Signs of the Zodiac).

Pitted Degrees—Of the Zodiac—(See Pitted; "Face" under Smallpox).

Polycrest Remedies—Of the Signs of the Zodiac—These Remedies correspond to the Twelve Signs of the Zodiac as follows—♂, Aconite Napellus; ♀, Belladonna; ♀, Bryonia Alba; ♀, Ipecac; ♀, Chamomilla; ♀, Nux Vomica; ♀, Rhus Toxicodendron; ♀, Pulsatilla; ♀, Mercurius; ♀, Sulphur; ♀, Arsenicum Album; ♀, Veratrum Album. There are also 12 Salts assigned to the 12 Signs of the Zodiac. (See "Salts" in this section).

Positive Signs—Of the Zodiac—(See Positive; "Electro-Positive" under Signs).

Remedies—Zodiac Remedies—(See "Polycrest", "Salts", in this section).

Salts—The Zodiac Salts—Cell Salts—Also known as the Schuessler Tissue Remedies—Each Sign of the Zodiac rules a different cell salt in the body, and these 12 salts make up the general chemical structure of the body, any one of which, when lacking, tends to disturb the chemical balance of the system. Dr. Schuessler, a Homeopathic Physician, prepared these 12 salts, finely triturated, in tablet form, so as to give the proper dosage, and in a form most easily assimilated. The Science of Biochemistry gives special attention to the use of these 12 Remedies, and to prescribe which are needed, and as indicated by the star map of birth. These Remedies are as follows, one for each Sign of the Zodiac—♂, Potassium Phosphate; ♀, Sodium Sulphate; ♀, Chloride of Potassium; ♀, Fluoride of Lime (Calcium Fluoride); ♀, Phosphate of Magnesia; ♀, Potassium Sulphate; ♀, Sodium Phosphate; ♀, Sulphate of Lime (Calcium Sulphate); ♀, Silica (called the "Surgeon of the System"); ♀, Phosphate of Lime; ♀, Sodium Chloride; ♀, Phosphate of Iron (Ferrum Phosphate). (See these subjects).

Example—People born with the ♂ in the ♀ sign are apt to use up the Phosphate of Magnesia of the body faster, and in illness should receive this Salt to supply the need of the body, and the birthday, and the sign born under would indicate what salt is especially needed in an increased quantity, and more than has been taken in normally in the food. And so on with all the Signs, the Rising Signs at birth, the Signs containing the ♀ and malefics, and all the aspects, etc., should be considered in determining what Salts are needed. These Salts are Inorganic, and as Inorganic Salts in their raw forms are not as easily assimilated, or as beneficial for the system, but tend to be deposited as minerals in the body, these Salts should be taken in their vegetable forms, and taken from the food. All of these Salts are contained in vegetables, and food of various kinds, and the student, or patient, should make a study of the Diet question, of food values, and then take those special foods, meats, nuts, vegetables, or fruit juices, which predominate in the Salt needed. Mineral waters containing these Salts are not good for the system, as the minerals in water are inorganic. People should

drink distilled water after middle life, and get their Salts and Minerals from their food, and not from their drink, or from Medicines. These are the views of the Occult Masters, and the best Authorities upon the subject. (See Chemistry; "Signs of the Zodiac" under Food; "Biochemistry" under Healers; Minerals; "Water" under Skin).

Sensitive Degrees—Of the Zodiac—Critical Degrees—The Sensitive, and more Critical Degrees of the Zodiac are the 13° and 26° of cardinal signs; the 9° and 21° of fixed signs; and the 4° and 17° of the common signs, and planets when in these degrees at birth tend to affect the native greatly, for good or ill, in health, or other matters, according to the nature of the planets, their power, and the aspects to them. (See Sensitive).
