TO WHOM IT MAY CONCERN:

I have examined the preliminary sheets of the work on Medical Astrology by Doctor H.L. Cornell, and this work will be a monument to Doctor Cornell, and to Astro-Science.

It is a Work that should be in every Astrologian's Library for study and reference. As soon as this book is off the Press, the First National University of Naturopathy will make it one of the standard Textbooks for the Chair in Astro-Pathological Diagnosis.

We have known Doctor Cornell for many years, and have given him our highest Honors. He has spent the best years of his life in research study along the lines of Medical Astrology, and also used this knowledge to practical advantage in his many years of Practice as a Physician. This Encyclopaedia is the only book of its kind ever attempted in the history of the World, as far as we know, and it gathers together the knowledge along the lines of Medical Astrology in a way that students can get at it, as subjects are all arranged alphabetically.

We trust the book will be well-received, and appreciated by the Astrological and Scientific World, and by Healers of all Schools who are interested in Astrology as an aid in Pathological Diagnosis, Prognosis, and in the etiological factors in knowing more about the Philosophy of Disease, and the Planetary Causes of Disease.

Respectfully,

INTRODUCTION TO THIRD EDITION

When Dr. Cornell enriched the astrological world with his *Encyclopaedia of Medical Astrology* in 1933 little was known about the planet Pluto and indeed most dedicated scholars strongly doubted the ultimate value of its effect upon our lives.

To support this disbelief Dr. Cornell quotes E. H. Bailey, Editor of the *British Journal of Astrology*. "I have no belief whatever in the alleged influence of this planet," and again, "I see no reason whatever to include it when dealing with horoscopes."

The shattering events of the early thirties coincide with the dramatic emergence of Pluto upon the scene and they were characterized by what we have since come to understand as Plutonian evolutionary and revolutionary tactics.

For the first time mass attention was focused upon the basic, individual needs—the Union of One with the Collective Whole. Established customs were challenged, laws repealed, the Federal Reserve System was reconstructed. There was belated aid to farmers, the NRA, WPA—every imaginable alphabetized tag symbolizing the results of a gigantic upheaval—the birth of Bureaucracy.

This evolutionary planet revolutionized the world to such an extent that even the most critical and discerning student must take its influence into sober account. And even before Pluto was officially added to the planetary family, his influence (Invisibility) may well account for the missing link in otherwise puzzling delineations.

As early as 1915 astronomer Percival Lowell and other astronomers observing from the Lowell Observatory in Flagstaff, Arizona, published "findings" on a new planet—a star of the 15th magnitude, its mass greater than half the Earth's Mass and approximately 1/50,000th that of the Sun, and located in the eastern part of the constellation Taurus traveling an eccentric path. However, it was not until 1930 that the planet (having been widely observed by then) was "discovered" and named Pluto.

As Man's consciousness expands, true to Cosmic Law and precisely "on cue," a new planet becomes visible and another evolutionary chapter unfolds. To better comprehend each revelation we need only refer to the point of reference bequeathed us (a veritable

Mein Kampf of the Skies)—the Encyclopedia of Life as embodied in mythological mysteries.

As we read about Pluto and his astral realm is absorbing—the subconscious implications, preoccupation with life and death, the very mystery of his Invisibility. Pluto must surely “rule” Scorpio and the Eighth House, for no other Sign has the stamina to endure the spiritual and psychological surgery Pluto employs.

The Latin translation for Pluto is *The Rich One*, and rich indeed was he, for all that is below the earth belonged to him. This fabulous and powerful god of the Underworld lived for six months of each year in his dark and well-heeled Kingdom—assessing his holdings—receiving and regenerating the souls of the dead.

Pluto was a resourceful and wily god. He saw, loved and carried off Persephone to his gloomy home. When Jupiter interceded for her release, it could not be completely effected, for Persephone had sucked the sweet pulp from a few pomegranate seeds which Pluto had cunningly offered her. So a compromise was made. Persephone was to pass half of her time with her mother (above) and the remaining half with her husband (below). This arrangement, as chronicled by Bulfinch, was probably the first recorded incidence of Equal Time!

With all due respect to Bulfinch, basic psychology today teaches us that Persephone must have elected to spend half of her time with Pluto sharing those treasures and rulings as his very powerful queen.

Along with Persephone, we are all profoundly affected by Pluto’s magic (witness the lives of those who have already consciously hosted him in their Signs—Cancer, Leo and Virgo and a presently foreshadowed Libra). We have all journeyed to Tartarus (deep subconscious) and have emerged with new concepts.

Pluto is a “gutsy” god, often unscrupulous, who traditionally exemplifies Power and Will. He has much in common with Jupiter (they were brothers, and blood tells) and is noted for the same largesse. They both exert powerful influences the scope of which is immeasurable.

Fantastically adventurous Pluto excites the purest and highest potentialized energy—creative Will Power and Genius. His message is simply *love* finally realized through *Occult awareness*.

PLUTO RULERSHIP—ARIES OR SCORPIO?

The entire subject of rulership is hopelessly involved in spirited controversy but, as with all esoteric symbolism, there does appear to be deep meaning and an uncanny order to the assignment of each new

planet as it appears upon the scene to impress itself upon the consciousness of the age it heralds.

The ancients held that Leo, the most regal of Signs, must surely be “ruled” by the Sun and that Cancer, the maternal Sign, was ruled by the Moon.

Moving outward from the Sun and clockwise around the Zodiac, Mercury was ascribed to Gemini and Virgo, Venus to Taurus and Libra, Mars to Aries and Scorpio, Jupiter to Pisces and Sagittarius and Saturn to Aquarius and Capricorn. To validate dual rulerships the Positive Signs (Aries, Gemini, Libra, Sagittarius and Aquarius) were considered the Day Homes, and the Negative Signs (Taurus, Virgo, Scorpio, Capricorn and Pisces) the Night Homes. Everything worked well enough under this system while only the Lights and the seven other known planets encompassed the Zodiac.

When Uranus was discovered in 1781, “modern” astrologers were hard put to find a tenable home for the newcomer. It was finally ascribed to Aquarius (and experience has proven this to be the proper choice) and so Saturn was relieved of divided allegiance.

In 1846 the advent of Neptune occasioned a similar reshuffling of rulerships, and Neptune emerged the ruler of Pisces, leaving Jupiter to reign noble and supreme in Sagittarius.

And so in 1930 Pluto’s emergence necessitated one more re-evaluation, and the planet Mars, like his predecessors Saturn and Jupiter, found himself operating in a special and more concentrated area—ruling a single kingdom—and there appears to be little doubt that the potent segment of the Zodiac he so rules is Aries.

To understand the god Pluto is to comprehend the Scorpio native for, in a very real sense, Pluto *is* Scorpio and he must have come finally to claim his own. Everything within the province of the Eighth House has Plutonian overtones (astral projection, birth, death, dream consciousness, fate, magic, money belonging to others, mysticism, psychic experiences, regeneration)—a few of its characteristics, simply stated.

Wily Pluto couldn’t possibly maneuver in Aries, for Aries is as naive as Scorpio is complex. Aries never needs a reason for action, Scorpio always has a nicely laid plan—a motivation and a purpose. Aries is ever young in experience, Scorpio is old and inscrutable. Aries is spelled out loud and clear and seeks the Light, Scorpio poses an everlasting riddle and prefers the Shadows. Aries (Mars) rushes into every conceivable situation unprepared, Scorpio (Pluto) moves only when the subconscious dictates absolute surrender. Aries is

Abortive—Scorpio, Conclusive. These are but a few of the countless and obvious comparisons.

John M. Allegro, in his contemporary and painstaking research of ancient Sumerian writings, (oldest known written language—5,000 years B.C.) “The Sacred Mushroom and the Cross,” contributes the following definition of the name Pluto:

The name Pluto, Greek Plouton, is primarily a fertility word now recognizable as coming from an original Sumerian BURO-TUN “deliverer of the womb,” is cognate with the Greek Bruo “teems with, be full, burst forth.” The same Sumerian word appears in such names as Apollo, Aphrodite (from which comes our “aphrodisiac”), and the plant name Abrotonon, “Southern wood,” a sprig of which under the pillow, Pliny tells us, “is the most effective countercheck of all to magical potions given to produce sexual impotence.”

One more interesting observation to further substantiate Pluto’s rulership of Scorpio’s domain is the obliquity of the planet’s course. This departs from other planetary graphs in a most pronounced manner. Although Uranus usurped Saturn in the Eleventh House, and Neptune, Jupiter in the Twelfth House, Pluto arbitrarily (following its eccentricity) by-passed the First House and veered over to take a 150° stance in the Eighth House to pinpoint and resolve the struggle between Selfhood and Soul and so open the channel to Immortality.

Where else can this illuminating confrontation take place other than in Scorpio—Scorpio who is eternally preoccupied with the riddle of Life and Death?

PLUTONIAN CORRESPONDENCES

A new, transmuting ingredient has been added to the cosmic cauldron. In an attempt to excite further interest and deepen understanding of the potent qualities of this ingredient (Pluto), the following alphabetized categories are correlated and examined by aspect.

The information that follows has been culled from books, magazines, dictionaries, lists inherited from Astrologers’ files, etc.

The delineations of aspects for Anatomy, Chemistry, and Diseases have been determined by examining accumulated birth charts from personal files, charts of contemporaries, and those of famous (or infamous) people.

Whatever limitations these sources imposed were remedied by aggressive exploration—i.e., by searching out people in circumstances under study and thereby closing the gaps in resource material.

This source material will help identify and corroborate the students' determinations—it's a Pluto Proving Ground—the launching pad for eternal questing.

INTRODUCTION TO SECOND EDITION

The results which this book will produce on the readers and students will, of course, depend largely upon the attitude of mind and mental advancement in which they approach the subject with which it deals.

Many students approach metaphysical phenomena with ingrained disinclination, to accept facts and conclusions which interfere with their preconceived opinions and dogmatic, youth-instilled beliefs.

Readers of this category will be necessarily incapable of comprehending the message and helpful advice contained in the following pages.

Those who are ready, cosmically speaking, to study this subject with an open, unbiased and unprejudged mind will find, perhaps, that whilst they can accept factors stated, they cannot reconcile themselves to PROGRESS—progress in thought, progress in the application thereof, no matter how sane they may appear to them.

The exposition as portrayed by Dr. Cornell in his treatise of something new, that has been suppressed for the past century, is but the beginning of a NEW ERA in the field of the Healing Arts; whatever conclusions or repercussions may arise therefrom are but a step FORWARD in the RIGHT DIRECTION.

A science whose significance is so far reaching and whose influence on the entire field in the Healing Arts will be revolutionary, to say the least, is bound to have repercussions from the old, obsolete and, by demonstration, impractical methods belonging to the past.

But, we must not overlook the fact, that with all our so-called advancements of standards of living, we still have with us a daily floating hospital population of close to 2,500,000 sick and ailing people in these United States. What is the cause? Too many 'Doctors' or not enough? Maybe not the right kind that know how to CURE disease or to alleviate suffering? Something surely IS wrong! Maybe, after all, the ancients knew more about relieving pain and suffering when they used common sense remedies, such as herbs, teas, poultices, made from various roots, plants and foliage.

Everything in this world was created for a well-defined and special purpose, including the stars, which were the first LINK between Man and the Heavens. The ancients knew well how to interpret the influence of these stars, especially that of the planets, upon ALL things terrestrial, including our health.

One of the most ancient and most reliable writers on this subject, Ptolemy, in his Quadripartite on the influence of the Stars, makes special reference to the stellar influence regarding localities north or south of the equator. Nicholas Culpepper, in his treatise on English Herbs (edition of 1695) allocates not less than 369 herbs to the various planets and their correlation to the Healing Arts. L. D. Broughton, M.D., in his work on this subject (Elements of Astrology) brings out very potent and convincing factors that the stars were made for something other than for professional 'Star-gazers' to look at.

An eminent Viennese medico, Dr. Friedr. Feerhov, as late as 1914, blazed the trail in Europe by publishing an astro-medical treatise, setting forth the close relationship between physical manifestation and metaphysical influence, between chemistry and biochemistry and alchemical allocation of human types.

At that time his 'findings and observations' were ridiculed by whom? By such who "Were down on something on which they were not up on!" It is the same today, albeit in a lesser way. After all, whenever I hear 'people' talking against something they do not know anything about, I am reminded of Shakespeare's lines in Julius Caesar, act I, scene III: "And that which would appear offence in us, His countenance, like richest alchemy, will change to VIRTUE and to WORTHINESS."

All good things take time! Ever since the beginning of the Aquarian age new systems within the healing arts have been proposed and expounded. Yet, the attacks made against all and everyone by the old, entrenched and well organized medical oligarchy (serum trusts and patent medicine vendors) have wrought havoc within the ranks of progressive exponents. Yet, with all the opposition, the 'old' must give way to the 'young' and the same holds good in medicine.

Disease is caused by retention of septic matter within the body; cure can be effected only by elimination of such septic retentions. The homeopathic and naturopathic systems have done more good than all the allopaths together.

I am well aware of the consequences of this statement, but, having graduated from both schools I know whereof I speak. Anyone, who is sceptically inclined, is advised to read: "Devils, Drugs and Doctors." (Howard W. Haggard, M.D., 1929.)

At the present time, there is a revolutionary trend within the ranks of the orthodox practitioners against the dictum of the medical trust. Yet, with all their wrangling they are not able to diminish the present day, ever-increasing 2,500,000 daily floating hospital population in the United States. Something is wrong somewhere. But the guilty parties are too stubborn to admit defeat from within. It will come from without.

The natural methods of healing, when well understood and judiciously applied, bring results. They fail only when suffocated herbs are used; this latter happens quite often lately, more so since the universal use of transparent water-proof wrapping material which excludes all oxygen not only from foods, but also from therapeutics. No wonder cancer has increased by leaps and bounds since the initiation of this oxygen-excluding wrapping material.

But, we are not interested in 'health-destroying' agencies; the point is to introduce something that WILL alleviate human suffering, and Dr. Cornell's book is one link in the long chain of Real Healing.

It might not be amiss to mention that Dr. Cornell, in his later years of life, became a loyal follower of the great genius, Emanuel Swedenborg, who, albeit not having been a licentiate of any orthodox school, laid the foundation of naturopathic principles.

Undoubtedly, Dr. Cornell gleaned many valuable pointers from Swedenborg's doctrines.

Dr. Cornell, whom, unfortunately I met too late and lost too soon, has built himself an everlasting monument; the future generation will honor him alongside the great souls, such as Pasteur, Koch, Lavoisier, Roentgen, Florence Nightingale, Lord Lister, for his contribution to mankind.

FOREWORD

For some years in my study of Astrology as a Physician and Surgeon, and in an effort to get at the Planetary Causes of disease, I searched through the Textbooks of Astrology to find something about the disease I was treating, but my efforts were often in vain. There are many fine things said in the Textbooks along the lines of Medical Astrology, but such statements are often made at random, and in obscure places, and are not indexed. To be sure, there are classified lists of the Planets in Signs, and the diseases they cause, but in making a study of any one disease, it is almost impossible to find in the regular Textbooks and Manuals of Astrology all that has been said about this disease, and its planetary causes, and this knowledge could only be obtained by a systematic search through my entire Astrological Library. Being so inconvenienced myself, and with a desire to get the knowledge along the lines of Medical Astrology into classified shape, about fifteen years ago I conceived the idea of making this Encyclopaedia, and of arranging the Disease Subjects alphabetically, and of gathering up the material on each subject from all the Astrological books of my Library. This has been a momentous and tedious task. To begin with, I opened up a Ledger Account for each disease subject, and began a systematic digest of my entire Library, and in reading, line by line, would post the thoughts into the Ledger under each disease subject as I would come to them. By keeping up this practice for some years I eventually had two large Ledgers filled with material. Then came the task of arranging, classifying, disentangling, and writing up these ledger Articles into readable form, as each Article was posted in as read, and like a jungled mass, and without form. It took me four years to go thru this and finish the first writing entirely in English. Then, in 1928 the idea came to me that I should retype and rearrange the entire book, and type it on an Astronomical Typewriter, and use the Symbols for the Planets, Signs, and Aspects. In this second writing it was necessary to rearrange the subjects, and place many Articles under a different letter. The system of Synonyms and cross references in the book has taken a great deal of time, and to see to it that such references were in harmony. To shorten the manuscript I have used many abbreviations, and a list of these abbreviations you can find in the front of this book.

When this mass of material was straightened out, arranged, classified, and the various influences causing a disease were gotten together and studied, it has been an interesting study to note the fundamental influence and nature of the various Planets, and how these influences were in the minds of the various Writers, from the time of Ptolemy, and on down thru the Centuries until the present time, and with these facts and data before me, it has become an easy matter for me to see what influences were missing, and which have never been listed or tabulated in any book, as far as I have been able to discover, and to fill these in, and to do my part in helping to develop the Science of Medical Astrology, and get the knowledge along this line into such shape that students can get at it quickly, and by merely turning to a subject in the alphabetical arrangement. Also in this Encyclopaedia I have given attention to the Higher and Spiritual side of Astrology, to Esoteric Astrology, and have tried to arouse the readers to an inner consciousness of their Higher Powers, to rule their stars, and not be a slave to the various planetary aspects and influences which operated over them at birth, or may be manifesting themselves along thru life.

The fundamental purpose of this Encyclopaedia is to give the planetary influences which cause the various diseases, afflictions, events, accidents, and injuries of life, and to gather such knowledge under subjects, and arrange them alphabetically. I am not attempting to repeat the Classifications to be found in the various Textbooks of Astrology, and the student is asked to use this volume in connection with his other books. Also this book

does not attempt to go into the Elements of Astrology, or to be a Textbook of such Elements, although many Articles do deal with these Elements, and especially as they are related to Medical Astrology, and the Diagnosis of Disease by Astrology. The student, in order to use this Encyclopaedia intelligently, should first be a student of Astrology, and to know the Elements and Fundamentals of Astrology and Astronomy, and be familiar with the Signs and Symbols of Astronomy. Also this book is not intended to be a Treatise on the various Systems of Healing, or Schools of Treatment, but to give the planetary causes and philosophy of disease, and to allow each student to use his own methods of treatment. I honor and respect all Schools of Healing, and recognize that there is good in all, but it would be impossible in a book of this kind to go into the merits of the different Schools. The Theory of Chiropractic is closely related to Astrology, due to the planetary rulerships over the Spine and Vertebrae, and I have attempted to give and list, under various diseases, the Subluxations caused by the planetary influences. It is also my desire to have students in the various Schools of Healing, and when they are studying a certain disease, to consult this Encyclopaedia on the subject in hand, and note the planetary influences which cause such disease, and to understand the philosophy of the case, and not to be satisfied merely with the treatment of the ailment. In Ancient Times all Physicians and Healers were required to know Astrology, and its relation to disease, and to the individual afflicted, as by a study of his Star Map of Birth, and the adverse Directions which might be operating over him, and such applicants for Medical, or Healing Licenses, were not allowed to become full-fledged Physicians until they could pass a satisfactory examination in Astrology. But, for various reasons, the knowledge of Astrology became more or less suppressed during the Middle Ages, but is now being revived again, and coming into its own, and is being more and more recognized as a true and Ancient Science. Physicians and Healers should lay aside their prejudices, and investigate Astrology, prove it by observation, and when they do, I feel sure they will give it its rightful place in their Schools and Colleges of Healing, and in their daily practices among their patients. In my own practice I found Astrology of inestimable value in diagnosing my cases, and to quickly determine the seat of the disease in the patient, how long they have been sick and ailing, and to form a reasonably accurate prognosis.

In this book, the Form and Shape of the body, and the planetary influences along the lines of Form, Shape, Height, Weight, Complexion, Hair, etc., are given. Also there are many Articles along the lines of Conduct, Habits, Morals, Temperament, etc. Also the prominent Fixed Stars, and their influences, are listed. Under each subject the sub-heads are arranged alphabetically for quick reference, and the student can very quickly get at the knowledge he is seeking, on any subject, as far as they are listed and recorded in this book.

One very great difficulty I have encountered in building up this Encyclopaedia has been to determine what subjects should go in, and what should be left out, and especially along the lines of Mental Traits. The Mind and Body are so closely related, and there are so many Mental Traits which are Pathological, and practically amount to a diseased Mind, that I have listed in this volume a great number of the less desirable Mental Traits, and also for a study in contrasts, some of the more desirable ones. During my years of study in the preparation of this volume I have gathered enough material for a separate Encyclopaedia, to be known as "The Encyclopaedia of Psychological Astrology", and hope soon to begin to assemble this book, and leave it to the World as the sister book to this present volume.

In the Fall of 1918, after many years of active Practice in Medical work in this Country, and in India, I gave up the Practice of Medicine, moved my family to Los Angeles, and have lived here ever since, and given my whole time to Astrology, Writing, and in the preparation of Star Maps, Horoscopes, and Astrological Health Readings for people over the World. When this Encyclopaedia is out, circulated, and established, it is my plan to

make a World Lecture Tour, and speak before the various Healing Centers and Schools in the U. S. A., and other Nations, and to make an effort to have the various Faculties make Medical Astrology one of the required studies for their students who are aspiring to be Healers. I plan to have this Encyclopaedia in the prominent Public Libraries in the large Cities over the World, and also in the Occult, Metaphysical, Astrological, and Healing Centers, and where students can have access to it. I am giving this book to the World as a labor of love, and trust it will prove of great help to you and be a fitting monument to my life work.

ABDOMEN—Abdominal Region—Abdominal Organs—Belly—Bowels—Hypogastrium—Navel—Peritoneum—etc. This region is ruled principally by the ♀ sign, and the 6th H. The internal parts of the abdomen, such as the bowels, are under the internal rulership of ♀, and the more external and surface parts are under the external rule of ♀. The muscles of the abdomen are especially under the rule of ♂, and tend to be greatly influenced when ♂ is in ♀ at B. The ♀ sign, opposite to ♀, and also all the common signs, when occupied by planets, or with common signs upon the angles, tend to affect the abdomen. The ♀ and ♀ are also said to rule over the abdominal region. The Belly is ruled by the ♀. The following subjects have to do with the Abdomen, which see in the alphabetical arrangement when not considered here.

ABORTION—Miscarriage—Premature Expulsion of a Foetus—The \mathfrak{m} sign rules the womb, and afflictions in this sign, and espec. the malefics \mathfrak{H} and σ in \mathfrak{m} at B., and affl., tend to cause abortions. The afflictions of h_2 in \mathfrak{m} also tend to, and to hinder and retard the growth of the foetus. Some women abort habitually at a certain stage of pregnancy, and are unable to carry a child thru to term when the \mathfrak{m} sign is heavily afflicted by malefics at B. Abortion is more apt to occur at the regular monthly menstrual period under the \mathfrak{D} influence at such times, working together with other malefic influences, transits and directions. Note the following planetary influences as causes of Abortion: If one of the Lights be in an aphetic place at conception, conjoined to a malefic, or in \square or δ to it, or if the \odot or \mathfrak{D} be in P. Dec. a malefic, there will be an abortion, the child dies in the womb, or dies soon after birth. Also, under these circumstances, if the Lights are in δ to h_2 and σ from angles, in exact or wider aspect, or if one or two malefics afflict either the \odot or \mathfrak{D} by an exact, or partile aspect, there will be an abortion. If the conditional Luminary is applying to a malefic, and sepr. from a benefic, the child will be born alive, but live only a few hours, days or months, as there are $^\circ$, $'$, and $''$ between the Luminary which is apheta, and the nearest malefic, but if the Luminary is sepr. from a malefic and

applying to a benefic, the child will be sickly, but will do well and recover. (See Conception, Embryo, Foetus). The \odot and \mathfrak{D} in angles, and espec. in the 1st or 7th, or in the 6th H. in σ h_2 , σ , or \mathfrak{D} , liable to an abortion, and to have no children. (See Barren, Pregnancy); an eclipse of the \odot or \mathfrak{D} falling in \mathfrak{m} , and espec. when the \mathfrak{m} sign contained the \odot , \mathfrak{D} , or malefics at B., or when \mathfrak{m} was on an angle at B., or on the cusp of the 6th, 8th or 12th H.; \mathfrak{D} in the 4th or 7th H. at B., and affl. by σ ; \mathfrak{H} in \mathfrak{m} at B., and affl., tends to cause a spasmodic action of the uterus, and expulsion of the fetus when the directions to \mathfrak{H} are evil during pregnancy; h_2 influence tends to abortive births, and especially when in \mathfrak{m} at B., or afflicting the \mathfrak{m} sign by asp., or planets in \mathfrak{m} ; h_2 tends to cause contractions of the womb at inopportune and abnormal times during pregnancy, when in \mathfrak{m} at B., and affl. by the directions of malefics; h_2 and \mathfrak{D} in the 7th H. and σ elevated above them, tend to spontaneous abortion; h_2 or σ in the 5th H., and in \square or δ asp. the lord of the 5th; h_2 lord of the 8th, and with a barren sign on Asc., or cusp of the 5th; σ in an angle at B., occi. of the \odot , and ori. of the \mathfrak{D} ; caused by σ when the dominion of death is vested in him; σ affl. in \mathfrak{m} ; σ in the 6th H. in \mathfrak{E} or \mathfrak{M} , and affl.; σ in \mathfrak{m} and affl. the \mathfrak{D} or Asc.; \mathfrak{U} in 5th H. denotes abortion, and in the 1st H. in Hor'y Ques., great danger of it; a malefic in cazimi is a sign of abortion in a Hor'y Ques. (See "Premature Birth" under Premature).

Often results from operations on the womb when the \mathfrak{D} is passing thru \mathfrak{m} , \mathfrak{E} , or \mathfrak{M} signs. (See Stillborn).

Death by Miscarriages—Or at Parturition—The \mathfrak{D} affl. at the birth of a child tends to death of the mother, or much trouble, and a bad time for the mother after confinement, and espec. if the \mathfrak{D} is in the 4th or 8th H., and affl.; σ affl. the hyleg by dir.; caused by σ when the dominion of death is vested in him. (See "Death" under Hemorrhage, Miscarriage, Parturition).

Sugar of Lead (Lead Acetate) Solution is a good remedy locally to relieve the irritation or inflammation from an excoriation. (See Accidents, Hurts, Injuries, Wounds).

ACCIDENTS—Accident—Accidental—Casualties—Unexpected Events, etc.—This is a big subject, and there is perhaps more said along this line in the textbooks of Astrology than upon any other subject. The general planetary causes of accidents, their nature and kind, etc., will be given in the various paragraphs of this Article, and especially under the headings of "Causes", "Danger of", etc. From an Occult standpoint Accidents are not always considered as matters of

chance, but may come, and do come, upon scheduled time, according to a prearranged plan of the Higher Powers and Hierarchies, or they may come upon a Nation or individual by a special decree, all which must be considered for the good of the individual, the Nation, or for the advancement and betterment of the Planet as a whole. Some star maps of birth show practical immunity from accidents, or violence, while others contain many influences which would lead to them, or a violent death. Every part and organ of the human body may be subject to a hurt, injury, or accident, according to the planetary positions and configurations at B., and the influences by direction, transit, or progression. Many of the subjects which have to do with Accidents are considered and also listed under the subjects of "Hurts", "Injuries", and these subjects should be studied and referred to along with the study of this Article. See the following subjects in the alphabetical arrangement when not considered here, and especially look for "Accidents", "Hurts", "Injuries", "Wounds", etc., under each subject.

Burns—(See Burns, Fire, Heat, Scalds).

Buttocks; Casualties—(See "Death", and the various paragraphs in this section).

Cattle; Causes of Accidents—General Causes—Ptolemy held that planets oriental at B. indicate accidents, and planets occidental, disease, but this rule does not always hold good, as the opposite is often the case. Many planets in violent signs of the zodiac at B., and espec. in angles, indicate more danger of accidents. Accidents are to be judged from the planets which may happen to be exactly rising or setting at B., and those in configuration or aspect with the ☉ and ☌, or the ascending degree. The afflictions of the malefic planets to the ☉, ♁, Asc., M.C., or hyleg at B., and by dir., and espec. when these places were affl. at B. by malefics, are common causes of accidents. The ♁ sign on the Asc., 6th or 12th H. at B.; ruler of the 8th H. at B. in the 4th H. at a Solar Rev.; Fixed Stars of the nature of ♂ ascending at B. make one more or less liable to accidents along thru life under the evil directions of these stars, or of the malefic fixed stars, to the places of the ☉, ♁, Asc., or Hyleg; the violent fixed stars, as Antares, Betelgeuse, etc., tend to cause accidents by their afflictions to the planets at B., or by dir. (For further influences see the various subjects in this Article).

Childbirth—(See Parturition).

Childhood—(See "Accidents" under Childhood).

Children; Clavicle; Concussions; Contusions—(See Blows, Bruises, Falls).

Cranium—(See Skull).

Crippled; Crushed; Cuts; Danger of Accidents—Liable to—Tendency to—In judging of the danger of accidents, note the Asc., the cusp of the 6th H., and whether the malefics h or σ afflict the Luminaries at B., or by dir. The following planetary aspects and influences tend to make the native more liable to accidents, be in greater danger of, and to have a more violent map, and with greater danger of death by violence, the result of an accident. The \odot affl. by σ at B., or by dir.; the \odot or \sphericalangle to the σ or ill-asp. σ in the zodiac or mundane; the \odot in fixed signs at B., and coming to the σ or ill-asp. σ by dir.; the \odot to the σ or ill-asp. Ψ , h , or H by dir., and espec. when in the card. or fixed signs at B., or when the directions fall in this class of signs; the \odot or \sphericalangle rising at B., and affl. by the σ or ill-asps. of σ , or other malefics; the \odot or \sphericalangle in the oriental Quadrants between the Asc. and M.C., or between the Desc. and Nadir, and affl. by the σ or δ of σ , produces accidents; the \odot or \sphericalangle affl. in ori. (See "Victims" in this section. Also see Rescue).

Events—(See Directions, Events).

Excessences; Explosions; Extraordinary Accidents—Sudden, Peculiar, and Unusual Accidents—These are caused by the afflictions of H, as his influence is sudden, unexpected, and acts in a peculiar, singular, strange, and unusual way. The following aspects and influences, in which H takes part, are said to cause this class of accidents.—H affl. at B., and in ☽, P., or evil asp. the ☉, ☽ Asc., M.C., or the hyleg; H in the 8th H. at B., and affl. the hyleg at B., and by dir.; H in the 8th H. at the Solar Ingress of the ☉ into ♀, and affl. the ☽ or planet ascending; the ☉ hyleg, and with H in the 8th H. and Anareta, and the ☉ to the ☽, P., or evil asp. These same influences may also cause a sudden, peculiar, singular, unusual and extraordinary death, as many accidents caused by H prove fatal. (See Extraordinary, Peculiar, Strange, Sudden, Unusual, etc.). Case—Of an Extraordinary Accident—See "Extraordinary", No. 192. in 1001 N.N.

Extremities; Face; Falls; Fatal Accident—Case.—See "Fatal", No. 346, in 1001 N.N. (See "Death", and the various subjects and paragraphs in this section).

Hips; Horary Questions—In Hor'y Questions, if the ♃, lord of the Asc., or the Asc., be applying to the ♂, ♀, or any ill-asp. of the malefics, and espec. to ♃ or ♂, there is danger of an accident just ahead, and espec. if the ♃ or lord of the 1st be in 8 or ♏, unless great care and caution are used, and dangers avoided. In Hor'y Questions, if the ♃ or lord of the Asc. are separating from the ♂, or ill-asp. of a malefic, and applying to the ♂ or good asp. of a benefic, there is little danger of an accident in the near future, or on a journey contemplated. The Asc. and the ♃ have affinity in denoting the accidents of life, and become the Significators of such events. (See Horary).

Horses—(See "Hurts By" under Horses. Also see Bites, Kicks).

Houses—(See "Buildings" under Falls).

Human Hands—(See "Hand of Man" under Man).

Hurts—(See "Violent" in this section. Also see Hurts).

Husband; Illness—Illness and Disease from Accidents—Sickness and Illness may result from accidents caused by ♃, where there was great shock to the nervous system, as ♃ by his afflictions tends to greatly weaken the nervous system, and to cause collapse. ♃ strongly afflicting the ☉, ♃, Asc., or hyleg at B., and by dir.

Less Liable—To Accidents—Born under the Airy Signs ♌, ♍, ♎, also known as the whole signs, and with these signs upon the Asc. at B., or with the ☉ well-aspected in these signs. These signs when strong at B., tend to keep the body more intact, and to be free from accidents, injuries, or mutilations.

Liable to Accidents—Hurts and In-

juries—(See "Danger of" in this section. Also see "Liable to" under Hurts; "Tendency to" under Injuries).

Lightning; Limbs; Machinery; Madness; Maimed; Males; Mangled; Marriage Partner; Mines; Miscarriage; Mobs; Mother; Murder; Mutilated; Narrow Escapes—(See "Escapes" in this section).

Nature of Accidents—Kind of—The planets each have a specific nature of their own, and tend to produce accidents or injuries after their nature, and to injure the part, or parts of the body, ruled by the Signs or Houses in which they were posited at B., or in which they may be by tr., dir., or progression. The afflictions of ♃ tend to accidents by water, drowning, shipwreck, etc. The accidents of ♃ are sudden, extraordinary, or unusual, such as by lightning, electricity, inventions, machinery, explosions, at bathings, on railroads, and in connection with the employment. Saturn governs accidents by falls, bruises, contusions, crushes, buried alive, fall of buildings, suffocation, etc. Mars rules accidents by cuts, stabs, loss of blood, wounds, burns, scalds, injuries in quarrels, and where violence is present in some form. The ☉, ♃, ♀, and ♁ are passive, and do not usually act as the cause of accidents unless they are afflicted by one or more malefics, or are united with them in common action. (See the Introduction under "Hurts". Also see each of the planets in the alphabetical arrangement as to their special influences).

Operations—Danger of Accidental Death From—Caused by ♂. (See "Dangerous" in this section. Also see Operations).

Painful Accidents—Caused especially by ♂, and when this planet enters into the configuration, and with loss of blood, violence, etc. (See Pain).

Paralysis—Resulting from Accident—(See "Blows", "Injuries", and other subjects under Paralysis).

Parents; Parts of Body—Liable to Accident and Injury—These are known by the Sign and House containing the malefics at B., and the malefic afflicting planets by dir. The ☉ or ♃ rising at B., and affl. by the ♂ or ill-asp. ♂, or other malefics, tend to injury in those parts of the body ruled by the sign containing the Lights, or the afflicting planets. The first 10° of a sign show the upper part of an organ afflicted. The middle 10°, the middle part of an organ, or region, and the last 10°, the lower part of the organ, or part. If ♃ be in the 3rd H., it shows injury to the left side of a male, or to the right side of a female. For accidents to the various parts of the body, see the part, or organ, in the alphabetical arrangement. (See Decanates, "Left Side" under Left; Lower, Middle, "Parts of the Body" under Parts; "Right Side" under Right; Upper).

Thighs; Time of Accidents—The Asc. and the ♃ have affinity in denoting the accidents of life, and become Significators, and directions to the ♃ and Asc. espec. show the times of possible accidents. Accidents are indicated by directions, and espec. when the directions are formed in the Ori. Quarters of the heavens, as between the 1st and 10th houses, and the 7th and 4th, and affil. the ☉, ♃, Asc., M.C., or hyleg at B. Accidents, injuries, or illnesses usually occur when the ☉ or ♃ are transiting the places of the four malefics at B., and espec. ♃ and ♂, or when ♃ and ♂, and other malefics, are on the places of the radical ☉, ♃, or Asc., or in evil asp. to them, and at these times more care and caution are necessary, espec. if the hyleg was afflicted at the previous New or Full ♃. Fixed stars of the nature of ♂, when ascending at B., make one more liable to accidents at the times when they form evil asps. to the ☉, ♃, Asc., M.C., or hyleg in the radical map by dir. (See Directions, Events, "New Moon" under Moon; Time; "Hurts" under Travel).

(See Escapes. Also see "Escapes" in this section).

Violent Accidents—Hurts, Injuries, or Death, by Violence—The ☉ and ♃ are the positive, heat-producing, and electric planets, and afflictions to them by directions, transits, or progressions, are more apt to result in accidents accompanied by hurts, injuries, violence,

loss of blood, fractures, wounds, etc. People who are born under the strong influence of ♂, or who have ♂ badly affil. at B., are more subject to violent accidents. Strong ♃, ♃, and ♂ afflictions to the ☉, ♃, Asc., or hyleg at B., and by dir., and with little or no help from the benefics; the ruler of the Asc. a malefic, and evilly aspected by malefics; malefics in the 6th, 8th, or 12th houses at B., and afflicting the ☉, ♃, Asc., or hyleg. (See Hurts, Injuries; "Death" under Violent).

ACCOMMODATION—The Focus of the Eyes—Defects and Errors of Accommodation are ruled by the ♃, and are considered ♃ diseases. For the various errors, and disorders of Accommodation, see Astigmatism, Eyes, Hyperopia (Far-sighted); Mydriasis, Myopia (Near-sight); Presbyopia (Old Age Vision); Sight, Vision.

ACCUMULATIVE—♃ exercises a strong influence for the accumulation of wastes in the body, and the retention of waste matter which should be thrown off, and to accumulate the poisons of the body in the various tissues and organs, which wastes and deposits tend to hardening, suppressions, etc. (See Crystallization, Elimination, Hardening, Obesity, Retention, Saturn, Stoppages, Suppressions, Tumors, Wastes). ♃ tends to accumulate fluids in localized parts of the body, and in the blood vessels, causing Apoplexy, bursting of blood vessels, swellings, tumors, abscesses, etc. (See these subjects). The ♃ also has an accumulating tendency of the fluids to circumscribed parts of the body, when affil. at B., or by dir. (See Congestion, Fluids, Functions, Oedema).

ACEPHALOCYSTS—Taenia Echinococcus—The Bladder Worm—A ♀ disease. ♀ affil. in ♃. (See Worms).

ACHES—Lingering Pains—Chronic Pains—Continuous, or Throbbing Pains—The ♃ influence is the principal cause of slow, continued, and throbbing aches and pains, while ♂ tends to the more sharp and acute pains of brief duration. See the following subjects in the alphabetical arrangement.

Backache—(See Back).

Bellyache—(See Belly).

Body Suffers—From Aches and Pains—The ♃ to the ♂ or ill-asps. ♃ by dir.; ♃ rising at B., afflicted, or affil. the hyleg at B., or by dir.; ♃ to the ♂ or ill-asp. the ☉ or ♃ by dir.; ♃ tends to retard and stop the functions of the body, cause retention of the wastes and excretions, and the deposit of Uric Acid over the body, which tends to general Malaise and depression. (See Deposits, Excretion, Malaise, Uric Acid, etc.).

Earache—(See Ears).

Feet—Aches In—(See Feet).

Headaches; Heavy Aches—And Pains—All heavy and dull aches and pains

Acids are said to be under the rule of the negative Signs of the Zodiac, and the negative planets, and remedies to produce more acidity in the system are ruled by the negative planets, the J , Ψ , η , Z . A predominance of the planets in the negative signs at B. tends to an over-production of the acids of the body, while the positive signs tend to too much alkalinity. Also the negative planets prevailing at B., and afflicted, tend to acidity, and in those parts of the body ruled by the signs containing them at B., and the afflicting planets. For Acids not listed here look for the subject in the alphabetical arrangement.

Gastric Acidity—Acidity in the Stomach— Ψ , η , Z or the J in Q , ∞ or D at B., and afflicted. (See Gastric, Juices, Stomach).

the face. Caused by subluxations at M. C. P., the 3rd, 4th and 5th Cervical vertebrae, and by afflictions in Q and Z , the signs which influence these vertebrae. This disease is also contributed to by disturbed kidneys, and Subs at KP, Kidney Place. (See Pimples, Sebaceous, Skin, Vertebrae).

ACQUAINTANCES—The J and Z rule Acquaintances.

Death of—An Acquaintance—The J to the place of Cor Scorpio by dir. (See Execrated, Friends).

ACQUIRED DISEASES—Those which arise after birth. Ruled by the J . Indicated by the condition of the J at B., and her evil aspects. The J is functional, while the \odot is organic and constitutional. The J denotes the acquired diseases and tendencies arising from external causes, as environment, climate, food, habits, clothing, etc. Acute diseases, and those of short duration, are generally acquired, while the chronic and lasting diseases result from organic and inherent weaknesses and defects, and the fundamental inability of an organ, or the constitution, to recover from the evil effects of an acute disease, shock or injury. (See Acute, Chronic, Congenital, Constitution, Consumption, Deformities, Environment, External, Functions, Heredity, Inherent, Organic, Structural, Susceptibility, Tendencies, etc.).

Many of the influences which tend to give an active body also produce a strong body. (See Brisk, Cardinal, Energy, "Energetic" under Gait; Exertion, Motion, Movement; "Strength" under Muscles; "Activity" under Physical; Quick, Sthenic, "Strong Body" under Strong; "Good" under Vitality; Walk).

Active Mind—Active Disposition—Active Nature— ψ is the principal ruler of the mind, and this planet when well-asp. by δ , or in his own signs, as in Π or μ , or when in the Asc., rising in the East, and well-asp. by the \uparrow and δ , tends to give an active mind; ψ rising before the \odot ; ψ δ or good asp. the \uparrow , and free from η affliction; ψ to the good asps. δ by dir.; ψ in Π , μ , or \uparrow , in good asp. to \uparrow , and espec. if in δ or P. asp. to \uparrow ; ψ Sig. in \wp , an active mind, but the body may be feeble thru worry; the \odot or \uparrow δ δ at B., or by dir.; the \odot well-asp. in \uparrow ; the \odot in a fiery sign at B.; the \uparrow δ or good asp. δ or ψ at B., or by dir.; ψ in the 3rd H. at B., and well-asp. tends to enhance the mental faculties; η or δ in Π or μ , and well-asp.; η in \ast to \uparrow and ψ , and ψ in \ast or Δ to δ at the same time; η infl. and affliction tends to restrain the mind, or limit the action of the brain cells, and make the mind less active in manifestation; δ in φ , Ω , or \wp at B., well-aspected and placed in the map; δ rising at B.; δ strong at B., rising, and ruler; δ δ ψ at B., except when in \ast ; δ to the good asps. δ by dir.; δ δ the \odot or \uparrow at B.; δ in Π , μ , or \uparrow at B., and well-asp.; fiery signs on the Asc. at B.; the airy signs strong, prominent, and well-occupied and placed at B., and espec. if there be one or more planets in fiery signs; μ on the Asc., this being the sign of δ ; lords of the nativity in S. Lat. at B., more active than when in N. Lat. Temperate climates, with alternate heat and cold produce an active mind. (See "Mental Energy" under Energy; "Quickened" under Mental).

Degree of Activity—The degree of activity in the mind and body depend largely upon the planetary positions and aspects at B., and by progression, direction, or transit. Planets rising at B., or rising and elevated, dignified, and strongly fortified by sign and aspect, tend to give greater activity of mind and body, while planets setting, below the western horizon, in weak signs, and badly aspected, tend to give less activity. The positions and aspects of the planets at B. may give too much activity, or too little, and there are very few people who are perfectly balanced in mind and body, and who do not tend to extremes in some way.

Energy—(See the various paragraphs under Energy).

Hyperactivity—(See this subject).

Mind—(See "Active Mind", "Over-Active Mind", in this section).

Muscular Activity—(See Muscles).

Over-Active Mind—Effervescent Mental Activity—Bubbling Over—The \uparrow and δ influences when combined tend to produce, and to spend their force, by the display of temper, anger, excess of feeling, emotion, and result in the dissipation and dispersion of the brain and nerve force; η in φ or Π , and afflicted, and espec. if ψ is aspected by δ at the same time; δ in φ ; ψ in φ δ ; ψ in the 6th H. at B., and affl., and espec. ψ in μ in the 6th, which tends to undermine the health also. (See Effervescent).

Perverted Activity—(See "Activity" under Perversions).

Qualities—Heat and Cold are active qualities, while dryness and moisture are passive qualities. (See Cold, Dryness, Heat, Moisture).

Sources of Activity—The ☉ and ☽ are the greatest sources of activity and energy in our Solar System, both being of a fiery nature, and having great affinity for each other. The Solar Forces are reflected upon us by ☽, to produce greater activity, and if it were not for the strong ☽ force over us there would be very little activity in the world. The ☉ and ☽ when combined in their action at birth, as the ☉ ☽ in ♀, the exalted sign of the ☉, and the sign of ☽, tend to give great activity, strong vitality, and espec. if ♀ also be on the Asc. (See Dynamic, Mars, Over-Activity, Sun).

Zest—(See Zest).

ACUTE—Acute Diseases—Acute Fevers—Short Diseases—Acquired Ailments, etc.—Diseases beginning in Summer tend to be acute, and shorter than those which begin in Winter. Acute diseases begin from the surface, and from disturbances of the Peripheral Nerves, and work toward the center, and remedies to combat acute diseases should be those which will act upon these nerves. (See Centrifugal). In chronic diseases, the cause is from within, and working outward, and caused by irritations to the ganglionic centers, and usually brought on by ♀ influence, by chilling of the surface, driving the blood inwards. (See Centripetal). Acute diseases are usually brought on by ☽ in an effort to burn up the surplus of wastes and poisons in the system, in an effort to restore the balance in the body, and to maintain normal health conditions, and are usually accompanied by a fever or inflammation. An acute disease may attack any part of the body, and instead of listing every acute disease in this Article, will ask you to see in the alphabetical arrangement the disease you have in mind if it is not listed here. Note the following general subjects concerning Acute Diseases and conditions.

Causes—General Causes of Acute Diseases—The ☉, ♃, and ☽ tend to cause acute diseases, and ☽ the acutest of all; the ☉ hyleg at B., and afflicted, and the ☉ to the ☽ or evil asps. the Asc. or ☽ by dir.; the ☉ affl. in ♀ or ♁ at B., and by transits and directions, as acute fevers are a ☉ disease, as well as diseases of ♃ and ☽; the ☉ to the ☽ or P. Dec. the Ascelli by dir. (See "Sun Diseases" under Sun); the ♃ to the ill-asps. the ☉ or ☽ by dir.; the ☉ ☽ or ♁ the Asc.; the ♃ in ♀, ♁, or ♃, and affl. by the ☉ or ☽ when taken ill; the ♃ in ♁ when taken ill, affl. by the ☉ or ☽, and the ♃ slow in motion and decreasing in light; ♃ causes sudden and short illnesses of an acute nature, and espec. when in the 6th H. at B., and afflicted. (See "Sudden Illnesses" under Sudden); ♃ causes acute diseases from indiscretions in eating and drink, and by cor-

rupt blood, too much blood, plethora, surfeits, etc. (See "Jupiter Diseases" under Jupiter); ☽ and the ☉ in fiery signs at B., and affl.; ☽ and the ☉ are fiery, electric, positive and heat-producing planets, and are great factors in causing fevers and acute diseases by their afflictions, or afflictions to them; an evil ☽ transit afflicting his place at B., or passing thru the birth-sign, or affl. the place of the ☉, ♃, Asc., or hyleg at B. by his ☽ or ill asps.; ☽ to the ☉ or ill-asp. the ☉, ♃, or Asc. by dir.; ☽ occi. at B., and affl. the hyleg by dir.; ☽ in the 8th H. at a Solar Ingress of the ☉ into ♀, and affl. the ♃, or the planet ascending; ☽ in the Asc. at an illness causes the disease to be swift, acute and violent; ☽ in the 8th H. at B., affl. the ☉, ♃, Asc., or hyleg, or in the 8th H. by tr. or dir. at the time of the illness, ruler of the 8th, or affl. the cusp of the 8th, acute and violent sickness, and with danger of death; the Asc. to the ☽ or ill asps. ☽ by dir., and ☽ in a fiery or airy sign at B.; the Asc. to the ill-asps. the ☉ by dir., and the ☉ affl. at B.; fiery signs upon the Asc. at B., or the cusp of the 6th H., and espec. when containing the ☉ and ☽, and afflicted; many planets in fiery signs at B.; afflictions in ♀, the sign of the ☉; a ♁ disease; ♁ on the Asc. at B., or the cusp of 6th H., and containing the ☉ or ☽, and afflicted; afflictions from cardinal signs, and such diseases are usually of short duration, run their course rapidly, and leave no bad after effects unless they run into a chronic disease. (See "Illnesses" under Short).

Crises in Acute Diseases—Critical Days In—Course of—The phases and Quarters of the ♃ govern the course and crises in acute diseases, from the time of decumbency, or the taking of the patient to bed. (See "Acute Diseases" under Crises; "Course of Disease" under Course; "Moon" under Motion).

Danger Of—Liable to an Acute Disease—The ☉ to the ☽ ☽ by dir., or ☽ to the ☽ ☉. (See "Causes" in this section).

Death By—The following influences tend to cause death by an Acute Disease, and an Acute Fever—The ☉ to the ☽ or ill-asp. ☽ by dir.; ☽ afflictions tend to death after a short or sudden illness; ☽ occi. at B., and affl. the hyleg by dir.; ☽ in the 8th H., ruler of the 8th, or affl. the cusp of the 8th at the beginning of an illness; ☽ in the 8th H. at a Solar Ingress of the ☉ into ♀, and affl. the ♃, or planet ascending. See "Arguments for Death" under Death).

Duration of—Acute Diseases are of different duration, according to the severity of the disease and the afflictions, the degree of vitality, etc., and some acute diseases will resolve themselves on the 7th day, and others on the 14th, 21st or 28th days. An acute disease can last for 28 days, one complete revolution of the ♃, and if it does not resolve, or prove fatal, on the 28th day, it runs into a chronic form. (See Continuity, Duration, End).

Ease In—(See Magnetic).

Fevers—Acute Fevers—Causes of—Acute fevers are caused principally by the afflictions of ☉ to the ☉, Asc., or hyleg; by afflictions in the fiery signs, and such signs on the Asc. (See the influences of the ☉, ☽, the Asc., and fiery signs under "Causes" in this section. Also see Ephemeral, Fever).

Hot Diseases—Acute Hot Diseases—The ☽ weak and ill-dig. at B., and to the ☽ Regulus.

Liable To—Liable to Acute Disease, or Acute Fevers—(See "Causes" in this section).

Periods of Acute Disease—Subject to—Time When Apt to Come—The ☉ affl. at B. makes the native more liable to times of acute disease, and when the ☉ comes to the evil directions the Asc., or to the ☽ or ill-asps. ☽, and also when the Asc. comes to the ill-asps. the ☉ or ☽ by dir. An evil ☽ transit, affl. his place in the radical map, or passing thru the birthsign, or affl. the place of the ☉, ☽ or Asc. at B. may precipitate an acute disease, and cause a fever. (See "Periods of Bad Health" under Health).

Precipitated—An Acute Disease, or Acute Fever Precipitated—(See "Periods" in this section).

Prevalent—Acute Diseases and Sharp Fevers Prevalent—h lord of the year at the Vernal, in ♀, and occi. of the ☉ or ☽ in fiery signs; ☽ having sole dominion of the year at a Solar Eclipse. (See "Prevalent" under Fevers).

Quick Diseases—(See Quick).

Signs—The Cardinal Signs of the Zodiac are called the Acute Signs, and planets in them at B., and by dir., or at the time of decumbiture, tend to acute, rapid, short, and swift diseases. (See Cardinal).

Suffering—Acute Suffering—This is usually caused by the afflictions of ☽, as in injuries, wounds, and violence to the person. (See Injuries, Pain, Wounds, Violence). For the various kinds of Acute Diseases, and the parts of the body affected, see the subject, and the disease or condition you have in mind, in the alphabetical arrangement. Also see such subjects as Abatement, Acquired, Better, Cadent, Diathesis, Feelings, Fierce, Greivous, Hexas, Inflammation, Mild, "Acute" under Mind; Moderation, Pain, Quick, Rapid, Severe, Sharp, Short, Slight, Sudden, Swift, Vehement, Violent, Worse, etc.).

ADDISON'S DISEASE—(See Adrenals).

ADDRESS—(See Appearance, Manner, Speech).

ADENOIDS—A Vegetable Growth—Caused by afflictions in ♀ and ♀, and espec. in the 25° of these signs, when affl. by malefics in, or in evil asp. to this degree; H or ☽ in, or affl. the 25° of ♀ or ♀; H and ☽ combinations in ♀ or ♀, and also h in or near the 25° ♀, and afflicted; the ☉ in the 25° ♀ or ♀, and affl. by the ☽, ☽, or ☽ the malefics; h ☽ ♀ in ♀; h affl. in ♀ or ♀; ♀ ☽ ☽ in ♀ or ♀; ♀ in ♀ or ♀ in the Asc., and afflicted; caused by Subs at LCP and SP. (See Nose, Pharynx, Throat, Tonsils, Vertebrae). Cases—See Figures 3A and 3B in "Astro-Diagnosis", and Fig. 27, in "Message of the Stars", books by Mr. and Mrs. Max Heindel.

ADENOMA—A Glandular Tumor—Quite frequent in Scrofula. The Glands are strongly acted upon by ♀, and afflictions to this planet tend to disturbances of the glands, and to swellings and tumors. As a whole, the ☉ and ♀ rule the glands, and afflictions to these bodies may cause Adenoma, and other glandular troubles. (See Glands, Scrofula, Tumors).

Breast—Adenoma of—♀ affl. in ♀. (See Breast).

ADHESIONS—The union of two surfaces, or parts, and due to the degeneration of the parts, the restraint of the function or blood circulation in the part, the deposit of wastes and mineral substances, and is the work of h. The parts most liable to such affliction are those ruled by the sign containing h at B. Adhesions and fusion may also result from extreme heat in a part, causing melting of the tissues, or bones, the work of the ☉ and ☽ in ☽ in a fiery sign, and possibly with other planets also in the same sign, and espec. if the sign also be on the Asc. The fiery sign ♀ rules the spine, and the ☉, ☽, and many planets in ♀, afflicted, and espec. in the 5th H., the house of ♀, may result in adhesions, and ankylosis of the vertebrae, due to melting and excess heat. (See Ankylosis, Coalition, Heat, Mars, Stricture, Sun).

ADIPOSE—Fatty—Adipose Tissue—(See Fat).

Adipos—(See Corpulent, "Fat Body", "Fatty Degeneration" under Fat).

Adiposa Dolorosa—(See Fat).

ADJUSTMENT—(See Coordination, Incoordination).

ADOLESCENCE—Disorders at time of—(See Puberty).

ADOPTION—Of Children—Children Separated from Parents, and Adopted—(See "Death of Parents" "Separated", under Parents). The afflictions of ♀ in, or to the 5th H., often indicate the denial of children, and the necessity for adoption of children. (See Barren, Bastards; "Early Death" under Father, Parents).

ADRENALS—Suprarenal Capsules—Ruled by ♀ and the ♀ Sign. The Adrenals are Ductless Glands, and in a general way also come under the rule of ♀. When the mind has been greatly disturbed, and the poise and equilibrium lost for a time, due to the emo-

tional disturbances caused by ♃, ♂, and ♃, the Adrenal secretion tends to restore calm and quiet to the mind, and also when the heart action is weakened thru worry, melancholy, or sorrow, tends to act as a heart stimulant. Lack of the adrenal secretion tends to depression, dejection, despondency, gloom, and worry. (See Atrabile). During fits of anger, rage, or passion, brought on by ♂, and when the muscles are trembling and tense, the glycogen in the liver is released in larger quantities by the action of ♃, and acts as a soothing, calming influence, and to restore poise. (See Soothing). Thus the Adrenals, thru the saving and benevolent action of ♃, keep the body from being permanently weakened, destroyed, and thrown into disease, ill-health, or premature death, by the adverse action of the malefic planets ♃ and ♂ upon the mind. The Adrenals are said to be connected with the Personality. The Adrenals are quite fully discussed from an Occult and Metaphysical standpoint in the book, "The Message of the Stars", by the Heindels.

Addison's Disease—Tuberculosis, or Consumption, of the Suprarenal Capsules—Caused by ♃ affl. in ♁ or ♀.

Coma—Influence of Adrenals In—(See Coma).

Consumption of—Tuberculosis of—(See "Addison" in this section).

Diminished Secretion—Lack of Adrenal Secretion—♃ affl. in ♀ or ♁. (See Fainting).

Plexus—The Suprarenal Plexus—(See "Ductless Glands" under Ductless).

ADULTS—Adult Life—The ♃, ♀, and ♂ rule the earlier years of life, but when maturity is reached, then the ☉ and the larger, or major planets assume rule. Old age is ruled by ♃. (See Maturity, "Middle Life" under Middle; "Periods of Life" under Periods). There are diseases which are peculiar to adult life, and others to infancy, childhood, youth, middle life, and old age, etc., as the planets bear rule over the different stages of life, and the ruler of such a Period in life when affl. by directions tends to the special diseases, or afflictions, peculiar to that planet. (See Periods).

Duration of Life—Of Adults—(See "Long Life" under Life; Maturity, "Death at Middle Life" under Middle Life; Old Age).

ADYNAMIA—A Deficiency, or Loss of Vital Power—A ♃ disease. Also caused by Subs of the Atlas and Axis, and by ♃ affl. in ♀ or ♂, the signs which rule these vertebrae. (See Asthenia, Debility, Feeble, Infirm, Sickly, Vital, Vitality, Vertebrae, Weak, etc.).

AEROPLANES—Aviation—Death or Injury By—The ♂ sign, and ♃, have special rule over the Air and the Ether, and the evil directions of ♃ to the ☉, ♃, Asc., or Hyleg, tend to accidents in the air, and by machinery used in such service. Also to start an air journey when ♃ is badly afflicting the ♃ and ♂ tends to mishaps, injury,

death, and for a safe journey a propitious planetary time for the start should always be chosen. (See Accidents, Journeys, Railroads, Travel, Vehicles).

AFFLICTIONS—There are some morbid and pathological deviations, or diseases of the affections and the passionate nature. (See Deviations, Love Affairs, Passion, Perversions, Reins, Sex, etc.).

AFFLICTION—Afflictions—The 12th H. is known as the house of affliction, sorrow, self-undoing, confinement, restraint, limitation, etc., and planets affl. in this house at B. tend to a greater number of afflictions to mind or body. Also the planets ill-placed at B., and with many ☐ and ♂ asps. in the map, tend to multiply the afflictions, miseries, sufferings, ill-health, and troubles of life unless self-control, wisdom, discrimination, knowledge, and spiritual attainment enter in, and change, modify, or prevent the calamities of life on the Earth Plane. The planet ♃ is known as the Chastener, the Tester, the special Afflictor among the planets, and his afflictions tend to sorrow, trouble, delays, hindrances, restraints, worry, melancholy, and chronic forms of disease. However, Saturn people are patient under affliction. (See Saturn).

Bodily Afflictions—For the various diseases and bodily afflictions, see the subject you have in mind in the alphabetical arrangement.

Causes of Affliction—Afflictions in the 12th H., ruler of the 12th, a malefic, and espec. ♃, and in the 12th H.; the ☉ or ♃ or ill-asp. ♃ at B., and by dir.; the ☉ or ♃ joined to the Whale's Jaw, great affliction, sickness, disgrace, or ruin; ♃ or ♂ in the 12th H. (For further influences see Disgrace, Misfortune, Misery, Reversals, Ruin, Sorrow, Trouble, etc.).

Many Afflictions—The ☉ and ♃ in cadent houses at B., in weak signs, and afflicted, and espec. when in the 3rd or 6th H.; the ♃ decr. in light, and sepr. from the ☉ or ♃ at B., and applying to ♃; the ♃ at the Full, or incr., sepr. from ♀ and applying to ♂ in a day geniture; ♃ or ♂ by dir. in ♂ or ill-asp. the ☉, ♃, Asc. or M.C.; ♂ ♂ ☉ at a Solar Rev. All manner of afflictions are ruled by the 12th H. and its influences. (See Miseries).

Mental Afflictions—Mental Disorders—(See the various subjects under Mental, Mind. Also see Anguish, Anxiety, Dejection, Dementia, Depression, Despondency, Distress, Epilepsy, Fear, Frenzy, Hallucinations, Hypochondria, Idiocy, Insanity, Mania, Melancholy, Memory, Miserable, Obsessions, Paranoia, Sadness, Sorrow, Worry, etc.).

Parts of the Body—The Parts Afflicted, or Diseased—(See "Parts of the Body" under Parts; Upper, Middle, Lower).

Planets—Affliction By—(See Malefics, Planets. See each of the planets in the alphabetical arrangement).

AGARICUS—A typical drug of the ♃. (See Moon).

AGED PEOPLE—(See Old Age).

AGILE—Brisk, Nimble, Quick, Active Body—(See "Active Body" under Active; Brisk, Muscles, Nimble, Quick, Sports, etc.).

AGITATION—The ♃ affl. by ♀ at B., the mind and body are afflicted with agitation, and espec. with females. (See Excitable, Fretfulness, Nervous, Paralysis Agitans, etc.).

AGONY OF MIND—(See Anguish, Anxiety, Distress, Melancholy, Worry).

AGUE—Malaria—Intermittent Fever—Ague is threatened, and to be long-continued, when earthy signs are in the Asc., or on the 6th H., or the ♃ in an earthy sign at B., or at decumbiture, and also to threaten Consumption. (See Consumption); caused by ♀ when the dominion of death is vested in him; a ♀ disease; ♀ affl. the hyleg or the Asc.; ♀ in the 6th H.; ♀ in ☽ when ♀ is the afflictor in the disease; ♀, H, or ♀ in ☽, and affl. the ☉ or ♃; or the ☉ or ♃ to the ☉ ♀ by dir.; ♂ too much in evidence at B. (See Intermittent, Malaria).

Mother—The Mother afflicted by Ague—The ♃ in the 1st or 10th H., and affl. by ♀. (See Mother).

Quartan Ague—Arising from Cold—A disease and affliction of ♀; caused by ♀ when the dominion of death is vested in him; ♀ sole ruler at an eclipse of the ☉; earthy signs on the Asc. and 6th H. at B., or at decumbiture; the ♃ in ☽ ♂ or ill-asp. ♀ (or ♀ if he be of the nature of ♀) at the beginning of an illness, or at decumbiture. If the ♃ be decr., and near the body of ♀, the disease will tend to be long-continued (Hor'y). (See Quartan).

Tertian Ague—Tertian Fever—A ♂ disease, and caused by the afflictions of ♂; ♂ sole ruler at an eclipse of the ☉. (See Intermittent, "Low Fevers" under Fevers; Malaria, Miasma, Quartan, Quotidian, Remittent, Semitertian).

AILING OFTEN—Is Always Ailing—(See Feeble, "Ill-Health All Thru Life" under Ill-Health; Infirmities, Invalids, "Much Sickness" under Sickness).

AILMENTS—Indisposition of Body and Mind—(See Disease, Debility, Deformities, General, Ill-Health, Indisposition, Infirmities, Mental, Mind, Sickly, Sickness, Weak, etc.).

AIR—Atmosphere—The Air is ruled by H and ♀. The Ether is ruled by H. The condition of the air has much to do with health and disease, and the atmosphere is much acted upon by the planetary influences each day, and so much so that the weather can be predicted a year ahead by making a study of the planetary aspects and influences that will be forming, as is done by the Hicks Almanac People, of St. Louis, Mo. The air may be corrupted and vitiated by the planetary vibrations and aspects, causing dis-

ease, epidemics, famine, pestilence, fevers, and under certain planetary influences an epidemic may spread over the World, or parts of the World ruled by the Signs of the Zodiac involved in the planetary configurations for the time. This is the reason why Cholera, a disease native to India, will spread to other shores in certain years. The germs of certain contagious diseases are developed by atmospheric conditions spontaneously in different Countries, and not spread by the transmigration of germs, as commonly supposed. See the following subjects in the alphabetical arrangement when not considered here, which have to do with the air.

(Planets in perihelion tend to disturb the equilibrium of the gases of our atmosphere); ♀ in the ascendancy, rising in the ascendant, or lord of the year at the Vernal, tends to foul, noxious, stagnant, mephitic air, and conduces to the spread of fevers; ♂ sole ruler at a Solar Eclipse; ♂ in power at the Equinoxes or Solstices, or lord of the year at the Vernal, the atmosphere is parched by hot, blasting, and pestilential winds; ♂ in aphelion; the ☉ of malefic planets in

Signs—The Air Signs—Sweet Signs—Whole Signs—Nervous Signs—The Air signs are ♀, ☌, and ♃, which signs are in Δ aspect to each other, and in harmony. The fiery and airy signs are opposed to each other in the Zodiac, as ♀ and ☌, ♀ and ♃, and ♃ and ♄. The Air Signs are connected with Gases, Air Cells, Intercellular Spaces, Arteries, Veins, and the Capillaries of the body. The Airy and Earthy signs are the least excitable. They are related to the Intellect, and tend to worry and nervous troubles, and are classed as Nervous Signs. Air is co-operative, self-conscious, and impersonal. The ☉ in an airy sign gives a strong constitution, but of a refined and mental character rather than physical. These signs are next to the fiery signs in degree of vitality. The Air Signs are good for the ☌, and the ☌ is better placed in these signs than in fire signs, and tends to more normal and regular functions and secretions, as the airy signs are moist and warm, and especially ♃. The ☌ in these signs also gives a tendency to worry, anxiety, and mental strain, and liable to Anaemia, Blood, Kidney, and Skin Disorders. The Air signs tend to diseases arising from Corrupt Blood, as Gout, Leprosy, etc. Air Signs on the Asc. and 6th H. at E., or at decumbiture, or the Significators of the disease in an airy sign at the beginning of an illness, show Gout, Cutaneous Diseases, Scrofula, Corrupt Blood, etc. Afflictions in Air Signs tend to broken bones, and also to impure breath. People born under Air Signs, and with many planets in these signs, should sleep and work in well ventilated rooms, as they require more oxygen, and it is also well to live in a high altitude. Collectively the Air Signs rule the Lungs (♀), the Kidneys (☌), and the Blood (♃). They also rule the Breath, the Houses of Kin (Brethren), of Partners, Marriage, and Friends, and also give the Sanguine and Artistic Temperament. (See the subjects mentioned in this para-

graph. Albuminuria—Albumen in the Urine—The work of ♃, and is a ♃ disease; ♃ or ♀ affl. by the ☐ of ♃; ♃ ♀ ♀; the ♃ affl. in ♃; fixed signs prominent, with many planets in them, and espec. in ♃, ♄, ♀; a fixed sign on the Asc. This disease is especially caused also by Subs at KP, the Kidney Place in the Spine, and by afflictions in ♃. (See Bright's Disease, Kidneys, Urine, Vertebrae).

ALCOHOL—Alcoholism—A Toxic Psychosis—Given to Alcoholic Excesses—(See "Softening" under Brain; "Delirium Tremens" under Delirium; Drink, Drunkenness, Intoxication).

ALDEBARAN—Bull's North Eye—A star of the nature of ♃, in the 2nd face of ♄. This great star when affl. the ☉, ☽, and the planets of our Solar System, tends to cause extreme suffering to humanity, sickness or death, and when directed to the angles of the horoscope produces periods of terrible stress and nervous strain. For the various influences of this star see

Blindness, Blows, Calamities, Cuts, Danger, Death, Disease, Disgrace, Enemies, Face (Injury to); Falls (Death By); Fire, Hanging, Hot Disasters, Ill-Health, Indisposition, Injuries, Military, Peril, Pestilence, Pirates, Putrid Fevers, Rashness, Red Hair, Ruin, Sickness, Sight, Soldiers, Stabs, Stars, Strain, Strangulation, Surgeons, Trouble, Untimely Death, Violence, Violent Death. ALGOL—Caput Algol—Medusa's Head—Gorgon's Head—A star of the nature of ♃ and ♃, situated in the 5th face of ♃, and considered to be the most evil of all the fixed stars. The M.C. directed to Algol tends to make the native murderous, riotous, turbulent. The ♃ directed to tends to make the native dangerous and violent. Algol when in line of the R.A. of the ☉ or ☽ in a violent nativity tends to make a murderer, and to lead to an untimely end, and a tragic death. Robespierre was an example of this. (See Pearce's Text Book of Astrology, Chap. XIX, page 120). The Algol region of ♃ also tends to Apoplexy, and death by Spasms. (See Apoplexy, "Death" under Fits). In Hor'y Questions, the lord of the Asc. conjoined with Algol gives danger of death by illness or accident. (See Burns, Decapitation; Goiter; Hair; "Death by Sentence" under Judges; Operations).

ALIMENTARY CANAL—Alimentary System—Alimentary Tract—The Digestive Tube and Accessory Glands—Alimentation—Ruled by the ♃ and the ♃ Sign, and has to do with nourishment. Planets afflicted in ♃ tend to disorders of Alimentation, and of the Alimentary System. Such disorders are also caused by Subs at SP, the Stomach Place in the Spine. (See Assimilation, Digestion, Duodenum, Food, Indigestion, Nutrition, Oesophagus, Stomach, Vertebrae).

ALKALINITY—Alkaline—The positive Signs of the Zodiac, ♃, ♄, ♃, ♀, and ♀, are alkaline in a physiological way, and also the positive planets, the ☉, ♃, ♃, ♃, are alkaline in their influence. Several positive planets in positive signs, and with positive signs on the angles at B. tend to an excess of alkalinity in the body, an unbalanced body, and to lead to disease or discomfort, increased nervousness, alkaline urine, etc. Remedies under the rule of the negative planets or signs tend to neutralize alkalinity in the system. (See Acids, Electric. Also see "Drugs", "Remedies" under each of the planets ♃, ♃, ♃, ♃, the negative planetary bodies. Also see "Causes of Impure Blood" under Impure; Remedies).

Cells—Alterations In—(See "Alterations" under Cells).

Disease—Alteration In—(See Abatement, Amelioration, Better, Crises, Moderation, Modification, Recovery, Recuperation, Worse, etc.).

Tissues—Alteration In—(See "Alterations" under Cells. Also see Disintegration, Fruit, Inflammation, Metabolism, Metamorphosis, Putrefaction, Sensations, Tissues).

ALTERNATING—Alternating, or Clonic Spasm—(See "Clonic" under Spasmodic. Also see Intermittent, Remittent, Returning).

ALTITUDE—Location—Residence—People born with the ☉, ♃, and many planets in the airy signs, ♀, ♁, or ♃, or with the airy signs upon the Asc. and angles of the map, should live in the higher and mountainous altitudes where the air pressure is lighter, as the airy signs rule largely over the Air and Ether, and espec. the ♃ sign. (See Air, Ether). Also when a cardinal sign is rising at B., the native should live upon a hill, and in a commanding situation, for the best health. People born with the ☉, ♃ and Asc. in the watery signs have better health in the low altitudes, and at Sea level, and to live near water, as rivers, lakes, or the Sea. With a common sign on the Asc. at B., live at Sea level. With a fixed sign on the Asc., live in a valley. Lung diseases are usually found in people who have the ♀ sign strongly afflicted at B., and by dir., and Physicians have found out by experience that such cases are benefited by high altitudes, altho they may not know the reason unless they are students of Astrology. The star map of birth shows what altitudes and locations, and whether At Home, or Abroad, and what Countries, are best suited to the native for better health or success in life. (See "Air Signs" under Air; Heights, Location, "Native Land" under Native; "Place of Birth" under Place; Residence, Travel).

Amativeness—A strong desire to propagate, and is largely a ☉, ♃, 5th and 7th H. influence. Is a strong ♃ characteristic, as ♃ is the sign of children, and the 5th H., the House of children. The ☉ in ☉, or ☉ on the Asc. at B., tend to make the bump of amativeness prominent. Mars in the 5th H. at B., makes one highly sexed, and espec. when in asp. to ♀. The ☉, ♃, and ♄ signs are strongly sex-conscious. (See Amorous, Passion, "Sex-Conscious" under Sex).

(See Right, Left).

AMBITION—The Ambitions, Hopes, and Desires are ruled by the 11th H. (See Eleventh). The fiery and cardinal signs on angles, espec. the Asc., and many planets in fiery signs at B. tend to give ambition, and an active mind and body; many planets rising and elevated in the East at B., and espec. when also in the positive, and masculine signs. The influences which give ambition also give more power and ability to resist and overcome disease, to hold on and never give up in despair as long as there is life, whereas the negative people, and those lacking in ambition, succumb to disease more easily. (See Negative, Positive, Purposes).

Of No Ambition—The ♃ or ♄ ill-dig. at B.; ♄ weak and ill-dig. at B.; many planets setting in the West at B., and espec. when below the western horizon, ill-positd, afflicted, and in signs of little or no dignity, and also with the majority of planets in the negative, or feminine signs of the zodiac, and people born under these conditions tend to succumb to disease more easily, be without hope and courage, to worry and be melancholic, and often to commit suicide. (See Carelessness, Desires, Dull, "Lack of" under Energy; "Hopes Cut Off" under Hope; Idle, Improvident, Inactive, Indifferent, Inertia, Lassitude, Lazy, Lethargy, Listless, Sedentary, etc.).

AMBUSHES—Death or Injury By—The ☉ to the place the Bull's South Horn; the ♃ to the ♄ or ill-asp. ♃ by dir.; ♃ when the afflicting planet tends to;

AMELIORATION—Of Disease, Hurts, or Injuries—The same benefic influences which tend to ameliorate and moderate disease also tend to lessen the evil effects of a hurt or injury. The good asps. of the benefics in the afflicting configuration, the afflicting planet separating from a malefic, and applying to a benefic, tend to ameliorate and modify the disease, and give a more favorable prognosis. The influences favorable for amelioration and alleviation of the evils of disease, hurts, or injury, are quite fully considered under the following subjects. (See Abatement, "Escapes" under Accidents; Alterations, Better, Continuity, Course, Crises, Curable, Curtailed, Ease, Epilepsy, "Amelioration" under Hurts; Improvement, Insanity, Minimizing, Moderation, Modification, "Action" under Morbid; Prognosis, Recovery, Recuperation, Remission, Separation).

AMULETS—Charms—Talismans—Amulets were worn in Ancient Times against infectious and contagious diseases, and such are in use today. Certain metals and minerals, flowers or herbs, have inherent powers to ward off disease, evils, and mischief of various kinds. Copper is worn by the natives of India, and other Countries, against Cholera. Physicians use copper internally in bowel disorders, and copper is one of the best intestinal remedies for diarrhoea, dysentery, etc., and is a remedy taken from the Ancient and Oriental Peoples. In Hungary a copper plate is worn next to the skin to ward off Cholera. A Coral Necklace is worn against

Whooping Cough. (See Cholera, Contagions, Copper, Coral, Infections, "Birth Stones" under Stones; Whooping).

AMUSEMENTS—Play—Recreations—Sports, etc.—Amusements, Play, Love Affairs, Opposite Sex, Theatres, Women, etc., are ruled by the 5th H., and malefics in this house at B., a malefic ruler of the 5th, lord of the 5th H. in the 6th, 8th or 12th houses, and afflicted, or afflicting the hyleg, tend to make people less fortunate in Amusements and Recreation, and more subject to accidents, injury, or death in such pursuits. Also certain Fixed Stars, and the Nebulae, have an adverse influence in these matters, and espec. to cause injury to the eyes, and blindness from some accident to the eyes while at play. (For further influences along this line see the various paragraphs under Accidents, Blindness, Exercise, Falls, Frivolity, Hunting, Injuries, Pleasure, Recreations, Sports, Theatres, Travel).

ANARCHISTS—Anarchy—Dangerous to the Community and Society—Destructive—Riotous—Cranks—Bomb Plotters, etc.—In the star maps of Anarchists the malefics bear sway, as a rule, are strongly fortified, usually in angles, or rising and elevated in the East, and above the Luminaries; the ☉ ☽ or ill-asp. ♁; ♀ affl. in ♃ or ♃; ♀ affl. in ♃, bomb plotters; ♁ ☐ or ♄ ☽ at B; ♁ ☽ or ill-asp. ☽; ♁ in the 5th H., and espec. when affl. by ♀; ♁ affl. in the 9th H. tends to make red Anarchists and Fanatics; ♁ affl. in ♃; ♁ ☐ or ♄ ♃; ♃ affl. in ♃; ☽ in the 3rd or 9th H., and strongly afflicting ☽, the ruler of the mind; ☽ ☽ or ill-asp. ♀; ☽ affl. by ☽ and other malefics, and espec. by ☽, the planet of violence. (See Assassins, Dangerous, Destructiveness, Enthusiasm, Fanatical, Fury, Ideals, Ideas, Imprisonment, Notions, Politics, Radicalism, Rashness, Reactionary, Reformers, Revolutionary, Riotous, Sedition, Violent, etc.).

ANARETA—The planet which destroys life, and the Anaretic Place is the sign and degree occupied by the Anareta at B. Any of the planets can act as Anareta when the dominion of death is vested in it, and when the planet afflicts the hyleg at B., and by dir., in a train of evil directions, and also occupies an Anaretic Place at B. (See Killing Place). The dominion of death is vested in the planet which occupies an Anaretic Place at B., as in the 4th,

6th, 8th, or 12th Houses, and the planets ruling the signs on the cusps of these houses are the disposers of these places. The strength of the Anareta, and of the Anaretical Places, and the rulers of these places, must be considered in passing judgment as to the duration of life. The Anareta falling in the term of a malefic greatly increases the danger, but if in the term of a benefic, almost any asp. of the benefic would save life. A malefic in the term of ♃ or ♃ would lose much of its anaretic power, and be scarcely able to kill, and a benefic in the terms of a malefic would be rendered equally unable to save. The ☉ may become Anareta when the ☽ or Asc. are hyleg, and the ☽ may become Anareta when the ☉ or Asc. are hyleg. The ☉ or Asc. may become Anareta when the ☽ is hyleg. The ☉, ☽, and ♃, being variable, may become Anareta when in asp. to ♃ or ☽, unless a benefic give testimony, and also the ☽ can operate as Anareta when in evil asp. the malefics. The ☉ can be Anareta when he is in the signs of ♃, and evilly aspected by ♃ and ☽, and acting in a train of evil directions, and cause death. The ☉, ☽, ♃, ♃ and ♃ can act as Anareta in morbid deaths. When acting as Anareta, ♀ disposes to death in a riotous manner, assassination, or a violent death. ♁ as Anareta causes death by violent accidents, explosions, machinery, or by suicide. ♃ when Anareta causes death by falls, bruises, crushes, hurts and concussions. As Anareta ♃ and ☽ are equally destructive whether by day or night in nativities. ☽ when Anareta causes death by burns, scalds, fire, cuts, stabs, explosions, etc., according to the nature of the sign he is in, and aspects to him. Planets in the 8th H. at B. can act as Anareta, and cause death by accidents or injuries when they reach the Descendant, the cusp of the 7th H. by dir. The Part of Fortune, ☉, can become Anareta when the ☉, ☽, or Asc. are hyleg. A malefic when Anareta, and elevated above the Lights, will tend to a violent death, but if a benefic be elevated above the malefic, it will destroy or modify the anaretic tendency, and also the injurious effects of a malefic, when Anareta, will be greatly lessened if the ☉ and ☽ be elevated above the malefic at B. (See Apheta, "Arguments for Death" under Death; Directions, Hyleg. Also see the subject of "Death" under each of the planets, and note the kinds of death caused by the planets).

ANASARCA—General Dropsy—(See "Anasarca" under Dropsy).

ANATOMICAL CHANGES—♃ tends to change the body by retention of wastes, deposits, crystallization, decay, slowing up or stopping of functions, etc., and thus change the form and shape of the body, leading to deformities, disease, or death. ☽ changes the anatomy by too much heat in a part, causing fusion of parts, or the burning up of too much tissue. The ☉ also, when acting with ☽, and in a pathological way, will give a surplus of heat to a part, resulting in anatomical changes. The vertebrae of the

spine being subjected to much heat thru the afflictions of the ☉ and ☽, tend to melt the bones, and cause the spine to assume many different shapes. (See Ankylosis, Spine, Subluxations, Vertebrae). Each of the planets have a beneficial and a pathological, or disease and disturbing influence, according to their sign positions, aspects to each other, and to the ☉, ☽, Asc., or hyleg at B., and by dir. (See "Action", "Influence", under each of the planets).

ANEURYSM—A Dilatation of an Artery, The ☽ affl. in ♀; the ☽ and ♃ in signs which rule the arms, hands, legs and feet affect the vesicles and glands of these parts causing cysts, ulcers, aneurysms, and varicose veins; the ☽ in ♀, ☉, ♀, ♁, ♃, ♄, ♅, ♆, ♇, ♈, ♉, ♊, ♋, ♌, ♍, ♎, ♏, ♐, ♑, ♒, ♓, in parts ruled by these signs; ☽ in signs which rules the arms, hands, legs and feet tends to aneurysms and inflammatory complaints in these parts; ☽ in ♀; ☽ in ♀ in the 6th H., and afflicted; a ♀ disease, and afflictions in ♀; ♀ on the Asc. at B. Aneurysm of the arch of the Aorta is caused by afflictions in ♀, and by Subs at AP, HP, and Lu.P., and which may be caused by spasmodic gushing of the blood thru the aorta, and espec. when H is in ♀, and affl. by ♃ and ☽. (See Aorta, Arteries, Dilatations, Heart, "Blood Vessels" under Rupture; Varicose, Vesicles, Vessels).

(See Choler, "Choleric Temperament" under Choleric; "Desire Body" under Desire; Dispersions, Effervescent, Enmity, Excitable, Fighting, Folly, Frenzy, Furious, Leukocytes, Madness, Profane, Quarrels, Rashness, Riotous, Temper, Violent, etc.).

Angina Pectoris—Pain and oppression about the heart—A sense of suffocating contraction and compression about the lower part of the chest, and

associated with heart disturbances—Caused by afflictions in ♀; a ♀ disease; ☽ affl. in ♀; Subs. at HP, the Heart Place, and at Lu.P., 3rd Dorsal.

Case of Angina—See "Angina Pectoris", Chap. 13, page 90, in Daath's Medical Astrology.

ANGLES—The angles of the star map are the 1st, 4th, 7th and 10th houses, and correspond to ♀, ☽, ☽, and ♃. Planets in angles are very strong and powerful in matters of health and disease, and are stronger than when in succedent or cadent houses, and have more power for good or ill over the life of the native. The malefic planets in the angles at B. become more powerful, and tend to disease, accidents, downfall, misfortune, or calamity to the native periodically along thru life, and when the angles are afflicted by directions, or when planets in angles at B. afflict their own places by dir., or transits. Angles show strength and vitality, and do not hasten death. In diagnosing disease by Astrology, and giving a prognosis, the student should note the influences affecting the angles, and the cardinal signs, as well as the influences of the 6th, 8th and 12th houses. (See Cardinal).

(See "Atrophy" under Brain). Animal propensities depend almost wholly upon the ♃, her position and aspects, and the ♃ when afflicted tends to drink, debauchery, dissipation and gluttony. (See Desire). ♃ in evil asp. to ♀ gives larger animal propensities, and also ♃ in the 5th H. at B., and afflicted, or affl. ♀ and the ♃. ANKYLOSIS—The union or fusion of the bones of a joint, resulting in a stiff joint. Is caused by the η deposits of waste or excess minerals of the system. Also caused by the excess heat of the \odot and δ over the part, resulting in fusion and melting of the bony tissues. (See Adhesions, Anatomical, Joints). Ankylosis can occur between the joints of any part of the body, but is more common between the vertebrae, and in the hip joint, knee joint, elbow, wrists and finger joints. η in the sign ruling the affected joint tends to dry up the fluids of the joint, cause deposits, solidification, hardening, Gout in the joint, etc., resulting in a stiff joint, and ankylosis. The \odot δ δ in a sign, both hot and fiery planets, intensifies the heat in the part, and especially if in a fiery sign in the Asc. Thus the \odot δ δ in Ω , and with Ω on the Asc., would tend to fusion and ankylosis of the dorsal vertebrae; η affl. in Ω or π tends to ankylosis of the spine thru deposits; η in ψ would tend to a stiff knee joint, from deposits; η affl. in π , the sign opposite ψ , would tend to stiff elbow joints; η in π , the sign opposite κ , would tend to ankylosis of the finger joints, etc., due to cold, deposits, whereas δ in the same signs would tend to fusion by excess of heat. Improper kidney action, and Subs at KP, also usually enter into ankylosis afflictions, and in addition to adjusting the vertebra, or vertebrae, thru which the nerves pass to the part afflicted, KP, the Kidney Place in the spine, should be adjusted,

to aid in elimination, secretion, and proper kidney action. (See Coalition, Crystallization, Deposits, Gout, Hardening, Heat, Stiff, etc.).

ANTARES—Scorpion's Heart—Cor Scorpio—A violent fixed star of the 1st magnitude, situated in the 8° γ , of the nature of η and δ . This star has an inimical influence on the eyesight for evil, and when the \odot or Δ are with it at B., tends to blindness, weak sight, eye trouble, etc. This star by its conjunctions and evil asps. tends to bring many dangers and evils upon humanity, and is one of the most mentioned stars in the textbooks of Astrology, for his evils. The good asps. of Ψ to Antares tend to give increased Spiritual Sight of a favorable nature, and the evil asps. of Ψ to Antares tend to Involuntary Clairvoyance and Mediumship, Obsessions, Spirit Controls, etc. The adverse influences of Antares when with the \odot or Δ at B., or afflicting them by dir., are mentioned under the following subjects, which see in the alphabetical arrangement—Accidents, Acquaintance (Death of); Assassination, Assaults (Violent); Beasts (Attacks by Great Beasts); Blindness, Blows, Burns, Calamities, Cattle, (Attacks By); Conjunctivitis, Dangers, Death (Violent Death); Demoniactal, Disease, Disgrace, Distempers (Hot); Drowning, Enemies, Eyes (Injury To and Eye Trouble); Falls (Danger From); Female Friend (Death Of); Fever (In Whole Body, and Putrid Fevers); Hanging; Hot Distempers; Ill-Health, Imprisonment; Injury (See Eyes, Right Eye, Military Life, Violence); Mediumship (Involuntary); Military Life (Injury In); Mother (Death of); Obsessions; "Over-heated" under Blood; Pestilence (Sickness or Death By); Peril, Pirates, Putrid Fevers; Right Eye (Injury to); Ruin; Scalds; Sickness (Extreme); Sight (Weak Sight and Injuries to); Spirit Controls; Strangulation; Stress (Periods of); Suffering; Suffocation, Treachery; Trouble; Vehicles (Dangers by); Violence; Violent Assaults; Violent Death; Whole Body (Fever In); Wife (Death of).

ANTICACHECTIC—A therapeutic property of the \odot . (See Cachexia).

ANTIDOTES—An agent counteracting the action of a Poison. Each planet rules over certain drugs, herbs, minerals, metals and poisons, and as the planets are arranged in pairs of opposites in their effects, the poisons of one will be counteracted by drugs and remedies of the other. (For further consideration of this subject see Alexipharmic, Antipathy, Cure, Opposites, Poison, Remedies, Treatment).

ANTIMONY—A typical drug of η . (For use as a remedy, see Leprosy, Voluntary).

ANTIINFLAMMATORY—A remedy for inflammation of the Kidneys. φ remedies, and a therapeutic property of φ . (See "Inflammation" under Kidneys).

ANTIPATHY—Contraries—Aversion—Dislike—The planets which rule opposite signs of the zodiac are in antipathy to each other. σ rules φ , and φ rules σ , the opposite sign. Thus σ is opposed to φ , and the remedies of φ will oppose those of σ . Also planets in their exalted signs are opposed to the rulers of the opposite signs. γ is exalted in σ , and in vibratory, or therapeutical value, is opposed to η , the ruler of σ , the sign opposite to σ . Planets have antipathy to certain signs, which signs are their detriment or fall. σ , a fiery planet, is weak and disturbing to the health when in δ , a watery sign; η , a cold and dry planet, disturbs the body when in Ω , a fiery sign, as he is in antipathy with Ω , and has his detriment in Ω , and his fall in the fiery sign φ . Each planet also has its especial therapeutical value, some working in harmony with each other, and some opposing, and in treating disease with medicines these values should be kept in mind. (See Drugs, Praeincipients, Remedies, Signatures, Therapeutic Properties, under each of the planets. Also see Chemical, Herbs, Medicines, Minimizing, Opposites, Remedies, Sympathy, Treatment).

Disease by Antipathy—When the afflicting planet causing the disease is opposed, or an enemy to the planet which rules the part of the body diseased or afflicted, the disease is said to arise from antipathy. Thus diseases under η (δ) are treated by γ (σ) remedies. Disease under the σ (Ω) are treated by η (δ) remedies. Hippocrates and Galen taught antipathy and contraries in the treatment of disease. (See Hippocrates). Thus the expression, "Contraria Contrariis Curantur". Allopathy uses Contraries in the treatment of disease. (See Homeopathy). The Astrological selection of remedies has been based upon the antipathy or sympathy between the planetary influences ruling each herb, mineral or remedy. Among the planets η opposes the σ , φ and the δ ; γ opposes σ ; σ opposes η , γ , φ , δ , and the δ in the therapeutical ways, but σ is friendly with φ in helping to arouse the passions and the lower nature, and when the lower vibrations of σ and φ combine their forces in the unawakened soul, their influences tend to dissipation, debauchery, passionate excesses. φ opposes η and σ .

A planet when passing thru its own sign is less apt to cause disease in the part ruled by such sign, but planets when passing thru signs which oppose their own strong signs are apt to produce irritation or disease, as when σ (φ) passing thru σ (φ) tends to acute inflammation of the kidneys for the time if σ was afflicted by σ , or malefics at B. These rules will be easy to apply if the student will become thoroughly acquainted with the nature of each planet and sign, and then apply his knowledge to each case as it arises. A Table of the Friendships and Enmities of the Planets is given on page 241 in Dr. Broughton's Elements of Astrology. (See Kinetic).

Enemies—Antipathy Between People—Malefics in one nativity on the place of the σ , δ , or benefics in the other tend to antipathy and discord, and such are apt to dislike and mistrust each other, irritate each other, cause the other to weaken thru worry and discord, antagonism, etc., and to invite disease or an earlier death of the other in their natural unawakened states, and this is also the case when the Asc., or rising signs in the two maps are in \square or δ to each other between the two parties, and people who are contemplating marriage should see to it that their star maps blend if they would have the best of health, happiness, and contentment with each other. These rules also apply in the choosing of a Healer, Physician, or even a business associate. People also should avoid each other when the Asc. in the radix of one is on the cusp of the 6th, 8th or 12th house in the other. (For the rules in choosing a Healer, see "Compatibility" under Healers. Also see Enemies, Friends).

Healers—The Antipathy or Compatibility of a Healer to the patient—The magnetism of some Healers tends to kill the patient, while the magnetism of others, where the star maps of patient and healer blend, tends to the more quickly restore the patient to health, and thousands of lives would be saved if people knew Astrology, and would spend some time beforehand in deciding upon some one who is to be their permanent advisor and healer before sickness overtakes them. (These rules are further considered under the subjects of Healers, Polarity, Sympathy, and Treatment. Also see Hatred, Husband, Love Affairs, Marriage, Marriage Partner, Wife).

In such cases it is necessary at times to forcibly dilate the sphincter ani.

Piles—(See Hemorrhoids).

ANXIETY—Anxiety Neuroses—Anxious Fears—Worry—Fixed Ideas— ψ and η by their afflictions are the principal planets causing anxiety, worries, false fears, obsessions, and to give a sense of impending danger, calamity, ill-health, or reversals. The \times sign, and the 12th H. are also important to be considered in this connection, and espec. when occupied by malefic planets. Anxiety and worry are also more common with people born under the Mutable Signs, and who also may have many planets in such signs. Fixed Signs tend to the least worry and anxiety. Cardinal signs are usually too much absorbed in their plans and promotions to realize their dangers. Afflictions to the η also tend to increase fear, apprehension, worry, and anxiety. The 12th H. is the house of tribulation; worry, anxiety, affliction, self-undoing, confinement, imprisonment, distress, trouble, and people born with this house much afflicted tend to have more than their share of what they may call "Ill-Fate". The following are some of the important planetary influences which tend to produce anxiety.—The \odot σ of the Asc. by dir., much anxiety; the \odot , η , or ψ affl. in the 12th H.; an eclipse

APPEARANCE—The Physical and Personal Appearance—The Form and Figure—The Physical Appearance is denoted by the 1st H., and the sign upon the Asc., the Decanate rising, together with the sign occupied by the ruler of the rising sign. (See Decanates). Lilly judges the appearance from the sign ascending on the Asc., and the two signs containing the lord of the Asc., and the sign the D is in, and by mixing these influences judiciously takes the greater number of testimonies. He also takes the sign descending as playing an important part. The appearance is judged by the lord of the Asc., planets in or near the Asc., planets rising, and by the positions of the C and D , and their aspects. Planets which aspect the Asc. influence both mind and body, and tend to modify the influence of any sign, or planets in signs. When the latter part of a sign is upon the Asc., and a large part of the next sign in the Asc., and party will partake of both signs, and both will tend to influence the appearance and shape of the body. For example, a person having the latter part of I upon the Asc. may have a handsome forehead, and a fine head of hair, but with L also largely in the Asc. the rest of the face, and the lower part, the chin and jaw, may be very ugly. In the case of Twins, one being born with the last degrees of I on the Asc. may be tall, and largely of the I nature and appearance, while the second twin, born a little later, having L rising, would tend to be shorter, and perhaps more sickly than the first one, and also more ugly and crooked in appearance. The subject of appearance, and the form and stature of the body, are further considered under the following subjects, which see in the alphabetical arrangement.—(1) See subjects naming the parts of the body, as Chin, Dimples, Head, Hair, Eyes, Ears, Face, Lips, Mouth, Neck, Nose, Teeth, Shoulders, etc., and on down to the feet. The subject of Appearance is largely considered, and with references, under "Body", "Complexion", "Face", "Hair", and "Stature".

APPENDIX—Appendix Vermiformis.—The Appendix is under the internal rule of the ♀ Sign, and is also influenced by the ♀ Sign. Some Writers say ♀ rules the Appendix. Another modern Writer says it is his opinion that ♀ rules the Appendix, and that disturbances of this organ are closely associated with Psychic, Spiritual, and Astral causes.

Appendicitis—Diseases of the Appendix—Inflamed Appendix, etc.—Afflictions in ♀ and ♀, and espec. ♂ affl. in these signs; a ♀ and ♀ disease; the ☉ affl. in ♀; ♀ is a common afflictor in this disease, and with ♀ affl. in ♀ or ♀; ♀ affl. in ♀ or ♀, and espec. with ♀ in the 6th H.; a ♀ disease; ♀ or ♂ in ♀ or ♀, and afflicted; afflictions in or to the 18° ♀; afflictions in the first three degrees, and in the 22° of the common signs; afflictions in or to the 22° of ♀ or ♀; caused by Subs at CP, KP, UPP, and PP. planets when afflicted tend to abuses in eating. The sexual appetites are dominated largely by the lower vibrations of ♂, ♀, and ♀, and the afflictions of these planets to ♀. APPLICATIONS—

AQUARIUS—The Aquarius Sign (♒). The eleventh Sign of the Zodiac, and affiliated with the 11th H. Ruled by ♃ and ♃. This Sign is classed as an airy, diurnal, fixed, fortunate, fruitful (more fruitful than barren), hot, human, masculine, mental, moist, nervous, obeying, rational, sanguine, southern, speaking, strong, sweet (a sweet disposition), vital, western, whole, wintry, etc. The Sign gives a humane and spiritual nature, when well-aspected and occupied, and when on the Asc. at B., tends to give a strong and beautiful body, with good vitality. This Sign has close affinity with the sense of Sight, as ♒ corresponds to the etheric vibrations. It is also closely associated with the blood, its composition, circulation and distribution in the tissues, and afflictions in ♒ tend to great disturbances in the circulation, and to impure blood. The pathological action of ♒ tends to gloom, nervousness, and supersensitiveness, and being a fixed sign, to make disease more enduring, and the mind and habits more fixed and set. The planet ♃ is strong in this sign, and ♒ is considered the most spiritual sign, the Sign of "The Son of Man", symbolized by the Water Pourer, pouring out blessings and alleviation upon Humanity. Some great characters have been born with the ☿ in this sign, such as Abraham Lincoln, Thomas Edison, and others of note, who have proven great Benefactors of Humanity. The Color ruled by ♒ is sky blue.

AQUARIUS RULES—Each sign has an external, internal and structural rulership. Externally the ♒ Sign rules the calves and ankles. Internally, rules the circulation, the breath, and the eyesight. Structurally rules the bones of the lower limbs, as the Tibia, Fibula, Astragalus, bones of the Ankles. As a general classification, the ♒ Sign rules the following things, which subjects see in the alphabetical arrangement,—Achilles Tendon; Ankles; Arsenicum Album (see Arsenic); Astragalus; Blood; Breath; Calves; Circulation of the Blood (see Circulation); Color,—Sky Blue; Composition of the Blood; Eyesight (see Sight); Fibula; Heart, by reflex action to ♀; Internal Saphenous Vein; Legs from Knees to Ankles; Lower Limbs; Lymph; Nations (see Nations); Shanks; Shin Bone; Sky Blue Color; Teeth; Tendo Achilles; Tibia; Vein,—Internal Saphenous Vein; Vision (see Sight).

ARIES—The Aries Sign—(♈). The first Sign of the Zodiac, ruled by ♂, and affiliated with the 1st H. Each year when the ☉ passes into ♈ is known as the Vernal Equinox. (See Equinoxes, Vernal). The ♀ Sign is known as a barren, bitter, cardinal, choleric, commanding, diurnal, dry, eastern, equinoctial, fiery, fortunate, four-footed, hoarse, hot, hurtful, inflammatory, luxuriant, masculine, mental, movable, northern, violent sign, etc. It is the day sign of ♂, the exaltation of the ☉, and the fall of ♁. (See Cardinal; "Fire Signs" under Fire). This sign gives much force, energy, and vitality when upon the Asc. at B. It is known as the

"Cerebral Pole of Paracelsus." The Sympathetic Nervous System begins with this sign, and ends with the other ♂ Sign ♀, which latter sign is known as the "Genital Pole of Paracelsus". (See Scorpio, Sympathetic). The Form of the Body given by ♀ when on the Asc. tends to be dry, spare, moderately sized, strong, red or sandy hair, a piercing eye, and a swarthy or sallow complexion. The Symbol of this sign is the Ram. The Colors ruled by ♀ are white and red, or red and white mixed. For Countries ruled by ♀, see Nations.

ARIES RULES—Some parts of the head are ruled by the ♂ and ♀ signs, but the head, taken as a whole, is ruled by the ♀ Sign. Also ♀ exerts an internal, external, and structural rulership over various parts of the head, and these will be mentioned in this section. The head is a very complicated part of the body, due to its many parts and organs, and all of the planets have a special rule over the different parts and organs of the head. The Cerebellum, base of the brain, the chin, lower lip, lower teeth, lower jaw, eustachian tubes, and the inner parts of the ears, are ruled by the ♂ sign. The right ear is ruled by ♀, and the left ear by ♂. The nose and nasal bones are ruled by ♀. The ☉ rules the right eye in a male and the left eye in a female. The ☽ rules the right eye in a female, and the ☉ the left eye in the male. The Pineal Gland, optic nerve, and the conjunctiva, are ruled by ♀. The Pituitary Body, Dura Mater, and the membranes of the brain are ruled by ♀. The skull, teeth, and skin of the head and face are ruled by ♀. The arteries, blood, and blood vessels of the head are ruled by ♀. The nose, forehead, and muscles of the head, are ruled by ♂. The complexion, cheeks, chin and upper lip, are ruled by ♀. The cerebral nerves, mouth, tongue, lower lip, and the hair, are ruled by ♂. Externally ♀ rules the head, face, nose, ears, eyes, and mouth. Internally ♀ rules the brain and nerve centers. Structurally ♀ rules the cranium and facial bones.

Alphabetical Arrangement—Of the Rulerships of ♀. See these subjects in the alphabetical arrangement.—Aconite Napellus (see Aconite); Arteries of the Head and Brain (these are especially ruled and affected by ♀ in ♀); Blood Vessels of the Brain; Bones of the Face, Skull, and Cranium, except those of the Ears and Nose; Carotid Arteries (the Internal Carotid); Cerebral Hemispheres—Cerebro-Spinal System—Cerebral Nerves, (which are especially ruled and affected by ♀ in ♀); Cheeks (ruled and affected by ♀ in ♀); Chin (ruled by ♀ in ♀); Colors—White and Red, and White and Red mixed; Complexion (ruled and affected by ♀ in ♀); Conjunctiva of the Eyes (ruled and affected by ♀ in ♀); Cranium; Dura Mater; Ears (ruled by both ♀ and ♂). ARIES DISEASES—And Afflictions—The pathological action of ♀ tends to excesses, dryness, heat, inflammation, excess of forcefulness and energy. Being a mental sign, afflictions in ♀ tend to produce mental diseases and afflictions, and disorders of the brain. When afflicted at B., ♀ tends to heat and disturb the system, causing in-harmony. The first half of the ♀ Sign gives a stronger constitution than the second half, and also greater muscular development. Comets appearing in ♀ tend to bring sorrow to ♀ people, and Countries ruled by ♀. The health tends to be good for the time for ♀ people, and for Countries ruled by ♀, when the ☉ is lord of the year at the Vernal Equinox, and free from affliction, but the health is bad when the ☉ is afflicted at the Vernal, and when malefics are in ♀ at this time. A classified list of the diseases caused by each of the planets in the 12 Signs of the Zodiac can be found in a number of the standard textbooks of Astrology. ARISTA—A star in the 1st face of ∞ , said to be fortunate, and when ascending at B. to give good health, renown, happiness, contentment and success. This star is also known as Spica Virgo, and is of the nature of ♂ and ♀.

ARMPITS—(See Axillae).

ARMS—The arms are ordinarily said to be ruled by ♂, ♀, and the 3rd House. However, there are several divisions to the arms, the upper arms, elbow, forearm, wrists and hands, which correspond to their opposite parts, the thighs, knees, ankles, and feet. Most Authors and Writers assign the one sign ♀ to rulership of all parts of the arms, including the shoulders. The upper arms are under the external rule of ♀. The humerus, opposite to the femur (♂), is under the structural rulership of ♀. (See "Middle Cervical" under Ganglion). The elbow, opposite to the knees (♂), is under the external rulership of ♀. The forearm, consisting of the radius and ulna, opposite to the tibia and fibula (♂), is under the structural rulership of ♀. The wrists, opposite to the ankles (♂), are under the rule of ♀. The hands, opposite to the feet (♂), are under the external rulership of ♀. The nerves of the arms and legs are ruled by ♀; the veins by ♀; the arteries by ♀; the muscles by ♂; the bones and joints of the arms and legs by ♀. The arms, hands, legs and feet should be studied together, as they have many points in common, as opposite signs are complementary and affect each other, and diseases which affect the hands may also affect the feet, or vice versa, etc. The Arm Place in the Spine is the 7th Cervical and 1st Dorsal. (See Vertebrae).

Brachial Plexus—(See Brachial).

Long Arms—Slender Arms—H ascending at B.; ♀ ascending at B., and free from the afflictions of other planets; Π gives, or Π on the Asc.; the 3rd or 4th faces of ♄ on the Asc. The ♀ influence especially tends to long arms, hands, fingers, legs and feet. Π on the Asc., when modified by planets rising, may give long arms, but with short and fleshy hands and feet.

Short Arms—The ♃ gives; the ♃ ascending at B.; ✕ influence tends to short and fin-like arms and legs; the 4th and 6th face of ♄ on the Asc.; the ♀ influence tends to brevity of members. (See "Short" under Legs).

DISEASES OF ARMS—Diseases, Infirmities and Afflictions to the Arms—See the following subjects in the alphabetical arrangement when not considered here—

Abscesses In—(See "Arms" under Abscesses).

Accidents To—Cuts, Fractures, Hurts, Injuries, Wounds, etc.—Generally caused by the afflictions of ♃ or ♄, or both, in signs which rule the different parts of the arms, as in Π, ♄, ♀, or ♀; afflictions in Π or ♄; the ♃ in Π and afflicted by the ☉ or ♄; ♃ to place of the Pleiades or Praesepe; ♃ ♄ in the Asc. or M.C., in the latter degrees of Π or ♄; ♄ affl. in Π or ♄; ♄ affl. in ♄ in the 6th or 12th H.; ♄ ♄ the ☉ or ♃ in ♄ in the 6th or 12th H., and affl. by the benefics; ♄ affl. in Π, ♀, or ♄, and ♄ or evil asp. the Asc. by dir.; ♄ ill-asp. by ♄; Π on the Asc., and affl. by ♄, or with ♄ in Π in the Asc., espec. tends to fractures and wounds to the arms; malefics and afflictions in the mutable signs, and with such signs on angles, as all the mutable, or common signs, as Π, ♀, ♄, ✕, afflict each other, and the parts ruled by such signs. (See "Broken" in this section; "Fractures" under Legs).

Affected—The arms tend to be affected by the ☉ ♄; ♃ ♀; ♄ ♄; ♄ ♄; ♄ ♄; ♄ ♄; ♄ ♄. (See Table 196 in Simmonite's Arcana).

All Diseases In—Are signified by the 3rd H., the Π Sign, the planet ♄ and its afflictions, and also afflictions in the mutable signs and cadent houses; planets afflicted in Π, or the opposite sign ♄, tend to the greatest number of diseases and afflictions to the arms, as listed in the textbooks of Astrology. Many of the influences which tend to afflict the arms also afflict the lungs, bowels, hips, thighs and feet, parts ruled by the common signs. Subs at LCP, the 6th and 7th Cervicals, and at AP, the 1st Dorsal, and at HP, the 2nd Dorsal vertebra, tend to various disorders of the arms, hands and shoulders. (See Vertebrae. Also note the various subjects in this section).

The watery signs also greatly influence the blood. ♃ dominates the arterial blood, and ♀ the venous blood. The ☉ and the ♁ Sign, and the opposite sign ♁, have much to do with the disturbances and morbid conditions of the arteries. ♃ in ♑ especially affects the arteries of the head; ♃ ♄ rules the arteries of the neck and throat; ♃ in ♅, ♆, and ♁ rules and affects the arteries and veins of the respiratory system; ♃ in ♁ rules the arteries of the stomach; ♃ in ♁ rules and affects the arteries and right ventricle of the heart; ♃ in ♁ rules the arteries of the bowels and abdomen, etc. (See Veins). The ☉, the ♁ Sign ruled by the ☉, and its opposite sign ♁, have much to do with the disturbances and morbid conditions of the arteries, and also the afflictions of ♀ to ♃. The good asps. of the ♃ and planets to ♃ at B., and along thru life, tend to healthy arteries, and normal replenishment of the blood flow. (See Aneurysm, Arterio-Sclerosis, and other subjects in this section).

ASCELLI—The Cratch—Praesepe—A Nebulous Cluster in the first decanate of Ω , of the nature of σ and the δ . The Ascelli have special affinity with the Eyes and the Sight, and to cause Blindness when with the \odot or δ at B. Their influence is said to be malefic, and to cause a variety of afflictions when the \odot , δ , or malefics are near them at B. The Ascelli denote Death by fevers, fire, hanging, beheading, or some violent catastrophe, and often ruin and disgrace, when joined with the \odot in an angle at B. Their Evils are Wounds, Hurts to the Face, Bad Eyes, Blindness, Imprisonment, Disgrace, and every evil that can befall Humanity, when directed to the \odot , δ , or Asc. For the influences of the Ascelli, see the following subjects in the alphabetical arrangement.—"Acute Fevers" under Acute; Animals; "Bad Eyes" under Eyes; Beasts (Hurts By—See Animals; Beheaded (see Decapitation); Conjunctivitis; Crime; Defective Sight—(See Sight); Disgrace; Dissipation; Evils; Eye Disorders (see Eyes); Falls; Fevers—Death by, Inflammatory, Violent (see Fever); Gunshot; Hanging; Head—Pains In—(See Head); Honour—Loss of—(See Honour); Imprisonment; Inflammatory Fevers—(See Inflammation); Left Eye—Blindness In (see Blindness, "Left Eye" under Left); Liquids—Death or Injury By—(See Scalds, Shipwreck, "Hot Liquids" under Heat); Murderer (see "Murderous" under Murder); Pains in Head (see Head); Pestilence; Quarrels; Ruin; Scalds; Shipwreck; Sight—Danger to (see Sight, Blindness); Stabs; Violent—Violent Catastrophes, Violent Death, Violent Fevers (see Violent, and these subjects); Wounds. ASCENDANT—The First House—The Sign rising upon the Eastern horizon at B. Determines largely the physical

appearance, description of the body, height, weight, the degree of vitality, etc., and is very important to study in connection with health and disease. (See "First House" under First; "Passive Planets" under Passive; "Rising Sign" under Rising).

ASCETIC—(See Self-Denying).

ASCITES—Dropsy of the Abdomen—(See "Abdomen" under Dropsy).

ASH—Ashes—Waste Products in the System—The product of combustion and decay, and ruled by ν . All influences which tend to interfere with elimination, excretion and secretion, etc., tend to deposit ash, and clog the system—(See Clogging). The body becomes heavily charged with Ash in such conditions as Impure Blood (see Impure), Gout, Kidney Trouble, Rheumatism, Uraemia, Wasting Diseases, etc. (See these subjects. Also see Elimination, Excretion, Secretion, "Influence of Saturn" under Saturn, Wastes, etc).

ASPECTS—Aspect—Appearance—Look. **Commanding Aspect**—(See Commanding).

Lowering Aspect—(See "Downward Look" under Look; Stooping).

Planetary Aspects—No Planet is considered evil in itself, but it is their ever changing aspects, and angles they form with each other, that tend to make their influences and vibrations good or evil, positive or negative, contracting or expansive, etc. (See Reaction). The aspects of pathological importance are the σ , P., \square , and δ . (See Opposition, Parallel, Square). The four Signs of any one Quadruplicity implicate each other pathologically, as by the \square and δ . The most fortunate aspects that can be formed between the planets for good health and good fortune in life are γ σ , \ast , or Δ φ . The fortunate aspects between the planets are the \ast and Δ , and also the σ and P. between planets which are in harmony with each other. There are other good aspects, divisions of the \ast and Δ , which you can see listed in the Textbooks of Astrology. The evil, sinister, or adverse aspects, are the \square and δ , and the σ and P. when occurring between malefics, or when a malefic afflicts the \odot , δ , γ , φ , φ , or other malefics, by a σ or P. As a rule only the major aspects, benefic and malefic, are listed in this book, and when the good aspects are referred to, it means not only the \ast , Δ , but also all the minor good aspects, as the semi-sextile, quintile, etc. When bad aspects are referred to it means also the semi-square, the sesquiquadrate, and all sinister aspects referred to in the textbooks of Astrology. To print all minor aspects, good and bad, would involve the printing of thousands of extra symbol characters, which the Writer deems unnecessary. Many good aspects between the planets at B. tend to give better health, a stronger and better balanced mind, etc., while the evil aspects, and many of them at B. between the planets, tend to give a weaker constitution, more liable to ill-health, and also a more evil, un-

balanced disposition and temperament. (See Directions, Dominion, Evil, Good, Kinetic, Opposition, Orbs, Planets, Polarity, Separation, Sextile, Square; "Perverted" under Tonic; Trine, Triplicities, etc.).

(See Cyanosis, Drowning, "Non-Oxygenation" under Oxygen; Strangulation, Suffocation, etc).

Birth—Danger of Asphyxiation at Birth—Blue Baby— η exactly rising at B., on the Asc., or η exactly on the Descendant, or η δ the Asc. The η influence also tends to delay birth. The Poet Goethe had η exactly rising at B., which tended to delay his birth, and also nearly caused his death by asphyxiation at his birth. Cases—See Case of Premature Birth, and Asphyxiation soon after birth, Chap. XIV, page 102, in Daath's Medical Astrology. Also see Cases, "Strangled at Birth", No. 922 and 923, in 1001 N.N. (See "Delayed Births" under Children).

Cases of Death By Assassination,—In 1001 N.N. see the following cases and birth data,— "Duke", No. 701; "Russia", No. 738; "Terris", No. 789; "Austria", No. 809; "Italy", No. 840; "Portugal", No. 902. naries, and δ affl. by the γ ; δ Sig. in \square or δ δ ; η ill-positd at B., and in \square or δ δ . (See Anarchists, Crime; "Death By" under Enemies; "Patriicide" under Father; Homicide; "Murderous" under Murder; Plots, Robbers).

An Eclipse of the \odot in η tends to a prevalence of Assaults and Batteries. The planetary influences which lead to assaults cover quite a large and varied field. (See the following subjects in the alphabetical arrangement,—Ambushes, Assassins, Attacks, Blows, Bruises, Cuts, Enemies, Highwaymen; "Hand of Man" under Man; Homicide, Maiming, Mobs, Murder, Pirates, Prisons, Robbers, Ruffians, Stabs, Stones, Sword, Travel, Treachery, Violence, War, Women, Wood, etc).

ASSIMILATION—Absorption of Nourishment—Distribution of Food—The Assimilative System—Assimilation is a function of the π Sign. Also η rules the functions of Assimilation, Nutrition and Growth until puberty, and then Π takes rule. The assimilation of food is regulated by Π thru the Pituitary Body. The γ is assimilative in action, as she rules the stomach, and has strong rule over the receiving and preparing of the bodily sustenance. Assimilation is aided and furthered by the good influence and aspects of γ . (See Absorption, Alimentary, Digestion, Growth, Nutrition, Pituitary).

Impure Assimilation—Impaired and Poor Assimilation of Food—Disturbed Distribution of—The γ in π or π in the 6th H., and afflicted; Π δ δ in π ; η affl. in π , or ψ ; η δ γ , or the γ in π , γ δ δ in π , disturbed assimilation in the small intestines; δ δ δ in π , the π sign afflicted by the \square and δ aspects from common signs. The degree of Asthenia, and Low Vitality, will depend largely upon the severity of the afflictions of η to the vital places in the map, as to the \odot , γ , Asc., and Hyleg, and also the nature of the sign rising, etc. (See Adynamia, Anaemia, "Bad Health" under Health; Emaciation, Feeble, Infirm, Invalids, Pale, Plethora, Sickly, Vitality Low, Wasting, "Weak Body" under Weak; "Weakened" under Strength, etc).

ease of the ♃, ♄, the ♀ and ☽ Signs, of ♁ by reflex action to ♀, and also of the common signs. Important areas in the disease are the 18° ♀ and ♁, the 4° of ♀ and ☽. Also the last few degrees of ♀ and the first part of ☽. Also caused by Subs at LCP, the 6th Cervical; at AP, the 1st Dorsal; at Lu.P, the Lung Place in the Spine, and at HP, the Heart Place. (See Accommodation, Eyes, Sight). Case—See "Diseases to the Eyes", page 87, Chapter 13, in Daath's Medical Astrology.

ASTRAGALUS—The Ankle Bone—Under the structural rulership of ☽. (See Ankles).

ASTRAL BODY—The Sidereal Body—One of Man's Vehicles, and an exact counterpart of the physical body. The focal point of the Astral Body is in the Spleen. The Astral Body is the seat of the Sensations. The planetary influences work upon man strongly thru his Astral Body, his Aura, his

Mind, and his etheric parts, the Etheric Double, and it is thru these channels that disease and sickness gain their entrance to, and hold upon the body and mind. The afflictions of ♀ to the hyleg and mental rulers tend to make man subject to adverse Astral Influences, to obsessions, spirit controls, and death from such causes. In the Astral Body ♁ has direct relation to the Breath and the Blood, and ☽ and ♁ more especially to the sensations and passions, and as all diseases originate in, and have their counterpart in the Astral Body, it would be well for all students to study up on the subjects which have to do with the Astral Plane. The Astral Body is the mould, pattern, or counterpart, upon which the physical body is built, and when the physical body in utero is finished, and conforms to the Astral Model, birth takes place if conditions are normal. (See "Moment of Birth" under Birth; Blood, Breath, Build, "Desire Body" under Desire; Emotions, Liver, Neptune, Obsessions, Physical, Sensations, Sidereal Body, Spirit Controls, "Body" under Vital).

Astral Entities—Discarnate Spirits—Elementals, etc.—Are the Forces on the Astral Plane which greatly influence the mind of man, and to obsess, or bring diseases and troubles upon man, if they are of the evil types. (Good books to read along these lines are the Astral Plane books by Mr. Leadbeater, and also "The Message of the Stars" and "Cosmo-Conception" by the Heindels; "Realms of the Living Dead" by Dr. and Mrs. Homer Curtiss).

Astral Shells—The etheric counterpart of the physical body, which separates at death, usually remains in the vicinity of the corpse, which may be seen as a "Ghost", and disintegrates with the physical body. (See "Silver Cord" under Silver).

ASTRINGENTS—Astringents—Haemostatics—Contracting Agents—A therapeutic property of ♁, and tends to contract organic tissues and stop discharges. Acids are astringent. The influence of ♀ is also said to be astringent and contracting. (See Acids, Collyria, Contractions, Constrictions, Haemostatics, "Drugs", under Saturn).

AUNTS—The mother's relatives in a male horoscope are ruled by the 6th H., and in a female nativity by the 12th H. The father's relatives, as his brothers and sisters, your paternal aunts and uncles, are ruled by the 6th H. in a female nativity, and by the

12th H. in a male horoscope. The mother's relations are ruled by ♄, and those of the father by ♃. Relatives in general, on both sides of the house, are ruled by ♁, and his positions and aspects tend to indicate the danger of ill-health or death among them, sudden events in connection with their lives, etc., when ♁ at B., or by dir., afflicts the parts of the native's map which rule these matters.

The health and disease conditions of the body and mind affect the Aura, varying its colors, etc. The magnetic aura is strengthened by the * and △ aspects of ♁ to the Asc. The physical growth tends to be backward when the malefics afflict the hyleg at B., and when there are weak signs on the Asc., and the vitality low. Also caused by derangements of the Thyroid Gland. Precocity is the opposite condition to this and tends to premature development, and to Prodigies, Geniuses, etc. (See Bashful, Blushing, Dull, Genius, Giants, Growth; "Arrested" and "Deficiency" under Mental; Modesty, Precocity, Prodigies, Prudery, Retarded, "Slow" under Motion; Thyroid, etc.).

BALANCE—Equilibrium—

Balance of Movement—The ♁ Sign gives grace and balance of movement. (See Coordination, Dexterity, Incoordination, "Muscular Action" under Muscular; Rhythm, Walk, "Well-Balanced" under Well).

Lack of Balance—The planetary influences and aspects at B., when not well-balanced, as when many planets are out of dignity and in evil aspect to each other, tend to cause the mind and body to be one-sided in their manifestations, and more apt to lead to mental and physical disorders until the Soul becomes awakened, and learns how to rule its stars. These evil, or negative planetary influences at B., and by transits, directions, etc., are sent upon us to try the Soul, and for experience, and no Soul can find peace, soul-growth, or any very great degree of satisfaction in earth life until it learns to conquer the "Monsters of the Zodiac" and keep its poise and balance at all times under the ever-changing planetary aspects and influences. The ♁ sign is called the Sign of "The Balance", or The Scales. (See Equilibrium, Harmony, Libra). Diseases of the Mind and Body are due to an unbalanced condition of mind and body, as a rule, and also due to sin somewhere in the life, now or in the past. The subjects in this book are taken up largely with Diseases, and the unbalanced conditions, and what you have to rule and overcome in life.

BALANITIS—Inflammation of the Glans Penis—(See Penis).

BALDNESS—Alopecia—Falling Hair—Loss of Hair—Baldness is due to an excess of heat in the system, causing

a dryness, lack of proper circulation in the scalp. The fiery signs strong at B., on the Asc., and also well-occupied by planets, tend to baldness, and especially when the scalp fits tightly over the cranium. A loose scalp gives more freedom of circulation and nutrition to the part. The earthy and watery signs tend to give plenty of hair, and to retain it. The airy signs give a heavy head of hair, and tend to grayness rather than baldness. Some people are destined from birth to baldness, which is the normal condition for them, and the teachings in the Occult books are that any relief is only temporary, and massage and tonics may succeed for a time in restoring the hair, but when discontinued the hair falls out again. Some signs and influences at B. give an abundance of hair on the head and body, while others give little, or no hair. (See Beard, and the various paragraphs under Hair). The following planetary influences tend to Baldness—The ☉ in a fiery sign at B., and espec. in ♁; fiery signs upon the Asc.; many planets in a fiery sign, rising, and espec. in the Asc.; the ☉ and ☽, the fiery planets, in a fire sign, and espec. in ♁, and in the Asc.; the ☽ ☽ the ☉ or ☽ in ♁, and espec. when in the Asc.; ♁ occi. of the ☉ at B. tends to fewer hairs on the head and body; born under the ☉, as with ♁ on the Asc., soon becomes bald; ♃ ruler of the Asc., and occidental; ♃ in ♃, and espec. with ♃ on Asc., rapid falling out of the hair early in life, and in youth; ♃ Sig. ✕ or △ ♁, and ♁ well-dignified; ☽ in ♁, and in □ to ♁ in ♁; ♁ influence, and with ♁ on the Asc., the sign ruled by ♁; an ♁, ♁, and ♃ disease, and with these signs upon the Asc.

Case—Loss of Hair and Eyebrows—See "Aqueous", No. 120, in 1001 N.N. (See "No Hair" under Hair).

Early in Life—Bald Early in Life—Premature Baldness—Quickly Bald—The ☉ afflicted at B.; the ☉ rising in fiery signs or fiery signs afflicted on the Asc.; ♁ or ♃ rulers of the Asc., and occi., as when between the 1st and 4th houses, or between the 10th and 7th H.; ♃ and ♁ affl. in ♃; ☽ afflicting ♁, and ☽ elevated above ♁; ☽ in ♀, ♃, and afflicting ♁; ♃ on the Asc.; many planets in fiery signs at B., and espec. when rising in the Asc.

Forehead—Bald About the Forehead—The ☉ rising at B.; ♃ and ♁ affl. in ♃, and espec. when rising in the Asc.; ♃ on the Asc. (See Forehead. Also see "Temples" in this section).

Inhibited Growth—Of Hair—The ☉ or ♁ in the 5th ♁ or ♃; ♁ tends to inhibitions in any part of the body, according to the sign or house he is in, and espec. when affl. the ☉, ♁, Asc., or hyleg. (See Inhibitions).

Loss of Hair Increased—The high fevers of the ☉ in ♁, or ♁ on the Asc. and afflicted, tend to cause the hair to fall out rapidly, or cause complete baldness for a time after illness; the ☉ or ☽ in ♁, and espec. with ♁ on Asc., due to too much heat in the head

and scalp; ♁, the ruler of ♁, occidental; ♃ in 1st H., and affl. by ☽ or ♁, and espec. with ♃ in ♃; ☽ or ♁ holding dominion at B., and in familiarity with each other, and ☽ affl. the hyleg and elevated above the Luminaries; ☽ Sig. in ♁, without much hair; ☽ in ♁ and □ to ♁ ♁; ☽ ☽ ♁ tends to increased falling of hair; look to the aspects of ☽ and ♁ to the Asc., to each other, and their strength or weakness, exaltation or detriment, etc.; ♁ in 6th H., and affl. by ☽; ♁ ori. at B.; ♁ or ♃ on the Asc. at B.

Scanty Hair—Fewer Hairs on Head or Body—♀ Sig. in ♁, scanty, but grows long. (See Beard; "Body", "Disorders", under Hair).

Temples—Bald About the Temples—Hair Growing Off the Temples—♃ on Asc. at B.; many influences in fiery signs; ♃ ♃, or ♃ ori. at B.; ♃ ♃ in Asc. (For further study see "Abundance", and the various paragraphs under Hair).

BALSAMIC—A therapeutic property of ♃. Produces an agent resembling a balsam.

BANDITS—Death or Injury By, and especially during Travel—♁ and ☽ in human signs and controlling the Luminaries. (See Highwaymen, Robbers, "Dangers", under Travel).

BANISHMENT—The ☉ directed to all Nebulous Clusters, and to Castor and Pollux, threaten banishment, and which may result in sickness and early death. (See Exile).

BAPTISM—The Planetary Baptism—The influences of the planetary vibrations stamped upon you at B., when you breathe in the magnetism of the Universe at your first cry. This is the photograph, the negative of your tendencies, possibilities, the diseases subject to, the picture of your personality, and the nature of the environment you will be apt to encounter in this day of school in earth life, and to gain experience, learn the necessary lessons for Soul-growth, etc. The map of birth is the foundation upon which you are to build a superstructure, and how you build will depend upon your degree of advancement, your spiritual insight and foresight, and your attainments, self-control, poise, balance, etc. (See "Moment of Birth" under Birth, Moment. Also see Fate, "Map of Birth" under Map; Nativity; "Free Will" under Will).

BARBERS—The ☽ influence strong at B., ☽ the ruling planet, or ☽ well-asp. in the 10th H., tend to make good Barbers, as well as Chemists, Surgeons, etc., and all who use sharp tools and instruments in their vocation. (See Chemists, Healers, Surgeons).

Barber's Itch—Inflammation of the Hair Follicles of the Face and Neck—Sycosis—Caused by afflictions in ♁, as a rule, and with ☽ in ♁ in the Asc., and also by ☽ ♁ in the Asc. or in the 6th H.; caused by Subs at MCP, the 4th Cervical, and also by Subs at KP, afflictions in ♁, as such are usually

due to retained poisons, and lack of proper secretion and elimination. (See Itch, Ringworm, Vertebræ).

BARRENNESS—Sterility—Unprolific—Impotency—Unfruitful—With animals the propagative faculty is in charge of the Group Spirits presiding over the different classes of animals. The mixture of blood between animals of different species tends to sterility. The Mule is a hybrid and sterile because the horse was bred with the Ass, two different species. This displeases the Group Spirits of Horses and Asses, and sterility is imposed upon the crossed offspring to prevent its further propagation. The Human Family in its evolution is beyond the power of these Group Spirits, and Races can interbreed without the penalty of sterility, as is the case with animals. However, certain Races become sterile sooner or later, and die out when they finish a Cycle in their evolution, and are ready to enter a new Race. Thus the Bushman of Australia are being exterminated thru sterility, and in spite of all the British Government is doing to perpetuate and increase their numbers. The Occult and Inner side of this question is quite fully discussed in the book, "Cosmo-Conception", by Max Heindel. Also see the subject of "Seed Atom" in this same book.

Barren Signs—Barren Planets—In Astrology there are certain Signs of the Zodiac known as Barren Signs, as ♀ (rather barren), ♀, ♀, and ♀. The planets classed as Barren are the ☉, ♀, ♀ and ♀, which signs and planets tend to deny or kill the children when found in the houses of children, as in, or on the cusps, of the 5th or 11th houses of the parents, one or both parents. Also Cauda (♁) is classed as a barren influence, of the nature of Saturn. Both parents must have fruitful maps in order to have children, and also the Seed Atom of an incoming Ego must be implanted in the spermatozoa of the father to produce a normal child, and one with an Ego and Spirit. The Givers of children are the ♀, ♀, and ♀, when in the houses of children and well-aspected, and also the watery signs are classed as fruitful. (See Fruitful). In studying thru a library of Astrological Textbooks, I have recorded and classified the following planetary influences given as reasons for sterility, or the denial of children.

Causes of Barrenness—Children Denied—The Map of Husband or Wife Barren—Impotency—Unfruitfulness, etc.—The ☉ and malefics in barren signs, and dominating the houses of children, the 5th and 11th houses, and also the M.C., or Zenith, and the benefics below them; the ☉ and the malefics being the rulers of offspring in the map, and in barren signs, and without the good aspects of ♀ or ♀, and the malefics elevated above the benefics; the ☉ in ♀ and afflicted; the ☉ and ♀ in the 5th H., and afflicted in barren signs; the ☉ in the 5th H. causes barrenness, except he be in a watery sign, and even this doubtful;

if the ☉ be joined to ♀, and apply to the ♀, ♀, or ♀ of both ♀ and ♀, and angular, and espec. in ♀, ♀, ♀, ♀, or ♀, the native will be wholly unfit for generation; the ☉, ♀, ♀ or ♀ in the 5th or 11th houses, and afflicted; the ☉, ♀, and ♀ deny children, or allot but few, espec. when in the 5th or 11th houses and afflicted; the ☉, ♀, ♀, or ♀ in the 5th H., or a barren sign on the cusp of the 5th., and the ♀ in a barren sign, or if the lord of the 1st and 5th be in evil asp. to each other, or with ♀ or ♀, are all causes of barrenness; the ☉ to the ill-asps. ♀ by dir., a barren time; the ♀ in ♀, ♀, or ♀, and in evil asp. to the ☉, ♀, ♀, ♀, or ♀, denotes barrenness; the ♀ sepr. from the ☉, and applying to ♀ in a day geniture; the ♀ in a husband's horoscope, and the ☉ in the wife's, applying to ♀, ♀, or ♀ in the 5th H., there will be no family unless there be powerful testimonies for fruitfulness in both maps, and even if children are born they are subject to early death; the ♀, ♀, and ♀ weak, afflicted and unfortunate at B., and not in fruitful houses or signs, tends to deny children; one or both Lights in an angle, and espec. in the 1st or 7th houses, or in the 6th in ♀, ♀, and ♀, no children, and if a female is liable to abortion; ♀ tends to deny children, or allot but few; ♀ affl. in the 5th or 11th houses, or afflicting these houses, denial of children; ♀ in 5th H. in ♀, ♀, or ♀ denies children; ♀ in the 11th H., and ♀ in ♀ asp. to the cusp of 5th H.; ♀ affl. in ♀ or ♀; ♀ ♀ ♀ in the 7th H.; ♀ and ♀ in the western angle and afflicted; ♀ in the 5th or 11th houses, and afflicted; ♀ tends to deny children, or allot but few; ♀ in an angle and afflicting both the ♀ and ♀; ♀ or ♀ in the 5th H., or ♀ or ♀ in evil asp. to the 5th, or its lord, or the Signs, or Benefics be in barren signs, and if any born they will not live; ♀, a cold and barren planet, in the 11th H. frustrates the hope of children in Hor'y Questions, and espec. if at the same time there are barren signs on the Asc., or cusp of the 5th; ♀ in the 5th or 11th houses, and afflicted; ♀ denies children, or allots but few, when afflicting the houses of children; ♀ in ♀ or evil asp. the cusp of 5th H., and with ♀ in the 11th H.; ♀ afflicted by the malefics; the atonic action of ♀ tends to sterility; ♀ affl. in ♀; afflictions to ♀; a ♀ disease or affliction; ♀ in a ♀ sign, and affl. by the ♀ and ♀; ♀ and the ☉ in the 5th H., in barren signs and afflicted; a cold and dry body, ruled by ♀ or ♀, tends to make the nature unprolific; ♀ denies offspring when occidental if in a barren sign and configurated with barren planets; ♀ either gives or denies children according to the planets he is configurated with at B.; malefics in the 5th or 11th houses in barren signs; the malefics ♀, ♀, ♀, and also the ☉ and ♀, when in the houses of children, and afflicted, or in barren signs, tend to deny children, allot but few, or cause their early death; the malefics and the ☉ being the rulers of offspring, and in barren signs, and without the good asps. of the benefics, and

the malefics elevated above the benefics; the malefics ori. and angular, and afflicting the ruler of the 5th H., or elevated above such ruler, and also afflicting planets in the 5th, tend to deny children, and espec. when the ruler of the 5th receives no help from the benefics, and with no benefics or givers of children in the 5th H., or in fruitful signs; a malefic in a house of children, and espec. if with the ☉, the native will always be barren; ♀ is rather barren because of ♂; the ♃, ♆, ♁, or ♀ signs on the cusp the 5th H., and with no intercepted sign in the 5th, are indications of no offspring; ♀ is called a barren sign because ♃ has no particular sex; ♆ is wholly barren because the ☉ is barren; ♁ or ♀ on the Asc., 5th, or 11th houses tend to deny offspring; the ♆ sign, or the ☉ and ♂ in ♁ on the cusp of the 5th H., the human plant is scorched by excess of passion before it has time to grow; ♃ is rather barren because of its ruler ♃; ♁ is the least fruitful of the watery signs because of its ruler ♂; ♃, ♁, and ♀ are classed as indifferent signs, neither fruitful nor barren; ♃ is rather barren because it is the sign of ♃, and the exaltation of ♂; ♃ on the Asc. at the Vernal Equi., Places and Peoples ruled by ♃ suffer from great sterility; ♃ is more fruitful than barren; the lord of the 11th H. a malefic, and in the 5th H. and afflicted; planets which promise or deny children, when posited together in prolific signs, and in ♂, or afflicting each other, tend to deny children or cause their early death, or very few will be reared; a barren sign on the Asc. or cusp of 5th., and espec. on the cusps of both the 1st and 5th at the same time, as ♀ on Asc., and ♃ on the 5th; barren signs in, or on cusps of 1st and 5th, without their Sigs. being in reception, good asp., or translation, the party will not conceive; a barren sign on the cusp of the 4th H., the house denoting the end of all things, gives little hope of ever having children in Hor'y Questions. Barrenness is also caused by Subs at the Private Place, PP, the 2nd, 3rd, and 4th Lumbar vertebrae. (See Vertebrae). For collateral study, and for further influences along this line, see Abortion, Children, Conception, "Cold and Dry Body" under Dry; Fruitful, Gestation; "Anchorite" under Husband; Impotent, Maimed, Men, Pregnancy, Unprolific, Wife, Women.

BASAL GANGLIA—The Ganglia at the base of the Brain—(See "Basal" under Ganglion).

BASHFULNESS—Shy—A ♃ influence; ♃ in the 1st H. at B.; ♃ ruler of the Asc. at B., and afflicted; a characteristic of ♃ people; the ♃ influence also tends to make one "Bashful as a Virgin". (See Backwardness, Modesty, Prudery, Reserved, Retiring, Shy).

BASTARDS—Illegitimate Birth—Children Born Out of Wedlock—The 5th H. should be especially noted.

General Causes—♃ in the 5th H., or afflicting the 5th, or planets in the 5th; ♃ ruler of the 5th H. at B., and by dir. in ♂ or evil asp. the Asc., and

espec. if ♃ afflict ♂ and ♀ at B.; the ☉ in the 5th H. is an indication the child may be illegitimate if there is any doubt or question about it.

Horary Questions—In Lilly's Astrology Horary Questions are considered along the following lines: (1) Is the Child Legitimate and the Child of the Reputed Father? It is if the following conditions exist in the Horary Map,—The lord of the Asc. and the ♃, signify the Querent, and the sign of the 11th H., and its lord, signify the Issue. If these Sigs are in * or Δ asp. in the hor'y map, and behold each other with reception, or not, the conception is legitimate, and the child of the supposed father. If the Sigs be in □ or ♂ asp. in close or perfect asp., and with reception; lord of the Asc., or ♃ be in the 5th H., or lord of the 5th be in the Asc., and with no evil asp. from the malefics, with one of the benefics in favorable asp. to the cusp of the 5th, or lord of the 5th, then also the child is legitimate. (2) The Child May Not be Legitimate—The Husband has Children by other Women than his Wife—Or the Wife has Children by other Men than her Husband—If none of the foregoing aspects and conditions concur; if ♃, ♂, or ♃ are in ill-asp. to the lord of the 5th, or the cusp of the 5th, there may be suspicion of adultery, or that the child is not the child of the Querent. Also if the lord of the 9th is in the 5th, and espec. if the lord of the 5th afflict the lord of the Asc., the husband may have children by other women, or the wife by other men. (See Adoption. Also see Case No. 688, "Illegitimate Birth" in 1001 N.N.).

BATHING—Bathings—The planet ♃ has special rule over bathing, swimming, etc., and his afflictions tend to bring dangers in connection with bathing and the water, and to cause the unexpected. There are times when it is dangerous to go near water, or to bathe in the Ocean, and the many deaths recorded from Sea bathing, and by drowning while bathing, have a close relation to the afflictions of ♃, and also to the afflictions of ♃ for the time. Accidents by water and bathing usually come on scheduled time unless you are forewarned of the dangers, and keep away from large bodies of water, or even be careful in your own bathtub, when these adverse planetary aspects are operating. (See "Dangerous", "Disease" in this section. Also see "Water" under Skin).

Bath House Keepers—Good influences for are ♂ and ♀ rulers of the employment and ♃ conjoined with them.

Birthday—Anniversary of Birth—The Solar Revolution—The time when the ☉ passes over the same degree of the

Zodiac he was in at B. The birthday each year begins your new year, and when the vital forces of the body begin to take on new and greater activity. During the period of 105 days before the birthday the forces of the body are usually at their lowest ebb. In each life the year is divided into seven divisions, or days, corresponding to the days of the week, periods of 52 days each, and the 105 days before the birthday are the Friday and Saturday periods of the year for the native. The Friday Period is the 52 days "On the Cross", and the Saturday Period the 52 days "In the Tomb", and these are usually very difficult and trying periods of the year for the average person unless he is settled, contented, prosperous, and of good health. These Periods and Cycles are discussed in the book called "Periodicity", by Dr. James Buchanan. (See "Solar Revolution" under Solar).

Birth Place—(See "Place of Birth" under Place).

Birthrate—The birthrate is increased when the ♃ is in the 5th H. at a Vernal Equinox, Ingress, or Solstice, and well-affected by the benefics, and decreased when the ♃ is in the 5th H. at these times, and afflicted by malefics, and with no assistance from the benefics).

Birthstones—(See this subject under Stones).

Blind from Birth—(See this subject under Blindness).

Cause of Birth—From a physical standpoint the immediate cause of birth of the body into the world is due to the influence of ♂ and the ♃. The violent influence of ♂ ushers the child into the world, and normally at the 10th menstrual period, which periods are ruled by the ♃. There exists in Nature a sympathy between parent and child, and children are born at a moment when the constitution of the heavens is such as to produce one with the traits and characteristics of one or both parents. Family resemblances are thus handed down in this way. (See "Moment of Birth" under Calamity; Foetus, Gestation, Heredity, Nativity, Parturition, Prenatal Epoch).

BLADDER—Vesica—Receptacle of the Urine—Vesical Muscle—All vesicles, or containers, which hold liquids and fluids in the body, are fundamentally ruled and influenced by the η and the ε sign. The urinal bladder is under the internal rule of the m sign. Also δ has affinity with the bladder. According to the various Authors and Textbooks, the Bladder is ruled by h , δ , the η , \sphericalangle , m , and the 7th and 8th houses. Elimination of the urine thru the bladder is ruled by δ and m . In infants the bladder is largely ruled and dominated by the action of the \odot and η working thru the \sphericalangle sign, and gives way to the Renal Diathesis. (See Hypogastrium). Note the following diseases and conditions concerning the Bladder:

BLEMISHES—Blemished—Bodily Blemishes—External Blemishes—Ptolemy associates the words "Diseases and Blemishes", in giving the causes of Disease. (See "Causes of Disease" under Disease). The Asc. rules over Blemishes and External Complaints. The Asc. affl. by \odot tends to hurts and blemishes; H, η , or ζ on the cusp of the 1st, 6th, or 7th houses, or in exact evil asp. to these degrees, and espec. if the \odot or η be in \odot or δ in the 1st or 7th houses; H, η , or ζ ori. tend to blemishes or hurts; the η is said to give blemishes when she is in Tropical or Equinoctial Signs, as in Υ , ε , \equiv , ϕ ; malefics ori., and in evil asp. the Lights, but if occi. cause diseases; malefics in angles, occi. of the \odot , and ori. of the η , and with no benefic configurations of the benefics to η or ζ , or to the \odot or η , the blemishes become permanent and can never be removed, and espec. if the malefics be fortified and elevated above the benefics. If the benefics in the foregoing configuration are elevated above the malefics, the blemishes will be mitigated, and may entirely disappear or be removed. Eyes—Blight In the Eye—(See "Blight" under Eyes).

BLINDNESS—Loss of Sight in One or Both Eyes—Light Rays are transmitted by H, which planet rules the Ether. Thus H indirectly tends to affect the eyes thru the light rays, and cause blindness or eye diseases. (See Ether, Light, Retina, Uranus). The Nebulous Spots in the heavens when found with the \odot or η at B.

also tend to blindness, and many eye disorders and weaknesses. (See Nebulous). In the Hindu System of Astrology the 2nd H. is given rule over the eyes, and afflictions in or to this house tend to impair the sight, or cause blindness. The malefics, when with the \odot or η at B., or with Nebulous Stars, increase the danger of blindness. Under the heading, "Causes of Blindness" in this section will be given the influences of the \odot , η , ζ , and each of the malefics in causing blindness. The Asc., or ruler of the Asc., in one of the Azimene Degrees of the Zodiac at B. also tend to Blindness. (See Azimene). Note the following conditions and influences which have to do with Blindness and its causes, and see these subjects in the alphabetical arrangement when not considered here.

Accidents—Blindness By—The \odot or η joined to Bellatrix at B., or by dir.; the η or Asc. in Nebulous parts at B., or by dir., and affl. by ζ ; caused principally by ζ afflictions to the \odot or η at B., or ζ with violent Nebulous stars; a malefic in a Nebulous place and affl. the \odot or η , and espec. if the malefic be elevated above the Lights. There is more hope of relief from the accident when the malefic in a Nebulous place afflicts the η rather than the \odot . (See the various paragraphs in this section). Also see "Accidents" under Eyes).

Afflictions to the η at each Lunar return during pregnancy, corresponding to the monthly period, often show the causes of congenital deformities, afflictions, blindness, and malformations which exist at B. The following conditions have existed in the maps of those born blind.—In males, η on the Asc., or in the M.C., afflicting the \odot , and the η sepr. from the \odot and applying to ζ ; the η near a Nebulous place at B., \odot or ill-asp. a malefic, and the \odot also afflicted; the η and ψ conjoined in the 2nd H., and in \square to δ in the 6th (Hindu); ψ on the Asc., and afflicting η , and possibly from some affection of the optic nerve; η in the 2nd H., and affl. the \odot or η (Hindu). BLOOD—The Blood—The Sanguineous System—The Blood is ruled by ♃, altho his main activities are confined to the arterial blood. The Blood is also under the internal rule of the ♃ Sign. The Arterial Blood is ruled by ♃, and ♀ rules the Venous Blood. The ♃ sign rules strongly over the blood, its condition and circulation. All the Fixed Signs tend to rule and affect the Blood. The Blood is also ruled and strongly influenced by the Watery Signs. The Blood is one of the manifestations of the Vital Body. (See "Vital Body" under Vital). The ☽ gives oxygen to the blood, and ♂ gives the Iron and Haemoglobin. (See Iron, Haemoglobin). In the Astral Body ♃ has direct relation to the Blood. The activity of ♂ in the blood tends to Hemorrhages, Rupture of Blood Vessels, Hemorrhoids, and Excessive Menses. For the Occult significance of the Blood read what is said about the Blood in the books, "Cosmo-Conception", and "Message of the Stars" by the Heindels. BONES—The Framework—The Osseous System—The Skeleton—The Bones, in any and all parts of the body, are ruled by ♀, and also influenced by the ♀ sign ♃. The ☉ or ☽ acting thru the ♃ sign tend to especially affect the Osseous System. The processes of hardening, crystallization, ossification, bone-building, and the deposits of the mineral substances in the bones, are carried on by ♀. An afflicted ♀, or ♀ weak at B., will tend to interfere with the normal workings of these processes, and lead to diseases of the bones and marrow. The influence of ♀ is limitation, confinement, restraint, and the bones under his rulership define the limits of the body. The Osseous structure is also connected with the Earthy Signs. The Articulations, or Joints, are also under the rule of ♀. The bones of the different parts, or zones of the body, are ruled by the Signs which rule those parts, and according to the divisions of the Grand Man. (See Osseous). The principal subjects to be considered in connection with the bones are the size, texture, diseases, dislocations, fractures, and the bones in health, etc. This Article will be arranged in two Sections. other parts of the Intestinal Tract, and accompanying diseases, are listed alphabetically in this section. The Bowels, as a receptacle, are ruled by the Δ . The Mesentery, or the Peritoneal Attachments of the Small Intestines, are ruled by \mathfrak{M} . The Colon and its different parts are ruled by \mathfrak{M} . (See Colon). The Lower Excretory Bowels, and the Rectum, are ruled by \mathfrak{M} . (See Colon, Rectum). The Intestinal Branches of the Solar Plexus are ruled by \mathfrak{M} . The degree on the Asc. also strongly rules and influences the Brain. Among the planets, ♄ is the strong ruler of the brain, in both sexes. Ptolemy says the ☉ also rules the brain. In males the ☉ is said to rule the brain. The ☉ has special affinity with the brain. The Pons Varolii is ruled by the ☉ and the ♂ sign. The brain substance is ruled by the ♃ and ♄. The Meninges, or Brain Coverings, the Dura Mater, are ruled by the ☿ Sign and ♃. In the foetus the brain development, and specialization of the nerve filaments, are ruled and carried on by ♄. The Cerebral Hemispheres, taken together, are ruled by the ♀ Sign. Separately, the right Cerebral Hemisphere is ruled by ♄, and the left Cerebral Hemisphere by ♂. The Cerebral Ventricles are ruled by ♀. The Cerebro-Spinal Nervous System is ruled by ♄. The Arbor Vitae of the Cerebellum are ruled by ♂. The functions of the brain are ruled by ♄ and the ♃. Brain balance is maintained by the secretions of the Thyroid Gland. The brain is smaller and less in weight at the New Moon, and increases in weight and size until the Full Moon, and then diminishes again. It is largely the relation between the ☉ and ♃ which determines the size and weight of the brain. The nerves of the brain are fed by the rays of the ☉. The planet ♀ has considerable action and influence over the brain and eyes. Brain workers should work in a room predominating in blue colors, as blue is restful, as well as stimulating and invigorating to the brain. The Pineal Gland

is ruled by ♀. The Pituitary Body is ruled by ♃ and the ♃ sign. The Medulla Oblongata is ruled by ♂. The Brain and Head correspond to the cardinal signs and the Mental Temperament. (See Cerebellum, Cerebrum, Cerebro-Spinal, Cortex, Medulla, Meninges, Mind, Nerves, Occiput, Pineal, Pituitary).

BREATH—Breathing—Respiration—Organs of Respiration—Respiratory Tract, etc. The Respiratory Tract consists of the Mouth, Nose, Throat, Larynx; Trachea, or Windpipe; Bronchial Tubes, Lungs, and Diaphragm, etc., all of which have a part in connection with the Breath, Breathing, Inhalation, Exhalation, the taking in of the Air, Oxygen, Oxygenation, and the expulsion of the Carbon and Wastes of the body. The Respiratory Tract and Organs are ruled by the δ , Π , and Ξ Signs. The Breath is ruled by δ , γ , the Airy Signs in general, and is especially under the internal rulership of Π , as Breathing is a special function of Π . Physiologically δ rules Respiration. In the Astral Body γ has direct relation to the Breath. (See

Astral). The Throat, Windpipe, and the Larynx, are ruled by the δ sign. The Bronchi, the smaller Bronchial Tubes, and the Upper Lobes of each Lung, are ruled by Π . The Pleura, the Pleural Cavity, Lower Lobe of the Left Lung, the two Lower Lobes of the right Lung, and the Diaphragm, are ruled by the Ξ sign. Neptune, η and δ in δ , Π , and Ξ rule and affect the Breath, Breathing, the Respiratory System, Nerves of the Respiratory System, the Air Cells, and the Windpipe. η espec. has strong rule over the Respiratory action and Breathing. BRETHREN—Shown and governed by Π and the 3rd H., and our relations to them, their sicknesses, prospect of life, death, etc. The term Brethren as used here espec. refers to brothers and sisters. One writer says that the 3rd H. and its lord signify brethren in Hory Questions, but not in Nativities, and that Brethren in Nativities are signified by the sign on the M.C., and the sign following, and to these are added the maternal place of φ by day, and the δ by night. In a predominance of Textbooks the 3rd H. is said to rule brothers, sisters, cousins, neighbors, etc., and our relations to them for good or ill, according to the signs and planets ruling this house at B. The following influences should be noted in the map of birth of the native as regards his relationships to his brethren. The following subjects have to do with Brethren, Relatives, Kindred, etc., which see in the alphabetical arrangement when not considered here—

Brothers; Death—Of Brethren—(See "Death" under Brothers, Family, Relatives, Sisters, etc.).

Increase Of—Many Brethren—Increase of brothers and sisters is indicated by the sign on the M.C. and 11th H., and by ♀ by day, and the ♀ by night. These places favorably aspected by benefics give increase according to the number of planets by which they are aspected, and the number is doubled if the planets be in double-bodied signs. Also the ☉ surrounded by good stars, or well-aspected by many, gives many brethren.

The place of brethren (brothers or sisters) in the native's map is taken from the sign on the cusp the 10th or 11th H., and the maternal places, which are the position of φ by day, and the \oslash by night. This refers only to children of the same mother. This sign is classed as a cardinal, cold, commanding, crooked, destructful, feminine, fruitful, moist, mute, negative, phlegmatic, psychic, sensitive, unfortunate, tropical, watery, weak, sign. It is the home sign of the ♃, the exaltation of ♃, and the fall of ♄. It is considered the weakest sign of the Zodiac, along with ♁, for vitality, and espec. when upon the eastern horizon at B., and afflicted, and with the ☊, ♃, or hyleg afflicted also. This sign is considered weak owing to its receptivity to outside influences, and afflictions in ♃ tend to quickly affect the mind and the digestive organs. The ☊ well-aspected in the ♃ sign at B., and rising and elevated, tends to strengthen the constitution, to augment the recuperative powers, give better health, etc., as the ☊ in any sign tends to bring more vital force and power to that sign. The ☊ affl. in ♃ tends to a weakened constitution, and lowered vitality. The ♃ well-aspected in ♃ is strong, and tends to regular functions and good health. Ipecac, an emetic, is classed as the typical Polycrest Remedy corresponding to the ♃ sign.

CANCER RULES—Externally ♃ rules the Breast, Epigastric Region, and the Elbow. Internally, ♃ rules the Stomach, Digestive Organs, and the Womb. Structurally, ♃ rules the Ribs, Sternum, Elbow Joint. CAPILLARIES—Minute Blood Vessels—Tubules—Are ruled by, and associated with the Π sign in particular, and also connected with all the airy signs. The influence of η (cold) tends to contract them, driving the blood inward, and causing congestions, colds, etc. The σ influence (heat) tends to dilate them, and make the surface circulation in them more free. Morbid dilatation of the capillaries, however, is a η influence, due to deposits, wasting, and a weakened condition of the walls of the vessels. Capillary obstructions are caused by η afflictions, and by the afflictions of η to γ and ψ , rulers of the blood and circulation. For various conditions affecting the capillaries, see Acne, Centrifugal, Centripetal, Circulation, Congestion, Constrictions, Dilatation, Erythema, "Red Face" under Face; Lungs, Nose, Obstructions, Oxygen, Veins; "Blood Vessels" under Vessels.

CAPRICORN—The Goat—Capricornus—The 10th sign of the Zodiac, and affiliated with the 10th H. The \odot enters ψ at the time of the Winter Solstice. Is a rather weak sign as regards vitality, and espec. when upon the eastern horizon at B. However, the ψ people do not yield readily to disease, but when once sick and diseased they become despondent and melancholic, hold onto it, and often become hypochondriacs. This sign is not strong in vitality during the early years of life, and espec. from birth to the 7th birthday, and there is much infant mortality among those born with the \odot , δ , and other planets in ψ , and afflicted, or with ψ upon the Asc. at B. In adult life the diseases produced by ψ tend to become chronic, being under η rule. It does not contribute much to the beauty of the human form, and espec. when rising, and often tends to ugliness, crookedness of body, deformities, and a thin, angular, awkward and ungainly physique. The \odot is weak in ψ , but tends to longevity. The δ is weak in this sign, in which she is in detriment and debility, and when afflicted in this sign tends to impeded, uncertain and irregular functions, and lowered vitality, due to mental depression, worry, and anxiety. It is a strong business sign, and the ψ people are usually full of business, promotion,

and many of their diseases result from business anxieties, cares, or losses. The accidents of ψ are broken limbs, bruises, falls, sprains, dislocations, and hurts to the knees and lower limbs. The Symbol of this sign is the Goat. The pathological qualities of ψ are crystallization, deliberation, dryness, and limitation. Sulphur is a typical remedy of ψ . For an illustration, and birth data, of a person born with 6 planets in ψ in the 3rd H., see "Pasteur", No. 950, in 1001 N.N.

(See "Non-Oxygenation" under Oxygen; "Tidal Air" under Tidal).

Elimination Of—The S sign rules, and has principle charge of, the elimination of carbonic acid gas from the system. Afflictions in, or to the S sign, tend to obstruct and hinder this elimination. CARDINAL SIGNS—Moveable Signs—Acute Signs—They are F , E , C , and U , and have largely to do with physical activity. These signs are ruled by C , D , F and h . These four signs form the cardinal cross, and are all in \square or 8 asp. to each other, and in affliction. Thus a person born with a majority of planets in the cardinal signs may tend to have a more or less unbalanced condition of mind

and body, and with less harmony in the system. The cardinal signs are mental in temperament. An affliction in one cardinal sign tends also to afflict the parts ruled by all the other cardinal signs, and this is also true of all the fixed and common signs, as all Signs of the same group afflict each other. Thus ♃ in ♁ at B. can cause stomach trouble, kidney disorders, eye infirmities, and weak and disordered knees. The cardinal sign ♃ rules the head; ♁, the stomach; ♋, the kidneys, and ♌, the knees. These signs are affiliated with the Angles of the map, the Equinoctial and Tropical Points, the 1st, 4th, 7th and 10th Houses, which are known as the cardinal houses. The cardinal signs on the angles at B. give an active nature, a restless energy, and considerable ability to throw off disease, but diseases caused by them tend to be acute, quick, severe, and to soon run their course. (See "Disease" under Nature). On the angles they also tend to lessen the chances of Insanity, or an unbalanced mind. Afflictions from the cardinal signs are moveable, and not as fixed or stationary, and can be overcome. People born with many planets in these signs, or when they are upon the angles, have more power to throw off disease or trouble, and to start life anew after failure, being hopeful, aggressive and optimistic. They try hard to get well when sick, and to cooperate with the Healer. The intensity of disease is associated with the cardinal signs. (See Severity). The cardinal signs denote the head, stomach, kidneys and skin. Cardinal signs also show death on railways, by fire, fits, scalds, gunshot, lightning, murder, and a notorious death. (See Active, Acute, Angles, Aries, Cancer, Capricorn, Curable, Energy, Functions, Head, Houses, Kidneys, Knees, Libra, Morbid, Skin, Stomach).

In alterations the \odot tends to structural changes; \hbar to stenosis; γ to hypertrophy; δ to the Sthenic Process; ϕ to Retrogressive Metamorphosis; ψ the Irritation and Periodicity. (See Alterations, Decay, Degeneration, Metabolism, Metamorphosis, Periodicity, Processes, Stenosis, Sthenic, Structural, Tissues, etc. Also see "Renal Process" under Kidneys; "Hepatic Process" under Liver; "Influx" under Nerves; Spleen, Thorax).

CHARACTER—The ♃ represents the personal character, the Personality or lower mind. The Higher Mind, or the Individuality, is denoted by the sign the ☉ is in at B. However, the real and true character of the Ego, its present stage in evolution, is difficult to determine from the star map of birth. It is said that the character of an incoming Ego is more typically shown and represented by the star

map for the time of conception, the Prenatal Epoch map, and usually this map will reveal many hidden traits of the character not shown on the map of birth. The map of birth shows tendencies of the temperament, the environment and external conditions and associations which the native will encounter during the present life; shows the nature of the experiences necessary and the lessons to be learned for soul growth, but does not necessarily reveal the character, or the real nature of the Ego, or the Soul. The native may have a good reputation, yet be hypocritical and evil in his inner character, may be unawakened and unspiritualised, and not yet conscious of his inner, higher, and Divine powers. Advanced Egos have more power over disease, while the younger, negative, inexperienced, and more susceptible souls give way to disease more easily and are more bound by earth and materialistic conditions. The student can learn much about the nature and meaning of Character by making a study of the Occult and Metaphysical books, and too much space cannot be given the subject here. All the good manifestations in a person come down from the Higher Mind, the Spirit, while the evils are usually the emanations of the Personality, or Lower Mind. There are no diseases, or disease thoughts in the Higher Mind, and the afflictions, diseases, ailments, traits of temperament, etc., listed in this work are mostly those of the Lower Mind. (See Conduct, Desires, Disease, Dishonesty, Fate, Heredity, Morals, Religion, Responsibility, and the various subjects thruout this Encyclopaedia).

Cheerfulness is a strong asset for good health and longevity. (See Contentment, Happiness, Joy, "Peace of Mind" under Mind; Optimistic, Sanguine, Smiling, etc.).

CHEMICAL ACTION—All of the planetary rays have a special chemical action of their own upon the Mineral, Vegetable and Animal Kingdoms. Some of these rays are agreeable and compatible among themselves, and others incompatible, the same as among chemicals, and a bad mixture of the planetary rays at B., or at any time or period in life, tends to explosions in the temperament, or to ill-health and disease, whereas a good mixture of planetary rays which are agreeable tend to expansion, benefits, good health, peace of mind, etc. For the subjects of planetary affinities and repulsions, see Antipathy, Opposites, Sympathy.

CHILDHOOD—Early Years of Life—This subject is considered largely under Infancy, and Children, but for convenience of reference, subjects which relate to Childhood in general will be listed and considered in this section. The Period of Childhood is divided into three parts. The first 7 years are under the rule of the ♃; the period from 7 to 14 years under the rule of ♄, and the period from 14 to 21 under ♀ rule. Some Authors divide these periods differently, which divisions are given under "Periods." (See Periods). The Period from 1 to 7 years is also discussed under Infancy. (See Infancy). In the Kabala the period of childhood was dedicated to the ♃. The Vital Body, one of the human vehicles, takes charge of the child at the 7th year, at the 7th birthday, and tends to excessive growth from 7 to 14 years of age. (See "Body" under Vital). At the age of 14 comes Adolescence, and the birth of the Desire Body, another of the human vehicles. (See Desire Body, Puberty). The birth of the Desire Body gives the power of procreation, and also tends to passion. The Mind does not take full control of the body until the 21st birthday, the end of the third seven-year cycle of childhood, and at 21 the child becomes "Of Age" legally. The following influences are listed in this section, which are supplemental to those which appear under "Children", "Infancy", "Youth".

Accidents in Childhood—Accidents in the early years of life are caused by the same general influences as given in the Article on "Accidents", only these influences come to a climax sooner after birth. A child having a malefic anywhere from 1 to 15° from the vital points of the map, such as the ☉, ♃, Asc, M.C., Desc, Hyleg, etc., would be liable to an accident, injury, fall, blow, fracture, sickness etc., according to the time it took the afflicting malefic, or planet, to reach the Asc, by direction, or other vital places in the map, and the affliction would be according to the nature of the afflicting planet. The same influences which cause accidents in childhood may also cause death, according to the severity of the afflictions, and a train of evil directions to the hyleg. (See Accidents; "Accidents" under Children, and Infancy; "Children" under Hurts).

Danger in Early Years—Weak Body During Early Childhood—Not Strong in Early Years—Much Sickness in Childhood—♃ on the Asc., or the ☉ or ♃ affl. in ♃, the early years weak, and with greater danger of death; ♄ affl. in the Asc.; lord of the 6th H. in the Asc., and affl.; the 19° ♃ on the Asc. (See "Death", "Poor Health", "Vitality", under Infancy. Also note the various paragraphs in this section).

Death During Childhood—These influences are much the same as given in the section on "Arguments for Death" under Death, only that they come to a climax earlier in life. If in the 6th year of life a train of evil directions afflict the hyleg, the child will be apt to pass out in that year. Children are more susceptible to planetary afflictions, and to pass out under conditions which an adult might weather thru, as children have not yet learned the laws of mind and spirit, and also the mind does not take more complete possession of the body until the 21st year. Thus an Astrologer can make a study of the star map of a new-born infant, and usually tell whether the child will live thru the first year, or not, by the transits, afflictions, and directions that may culminate over the hyleg in that year, if any. However, it is unethical for Astrologers to predict the time of death, even if they knew, as such would only tend to worry the parents, and the child also if old enough to comprehend the meaning of it. For the planetary influences along this line see "Arguments for Death", "Early Death", "Time of Death", under Death; "Death in Infancy", and other paragraphs under Infancy; "Short Life" under Life; "Death in Early Youth" under Youth. Also note the various paragraphs in this section. Here are a few cases and Birth Data of children dying during childhood, given in 1001 N.N., and dying at ages of 5, 14, 15 and 16 years of age. See "Early Death", No. 428; "Elizabeth" No. 654; "Prince", No. 654; and "France", No. 533, all in 1001 N.N. Also under the heading of "Death" under Infancy, there are about 12 Cases, and Birth Data listed from 1001 N.N., cases of Death in Infancy.

Early Childhood—Early Years of Life—Sickness or Death In—(See the various paragraphs under Children, Infancy, and in this Article. Also see "Short Life", under Life; Youth, etc.).

Enteritis in Childhood—Inflamed Bowels In—Afflictions in ♀; ♂ affl. in ♀; Subs at UPP. (See "Inflammation" under Bowels).

Fevers in Childhood—And Early Youth—♄ coming to the ☉ or ill-asp. the Asc. in early years, tends to chickenpox, fevers, hurts, inflammations, measles, smallpox, wounds, etc. (See Fever).

Many Diseases—In Childhood—No asp. between the ☉ and ♄ at B. (See "Danger" in this section).

Much Sickness—In Childhood—The Body Weak in Early Years—(See "Danger" in this section; "Much Sickness" under Infancy; "Vitality Low" under Vitality).

Restricted and Unhappy—An Unhappy Childhood—The ☉ in ♃ in the 12th H., and affl. by ♄; ♄ ♂ ☉ or ♃ in the Asc. at B. (See Saturn, Twelfth House).

Rickets—In Childhood—(See Rickets). For other subjects, diseases or afflictions concerning Childhood and Children, see the various paragraphs un-

der Children, Infancy, and also look in the alphabetical arrangement for the subject you have in mind.

CHILDREN—Offspring—Progeny—Issue—The 5th and 11th Houses are the principle rulers of children. The 10th H. is also strongly related to children. According to Ptolemy the 10th and 11th Houses signify children, and planets in them, or configured with them, but if there are no planets in these houses, or in aspect to them, then take the 4th and 5th Houses. ♃, ♀, and the ♃ are the Givers of Children. ♃ and ♂ tend to deny them, and cause barrenness. ♃ is variable according to stars with which configured. ♃ ori. tends to give children, but occi. to deny them, and cause barrenness. (See Fifth House, Eleventh House, Tenth House, Fourth House). The subjects of Childhood, Early Years, Infancy, Diseases of Infancy, Death in Infancy, Youth, etc., are considered under the subjects of Childhood, Infancy, Youth. So much has been said in the Textbooks of Astrology on the subject of Children, and I have gathered so much material, that I will arrange this Article in three Sections as follows—

Section One—General Considerations. Section Two—The Diseases of Children. Section Three—Duration of Life, and Death of Children. See the following subjects in the alphabetical arrangement when not considered more fully in this Article.

H.; ♃ or ♀ to the ♃ or ♀ the ☉ or ♃ by dir.; ♃ by Periodic Rev. to the ☉ the place of the ♃ at B.; the good asps. of ♃ by dir. to any of the Moderators, as the ☉, ♃, Asc., or M.C.; the good directions of ♃ to the M.C., or fruitful places, or a giver of children in the map; ♂ ♃ or ♀ the Asc. or M.C. by dir.; ♀ in 8, ♃, the Asc., or 7th H., and the place of ♃ ascending at a Solar Rev., a child that year if married; ♀ ☉ the Asc. by dir.; ♀ to the ♂, ♃ or ♀ the M.C. by dir.; the Asc. to the ♂, ♀, or good asp. ♃ or ♀ by dir.; the Asc. to the ♃ or ♀ by dir.; the M.C. to the ♂, ♀, ♃ or ♀ by dir.; the M.C. to the good asps. the ♃ by dir. (See "Female Births", under Female; "Births" under Male; "Time" under Parturition. Also see "First Born" in this section).

Birth Delayed—(See "Delayed in this section).

Birth of Children Prevented—(See "Denial" in this section. Also see Barren).

Birthrate—(See this subject under Birth).

Black Sheep—The Black Sheep in the Fold—The house ruled by a malefic planet, in the order of children given, will tend to be the black sheep among the children, and bring sorrow, trouble, or disgrace upon himself and the parents. (See "Parents", "Worries", in this section).

Blessing—Children tend to prove a blessing to the parents—♃ or ♀ well-asp. in the 5th H., and no malefic influences over this house at B. in the maps of the parents.

Born—When Will the Child Be Born?—Probable Time of Birth—Birth usually takes place when the ♃ reaches her 10th Lunation from the time of conception. Usually when the ☉ is passing some asp. of the cusp of 5th H.; when the ☉ or ♂ reach a ♂ with lord of the 5th; at the time of the ♂ of lord of the 5th with lord of the Asc. in the 5th; when the lord of the Asc. goes out of one sign into another. These influences tend to precipitate the birth if they exist near the time of regular delivery. Note the distance of lord of the 5th H. from the cusp of the 5th., and give one month to each sign. Judge according to the majority of testimonies. (See "Moment of Birth" under Birth, and Moment; "Time" under Parturition; Premature. Also see "Delayed" in this section).

Boy Born—(See "Births" under Male. Also see Son. See "First Born" in this section).

Brothers Indicated—(See Brothers).

Child Promised—(See "Birth of a Child" in this section).

Childbirth—(See Mother, Parturition).

Childhood—(See Childhood, Infancy, Youth. Also see the various paragraphs in this section).

Childless—(See Barren, Husband, Wife. Also see "Denial" in this section).

Complexion—Fair in Youth—(See Youth).

Conception—Moment of—Signs of—(See Conception).

Creative Powers—Of the Parents—(See Barren, Creative, Fruitful, Husband, Powers, Wife).

Daughter Born—(See "Female Births" under Female).

Decreased—The Number of Children Decreased— h in the 5th H., and affl. The number of children will be increased or diminished according to the nature of the planets in the 5th H., and the asps. to such planets. (See "Increased" in this section).

Delayed Births— h rising, or on the Asc. and with danger of Asphyxiation. This was the case with Goethe, the Poet. (See "Birth" under Asphyxia). Also what some people would consider a delayed, or overtime birth may be normal according to the laws of the Prenatal Epoch, as in Epochs of the 2nd and 3rd Orders, which show 273 days + x in utero, etc. (See Prenatal Epoch).

Denial of Children—The \odot , H , h and ζ tend to deny children, or allot but few, or cause their death when born, and espec. if these bodies are in the 5th H. of the parents at B., and affl. (See Barrenness, Husband, Wife).

Denoted—Children Denoted—Promise of—(See Fruitful, Husband, Wife. Also see "Birth of" in this section).

Desire For Children Strong—(See Amativeness).

Directions and Children—The Primary or Secondary Directions of Childhood and Youth—In case of young children and infants, the first train of evil directions to the hyleg tend to kill, and espec. during the Δ period from 1 to 7 years of age. Children at an older age may survive evil directions, and even have good health if born with strong vitality, but the evil directions may severely afflict the parents, cause disease, suffering, or the death of a parent. (See "Direction" in Sec. 3 of this Article. Also see "Directions" under Infancy, Parents).

Disposition Of—(See Disposition, Savage, Temperament. Also see "Savage" in Sec. 2 of this Article).

Dogs—May Resemble Dogs—(See "Dogs" in Sec. 2 of this Article).

Duration of Life—(See Sec. 3 of this Article).

Dwarfs; Early Years—Conditions Affecting—(See the various paragraphs in this section. Also see Childhood, Infancy, "Short Life" under Life; Youth, etc).

Eclipses—Children Born at Time of—(See Eclipses, "New Moon" under Moon).

Eight Months Children—Children Born at the 8th month of Pregnancy—A child born at the 8th month is more apt to die because, according to the Science of Numbers, the number 8 is made up of two feminine factors,

$4+4=8$, the two elements making up 8 both being even, or feminine numbers. (See Climacteric). Children born at the 7th month live, it is said, because the elements making up 7, consisting of $3+4=7$, combine an odd and even number, or a masculine and feminine number. (See Cases under Premature). Children born at the 9th month also have a positive and feminine combination, an odd and even number, as $4+5=9$, and such combinations give force and vitality, whereas the combination of the two even numbers lack balance and the vital force necessary to sustain the child after delivery. This theory is discussed in books on the Science of Numerals, and is undoubtedly, in my opinion, the true explanation and philosophy of the matter. All Nature is founded upon the laws of Mathematics, Numbers, Vibration, etc., and the Planetary influences also work according to these rules and laws. (See Gestation).

Eleventh House—As Related to Children. (See the Introduction to this Article. Also see Eleventh).

Embryo—(See Foetus).

Faithful Children—(See "Blessing" in this section).

Family—A Large Family of Children—(See "Many Children" in this section).

Father—Conditions Affecting the Father—(See Father, Parents. Also see "Parents", "Worries", in this section).

Female—Barrenness In—(See Barrenness).

Female Births—Daughter Born—(See "Female Births" under Female).

Female Child Promised—(See "Birth of a Child" in this section. Also see "Female Births" under Female).

Female Children—Predominance of—This matter is largely judged from the sex of the horoscope. In female nativities the 5th H. is female, and the 4th H. is male. In male horoscopes the 5th H. is male, and the 4th H. is female. The conditions of these houses will show the predominating sex, and which gives the greater promise of fruitfulness, while the opposite houses show detriments. The majority of planets at B. in the feminine signs also indicate more female births, and the majority in masculine signs, more male births. (See "Female Births" under Female; "Births" under Male; Predetermination. Also see "First Born" in this section).

Female Horoscope—First Born Child In—(See "First Born" in this section).

Female or Male—During Pregnancy—(See "First Born" in this section. Also see Predetermination).

Few Children—But Few Promised—Few or No Children—One or Two Allotted—Small Family—The \odot , H , h , ζ , and ψ allot but few, or deny children; the \odot in ψ ; the \odot affl. in the 5th H.; the \odot in the 5th H. of the marriage partner; the \odot , H , h , ζ or δ in the 5th H. may give a few, but if af-

flicted, apt to see their early death; ♀ occi., in a barren sign, and configurated with barren planets; the ♀ sign on the cusp of 5th H.; a barren sign on the Asc. or cusp of 5th H., or the ♀ ruler of the Asc. in such signs; lord of the Asc. in the 5th H. and affl. by h, ♂, or ♀. (See Barrenness. Also see "Denial" in this section).

Fifth House—This is the principal house of children, and the conditions affecting this house in the maps of the parents indicate much along the lines of children, their fate and destiny, and whether children will be born or denied; whether they will live or die; whether they may prove a blessing to the parents, or a source of worry and anxiety, etc. (See Fifth House).

First-Born Child—In a male horoscope the 5th H. denotes the first child, and the possible sex. The 7th H. denotes the second child, and the 9th H. the 3rd child; the 11th H., the 4th child, etc., in a male horoscope. Thus if there are malefics in the 5th H. of the father the first child is apt to be sickly, or die early; if malefics in the 7th H., the second child may die; if in the 9th H., the third child, etc. Benefics in these houses would show which of the children would be more fortunate, honorable, useful, a blessing, etc. In a female nativity the first child is denoted by the 4th H.; the second child by the 6th H.; the third child by the 8th H., etc., and the nature and possible destiny of each, from the mother's standpoint, is to be judged from the nature of the planets in these houses in her map. h, ♀, or ♂ in the 5th H. of the father, or in the 4th H. of the mother, indicate accidents, injuries, or sickness, death, etc., of the first child. Malefics in other houses, as stated, indicate hurt, loss of, or detriment to the second or third child. (See "First Born Brother" under Brothers). Cancer, a feminine sign, on the cusp of the 5th H., and with the ♀ or ♀ feminine planets also in ☽ in the 5th H., indicate a daughter in a male nativity. The ♀ sign on cusp of 5th H., and masculine planets in the 5th, would indicate a son as the first child in a male nativity, etc. The 7th H. dominated and influenced by masculine planets, and a masculine sign, indicate that the 2nd child, in a male nativity, would be a boy, etc. These rules, of course, apply to the natural order of conceptions, and where conception has not been interfered with, or prevented in any way. (See "Female Births" under Female; "Births" under Male; Son).

Directions—Primary Directions, Secondary Directions, Progressions, Transits, New Moons, Lunations, etc., and the Death of Children—Before the age of 3 years, children are killed by the radical positions in their maps. After 3 years of age they are killed by directions. Children with weak and evil maps usually die when the ☽ by transit or direction reaches a malefic, and espec. in the 4th H., the house of the grave and close of life, or in the 6th or 8th H. Much depends upon the vitality, and also the indications in the maps of the parents as to whether the child will live or die. The signs ♃, ♃ or ♃ on the Asc. at B. tend to lower the vitality, and evil directions are more liable to kill in early life. The New ☽ is critical in infancy and tends to much infant mortality, and the Longitude of each succeeding New ☽ after birth should be noted, and the aspects it forms to the radical map. The evil directions of the ☽ should be carefully studied, and also the transits of malefics over the afflicted portions of the radical figure. (See Directions, Eclipses; "New Moon" under Moon; Transits). In the nativities of children, the influences of evil directions which do not disturb the health, fall on the parents, the Guardian, or the Family. (See Family, Guardian, Parents).

Dissipation—Children Die Young Thru Dissipation and Passional Excesses—The ♀ ♃ on the Asc. at B. (See Debauched, Dissipation).

Early Death of Children—Children Die Young—Of Short Life, etc.—The ☉ and givers of children in masculine and barren signs, and malefics elevated above them; the ☉ in evil asp. to the ruler of 5th H., or to H or h in the 5th; the ☉ or ☽ hyleg and ☿ a malefic at B., and with no assistance to the hyleg from the benefics; children given or allotted by the ☉, H, h, or ☿ are apt to die early; the ☉ and ☽ angular and conjoined with malefics; the ☉, H, h, or ☽ in the 5th H. and affl.; rulers of the Lights in the 6th or 8th H.; the ☉ affl. by h, danger in early years; the ☽ in the husband's horoscope, and the ☉ in the wife's nativity, applying to H, h, or ☽ in the 5th H.; H affl. the ☉, ☽, or Asc., and elevated above the Luminaries; h affl. in the 5th H., the untimely death of children; ☿ affl. in the 5th H., or affl. the ☉ or ☽ from this house, some die early and suddenly; the malefics in feminine, or prolific signs, even tho supported by benefics at B., the first train of evil directions to the malefics, or to the hyleg after birth, tend to kill; the malefics angular and oriental, affl. the ruler of the 5th H., or planets in the 5th, and with no assistance from benefics to the givers of children; a malefic on the Asc., affl. by lord of the 8th, and the ☽ also affl. by the ☉, h, or ☿, the child soon dies; a malefic on the Asc., and affl. by lord of the 8th, and also the ☉ or ☽ affl. at B.; the hyleg at B. severely affl. by h, or ☿, and with no good asps. from the benefics; lord of the Asc. in the 5th, and affl. by h, ☿, or ☽; lord of the 7th, 11th, or 12th H. a malefic, and in the 5th H. and affl.; the 5th H. affl. in the mother's map, and the ☉ and ☽ both affl. in the child's map; ♁, ♃, or ♀ on the Asc. at B., and the hyleg severely affl. by malefics; malefics in the 5th or 11th H. at B., and affl., or afflicting the hyleg. Unless the hyleg is much afflicted an early death is not necessarily shown. (See "Death" under Infancy, Childhood; "Early Death" under Death; "Short Life" under Life, and also note the various paragraphs in this section. For the early death of Parents, see Adopted, Orphans, Parents).

Early Life—The Early Years of Life—Danger of Death In—♃ on the Asc., or the ☉ or ☽ affl. in ♃, tends to make the early years weak, lacking in animal heat, and with greater danger of death, and to give a weak body; lord of the 6th H. in the Asc., and affl., and espec. with ♃ on the Asc.; the 19° ♀ on the Asc. (See Childhood, Infancy; "Short Life" under Life. Also note the various paragraphs in this section). The hyleg must be severely affl. at B., and by dir., to cause death in early life and childhood, and a good asp. from ♃ or ♀ in the configuration will tend to save the life.

Diarrhoea—(See Diarrhoea).

Epidemics—Cholera Epidemics usually occur when one of the major planets is in perihelion (nearest the ☉) in its orbit. Its spread is due to vitiated atmospheric conditions. It spreads faster than human means of travel, and one Epidemic may quickly encircle the Globe when ♃ or ♃ are in perihelion, and in other years, when no planets are in perihelion, it usually remains in or near its birthplace, which is India. Its germination is dependent upon atmospheric conditions caused by planetary influences, and is not local, or due to insanitation, as commonly believed. The orbit of ♃ is 12 years, and every 12 years he is in perihelion and Cholera has broken out in India every 12 years for Centuries, and under the influence of ♃ in perihelion. These same influences also tend to cause Floods, Volcanic Eruptions, Earthquakes, which surface changes tend to decomposition and fermentation of vegetation, to vitiate the atmosphere, and produce Chills, Fever, Typhoid, and to lower the vitality of the inhabitants. Cholera also occurs epidemically when ♂ is in perigee, and at the same time in ♁ the ☉, which is once every 15 years. (See Air).

All Cold, Lingered, and Chronic Diseases are produced by ♃, and espec. when ♃ is in the 6th H. at B., and affl. the hyleg or Asc. Chronic Diseases usually begin in Winter, from cold and chilling of the skin, or surface, driving the blood inwards, and causing internal congestions, the result of ♃ influence, as ♃ rules Cold. (See Centripetal, Chill, Cold, Congestions). In Greek Mythology ♃ is called "Kronos", from which our word "Chronic" is taken. The 12th H. and ♃ have general rule over Chronic Diseases, and those which tend to become morbid. While Permanent Diseases proceed from ♃, their course is regulated by the motion of the ☉, and it is very essential to watch the aspects to, or afflictions to the ☉, to give a prognosis, or forecast, concerning the probable outcome of a chronic disease. The course of Acute Diseases is ruled by the ♃. (See "Crises" under Acute). Chronic Diseases begin their action in the Ganglionic Centers, and all remedies indicated in chronic diseases must begin their action in these centers. (See Ganglion). Diseases indicated by the radical map tend to become chronic, or sub-acute, and espec. when afflicting planets are in the Occidental Quarters, between the Nadir and Asc., and between the Midheaven and Descendant at B., and are usually organic, constitutional, hereditary, or structural diseases. Acquired Diseases, and those of shorter duration, are the result of Directions, rather than from the indications of the map of birth. An Acute Disease which reaches the 28th day, or the Fourth Quarter of the ♃ from the time the disease began, will either resolve itself, or go into the chronic form. Thus any acute disease may become chronic, and run on indefinitely, eventually become cured, or end in death, according to the amount of vitality, resistance, recuperating power, etc. It would consume

too much time and space to list all the names of diseases in this section, which may be chronic, and will ask you to look in the alphabetical arrangement for the special disease you have in mind. The more general subjects concerning chronic diseases will be taken up in this section.

CHRY SOLITE—A Mineral ruled by the ☉.

CHYLE—The Milky Fluid of Intestinal Digestion. The ♀ sign and ♃ are concerned with chylification, or chylopoiesis, the preparation, absorption and assimilation of the Chyle. As a fluid, the ♃ also rules the Chyle. Also the physiological action of the ♃ and ♀ produce Chylification, Chylopoiesis, Chyle formation, and its absorption. The afflictions of ♃ tend to have a pathological action on the Chyle. (See Chyme, Digestion).

Abated Absorption—Of the Chyle—A ♀ disease; the ☉, ♃, or ♃ affl. in ♀; ♀ on the Asc. and afflicted. (See "Intestinal" under Indigestion).

The ♀ and ☿ signs also are concerned with distillation and the circulation. Also ruled by Posterior Lobe of the Pituitary Body.

Arterial Circulation—Ruled by ♃. Poor Arterial Circulation—Obstructed—Restricted—Impeded—Sluggish—Spasmodic—Good Circulation of, etc.—The afflictions of ♃ to ♃; ♃ ☿, ♃, ☐ or ♃ ♃; ♃ ☿ the ☉ and planets in ♀, the heart sign; ♃ ☿ the ♃ in ♀; ♃ affl. in ♀ or ☿; ♃ in the 6th H., and afflicting ♃; ♃ ☿ the ☉ or ♃ in ♀ or ☿, etc., tend to Poor, Restricted, Obstructed, and Sluggish Arterial Circulation, and of the Circulation in general. The afflictions of ♃ to ♃ tend to increase the mineral deposits in the walls of the arteries and blood vessels, restricting circulation, and causing hardening of the arteries. Also the afflictions of ♃ to ♃ tend to over-eating, gluttony, resulting in too much blood, and Plethora, causing sluggish circulation.

Spasmodic disturbances of the Arterial Circulation are caused by the afflictions of ♃ to ♃. The good asps. of the ♃, and other planets, to ♃ at B., and by direction, favor good circulation, normal blood pressure, and to keep the blood properly replenished and in a healthy condition, as well as the arterial walls. (See Arteries, Blood, Cyanosis, Degeneration, Vessels. Also see "Good", "Poor", in this section).

Bad Circulation—(See "Poor", and the various paragraphs in this section).

Blood—Circulation of the Blood—Upon the action of the heart, and its force or weakness, depends the condition of the circulation of the blood. Therefore, the Circulatory System in general is ruled by the ☉ and the ♀ sign. The ♃ sign, in ♃ to ♀, and complementary to ♀, also has much to do with the circulation of the blood. ♃, the ruler of ♃, and ruler of the peripheral nerves, presides over the circulation and distribution of the blood in the tissues, and the surface of the body, and for this reason the pathological action of ♃, and the influences of Cold, tend to disturb the peripheral circulation, drive the blood inward, and cause internal congestion, colds, etc. (See Centripetal). Afflictions in, or to the ♃ sign, tend to disturb the blood circulation, causing corrupt and impure blood, morbid conditions of the blood, blood poisoning, and incomplete oxygenation. The Blood is of two kinds, the Arterial and Venous. (See "Arterial", "Venous", in this section. Also see "Blood Poisoning" under Poison; "Impure Blood" under Impure; "Blood" under Morbid; Oxygen). The Circulation of the Blood is assisted by the ☉, and impeded by ♃. In a physiological way, the Herbs and Plants ruled by the ☉, affect the heart and circulation in a beneficial way, strengthen and help to restore its action to normal. Gold, the mineral ruled by the ☉, is also a remedy, used in conditions of disturbed circulation and heart disorders. The drugs and remedies of ♃, such as Aconite, tend to slow up the circulation and heart action. The drugs and remedies of ♃ accelerate the heart action and circulation, such as Strychnine, and act as tonics.

There are two kinds of Clairvoyance, the genuine, or trained Clairvoyance, which can be called into action at will, and the involuntary form of Clairvoyance which comes upon people at any time, without an act of the will, and leads to obsessions, or undesirable mediumship.

Involuntary Clairvoyance— Ψ ruler of the horoscope, and afflicted; due to the pathological action of Ψ ; Ψ affl. in the 6th or 12th H. at B.; Ψ \square or δ H at B.; the evil directions of Ψ to the \odot , D , δ , or the Asc. tend to intensify the evil, and espec. if the radical map shows such an affliction. (See Antares, Clair-audience, Fears, Hallucinations, Illusions, Imagination, Insanity, Mediumship, Obsessions, Pituitary, Prophetic, Psychic, Spirit Controls, etc. Case—See "Clairvoyant", No. 322 in 1001 N.N.)

CLEANSING OF THE BODY— δ cleanses the body of wastes and filth, and when the system becomes clogged thru excesses, dissipation, or gluttony, brings fevers and inflammation to quickly burn up the wastes, and thus save life. The D also is cleansing and fluidic, and acts thru the fluids of the body in carrying off wastes. (See Combustion, Deposits, Destructive, Elimination, Enemas, Excretion, Fever, Inflammation; "Lease" under Life; Physic, Poisons, Retention, Wastes).

CLIMACTERIC YEARS—Critical Years of Life—Every 7th and 9th year of life are called Climacterical because the D then repeats her \square and Δ aspects to her positions at B. by progression. The \square asps. of the D to her radical place are the 7th, 14th, 21st, 28th, 35th, 42nd, 49th, 56th, 63rd years, etc., and are considered unfortunate and critical years, while her Δ asps. fall in the 9th, 18th, 27th, 36th years, etc., and are more fortunate years in life. The \odot hyleg, and to the \square or δ q by dir. is a very evil, and often a fatal influence, when falling due in a climacteric year, or under any other fatal direction or Lunation. (See Directions). Also it takes h a little more than 28 years to make one circuit in his orbit, and his first \square asp. to his radical place comes about the 7th year; his δ at the 14th year; his \square again at about the 21st year, and his δ with his radical place about the 28th or 29th years of life, which tends to make these times very critical years in life every seven years, and subject the native to ill-health, reversals, self-undoing, or a downfall, etc.

Grand Climacteric—Double Climacterical Years—The 49th and 63rd years, being 7×7 , and 7×9 , and the statistics of Undertakers show that the years of greatest mortality among adults are the 49th and 63rd years. In the 49th and 63rd years of life, the native usually continues to live if the D at B. is well-aspected, and the directions for the year are good, but if not, death is more apt to come, especially if there is worry, anxiety and unsettledness. A fundamental rule is that the number 7 when multiplied by an odd number, as by 1, 3, 5, 7, 9, indicate the more evil and critical years in life, the climacterical years, while multiplied by an even number, as by 2, 4, 6, 8, give the more fortunate years, or years of less danger to life under evil directions. The even numbers are feminine, and the odd numbers masculine, and a masculine and feminine number when combined by addition or multiplication, according to the Science of Numbers, give greater strength and resistance to the body, whereas two masculine, or two feminine numbers combined tend to lowered vitality. (See "Eight Months Children" in Sec. 1 under Children). There are other years in life which may become critical, due to the aspects and directions, and yet not be called Climacteric. (See Crises, Critical, Cycles, Enneatical, Periodic, Periods).

CLIMATE—In considering the physical constitution and its welfare, the ♃ and her positions and aspects at B. becomes the Significator of affections which proceed from external causes, as climate, clothing, food, environment, etc. Climate is very important to good health. The different Climates, Countries, and parts of the Earth, are ruled by the different Signs of the Zodiac, and Planets, and in deciding upon the location, kind of climate, etc. for any individual, it is necessary and important to make a detailed study of the Star Map of Birth. Climates which would kill some people are beneficial for others. Some constitutions require a high altitude for good health, and others the Sea Level, or a low altitude, all which is shown and indicated by the Map of Birth. Many people suffer ill-health because they are in the wrong location and climate. Chronic diseases are often developed by people removing from their native climate, as to the Tropics, if born in a Northern Latitude, and then find a cure again by returning to their own Country. This subject of climate, location, etc., is further considered under Abroad, Altitude, Cold, Endemic, Environment, Exposure, External, Heat, Location, Nations; "Native Land" under Native; "Place of Birth" under Place; Races, Residence, Travel, Weather, etc.).

In a pathological way ♃ tends to coalition, union of parts, etc., thru deposits, hardening, crystallization, etc. The influences of the ☉ ☽ ☿ also tend to fusion of parts thru excessive heat. (See Adhesions, Anatomical, Ankylosis, Crystallization, Deposits, Fusions, Hardening, Harmony, Rhythm, etc.).

(See Apathy, Bachelors, Celibacy; "Aversion" under Marriage; "Free from Passion" under Passion; "Married Women" under Sex; Spinsters).

Passional Excesses—(See Intercourse, Passion, Sex, Venery, etc.).

COHESION—Lack of Cohesion of Parts—A ♀ disease and affliction.

COLD—Chill—Saturn rules and produces Cold, and excess of cold in the body, or in the atmosphere. Cold is noxious and destructive, and all matter is dissipated by coldness and dryness. Cold and Dry are malevolent influences and tend to decay. Cold is affiliated with moisture, and heat with dryness. Cold is a negative quality, and also passive, and predominates in the left side of the body. (See Left). The watery signs, ♋, ♌, and ♍ are cold in nature. The therapeutic action of ♃, and ♃ remedies, are cooling and refrigerating, and such remedies are used to combat the high fevers given by ♃. Hydrogen, ruled by ♃, has affinity with Cold. Statistics show that about 50% of all our diseases come from cold, chill, exposure to cold, and the chilling of the skin, or surface of the body, by improper clothing, thus driving the blood inwards and causing functional disorders, internal congestions, colds, etc. (See Centripetal, Colds, Congestion, Ganglion). Cold, Lingering, and Chronic Diseases are produced by ♃. The parts of the body, or organs more liable to be afflicted with cold, colds, or chill, are those ruled by the Sign or House containing ♃ at B., and espec. when ♃ is in an earthy or watery sign, affl. the ☉, ☽, Asc., or hyleg, and when this class of Signs may also be on the Asc., or cusp of the 6th H., or the ☉, ☽, and a majority of planets in such Signs at B., tending fundamentally to give a cold body or constitution. Cold tends to contractions and obstructions in the body. There are diseases and bodily conditions which arise from Cold alone. Others from a combination of Cold and Moisture, and others from a combination of Cold and Dry causes. The following diseases and afflictions

have to do with Cold, Cold and Moisture, and with the ♃ influence. Also the diseases listed under Saturn are mostly Cold Diseases, and caused by Cold at their beginnings. (See "Cold", "Diseases of Saturn", under Saturn. Also see Chill, Dry, Moisture).

Ague—(See "Quartan Ague" under Ague).

COLDS—Saturn causes and rules Colds, which arise principally from Cold, and chilling of the surface of the body, driving the blood inwards, and causing internal congestions. (See Centripetal, Congestions, Constrictions). People who have h weak at B., and not afflicting the g , d , Asc., or hyleg, and when the watery sign element also is not prominent, do not suffer much from Colds. People who have h in an earthy or watery sign at B., and affl. the g , d , Asc., or hyleg, and when this class of Signs may also be upon the Asc., or cusp of the 6th H., should guard against Colds. Saturn people catch cold easily from wet feet, drafts, or from the slightest wetting. It is said that Colds are caused by Sideral influences, and disturbed atmospheric conditions, as taking cold in a room, and against which no precautions seem to be available or successful. For the general influences causing Colds, see "Causes" in this section. Also the following diseases and afflictions are associated with Colds and Cold, or are the direct result of them.

Skin—Color of—(See Complexion, Pigment, Races, Skin). See the next Article on Colors.

COLORS—Colors, according to Astrology, are symptoms of the nature of the Stars. Fixed Stars of the color of ☿ are of the nature of ☿; those of the color of ♃, of the nature of ♃, etc. The ☉, ♃, and planets, each have a color under their rule. The colors in the Solar Spectrum are ruled by the ☉, ♃, and the five planets, excepting

♃ and ♃. For the rulership of the various colors, see "Planets", "Signs", and the various paragraphs in this section.

Clothing—Dress—Colors of Clothing in Horary Questions are said to be according to the mixture of the planets, and the Signs and Terms they are in, as follows—The ☉, saffron or sandy color; the ☉ and ♃, light yellow or green; the ☉ and ♃, dark yellow, or bronze color; the ☉ and ♃, very deep, shining red; the ☉ and ☿, deep shining red; the ☉ and ♀, olive; the ☉ and ♀, light gray; the ♃, light mixed colors, white, cream-colored, or pale green; the ♃ and ♃, deep gray or russet; the ♃ and ♃, bright green; the ♃ and ☿, light red; the ♃ and ♀, light blue, or bluish white; the ♃ and ♀, buff or fawn color; ♃, black; ♃ and ♃, dark black green; ♃ and ☿, dark brown; ♃ and ♀, whitish gray; ♃ and ♀, dark gray or blue; ♃, green, spotted, or ash colored; ♃, red mixed with green; ♃ and ♀, blue and yellow, or greenish gray; ♃ and ♀, spotted green; ♃ and ☿, tawny, with light spots; ☿, red; ☿ and ♀, light red or crimson; ☿ and ♀, red tawny; ♀, white or bluish; ♀ and ♀, purple or light mixture; ♀, gray or dove color; 8, red mixed with citron; ♃, red and white mixed. When a planet is in the house of another planet, judge of him as mixed with that planet. Thus, ♃ in ♃, the house of the ☉, denotes the dress to be either dark yellow, or bronze color, etc. (See Mixed).

Complexion—For the various colors of the complexion, see Complexion, Face. Also see the remarks under "Signs" in this section.

Houses—Colors of—(See Houses).

Light Colors and White—Are ruled by the 1st H.

Mixed Colors—Ruled by ♃ and the ♃. (See "Clothing" in this section. Also see the ♃ influences under "Planets" in this section).

Planets and Color—Planetary Colors—In the Secret Doctrine by H. P. B., the colors in the Solar Spectrum are assigned to the planets as follows,—The ☉, Orange; the ♃, Violet; ♃, Green; ♃, Blue, or Purple; ☿, Red; ♀, Indigo; ♀, Yellow. Astrological Authorities seem to differ some from this classification, and in the following notes, I am using the assignments as given in the textbooks of Astrology. The ☉ rules orange in the Solar Spectrum. Orange is the color of the Pranik life forces in the blood. The ☉ rules yellow, or golden, inclined to purple, has an active power, and gives radical heat. The ♃ rules green in the Solar Spectrum. The ♃ rules white, or white spotted, or a light mixed color. The ♃ has a passive power, and is the sign of radical moisture. One Author ascribes violet to the ♃. In the Solar Spectrum ♃ rules Indigo. ♃ signifies black, and black being ruled by ♃, has a deadening and devitalizing influence, and black clothing should be avoided. ♃ rules lead color, and is a sign of

intemperate coldness and dryness. One Author ascribes green to ♃. In the Solar Spectrum ♃ rules violet. ♃ opposes ♁ in nature, which makes the Violet Ray helpful in treating chronic and morbid conditions, and violet is considered a beneficent color. One Author ascribes purple to ♃. Also ♃ is listed as ruling blue, and red mixed with green. The blue and yellow of ♃ and ♀ are signs of heat and moisture united. Heat is predominant in ♃, and moisture with ♀. ♂ rules red in the Solar Spectrum. ♂ rules fiery red, the result of intemperate heat and dryness. Red being ruled by ♂ is a tonic color. Red and orange are the predominant masculine colors. Yellow in the Solar Spectrum is ruled by ♀. One Author ascribes blue and indigo to ♀. White and purple are also ascribed to ♀. In the Solar Spectrum blue is the color of ♀. Yellow is also ascribed to ♀. Azure and light blue are also ascribed to ♀. Mixed colors, checks and plaids are ruled and given by ♁. Lavender, and a smoky gray or blue, are ascribed to ♄. Color Therapy has its value by using the ray or color of one planet to oppose that of another, and the diseases caused by each. (See Antipathy, Opposites, Polarity, Sympathy, Vibration). For each of the colors of the Solar Spectrum, ruled by the planets, such as Blue, Green, Indigo, Orange, Red, Violet, and Yellow, see these subjects in the alphabetical arrangement. Also see Black, White.

Race Horses—Color, or Combined Colors of a Winning Horse—When two horses, or more, are to race, if a Horary figure is set up, the sign or planet signifying their color, which is strongest, or posited in the best house, shows which horse will win. (See the book, "The Silver Key" by Sepharial).

Sense of Color—(See this subject under Color in the section before this one).

Signs of the Zodiac—Colors Ruled By—The Colors ruled by the Signs are given under each Sign. (See "Colors" under Aries, Taurus, Gemini, etc. Also the colors ruled by each planet are given under the planets. (See "Color" under Sun, Moon, Saturn, etc.). The Colors are said to be an indication of the color of the complexion of any person signified by these signs and planets, or by the combination of sign and planet, and in Hor'y Questions to also indicate the color of their dress. (See "Clothing", "Complexion", "Skin", and the various paragraphs in this section).

Skin—For the various colors of the skin, or discoloration, normal and abnormal, see such subjects as Black, Blemishes, Brown, Complexion, Dark, Discolorations, Face, Freckles, Jaundice, Marks, Moles, Naevus, Negro, Pigment, Races, Red, Skin, White, Yellow, etc.

Solar Spectrum—(See "Planets and Color" in this section).

Therapy—Color Therapy—(See "Plans" in this section).

Vibration—Each Color has its special rate of vibration, and these vibrations

are in tune and harmony with the rate of vibration of the planet, sign, or combination of planet and sign, which rule the various colors, singly, or in mixed combinations. It is on the basis of the rate of vibration of the different colors that they can be used with success in the treatment of disease, the same as the planetary herbs or minerals are used. Thus the violet rays of ♃ oppose the vibrations given off by ♁, and assist in alleviating the symptoms produced by ♁ in chronic diseases. (See "Planets" in this section. Also see Polarity, Vibration).

Vocation and Colors—♀ ruler, and in the 10th H. favors dealing in Dyes, Colors, Perfumes, etc.

Carus—The last degree of Coma. A Ψ disease. (See Carus).

Also see Cleansing, Digestion, Fevers, Inflammation, Mars, Oxygen, Sun).

COMETS—From Ancient Times the appearances of Comets have had a special significance of calamity or disease in some form. They tend to affect the Regions and Places ruled by the Sign, or parts of the Zodiac, in which they appear, and in the direction of their trains, and those Parts suffer most toward which its tail points. Coincident with their appearance have occurred Famine, Pestilence, Drought, Floods, Fires, Bloodshed, War, Slaughter, Fevers, Epidemics, Endemic Diseases, Calamities, Earthquakes, Tidal Waves, The Plague; Death of Rulers, Nobles, Kings and Prominent People; the death of Children; affections of the Eyes; loss of Cattle; the death of Fish in the Rivers and Seas; Attacks upon Man by Wild Animals; Dissensions and Quarrels; the Locust Pest; Robberies, Increase of Crime, Poverty, unusual Sadness among Peoples; Treachery, Wind, Storms, Rain, Hurricanes, Dangers to Women; Derangement of the System; a prevalence of Urinary and Sex Disorders; Obscuration of the Air; Dangers in Navigation; Hot Seasons in Countries ruled by the Sign in which they appear; Troubles in Religion, and to bring every kind of evil upon Mankind. Comets appearing in the Airy Signs tend to Disturbances in the Air, as Corrupt Air, etc. In the earthy signs, Famine, Drought, Loss of Crops, Rotteness of Seeds, Pestilence, etc. Fevers are prevalent when Comets appear in ♀. In the fiery signs, Fevers, Fires, Wars, Quarrels, Hot Weather, etc. In the watery signs, Floods, Destruction of Fish, Perils, Dangers on the Seas, Tidal Waves, Disturbances of the Fluids of the Body, etc. Halley's Comet is the best known of the Comets, and the different appearances of this Comet along thru the Ages have been attended with Plague, Spotted Fever, Pestilence, Volcanic Eruptions, and great calamities of some kind, and espec. in the years when there were great conjunctions between the major planets, or many major planets in cardinal signs. Halley's Comet appeared in 1909 and 1910, and the death of King Edward, of England, followed within 12 days of its appearance. Also Revolution broke out in Portugal in 1910, and King Manuel fled to England. A good Chapter on Comets, and their influences over disease and afflictions to Humanity, is to be found in Pearce's Textbook of Astrology. (See Eclipses, Events. Also see the subjects mentioned in this Article).

Many subjects which have to do with the Complexion are considered and listed under Eyes, Face, Hair. In a general way the Complexion may be divided into four classes, such as Dark, Light, Pale and Ruddy. The fiery signs, and the ☉ and ☽ strong at B. tend to give a red and ruddy complexion. The earthy signs give a more dull, muddy, and obscure complexion. The airy signs, a clear and rather delicate complexion. The watery signs, and espec. ☽ and ♃, give a pale and more sickly complexion when upon the Asc. at B., and due largely to a weakened and lessened vitality from birth. COMPLICATIONS—Complication of Diseases—The planets in the Signs show the zones of the body afflicted, but the aspects, and the influences of the planets themselves, have to be considered in complications. (See "Complications" under Disease). Ruling over the human body are three Crosses, known as the Cardinal, Fixed and Mutable Crosses in the star map of birth. The Fixed Signs ♀ and ♀, being opposites, and also the ♀ and ♀ Signs being opposites, and all four of these signs being in ♀ or ♀ asp. to each other, the fixed signs when occupied by many planets, and espec. malefics, tend to diseases or complications in parts or organs ruled by all four of these Signs. Thus a disease starting in the throat, ruled by ♀, may affect the Heart, Sex Organs, Lower Limbs, or the Circulation of the Blood, all of which are ruled by the fixed signs. Evil Directions, or Transits, coming into a Fixed Sign during the course of a disease may tend to involve and complicate, or extend the first disease to other parts of the body ruled over by a fixed sign. Also during the course of a disease, if the ☉, in the case of a male, comes to an evil asp. a malefic, or some evil direction be formed to the ☉, there is apt to be a relapse, or a complication of diseases, according to the signs occupied by the ☉ and the afflicting planet. The same with the ♃ in the case of a female. In males, afflictions to the ☉ rule the course of the disease, and to the ♃ in females. (See Chronic, Crises, Continuity, Course, Curable, Duration, Incurable, Moderation, Opposites, Prognosis, Prolonged, Relapses, Remote, Return, Sympathy, Tedious, Various, etc.).

Many Complications—The ☉ to the ill-asp. his own place at B., and by dir.; $\frac{1}{2}$ in the 6th H., and affl.

Many Diseases—Many Diseases Afflict the Body—The ☉ to the ill-asp. his own place by dir., and the ☉ affl. by malefics at B.; no asp. between the ☉ and ♂ at B., and espec. in childhood; ♃ affl. in ♀, due to the blood being corrupted by too much blood. (See

Impure; "Much Sickness" under Sickness; "Too Much Blood" under Blood).

Shifting of the Disease—Changes to Some Other Form of Disease—The Sig. of the disease being in a double-bodied sign; the afflictor in the disease changing signs, or passing from one house into another, and the disease will either shift to some other form, become chronic if it has been acute, or resolve itself. The strong affinity which exists between opposite signs of the Zodiac also tends to complications, and a change in the disease. Thus stomach disorders, ruder ordinarily by the ♁ sign, may have skin complications and eruptions, and espec. if there are also afflictions in ♃. (See Crises, Opposites, Praeincipients, Remote, Scope, Sympathy, Various, etc. Also note the different paragraphs in this Article).

COMPREHENSION—Is ruled by ♃.

(See "Mental Chaos" under Chaotic; Confusion, Dreamy, Visionary).

Moment of Conception—A Star Map of the Heavens for the moment of conception is very important to study in helping to know the character and temperament of a person, and also to diagnose diseases which are not especially shown or indicated in the map of birth. The Moment of Conception is known as "The Epoch", and is determined by the rules of the Prenatal Epoch. The moment of birth and the moment of conception have a fixed relation, and when the moment of birth is known approximately, the moment of conception can be determined by the laws of Astronomy, as the degree on the Asc. or Descendant at B. is said to be the Longitude of the ♃ at conception. The moment of conception may occur some days, or a week after coition, and is ruled by the motion of the ♃ in the individual case. (See "Moment of Birth" under Birth; Prenatal Epoch). The Occult Side of Conception, the connection of the Ego with conception, etc., is discussed under the headings of "Conception", "The Ego", "The Seed Atom", etc. in the book entitled "Cosmo-Conception" by the Heindels.

Others measure the time by the application of the lord of the Asc., or the

), to the lord of the 5th, or to ♃ or ♀, reckoning by degrees according to the nature of the sign the applying planet is in. (See "First-Born Child" under Children).

Triplets Conceived—(See Triplets).

CONCRETIONS—A Calculus—An Osseous Deposit—Stone—Concretions are the work of ♃, by crystallization, and mineral deposits which should be eliminated. They are formed by mineral deposits carried by the blood, and are ruled by ♃. They are connected with the earthy signs. They are also the result of Cold, ♃ influence, and are associated usually with Cold Diseases. (See Chalk, Cold, Crystallization, Deposits, Elimination; "Gall Stones" under Bile; Gravel, Growths, Hardening, Lime, Minerals, Osseous, Sand, Stone, Suppressions, etc.).

Many of the subjects along this line you will find listed alphabetically at the end of the Article on the Mind, both good and bad traits. CONGENITAL—Existing from Birth—Innate—The derivation, causes, and explanations of congenital afflictions, defects and deformities are shown in the figure of the Prenatal Epoch, in the aspects and afflictions to the ♃ in the Chart of Descent, and are reflected in the horoscope thru the interchange of the two factors the ♃ and the Asc. at the Epoch and at birth. The horoscope influences begin with the moment of birth, and continue in power until the death of the body. The ☉, ♃, Asc., or Hyleg much afflicted by malefics at B. will account for most of the diseases and afflictions which develop after birth, or known as Acquired Ailments. Deep-seated, organic, structural, and innate ailments, can usually be located in the map of the heavens for the time of conception, or in figures erected for the time of the return of the ♃ to her place each month during gestation. This subject is further discussed under Prenatal Epoch. The list of congenital defects is a large one, and a few of them are here suggested for study, and if the subject, or disease, is not mentioned here, look for it in the alphabetical arrangement. CONSTITUTION—Constitutional—Organic Constitution—The Physical Constitution—Constitutional Diseases, etc.—Planets in the East at B. affect the physical constitution. The 1st H., or the Asc., rule the constitution, the peculiarities and construction of the physical body. (See the Introduction under Body). In a female nativity the asps. to the ♃ determine the strength of the constitution, and the asps. and position of the ☉ in a male horoscope. In general, however, the strength of the constitution in both sexes is denoted by the ☉ at B., his asps. and power, as the ☉ is the central source of power, and the ♃, and other planets, reflect the Sun's rays, power and influence, for good or evil for the time, according to the aspects. In judging the constitution, the ☉, ♃, Asc. and Hyleg, and their conditions, must be carefully noted. (See "Strength" in this section). Many subjects concerning the physical constitution are considered under the Articles on Appearance, Body, Complexion, Defects, Form, Height, Organs, Stature, Weight, etc. The physical body, (the constitution), is subject to two classes of diseases, those which are congenital, innate, hereditary, organic and structural, and secondly, acquired and the more temporary ailments. (See Acquired, Acute, Chronic, Congenital, Diathesis, Organic, Prenatal, Structural, etc.). The Constitutional, or Conditional Signs, are the Cardinal, Fixed and Mutable classifications, and the Constitutional Temperament is determined by the groupings of the planets in the Constitutional Signs. (See Temperament). Note the following subjects, conditions, benefits, afflictions, diseases, etc., which have to do with the Constitution. For the diseases of the Constitution, and subjects which may not be listed here, see "Diseases", and also look for the subject in the alphabetical arrangement.

Cold and Dry—(See "Cold and Dry Body" under Dry).

Cold and Moist—(See "Cold and Moist Body" under Moisture).

Consolidation Of—(See Consolidation).

Constitutional Diseases—Organic Diseases—Structural Diseases—Innate—Hereditary—Inherent, etc.—These are diseases indicated by the radical map, and prenatal conditions, are more inherent, and in contrast to Acquired Diseases. The latter class of diseases are of shorter duration, more often acute, while Constitutional diseases tend to become chronic, and

sometimes incurable. Constitutional Diseases are ruled by the ☉, and the ☉ much affl. at B. brings the danger of serious and severe constitutional, deep-seated, and organic diseases. The ☉ affl. by the ♃ at B. tends to weaken the constitution, and make one more liable to some form of Constitutional Disease. Also the sign ♃ is in tends to weaken the part of the body ruled by such sign, and to make the part, or organ ruled by the sign, more subject to inherent disease, and espec. if ♃ be severely afflicted, or weak in the sign, and also the map show weak vitality in general, and poor health conditions. The following are a few of the more serious Constitutional Diseases, which have to do with Constitutional Disorders and Defects, their cause, etc., which subjects see in the alphabetical arrangement.—Anaemia, Asthma, Atrophy, Cancer, Chronic, Congenital, Consumption, Crystallization, Decay, Defects, Deformities, Distortions, Emaciation, Epilepsy, Exerescences, Hardening, Heredity, Incurable, Insanity, Latent, Leprosy, Leukaemia, Malnutrition (see Nutrition), Organic, Palsy, Paralysis, Phthisis, Prenatal, Rickets, Sclerosis, Scrofula, Stone, Structural, Suppressions, Tuberculosis, Wastings, etc. The lists of diseases given under Chronic, the Sun, and Saturn, also suggest diseases which tend to be constitutional, inherent, and organic. Good Constitution—Fine Constitution—Advantageous Stature—Strong Constitution—Healthy Body—Vitality Strong—The Quadrant from the Asc. to the Nadir tends to produce, and espec. the 1st H. strong at B., and a fiery sign upon the Asc.; the ☉ in the Asc., or M.C., and well-asp.; the ☽ in ♀ unless the hyieg be affl. at B.; the ☽ strong and dignified at B.; the ☽, ♃, and Asc. well-asp. by benefics, and free from evil asps. of malefics; the ♃ strong at B., and free from affl.; ♃ ori.; ♃ moderately fortified in the 1st H., and in good asp. to the ☽, ♃, ♃, or ♃; ♃ ascending at B., and in good asp. to the ☽ and ♃; ♃ in the 1st H., or having the same or opposite Dec. with the Asc.; ♃ * or △ the ☽ at B., and if the ♃ and Asc. be free from affl.; ♃ or ♃ in the Asc. at B., and well-asp.; ♃ ascending at B.; ♃ ☽, * or △ the ☽; ♃ ascending at B., well-placed and aspected; ♃, ♃, ♃, ♃, or ♃ on the Asc.; given by the fixed signs when on the angles at B., and well-fortified and occupied; the ♃ influence when strong, or on the Asc., gives a healthy appearance. Sound Constitution—(See "Good", "Powerful", "Strong", in this section).

Stamina—(See Stamina, Tone; "Vital Force" under Vital; Vitality, etc.).

Strength—Of the Constitution—The strength and vital forces of the Constitution depend upon the position of the ☽ at B., and must be judged by the influence of the ☽, no matter in what part of the horoscope he may be in, in either a male or female nativity. (See the Introduction to this section).

Strengthened—The Strength of the Constitution Increased—The ☽ well-asp. by the ♃ at B.; the ☽ in a fiery sign; the ☽ ☽, or good asp. ♃; the ☽ well-asp. by ♃; the ♃ in 8, 9, 10, or 11; ♃ in * or △ asp. the ☽ benefits the constitution psychically rather than in a physical way; ♃ * or △ the ☽ tends to strengthen and consolidate the constitution. (See "Increased" under Vitality).

CONstrictions—Stenosis—Contractions—Constrictive—Constrictor Nerves—The Blood Vessels of the surface and extremities are constricted by cold, the work of ♃, driving the blood inwards, causing internal congestions, colds, etc. The influence of ♃ is to narrow, bind, and constrict, and

to cause stenosis of vessels, or parts. η , the ruler of ψ and π , has a special pathological action over the cutaneous capillary vaso-constrictor nerves, and by cold to cause them to contract, throwing the blood inwards. Constrictions also are caused by the contracting influence of Π , and espec. of the spasmodic variety. Constrictions may occur in any narrowed channel of the body, as in the Blood Vessels, Bowels, Capillaries, Ducts, Nose, Heart, Pylorus, Throat, Ureters, Urethra, and caused by Π or η afflictions, and with these planets in the sign ruling the afflicted part. See these parts in the alphabetical arrangement, or any other part or organ you may have in mind, and remember that η especially tends to constrict, hamper, restrain, and suppress any part or organ ruled by the sign containing η at B. ψ is also referred to by some Authors as causing constrictions. (See Astringents, Capillaries, Centripetal, Cold, Colds, Congestions, Contractions, Cramps, Hernia, Spasmodic, Stenosis, Strictures; "Vaso-Constrictor" under Vaso; Vessels).

CONSTRUCTIVE—Constructive Energies—Constructive Metabolism—Anabolism—Constructive Processes—Constructive Functions—The \odot and σ are constructive in the body. The principle of the \odot is constructiveness, and the constructive energies in the body are directly under the influence and rule of the \odot . The \jmath rules the constructive functions, and the general health. In subsidiary ways η and σ have a part in the constructive work going in the body. Bone building is carried on by mineral deposits formed by η . Mars has a constructive influence by burning up wastes and refuse in the body by fevers and inflammations. (See Action, Blood, Bones, Destructive, Energy, Fevers, Functions, Granulations, Haemoglobin, Inflammation, Iron, Mars, Metabolism, Muscles, Nerves, Sun, Tissues, Vital).

COUNTENANCE—Face—Expression—Look—Features—Visage, etc.—This subject is largely considered under such subjects as Appearance, Aspect, Complexion, Expression, Eyes, Face, Features, Look, etc. In this section, however, some subjects which have to do with the countenance will be considered and listed alphabetically. Disease, Conduct, Habits, Ill-Health, Pain, Suffering, etc., tend to change the countenance, and it would take considerable space and time to list here every subject related to countenance. Therefore, if the subject is not listed here, or under the subjects mentioned, look in the alphabetical arrangement

for the subject you have in mind. See the following subjects.—Anaemic, Animal, Appearance, Aspect, Austere, Beautiful, Blemishes, Bold, Cheeks, Cheerful, Chin, Commanding, Complexion, Contented, Cruel, Debauched, Dimples, Dissipated, Downward Look (see Look); Effeminate, Expression, Eyes, Face, Fair, Features, Fierce, Fiery, Glances, Gloomy, Good, Grave, Handsome, Harmless, Humane, Indifferent, Intellectual, Intemperate, Jaundiced, Kind, Lean, Long, Look, Lowering, Lumpish, Lustful, Mouth, Nose, Open, Oval, Pale, Peaceful, Pensive, Piercing, Pleasant, Pimpled, Pockmarked, Red, Refined, Robust, Round, Ruddy, Sad, Savage, Scarred, Scurvy, Sensual, Serious, Severe, Sharp, Sickly, Slender, Smiling, Smooth, Solid, Sympathetic, Sober, Stern (see Austere); Strong, Surly (see Aspect); Teeth, Thin, Thoughtful (see Grave); Unhealthy, Violent, Visage, Voluptuous (see Amorous, Sensuous); White, Wicked, Wide, Wrinkled, Youthful, etc.

COUNTER-IRRITANTS—Ruled by ☿. (See Caustics, Rubefaciants, Vesicant).

COUNTRIES RULED BY SIGNS—Nations—The different Countries, Nations, Cities, and Parts of our Globe, have been assigned to the rulership of the different Planets and Signs of the Zodiac. A list of these rulerships can be found in Lilly's Astrology, and other textbooks. In travel, and espec. for health, it is very important for people to avoid Countries ruled by the Signs in which they have the malefic planets at B., unless such planets have dignity and power in the sign, and are well-aspected. Under the subject of "Nations", the rulership of the different Countries and prominent Cities is given. Also see Location; "Native Land" under Native; "Place of Birth" under Place; Residence, Travel, etc.).

COURAGE—(See Bold, Mars, Positive, Resolute, Servitude).

COURSE OF DISEASE—As no two people are born exactly alike, and have varying inherent, natal and prenatal qualities, there can be almost a limitless number of ways in which a disease may manifest itself, and the course it will pursue. In making a prognosis as to the course any particular disease will pursue, you should make a detailed study of the map of birth, the prenatal epoch map, and also the map of the heavens for the time of decumbiture, the beginning of the illness, or when the patient takes to his bed, and interpret it according to the Laws of the Science. The transits, directions, and progressed influences now working over the native should be studied. The nature of the signs and houses containing the afflicting planet, or planets, should be considered, and the afflicting planet, and the times when such planet, or planets, will change signs or pass into the next house, etc. (See Continuity). Disease tends to take its course when the ☾, ♀, or ♁ are in the 8th H. at B., as there is less resistance by the mind under these conditions. Also in nega-

tive people illness is more apt to take its own course and time, as such people give up easily, and lack will-power, resistance, grit and determination.

Danger In Course Of—The lord of the Asc. in evil asp. the ♃; the malefics affl. the hyleg at B., and by dir., and espec. when the hyleg is affl. by a train of adverse directions, and without the favorable intervention of the benefics ♃ and ♀. (See "Certain"; "Sure", under Death; Fatal; "High" under Fever; "Dangerous" under Ill-Health; Malignant; "Disease" under Severe; "Violent" under Sickness; Vehement, Worse).

The principal planet causing cramps and incoordination is ♃, and in the part ruled by the sign containing ♃ at B. ♃ and ♀, when associated together, also tend to cause cramps, and in the parts ruled by the signs containing them. Also ♃ by his binding and restricting

influences tends to cause cramps in that part of the body, or organ, ruled by the sign he is in at B., and espec. in the limbs when in signs ruling the limbs, and afflicted, or in configuration with ♃. Also ♃ may cause cramps indirectly, due to gorging, excesses, gluttony, indigestion, etc. Cramps are also considered a ☉ disease, and espec. when the ☉ is configured with ♃. (See Uranus). The following subjects have to do with Cramps in the various parts and organs of the body, and the causes of Cramps, which see in the alphabetical arrangement when not considered here—

The malefics ♃ and ♂ in the signs ruling the arms, legs, knees and feet bring great danger of accidents and injuries in these parts, in loss of members, disease, fracture,

ankylosis, deposits, etc., by which the members, or parts, are temporarily or permanently crippled. (See Accidents, Arms, Birth, Congenital, Contortions, Contractions, Deformities, Distortions, Falls, Feet, Fractures, Gait, Hands, Incoordination, Infancy, Injury, Joints, Lameness, Legs, Limbs, Maimed, Members, Monsters, Muscles, Mutilated, Paralysis, Parturition, Rheumatism, Rigid, Spine, Walk, etc.).

Crippled from Birth—(See "Crippled" under Birth; Congenital).

CRISES IN DISEASE—Turning Point in Disease—A Paroxysm or Increase in the Disease—Crises are brought about by the changes of the ♃, by transits, by Prog. ♃ aspects, or a New ♃, and by directions. Judgment should not be based upon any one affliction, but all are to be considered. In making a judgment about crises, for the better or worse, the fundamental vitality should be considered, the indications of the radical map. The time of death usually comes at a crisis time, but should not be predicted openly, or to a sick person, even though certain death is indicated by the planetary influences, configurations and directions. The map of birth shows the days when crises are due, and when the transits or progressed planets will affect the radical planets by aspect.

Acute Diseases—Crises In—The 7th, 14th, 21st, and 28th days from the time the patient is taken sick are crisis days of the disease, being based upon the Four Quarters of the ♃. (See Critical). The ♃ makes on revolution in her orbit in about 28 days, and the 7th, 14th, 21st days, and her return to her place at the time of the New Moon, correspond to her Quarters, adverse aspects, and crises times in the disease. The First, Second, and Third Quarters of the ♃, from the time the illness began, are crisis days in acute diseases and fevers. If the patient lives thru these crises, and until the ♃ returns to her place, the disease will dissolve itself, or run into a chronic form. A person taken sick with a fever exactly at the New ♃ would have the crises days on the exact Quarters of the ♃ as given in the Calendar. In Acute diseases and fevers, the crises days are the dangerous ones. The most serious crisis day in an acute disease is on the 14th day, as a rule, when the ♃ arrives at the ♁ asp. to her place at the beginning of the illness, and this crisis day is called "The Criticus Primus", the one of prime importance. More patients die on the 14th day of a serious fever than on the other crises days, and if they do not die on the 14th day their chances for recovery and moderation of the disease are usually good. The patient is usually worse on the 7th and 21st days of the disease, but these crises are considered of minor importance as compared to the 14th day crisis. Improvements in the disease are due on the 9th, 10th, 18th, and 19th days of the disease, as these aspects correspond to the ♁ aspects of the ♃, her good aspects from the day

the illness began. (See Acute, Climacteric, Enneatical).

Better—Crisis a Turn for the Better—The Crisis Favorable—The ♃ in good asp. a benefic when she is 45, 90, or 135° from her place at the beginning of the illness; the ♃ on a crisis day in ♀ or ♁ asp. the lords of the Asc., 9th, 10th or 11th Houses, gives an interval of ease and relief; lord of the Asc. on a crisis day in good asp. the ☉ if the ☉ does not have the power of dominion over the disease. (See Amelioration; "Solution" under Continuity; "Better" and "Ease" under Disease; Enneatical, Moderation, Modification, Recovery, Recuperation, Remission, Resistance, etc.).

Chronic Diseases—Crises In—In Chronic Diseases the crises are Solar, and based upon the movements of, or aspects to the ☉, rather than to the ♃. Chronic disease follows the motion of the ☉, and acquires a crisis after the 40th day, and judgment, or prognosis, can be made when the ☉ arrives to the ☐ his own place in the map. Then there is a turn for the better if the ☉ is well-asp. by the benefics, but worse if configured with malefics. The ☉ to the ♀ or ♁ his own place indicates improvement, but to the ☐ or ♁, a change for the worse. As ♃ is the author of chronic diseases, a serious crisis usually comes, with a turn for the worse, or death, when ♃ by direction comes to the ☉ or ill-asp. the ☉, ♃, Asc., or Hyleg, and also when accompanied by a train of evil directions to the hyleg, and when there is little or no assistance, or favorable intervention, from the benefics. Crises days, crises periods, and the critical times in life in health matters can thus be somewhat predicted, and possible forecasts of the outcome made, by looking ahead in the planetary tables, and by calculating the times when evil aspects and directions form and culminate, tending to make the patient worse, and when the favorable aspects come, making moderation, convalescence, and cure possible. (See Chronic).

Eye Diseases—Crises In—(See "Crises" under Eyes).

Fevers—Crises In—(See "Acute Diseases" in this section. See Fever).

Indicative Crises—(See Indicative).

Worse—The Crisis a Turn for the Worse—The ♃ at 45, 90, or 135° from her place at the beginning of an illness, and in evil asp. a malefic, or lords of the 6th or 8th H.; the ♃ at crisis day ☉ or ill-asp. a planet which afflicted the lord of the Asc. at decumbiture; the ♃ at a crisis day ☉ or ill-asp. lord of the 6th, or planets in the 6th H., the disease runs high and relief measures do little good. (See "Acute", "Chronic", in this section. See "Increase", "Worse", under Disease; "High Fevers" under Fevers). CRITICAL—Pertaining To a Crisis—

Critical Days—The critical days in acute diseases and fevers are the crises days. (See "Acute", "Fever", under Crises). For critical days and times in Chronic diseases, see "Chronic" under Crises. Every individual meets with many critical days in life, due to transits, progressions, or directions over the radical map, and the ♃ aspects, which may precipitate an accident, injury, fever, disputes, quarrels, misfortune, reversal in business, sorrow, worry, etc., and it would take considerable time to study out beforehand all the critical days and crises each person is apt to meet during life. The person who becomes advanced, spiritualized, with balance, equilibrium, poise, self-control, wisdom, knowledge, discretion, discrimination, foresight, intuition well developed, etc., one who has found his right calling and place in the world, and who can keep quiet, work, persist and endure in his work, can usually pass thru the critical days of life unharmed, can pilot his ship of life safely thru the troubled waters of earth existence, and be a master of his destiny. The critical days and times in life, the evil planetary aspects from day to day, etc., are more apt to overtake, weaken, discourage, or ruin the one who is drifting along thru life, like a ship without control or a pilot, and who lacks knowledge of the scheme of things, the laws of the Universe, the philosophy of life and destiny, etc. The study of Astrology is one of the very important Guides in life, and to learn from it, and by a study of your own star map of birth, what the Will of the Higher Powers is for your life. (See Fate; "Free Will" under Will).

CRYSTAL GAZING—(See Clairvoyance, Mediumship, Psychic).

CRYSTALLIZATION—The Formation of Crystals—Hardening—The work of ♀, the ♃, and the ♀ sign. A principle of ♀. Renal Stones and Gravel are crystallizations, carried on by ♀ by virtue of his exaltation in ☽, the kidney sign. Also ♀ crystallizes Gall Stones, furnishes the mineral deposits which harden the Bones. Hardness, density, strength, and resistance in the tendons and cartilages are given by ♀. All crystallization is the effect of the electric action of the planets, whether in the body or in the mineral world. Rock, Coal, Lead, etc. are the crystallizations of ♀ in Nature. Up to a certain point the crystallizing work of ♀ in the body is normal, but ♀ also has his pathological action in the body by causing too much crystallization by his afflictions, and causing disease, such as Stone, Hardening of the Arteries, hard Tumors containing mineral deposits, such as Goiter, and also by crystallizing the Nerves and Muscles. After middle age the body begins to crystallize more rapidly, and when at last it is so hardened as to lose its elasticity, death comes to the body, and the separation of its vehicles. The action of the ☽ is also crystallizing, and the ☽ is a hard, crystal body, incapable of sustaining animal life or vegetation. Crystallization is also the result of Cold, and Cold Diseases tend to abnormal and pathological crystallization. Cauda (♁), the Dragon's Tail, also exerts a ♀ influence along this line. ♀ in any sign tends to more

rapid crystallization in the part, or organ, ruled by the sign he is in, and espec. after middle life, but it may be earlier in life if ♀ is badly afflicted, and also the afflictor in the disease, holding the dominion of death, etc. Thus ♀ in ☐ tends to crystallization in the lungs; ♀ in ☽, to crystallizations in the kidneys; ♀ ♂ ♃, to crystallization and hardening of the arteries, etc. (See Arteries, Bile, Bones, Cold, Concretions, Condensation, Congestion, Consolidation, Density, Deposits, Elimination, Eyes, Fiber, Goiter, Gout, Gravel, Hardening, Lameness, Lime, Minerals, Muscles, Nerves, Obstructions, Optic Nerve, Osseous, Retention, Rheumatism, Rigidity, Sand, Saturn, Stone, Suppressions, Tumors, etc.). For crystallizations in the various organs and parts of the body, and as associated with the various diseases, if not mentioned in the preceding list, see the subject in the alphabetical arrangement.

CULPEPPER—"Culpepper's Herbal" is a large book giving the planetary rulership of Herbs, and is a good book for students to have, as it is quite exhaustive along the lines of Herbs, their use in the treatment of disease, and the best times to gather them to get their best medicinal values. (See Herbs).

CUPRUM—(See Copper).

CURABLE—Cure—Cured—Cure of Disease—

Curable Diseases—Convertible Diseases—A disease is more curable when the afflictions are in the cardinal or common signs, as the influences of these signs are more flexible and amenable to treatment and a cure, but when in the fixed signs tend to be incurable, or greatly prolonged. However, if a disease is allowed to run its course, no matter from what kind of signs the afflictions may be, the disease may become chronic, and espec. if the mind and temperament are too weak to throw off the trouble, as is the case with many negative people. (See Negative). Disease is more curable if the benefics are with the malefics, or ori., angular, and cast any ray to the Lights, but if the benefics do not lend any assistance, or are weak, the disease tends to be incurable. The absence of malefics with the ☉ and ☽ in angles, and the benefics giving a good aspect, tends to hope of a cure, and the alleviation of the disease. Also if the 6th H. is free from afflictions there is more hope of a cure. (For further influences as to when a disease is curable, or incurable, see in the alphabetical arrangement the disease subject you have in mind, such as "Curable" under Cramps, Epilepsy, Fits, Insanity, etc.).

Curable Mental Disease—(See Conspicuous; "Curable", and "Incurable" under Brain).

Cure of Disease—Afflictions from the fixed signs are difficult to remedy. From the common signs are more amenable to treatment. From cardinal signs are more acute and transient,

and may be quickly broken or cured. (See "Curable" in this section. Also see Native Land, Prognosis; "Cure of the Sick" under Sick; Treatment).

Cured But Has Relapse—(See Relapse).

DEATH—Dissolution—The Terminus Vitae. The 8th H. is known as the House of Death, and the death dealing forces act the strongest thru this house. The 4th, 8th and 12th Houses are called the Terminal Houses, and have to do with the close and end of life, and the death of the physical body. (See Fourth, Eighth, Twelfth, Terminal). The η Sign, affiliated with the 8th H., is said to give the death sting, and the malefic planets, h_2 and σ to cut the Silver Cord. (See "Silver Cord" under Silver). The general influence of h_2 especially is to bring death of the body by his afflictions to the Hyleg. h_2 is called the Planet of Death. He is The Tester, Father Time, and it is his business to ultimately separate the Soul from its earthly vehicle, and set the Soul free. h_2 is the principal Significator of death by disease, and σ by accident or violence. The Benefics do not of themselves cause death, and even their evil aspects will often avert death when they fall in a train of evil directions. However, the Benefics, when holding the dominion of death, do largely contribute to the causes leading to death. (See Saturn, Mars, Jupiter and Venus Influences. Also see Scorpio). The New Moon implies decay, disintegration, and death, and the preparation for a new cycle, and is the low ebb of the physical forces. (See "New Moon" under Moon). The Killing Place is called the Anareta, and death depends upon the one, or more, killing planets which occupy an Anaretic Place at B. (See Anareta). The \square aspect by direction from the Killing Planet to the hyleg is known as the Killing Arc. The Diseases and Afflictions which tend to cause, produce, contribute to, and be the immediate cause of death of the physical body, are legion in number, and too numerous to list here. For Death by the various diseases, see the disease subject in the alphabetical arrangement. For death by Accidents, Bruises, Blows, Hurts, Injuries, Violence, Wounds, etc., see the various headings under these subjects. Only the more abstract subjects concerning death will be listed and considered here, such as Arguments for, Causes, Kinds, Manner, Quality, etc., and also a number of subjects listed for your attention, which you might overlook. HYLEG—Life is not destroyed unless the hyleg be severely afflicted, however evil the directions may be, altho the health may suffer greatly by the directions. (See the mention of the various afflictions to the hyleg under the ☉, ♃, ♃, ♃, ♃ influences in this paragraph. Also see Hyleg). ANARETA—The ♃ asps. of the Anareta to the hyleg, in signs of short ascension, or the ☐ asps. in signs of long ascension, according to Ptolemy, will kill or threaten death; the Anareta ☉ or evil asp. the hyleg by dir. (See Anareta. Also see the mention of the Anareta among the ☉, ♃ and Directions influences in this paragraph). DIRECTIONS—A train of evil directions afflicting the hyleg and the vital points of the map are necessary to produce death. The hyleg must be affl. by the ☉, ♃, ☐ or ♄ asp. of the killing, or Anaretical stars, and these also must be afflicted of themselves to cause death. To produce death there must be a combination of several evil directions to the hyleg, and without the aid or intervention of the Benefics to the Anaretic Places, or to the 4th H. One evil direction to the hyleg, however powerful, rarely destroys life. The hyleg evilly aspected at B., but supported by the Benefics, brings great danger of death under a train of evil directions to the hyleg, but with possibility of escape and mitigating influences, and espec. if the benefics give a good asp. to the hyleg at the time

of the evil directions. (See Directions; "Danger to Life" under Life. Also see "Certain", "Symbols", in this section). Each of the Houses and Signs of the Zodiac also bear rule over certain diseases, and to contribute to death by these diseases, or afflictions, and for these influences see each of the Houses, and the Signs, in the alphabetical arrangement, in addition to the 4th, 6th, 8th, and 12th H. influences already given in this paragraph.

(See Chap. 4 in Sepharial's Manual of Astrology, on the relation of the decanates and planets, and the diseases and qualities given by each of the 36 decanates). The Decanate rising on the Asc. has a distinct influence over the height, weight, bodily development, personal appearance, facial characteristics, and also determines the natural temperament. The first Dec. of cardinal signs is mental; the second Dec. is mental-vital, and the third Dec. is mental-motive. The first Dec. of Fixed Signs on the Asc. is vital; the second Dec. is vital-motive; the 3rd Dec. is vital-mental. The first Dec. of mutable signs on the Asc. is motive; the 2nd Dec. is motive-mental; the 3rd Dec. is motive-vital. The Bodily Tem-

perament given by the Asc. may thus be either mental, motive, or vital, or a combination of two of these, as mental-vital, mental-motive, etc. These Decanates on the Asc. also have much to do with the shape of the face. The mental type is shaped like a pear, and the head narrows down to the chin, and is wide at the temples. The vital type is widest about the cheeks, and with an oval or round face. The motive type has the head and face flatter at the sides, and the square-shaped head. Each of these types are also subject to three variations or combinations, according to the Dec. rising, such as vital, vital-motive, and vital-mental, etc. Planets rising, and the position of the ruler of the Asc., also produce other variations. Also the personal appearance is much affected by the ♃, and her sign and position. Also it is said the height of a person is partly determined by the Moon's Nodes, but this cannot always be relied upon. (See Navamsa). (See Appearance, Ascendant, Body, Face, Height, Stature, Temperament, Weight, etc.).

DECAPITATION—Danger of Death By—(See Beheaded).

DECAY—Putrefactive Changes—Decomposition—Governed by ♃ and the ♃. Cold and Dryness tend to decay, dissipation and decomposition of matter, and are malevolent influences. Organic and vegetable decay are under the rule of the ♃. (See Blight, Catalysis, Cold, Corrosion, Death, Decrepitude, Degeneration, Dissolution, Dryness, Excretions, Gangrene, Granulations, Moisture, Mortification, Moonlight, Necrosis, Noxious, Putrefaction, Rotten, etc.).

Death by Decay—♃ causes death by a decayed system, and due to corrupt blood, surfeits, and brought on by excesses of various kinds. (See Excesses, Impure, Jupiter, Plethora, Surfeits, etc.).

Decayed System—(See "Death" in this section).

Old Age—The 3rd Decanate of ♁ denotes old age, decay, infirmity, weakness and dissolution. (See Infirm, Old Age, Shrinkage, Wasting, Withering, Wrinkles, etc.).

poreal signs; a ♀ influence when this sign is badly afflicted; characteristic of bad ♀ and ☿ maps when under strong ☿ afflictions; deceptions are also ruled by ☿. (See Cheating, Dishonest, Dual, Evil, Forgers, Gambling, Hypocritical, Liars, Mischief, Mockery, Pettifogging, Shrewd, Swindlers, Thieves, Treachery, etc.).

DECUMBITURE—This means "Lying Down", the beginning of an illness, or when the patient first takes to his bed in the illness. A Horary map made up for this time gives very valuable indications as to the nature and prognosis of the disease, and when studied along with the map of birth. The ☽ and Asc. are always taken as hyleg at decumbiture in Horary Questions. The afflicting planet, or planets, in cardinal signs at decumb. show a more rapid disease, and soon over. The afflicting planet in a fixed sign shows continuity, a prolonged or tedious disease, etc. (See Acute, Cardinal, Chronic, Continuity, Crises, Duration, Fixed Signs under Fixed; Mutable, Particular, Prolonged, Short Illnesses under Short, Praecipitants, Prognosis, Symptoms, Tedious, etc.).

DEFECTS—Defective—Imperfections—

Absence of a Part or Organ, etc.—

Defects may occur in any part or organ of the body, and may be congenital, from birth, or acquired. For the various Defects of Parts of the Body, Organs, Functions, etc., see the Part, Organ, or Function in the alphabetical arrangement. The ☾ in the different Signs, if afflicted, tends to cause organic and structural defects in the part or organ ruled by such sign. Also the malefics ♃ and ☿ in the various signs at B. tend to defects, marks, deformities, and afflictions to the part, or organs ruled by the sign containing them. The planet ♃ especially causes defects in the personal appearance when he is in the Asc. at B., or rising, and afflicting the ☾, ☽, or Asc. at B. The Prenatal Influences, and the planetary afflictions during Gestation, also account for many of the bodily, physical and mental defects, which defects exist from birth, and are conspicuous throuout the life. Heredity also accounts for many defects, and which are handed down from parent to child from generation to generation, such as Birthmarks, Marks, Moles, Deformities, Insanity, etc. For the Defects which arise from disease, such as Blindness, Deafness, Lameness, Paralysis, Stiff Joints, and a multitude of subjects, look for the disease and the subject in the alphabetical arrangement if not listed here. The following subjects are suggestive along the lines of Defects, which see in the alphabetical arrangement.—Abnormalities, Accommodation, Acquired, Appearance, Arms, Atrophy, Azimene, Baldness, Barrenness, Beastly Form (see Beasts); Breathing, Births, Blemishes, Blind, Blood, Bloches, Body, Brain, Breasts, Broken, Build, Chest, Children, Circulation, Cloaca, Complexion, Congenital, Constitutional, Contortions, Contractions, Crippled, Crooked, Cyclops, Deaf, Deaf and Dumb (see Hearing, Mutes); Deficient, Deformities, Digestion, Diminished, Disabilities, Displacements, Disfigurements, Distortions, Dumb, Dwarfed, Ears, Enlargements, Eunuchs, Excrescences, Eyes, Eyesight (see Sight); Face, Faulty, Feet, Foetus, Freaks, Freckles, Gait, Growth, Hair, Hands, Heart, Heredity, Hermaphrodites, Idiocy, Ill-formed, Imbecility, Imperfections, Inefficient, Inhuman, Insanity, Insufficient, Irregularities, Joints, Judgment, Knees, Lameness, Left Eye (see Left); Legs, Limbs, Locomotion, Lungs, Maimed, Malformations, Marks, Matrix (see Womb); Members, Memory, Mental, Mind, Missing, Moles, Monsters, Mutes, Mutilated, Naevus, Natural, Nerves, Ocular, Organic, Organs, Paralysis, Personal Appearances (see Appearance); Physical, Posture, Prenatal, Pressure, Rectum, Respiratory Organs (see Breathing); Right Eye (see Right); Rigidity, Savage, Scars, Sex Organs, Sight, Skin, Speech, Spine, Stature, Stoopd, Structural, Teeth, Throat, Tongue, Vision, Walk, etc.

DEFICIENT—Deficiency—Deficiencies—Are ruled over strongly by ♃, as ♃ tends to slow up the functions, retard, suppress bodily activities, and espec. when he is badly afflicted at B., or afflicting the vital centers, as the ☉, ☽, Asc., or hyleg. The influence of ♀ when conjoined with ♃, and affl. the rulers of the circulation, ♃ and ♀, also tends to increase the afflictions of ♃ along this line. (See Obstructions, Retardation, Stoppages, Suppressions).

DEFORMITIES—Deformed—Imperfect in Body—Disabilities—These may be congenital or acquired. The congenital deformities are usually the result of prenatal afflictions during gestation,

assisted by strong afflictions of the malefics at birth, or with what are known as the Broken, Imperfect, or Mutilated Signs on the Asc. strong, or occupied by malefics. (See Broken, Distortions, Mutilated, Prenatal).

Heart—Depressor Nerves of—(See "Depressor" under Heart). See Inhibition).

DERANGED—Derangements—Disordered—Discomposed—The malefics ♀ and ♂ are the principal factors in causing physiological derangements. Mental derangements are due more to the influence of ♀ and the ♀, afflictions to them, and their relations to each other and the Asc. (See "Derangement" under Mental). Any part of the body, as well as the different parts or qualities of the mind, are subject to derangement under the various planetary afflictions at B., and by dir., and for these disorders, and the influences causing them, see the subject, and the disease, disorder, or weakness, in the alphabetical arrangement. The word "Deranged" is used very little in Astrological Literature, but has been used in connection with the following subjects.

Deranged Blood—Caused by afflictions to ♀ and ♀, the rulers of the blood. (See the various paragraphs under Blood, Circulation).

Mental Derangement—(See "Derangement" under Mental).

Physiological Derangements—Bodily Disorders—(See Disease, Disorders, Distempers, Fevers, Functions, Glands, Heaviness, Humours, Ill-Health, Imperfections, Indispositions, Infirmities, Irregularities, Irritations, Lethargy, Morbid, Sickness, etc. Also see each organ and part of the body, functions, etc., for the various derangements of such parts).

DERMA—The Cutis—The Corium—The True Skin—The Derma comes under the same rulership as the Skin in general. (See Skin). The Derma is contracted by ♀ and Cold, driving the blood inwards, causing internal congestions, colds, etc., and is relaxed by the heat of ☉, which influences tend to draw the blood to the surface again. (See Centrifugal, Centripetal, Cold, Colds, Congestions, Corium, Cutis, Eruptions, Purpura, Rubefacient, Skin).

DESCENDANT—The 7th H., the Cusp of the 7th, the Western Angle, etc.—This is one of the vital and sensitive places of the map of birth, and espec. the degree on the Western horizon at B. These same influences also apply to being lost in, starvation in, death or sickness in desolate, inaccessible, or wilderness places. (See "Dangers" under Travel).

DESIRE—Desires—Desire Body—The Desires, Hopes and Ambitions are ruled by the 11th H. The principle of η is desire. Venus ill-dig. at B. leads to wrong desires, illicit affections, increase of passion, excess of amorous indulgences, etc. When η is well-asp. at B., and by dir., the desires are of a higher, purer, and more spiritual nature. (See Character). There are many subjects affiliated with Desire and Desires which tend to cause ill-health and disease when illicit and perverted desires are given too much liberty, and especially along the lines of food, eating, drink, pleasure, passion, sex, etc., and for subjects which may not be included in this section, look for it in the alphabetical arrangement. (See Eleventh House).

Depraved Desires—(See Depraved).

Desire Body—This is one of Man's finer Vehicles and made of Desire Stuff. Our emotions, feelings and passions originate in this body. The Desire Body being the seat of the passions and emotions is a strong factor in causing disease and sickness. The Desire Body, also known as the Animal Soul, is ruled by the η and δ , and is also influenced by η , \sphericalangle , and δ . The impulses of δ stir the Desire Body into action. The Animal Soul has its seat in the Liver, and the Liver is the great central vortex of the Desire Body. (See Liver). The Desire Body urges us on to Action. (See Action). Desires, and the Desire Body, are affiliated with the watery signs. The As-

tral Body is the seat of the Desires. (See Astral, Childhood, Emotions, Feelings, Impulses, Iron, Sensations).

DESTRUCTIVE—Destructiveness—Pernicious—Ruinous—Noxious—Cold and Dry are destructive and noxious forces in Nature, and espec. when in excess. Cold is ruled by η , and excess of dryness by δ . (See Cold, Dry). Heat and Moisture, on the other hand, are prolific and nutritive, when not in excess, and are ruled by the benefic planets \sphericalangle and η . (See Heat, Moisture).

Destructive Processes—In the Body—Are the work principally of η and σ , and also of the \odot when he is in \square or δ asp. to the malefics, and espec. to η and σ . Saturn is destructive by retention of wastes, deposits, hardening, corrosion, stagnation of functions, suppressions, impeded elimination, concretions, retention of Urea, obstructions, atrophy, crystallization, etc., and by causing fears, worry, pessimism, etc. Mars is destructive for the time by causing high and violent fevers to burn up the wastes of the system, and by causing accidents and violence. Scorpio, one of the signs of σ , is concerned in both the destructive and reproductive processes. Thus η and σ are both constructive and destructive according to their different aspects and influences. Destructive energy is under the rule of σ . (See Anaemia, Atrophy, Cells, Constructive, Corrosion, Crystallization, Decay, Degeneration, Deposits, Destructiveness, Deterioration, Emaciation, Hardening, Impediments, Mars, Metabolism, Noxious, Obstructions, Pernicious, Processes, Retention, Saturn, Stagnation, Stone, Suppressions, Tissues, Wastes).

DESTRUCTIVENESS—Pernicious—Ruinous—Tending to Destroy—Mental Destructiveness—A σ disease and affliction; afflictions to σ at B., and by dir.; σ and H prominent at B., and afflicted, tend to wanton and dangerous destructiveness; the D \square or δ σ at B., and by dir.; the 3rd Decanate Ω on the Asc. In a good horoscope these same forces manifest themselves in Reforms, and in the destruction of evil, sin, wickedness and vice wherever they may be found. (See Anarchists, Criminal, Cruel, Dangerous, Destructive, Fierce, Furious, Murderous, Pernicious, Rashness, Reformers, Religion, Revolutionary, Riotous, Savage, Temper, Violent, etc.).

Children—Detriment To—(See "Detriment" under Children).

Detriment to Everything—The \odot , η , J , and σ conjoined in Ξ ; the D , η , and σ conjoined in Ξ .

Planets in Detriment—Planets are in detriment, and weaker in influence, and afflicting, when in the signs opposite to the signs they rule. Thus the \odot rules Ω , and is in detriment in Ξ . Planets in detriment, being weaker and less fortunate, tend to invite disease and affliction to the parts of the body ruled by the sign they are in at B., and to increase the inherent debility of that part, and espec. when such planet is very evilly aspected. (See Opposites). For detriment to Men, Women, Children, Brother, Sister, Father, Mother, Aunts, Uncles, Grandparents, Family, Relatives, Kings, Nobles, Monarchs, Rulers, Presidents, etc., see these subjects in the alphabetical arrangement. DEVIATIONS—Abnormalities—

Faculties—Deviation of the Passive or Sensitive Faculties—Deviation in these faculties is discernible chiefly in the excess or deficiency of the masculine or feminine genders, and lack of the proper balance and conformation agreeable to its own nature. Thus in a male horoscope many planets in feminine signs tend to make men effeminate, and in a female nativity many planets in masculine signs tend to make women more coarse and masculine, and to deviate from the usual limits of nature. (See Abnormal, Aversions, Bachelors, Celibacy, Effeminate, Fears, Perversions, Sex, Spinsters).

Locating the Disease—The planets in the different Signs at B., and also the signs on the Asc., 6th, 8th, and 12th Houses, show what parts of the body are afflicted. The Signs containing the malefics usually show what parts of

the body are most afflicted from birth, and the directions, transits, and progressed influences after birth show when the afflicted organ is more apt to become diseased, and the duration of the affliction. (For further influences along this line see each of the planets, signs, and houses in the alphabetical arrangement, and note the parts of the body, or organs, they rule. Also see Left, Lower, Majority, Malformations, Middle, Organs, Parts, Prenatal, Right, Sympathy, Symptoms, Upper, etc.).

DIRECT MOTION—Of Planets—The disease tends to be more continuous and intense under the direct motion of the planets when such a planet is the afflictor in the disease. (See Continuity, Disturbances, Intensity, Interrupted, Retrograde, Sequence, Stationary).

DIRECTIONS—Primary and Secondary Directions—Effects of Upon the Health, Mind, and Affairs of the Native—Diseases caused by Directions tend to be functional and temporary unless neglected and allowed to progress into morbid conditions. Diathesis and the Transient Disposition in disease are indicated by Directions, while the Radix denotes the Hexis, or Permanent Habit in Disease, Structural, Organic and Constitutional Diseases. (See Diathesis). The Time and Type of the disease are shown by Directions, but only such as are foreshadowed by the radical map. (See Events, Progression, Secondary; "Spared" under Life). Mars a strong afflictor at B., and by dir., tends to Acute and Swift Diseases, Accidents, Injuries, Death by Wounds and Violence, while h the afflictor tends to Chronic Ailments, and so on with the nature of each planet. The directional strength of planets depends upon their aspect, mundane position, and their position in the Zodiac. Directions of the planets are more evil in disease when they occur during the different periods of life ruled by the planets. Thus a h direction is more evil during the h period of life, etc. (See Periods. Also see "Directions" under Saturn, and each of the planets). Also evil Directions to the Hyleg in the Climacterical Years of life are more dangerous in health matters. (See Climacteric).

Childhood—Directions In—During Childhood and Youth the effects of Directions are said to be transferred to the Parents or Guardian. (See "Directions" in Sec. 1 under Children).

Death—Directions and Death—It takes a train of evil Directions to the Hyleg to cause death. (See Anareta, Benefics; "Directions" in Sec. 3 under Children; "Arguments for Death", "Quality", under Death; Epidemics, Hyleg; "Death" under Immediate; Malefics).

Evil Directions—(1) First Train of Evil Directions Destroys—(See Crises; "Directions Kill" under Infancy; "Directions" in Sec. 3 under Children; "Resistance Weak" under Resistance; "Vitality Low" under Vitality; "Weak Body" under Weak). (2) Good Powers to Overcome Evil Directions—(See "Abundance of Health" under Health; Immunity, Recuperation, Resistance, Vitality Good, etc.).

Females and Directions—When the ♃ is weak, ill-dig., and badly aspected at B., the constitutional powers are often so reduced as to be unable to withstand the shock of subsequent evil

directions, and with females in infancy, under such conditions, the first train of evil directions tends to kill.

Mind Afflicted by Directions—The ☉ to the bad asps. ♀; the ☽ to the bad asps. the ☉ or ♀; the M.C. to the ☉ or ♀; asp. the ☽. (See Drink; "Diseases", "Irritations", under Mental).

Overcoming Directions—(See "Evil Directions" in this section).

Primary Directions—If the nativity is weak, and the constitution broken by disease or age, a primary direction will kill if the planets at B. are unfortunate, and without the assistance of benefics, or an attending good Secondary Direction. In a stronger constitution a train of evil primary directions is necessary to kill, and espec. in childhood, youth, or middle life. (See Primary, Transits).

Secondary Directions—(See Secondary).

Succumbs Easily—To Directions—(See "Evil Directions" in this section. Also see Feeble; "Ill-Health All Thru Life" under Ill-Health; Incurable; "Life Destroyed" under Life; Sickly; "Much Sickness" under Sickness; "Weakened" under Strength; "Low" under Vitality; "Weak Body" under Weak).

The natural discharges from the body are such as Breath, Tears, Milk, Sweat, Faeces, Urine, Mucus, Saliva, Menses, Oils of the Skin. (See these subjects). Discharges occur from the orifices of the body, organs, and membranes, as from the Eyes, Ears, Nose, Mouth, Throat, Lungs, Breasts, Navel, Rectum, Skin, Urethra, Vagina, etc., and may be natural, or morbid in disease conditions.

DISEASE—Diseases—Ailments—Complaints—Distempers—Disordered System—Maladies—Ill-Health—Pathological Disorders—Sickness, etc.

The following influences tend to cause disease.—The ☉, ♃, and planets in the Occidental Quarters at birth show disease, and in the Oriental Quarters indicate Acute Pains and Accidents. (See "Causes" under Accidents). Malefics occidental, and affl. the ☉ and ♃, cause diseases, and when oriental cause Blemishes (see Blemishes). Disease is indicated by the planetary positions

and aspects to the ☉, ♃, Asc. and Hy-leg, and their positions in the 6th, 8th, or 12th Houses. Ptolemy says disease and blemishes belong to the 6th and 7th Houses, and to the Asc. Malefics when ori. to the ☉, and occi. to the ♃, cause diseases. The diseases caused by each planet are said to arise from the planet whose aspect or body first arrives at the Anaretic Place. If there be no such aspect, that planet causes the disease which last separated by body or aspect from the Anaretic Place. (See Anareta). Planets B., or in Perigee, tend to cause disease and distempers. Disease is caused by planets afflicting the ☉, ♃, or Asc., if they be malefics, or if the same Declination. No aspect of ♃ or ♀ alone causes disease, but only as configurated with malefics. Some say most diseases owe their origin to the ♃, and they are at least governed by the aspects and periods of the ♃ for some time if they are acute diseases, and even chronic diseases are much affected by the ♃ at her Quadratures and Semi-Quadratures. At the New and Full ♃ the ♃ influence is not so manifest, except with Lunatics, whose fluids are more violently disturbed at the New and Full ♃. Common Signs and cadent houses are closely identified with disease, and are weaker constitutionally. The 3rd and 9th houses, both cadent, are especially connected with the Mind and Mental Disorders, and ♃ and ♀ in these houses at B. will help to overcome disease thru a good state of the mind. The 6th House and the ♃ Sign are important in the consideration of disease. In these Spirit, Mind and Matter meet, as ♃, the ruler of the mind, is also the ruler of the 6th H. It is thru the Vital Principle that disease acts upon the mind, and diseases of the mind upon the body. The power and degree of morbid action show a falling off as the planets pass from cardinal to common signs. The intensity of disease is associated with the cardinal signs, and its remission with the mutable signs. (For further influences along this line, see Health, Ill-Health; "Organic" under Functions; Sickness. Also note the various paragraphs in this section. For the various diseases to which mind and body are liable, look for the subject in the alphabetical arrangement, as only the more abstract subjects concerning disease, the causes of disease, the classification of diseases, the nature and quality of the disease; the time, duration, and possible outcome of the disease, and subjects closely affiliated with disease, will be listed in this section. DISHONESTY—Dishonorable—Cheating—Crafty—Cunning—Artful—Sly—Fraudulent—Liars—Subtle—False Pretenses—Dual—Duplicity—Wily—Shrewd—Insincere—Unfair—Unprincipled—Unscrupulous—Hypocritical—Thieving—Swindling—Underhanded, etc. Dishonesty is a disease of the Mind, and for this reason these influences are inserted here. Such influences, however, can be overcome. There are usually some good influences in every map of birth, or in the character, which tend to make a person honest, kind, balanced, good, and upright, and also some evil influences which tend to the opposite unless they are controlled and transcended. Wilson has observed that those who have a copious flow of Humours from the head are remarkable for Shallowness of Intellect, and for Dishonesty. The following influences tend to Dishon-

esty, and to the traits of mind listed in the first part of this Article.

Causes of Dishonesty—The Planetary Causes at Birth and by Direction—The Prenatal Causes, the Epochal Map, the map for the time of Conception, also show the character, and contributory fundamental causes. poreal signs strong at B., and many planets in them, tend to duplicity, hypocrisy, etc., and espec. the double-bodied signs of ♃. Bones and Organs in the parts of the body ruled by the sign containing ♃ at B. are espec. subject to displacement and dislocation, or the trouble brought on by the afflictions of ♃ by dir. to the part so afflicted at B. The afflictions of H also cause violent dislocations, and espec. when configured with ♃ or ♁ at the time. Mars also tends to cause dislocations by his violent nature, as by injury in accidents, etc. Mechanical Displacements, espec. of organs, are both ♃ and ♁ disorders. Organs are often displaced due to the weakening effect of ♃ afflictions to ligaments and supports.

DISTORTIONS—Twisted Out of Natural or Regular Shape—

Causes Of—Many planets in Imperfect or Mutilated Signs at B, or with such a sign upon the Asc., as ϕ , μ , or \times (some Authors include \simeq and ψ), are apt to produce distortions of body and limbs; malefics in angles, and the \odot or \sphericalangle in ϕ , or brought up to them; the \odot or \sphericalangle ϕ or δ h, in angles, and espec. if the \sphericalangle be in her nodes, or in extreme Lat., or in hurtful signs, as ϕ , δ , \simeq , μ , or ψ ,—under these conditions if the \odot or \sphericalangle be in ϕ with h or ϕ , the defect will be from birth, but if h or ϕ be in δ to the \odot or \sphericalangle , or h or ϕ in the M.C. in \square the \odot or \sphericalangle , it will be from Cuts, Blows, Stabs, Falls from Heights, Injury by Robbers, Quadrupe, by Shipwreck, and in Accidents;

the ♃ in obnoxious signs, as ♃, ♄, ♅, ♆, or ♇, in her nodes, or in extreme Lat., and the malefics brought up to the Luminaries, the body is afflicted with Excrescences, Distortions, Lame-ness, or Paralysis. The calamity takes place from the moment of birth if the malefics be with the ☉ or ☽, but if the malefics be in the 10th H., and elevated above the Lights, or in ♄ to each other, then the trouble arises from Falls from Heights, Attacks by Robbers or Quadrupeds, or by some dangerous Accident, Cut, Stab, etc. (See Excrescences).

Degree of Disturbance—In Disease—This is greater when the tempo of the movements of the planets is slower in forming or separating from aspects,

as when the planets are R, Stationary, Slow of Motion, etc. The rate of progression of the planets varies from day to day, and in disease the daily motion, or rate of movement of the planets, should be studied in helping to form a judgment. Planets rapid and direct in motion, and at their normal daily rate, tend to more rapid dissolution of disease. (See Direct; "Planets" under Motion; Retrograde, Stationary).

DRY—Dryness—Dried—Hot and Dry—Dry Body—Dry Diseases, etc.—Dryness is noxious and destructive, and tends to diseases accompanied by friction, and by irritation of both mind and body. Dryness is associated with the earthy signs ♀, ♀, and ♀, and when acting alone is considered passive and feminine. When associated with heat, as acting thru the fiery signs, ♀, ♀, and ♀, the combination of hot and dry becomes more positive. The fiery and earthy signs contribute the heat and dryness, while the airy and watery signs are cold and moist. Dryness and Moisture are considered passive qualities. (See Moisture). The Nocturnal Signs ♀, ☐, ♀, ♀, and ☒, excel in dryness and moisture. Excess of dryness is caused by ♂. Moderate dryness is produced by the ☐, ♀, and ♂. The ☐ produces dryness due to his heat; ♂ by his hot and fiery nature; ♀ by being remote from the ☐. When masculine, ♀ produces dryness, and moisture when femininely constituted, and as ♀ is variable, produces both dryness and moisture, according to his distance from the Earth and ♀. The ☐, ♀, ♀, ♂, and ♀ tend to dryness of the body and to dry diseases. ♀ exerts a dry influence. ♀ and ♀ are cold and dry, and ♀ so when configured with them. ♀ causes dryness when occi., and ♂ causes dryness only when occi., and when ori. causes heat and dry-

ness. Dry and Cold are malevolent influences and tend to decay. (See Decay). The elementary qualities Dry and Hot are positive, while Dry and Cold are negative. The Dry and Cold of the left side of the body are more feeble than the Hot and Dry of the right side. (See Left, Right). The elementary qualities Dry and Moist alternate, so that the 12 divisions of the body, as ruled by the 12 Signs, are once dry and once moist, positive and negative in rotation. The following subjects have to do with Dryness, which see in the alphabetical arrangement when not considered here.

DURATION—

Duration of Disease—The Length of the Disease—This may be judged by the nature of the Signs in which the afflicting planets are found, and which cause the illness. The afflictions in cardinal signs show the disease to be very severe, but soon over. Afflictions in fixed signs show long, chronic, stubborn, tedious diseases, and with slow recovery. In common signs, difficult to cure, or incurable, due to the passive and indifferent state of the patient's mind, and amenability to adverse suggestions. For the influences along this line see the following subjects in the alphabetical arrangement—Acute, Alterations, Amelioration, Cardinal, Changes, Chronic, Convalescence, Constancy, Course, Crises, Curable, Death, Decrease; "Better" under Disease; End, External, Fatal, Fever; "Fixed Signs" under Fixed; Force, Increase, Incurable, Invalids, Lingering, Long, Moderation, Modification; "Moon" under Motion; "Mutable Signs" under Mutable; Prolonged, Quick, Recovery, Recuperation, Relapses, Remission, Remote, Resolution, Return, Short, Slow, Tedious, Termination, Violent, Worse, etc.

the mind and body. Also caused by disturbances of the Pituitary Body, which is ruled by H and the ♀ Sign, and by lack of the Pituitary secretion. An earthy sign on the Asc., and two or three planets in the Asc., tend to make Dwarfs and people under the usual stature, and espec. if ♀ is also in the Asc. At the birth of Dwarfs, the ♀, ♀, or ♀ Signs are usually rising, and also there is usually an affliction between ♀ and ♂, or between H and ♂. The ♂ of the malefic planets H, ♀, and ♂, or their ♀ aspects, in fixed signs, tend to; the ☉ and ♀ in the 6th or 12th H., and affl. by H, ♀, or ♂; the malefics H, ♀, or ♂ in, or afflicting, the 5th, 6th, or 12th H., the cusps of these houses, or the cusp of the Asc., or if they be in ♀; ♀ ☐ ♀; ♀ in ☐, principally in the 6th H., and below the horizon, and with ☐ on the Asc., and the ♀ in ☐; many planets in ♀ in the 6th or 12th H.; ♀, ♀, or ♀ on the Asc.; ♀ on the Asc., and containing ♀, ♀, and ♀ in ♂; the lord of the Asc., and the ♀ in the last degree of a sign, and without Latitude.

EARS—Organs of Hearing—Auditory Organs—Aural, etc.—The Ears in general, the Ossicles, Nerves, and all parts of the Ears, are ruled by the ♄ sign, the external rulership of ♄, and are also influenced by the ♃ Sign. The Ears have special affinity with ♄ and the ♄ Sign. The 12th H. also tends to affect the Ears for good or ill, as this

house is closely connected with the Senses, and limitations upon them, and in cases of Deafness, ♄ and the 12th H. are usually badly afflicted, or with ♄ and other planets afflicted in the 12th H. The right ear is said to be ruled by ♀, and the left ear by ♂. In the Hindu System the 3rd H. is assigned to rulership of the ears, and in our System of Astrology, the 1st H. rules and affects the ears. The Auditory Organs are also ruled by ♀ in general, and espec. the right ear, and an afflicted ♀ in ♃ or ♄, in the 12th H. at B. tends to greatly hamper the functions of the ears. They occur when planets are in violent signs, and also at the time of, or soon after an eclipse. They are also coincident with the appearance of Comets. Caused by eclipses of the ☉ in ♌ or ♍; an eclipse of ☉ in 2nd Dec. of ♌ or ♍; the ☉ to the ☽ in an earthy sign during travel brings danger of injury or death in an earthquake; the ☉ and ☽ in fixed signs, and also with heavy afflictions from several major planets in fixed signs at the same time; an eclipse of the ☽ in ♁, ♀, ♃, ♄, and ♅ in 8 and ♁, and with other planets in fixed signs; ♀ and ♃ in terrestrial signs, and afflicting the Lights; ♀ ☽ ♃ in 8, ♀, ♃, or ♁, in the 4th H., and on the lower Meridian; ♀ in the 4th H., and affl. the hyleg, subject to injuries or death in an earthquake; ♃ in 8 or ♁ in ☽, ♀, or ♃ ♀ or ♃; several planets on or near the Equator; eclipses in the 1st Dec. of ♁; many aspects between the planets exist at the time of; great Comets in their perihelion, and within the orbits of ♀ and ♃; the 19° ♃ on the Asc., subject to earthquake casualties. Earthy Matter—Deficiency of In the Bones—(See "Deficiency" under Bones; Deposits, Minerals).

Earthy Signs—Of the Zodiac—The Earthy Signs are 8, ♁, and ♃, and are cold and dry Signs. Taken collectively they rule the neck, throat, bowels, bones, knees, skin, the flesh, the carbon in the body, and are connected with the mineral salts of the body, the osseous structures, and the concretions. They give the Nervous and Melancholic Temperament. When on the Asc. they tend to give a compact body, but with less vitality and physical power than is given by the Airy or Fiery Signs. ♃ on the Asc. tends to give low vitality, an ill-shaped body, and a melancholic temperament, being the sign of ♀. The 8 and ♁ Signs tend to strengthen the general health when containing the ☉ and benefics, and not seriously afflicted. The earthy signs are more free from fevers than other signs. Significators in, or earthy signs on the Asc. and 6th H. tend to all chronic, long and tedious diseases, Ague, Intermittent Fevers, and such as proceed from Consumptions or Melancholy. They dispose to falls, fluxes, hanging, and death by beheading. The action of the ☽ is different in all three of the earthy signs. The ☽ well-asp. in 8 tends to good health, regular functions, and methodical habits. The ☽ in ♁ tends to bowel disturbances and irregularities, irregular intestinal functions, and digestive disorders. The ☽ is very weak in ♃, and tends to irregular functions, and which may be impeded and uncertain. Despondency and melancholy easily result, which tends to lower the vitality and

weaken the functional activities. The airy and earthy signs are the least excitable. (See in the alphabetical arrangement the various subjects mentioned in this paragraph). For other subjects which have to do with the Earth, Human Affairs, the Peoples of the Earth, etc., see the following subjects.—Air, Animals, Calamities, Catastrophies, Cold, Crime, Epidemics, Events, Famine, Fig Trees, Fire, Fish, Floods, Frost, Fruits, Grains, Heat, Herbs, Mankind, Materials, Metals, Minerals, Miseries, Mortality, Murderers, Nations; "Operations" under Nature; Ocean, Pandemics, Perils, Pestilence, Plague, Prevalent, Public, Rain, Rationalism, Reptiles, Rivers, Sadness Everywhere (see Sadness); Scarcity, Seas, Seasons, Seeds, Serpents, Slaughter, Snow, Summer, Tides, Trouble, Vegetation, Vines, Volcanoes, War, Water, Weather, Wheat, Winter, etc.

ECLIPSES—Eclipses affect those individuals whose maps of birth have configurations similar to those at the time of the eclipse, and who may also be living under the shadow of the eclipse, or if it is visible to them. At a Solar Eclipse the Solar activity is depleted and low. At the New Moon, if an Eclipse of the ♀, the Lunar activity is more depleted than that of the ☉. Eclipses are portends which should not be overlooked. (See Lunations). The effect of an Eclipse of the ☉ endures a year for every hour the ☉ is eclipsed, and a month for every hour the ♀ is eclipsed. An Eclipse of the ☉ especially falling on the places of malefics in the radical map tend to renew and increase the original strength of such malefic, whether it relate to trouble, sickness, or death. No effect

of an Eclipse can be very good even tho falling on the place of a benefic, but the evil effects ascribed to them are very probable. The lord of an Eclipse being in a human sign, its evil effects will fall upon Mankind. (See "Human Signs" under Human). They are more important, and more serious in their effects if they happen on the birthday, and take part in the Solar Revolution. A male born at an Eclipse of the ☉ may never breathe, or expire soon after birth, and so with a female born at an Eclipse of the ☽. (For Cases and Birth Data of death of Males born at time of a Solar Eclipse, see "Austria", No. 152, and "Short Life", No. 775, in 1001 N.N.). An Eclipse of the ☉ threatens some male member of the family with sickness, hurt, or death, and an Eclipse of the ☽ some female member. An Eclipse falling on the ☽ in a child's map denotes hurt to the mother; falling on the ☉, hurt to the father; on the place of ♃, hurt to an uncle; on the place of ♁, to a brother; on the place of ♀, hurt to a sister; on the place of ♄, to an aunt. (For the further mention of Eclipses, and the diseases and afflictions they cause, see Air, Bubo, Calamity, Cattle, Childbirth, Cholera, Cough, Death, Disaster, Drought, Earthquakes (see Earth); Endemic, Epidemics, Events, Fainting, Famine, Fever, Floods, Fruit, Functions, Influenza, Mankind, Middle Life, Miseries, "Full Moon", "Metonic Cycle", "New Moon", under Moon; Mortality, Murder, Old Age; "Virus" under Pestilence; Pirates, Plague, Public, Rain, Revolutionary, Rottenness, Scarlet Fever, Sedition, Shipwreck, Storms, Trouble, Volcanoes, War, Weather, Wind).

most elevated planet, and powerful in matters of health and disease. The ☽ elevated above the Earth in a nocturnal map tends to more regular and normal functions, and to weakened functions when elevated in a day nativity. A malefic elevated above the Lights denotes sickness, misfortune, death, and if the malefic is Anareta, a violent death. If a malefic be elevated above a benefic, such benefic cannot save, but if the benefic be elevated above the malefic, it will destroy or modify its anaretic tendency, and if also both the ☉ and ☽ be elevated above the malesics, it greatly lessens the injurious effects of the malesics. (See Anareta, Majority, Power, Rising, Setting).

In matters of children, and as to the indications of fruitfulness or barrenness, this house is closely associated with the 5th H., as the 5th and 11th are opposite and supplemental houses, and when the 5th H. conditions tend to deny children, they are often promised if the Benefics, or the ☽, be in the 11th H., and well-aspected. The 11th H. signifies all diseases in the legs from the knees to the ankles, and in the shin bone, shank, etc. When in this house at B., ♀ brings despair, false friends, and death of children; ♂ here brings false friends, ruin, and wicked children. Other influences and aspects which tend to greater physical endurance are,—The \odot in Ω , or Ω on the Asc.; the \odot in an earthy sign, much endurance in the constitution, and can stand wear and tear; the less the \odot is afflicted at B, the greater is the endurance; the \odot or ν may be afflicted, but if they are above the malefics the endurance is greater; the body of ν persons is usually weak; η people have great powers of endurance; η * or Δ \odot , endures against disease, and with strength and consolidation of constitution; η * or Δ the Asc., much physical endurance; ν in the Asc. at B., and in good asp. the \odot and ν ; ν in the 6th H. at B., and not afflicted; σ in the 1st H., even tho' afflicted; σ * or Δ η , ν , or the ν ; σ well-aspected at B.; σ in good asp. the \odot at B.; ξ or Ω on the Asc.; the 2° μ on the Asc. (See Cure, Healers, Medicines, Physic, Treatment).

Aspects to the ☉ and ☉ tend to give energy and zest, and even the bad aspects of ♄ are better to give energy than no aspects at all. In the wide sense energy is the manifestation of ♃ and ☉, acting thru the signs and houses occupied, and the planets in aspect. A new lease on the bodily energy is given by ♄ when he brings fevers and inflammations to burn the impurities from the system. EPIDEMICS—A Prevailing Disease, and Common to Many People—

Causes—Epidemics are caused by the major planets in perihelion, and espec. ♃ and ♃, and also by ♂ in perigee. The greatest epidemics have occurred when ♃ is perihelion, and ♂ perigee at the same time. People born under the ♃ sign are very susceptible to epidemics, and to infectious and contagious diseases, due to the magnetic nature of this sign, and they fall easy victims. When in perihelion, the planets ♃ and H have also been observed to cause epidemics of various kinds. They also occur at the time of the appearance of Comets, and are coincident with Earthquakes and Earth disturbances. Fatal Epidemics can be due to general causes, as great Eclipses, and may not show fatal Directions in the cases of every individual affected. The influences of the Equinoxes and Solstices also have their effects, such as ♃ in ♀, and lord of the year at the Vernal Equi., and ♃ therein conjoined with ♂, or ♃ ♂ therein, and with ♃ R, and ♀ combust; ♃, ♃, and ♂ conjoined in ♀; ♃ in ♍, R, occi., and ruler of the year at the Vernal Ingress; ♃ ♂ or ♀ H; ♂ supreme at the Equinoxes and Solstices; a ♃ disease; afflictions in ♃, and with several superior planets in ♂ in ♃; coincident with the appearance of Comets, and espec. in ♃. Disorders In—(See "Heartburn" under Heart).

EPILEPSY—Eclampsia—By Ancient Writers this was classed as a mental disease, and was called the "Holy Disease", as they considered the patient in a fit, or paroxysm of the disease, to be under the influence of a Supernatural Power. Most Astrologers consider it a mental disease, as many of the same planetary influences which cause Insanity also cause this disease. Some Writers, and also Modern Medical Authorities, class it as a Nervous Disease, with loss of consciousness, and with tonic and clonic convulsions. The major attacks of Epilepsy are called "Grand Mal", and the milder forms, "Petit Mal". Eclampsia is a milder form without loss of consciousness. Some Writers say that Epilepsy is due to an abnormality of one of the Ductless Glands, the Pineal Gland, which Gland is ruled by Ψ , and as Ψ rules the Spiritual Faculties, Epilepsy, no doubt, has a spiritual, as well as a mental or psychic cause, and may also be due to some obsession, or Spirit Control. (See Neptune, Obsessions, Spirit Controls). The Planetary Causes of Epilepsy are as follows—The \odot above the horizon (daylight horoscope), with ψ and the \Downarrow unconnected with each other or the Asc., and with h and δ in angles ruling the scheme, h by day and δ by night. (Note— h ruling the scheme by night and δ by day, tends to Insanity (see Insanity); the \Downarrow rules diseases which return after a time, such as Epilepsy; the \Downarrow , ψ , and the Asc. unconnected with each other, and affl. by h and δ from angles, and with no assistance from the benefics, tend to Epilepsy and Falling Fits, and espec. if h be so posited by day, and δ by night; the \Downarrow in Ξ , δ , or ill-asp. any of the malefics as promitters; the \Downarrow dectr., and sepr. from δ and apply. to h ; a \Downarrow disease; the \Downarrow affl. in Ξ , and affl. the hyleg therefrom; patients tend to be worse at the Full \Downarrow ; Ψ afflicted; H in the 6th H., and affl. ψ or the hyleg; H δ or ill-asp. the \odot at B., and by dir.; h in an angle, occi. of the \odot , and ori. of the \Downarrow , and ψ in familiarity with δ ; h or δ in the Asc. or M.C. in Π or f ; a h disease, and h denotes death by; h and δ ruling \downarrow and δ , and at the same time the \Downarrow , ψ , H , and the Asc. be unconnected with each other; h and δ angular, occi. of the \odot , and ori. of the \Downarrow , and ψ in familiarity with δ ; the combined influence of h and δ ; h and δ in angles, elevated above H , ψ , or the \Downarrow , and if

H , δ , and the \Downarrow be unconnected with each other by good asps., and be affl. by h or δ , and with no assistance from \downarrow or ψ ; δ and ψ holding dominion at B., and in familiarity with each other, and δ affl. the hyleg, and elevated above the Luminaries, the Epilepsy is increased; ψ affl. at B., and to the δ or ill-asp., the \Downarrow or hyleg by dir., or by Periodic Revolution; ψ in the 8th H., and affl. at a Solar Ingress of the \odot into Φ , and ψ affl. the \Downarrow or planet ascending (see Madness); ψ denotes death by; ψ and the \Downarrow unconnected with each other or the Asc., and h and δ in angles ruling the scheme, h by day, and δ by night,—under these conditions if the malefics be in Eastern Parts and angles, and the benefics in the West, the epileptic person will be subject to constant fits, danger of death, and the epilepsy becomes conspicuous; ψ and \downarrow cooperating in the scheme contribute to epilepsy, and ψ espec. when the dominion of death is vested in him and he is of the nature of h ; an \uparrow disease; Subs at AT, CP, KP and PP. Epilepsy also is strongly associated with the m sign and sex, highly sexed people, and espec. with females. (For further influences along this line see Coma, Convulsions, Consciousness, Day, Delirium, Demoniac, Deranged, Fainting, Fits, Idiocy, Insanity, Insensibility, Madness, Mania, Night, Obsessions, Pineal Gland, Spasms, Spirit Controls, etc.). Curable—Ameliorated—Mitigated—Epilepsy will tend to be mitigated, or curable, if the benefics are elevated at B. above the malefics which produce it, and espec. under favorable directions to the \Downarrow or ψ . The more oriental and angular the benefics may be, the more powerful will their effects be for good, and espec. if the malefics are setting in the West, and out of power and dignity. The opposite to these conditions would tend to make the Epilepsy incurable ordinarily, and without the proper treatment. (See Amelioration, Curable, Incurable, Modification, Recovery).

Death by Epilepsy—Danger of— H in the 8th H., and affl. ψ and the hyleg, and with the malefics h and δ elevated in the East, and above the Luminaries at B. or in angles; h occi. at B., and affl. the hyleg by dir., and holding the dominion of death; ψ affl. the hyleg, or giver of life, by dir.; ψ affl. by h or δ at B., and affl. the hyleg by dir., and also holding the dominion of death. It is said the Spinal Canal is filled with Ether during life, which is called the "Spinal Spirit Fire", which becomes condensed, and a fluid, when exposed to the air. (See Air, Azoth, Blindness, Electricity, Eyes, Gases; "Light Rays" under Light; Matter, Retina, Shock, Sight; "Spinal Canal" under Spine; Uranus).

Morbidity Frequent—(See Diarrhoea).

EVENTS—Accidents, Calamity, Sickness, etc., are events, and are usually precipitated by the aspects and movements of the ♃, and also by progressed influences, transits, and directions over the map. The ♃ tends to bring events to pass, as she is the time marker in Human Affairs and World Conditions, and on the dial of destiny corresponds to the minute hand, while the movements of the ☉ represent the hour hand. The aspects of the ♃, Lunations, New Moons, and Eclipses, indicate the times when directions and progressed influences will culminate into action.

Events, and the time of sickness, accidents, etc., are shown by the aspects of progressed planets, transits and directions, as they affect the radical map, and thus in this way "Coming Events Cast Their Shadows Before." Obstructions and impediments can be placed in the way of the planetary influences, thus greatly diminishing their force, or preventing them altogether. Events can be altered and modified by foreknowledge of their nature, and by the use of wisdom, self-control, discretion, discrimination, will-power, spiritual attainment, mastery of the lower nature, and by ruling one's stars, conquering the Monsters of the Zodiac, etc. For this reason the Ancients instituted remedies, preventatives, preservatives, and propitiations. The time of death, injuries, accidents, and dangers, is shown by the arcs of directions to the Sig. for the event.

Accidents—The Event of—(See "Time" under Accidents. Also see the first part of this Article).

The ♃ ♂ ☉ by dir., and at the same time in ☐ to a malefic, indicates a very evil time in the life, illness, accidents, afflictions, reversals, and possible death, and under such a configuration a remarkably evil event usually takes place. (See "Time" under Evil).

EVOLUTION—The Occult teaches that Man's Mind and Body have evolved gradually thru many stages before coming to their present efficiency. Man's early bodies were bisexed, hermaphrodites, and the separation of the sexes began in the Lemurian Epoch, and Adam and Eve are considered types of the first of the separated sexes. There are still remnants of hermaphrodites in the World to-day. Also in the early stages of the Earth, when it was hot and fiery, people could not stand upon the Earth, and their bodies were like gas bags, capable of living and floating in the air. They also had a third eye in the back of their heads so they could see approaching dangers from all sides. This eye has now been drawn inward, and is the Pineal Gland. When language was needed, and a voice, the larynx and vocal cords, ruled by the ♂ sign, were taken from ♀, the sex sign, and this is the reason why the voice and the sex organs are so closely related, and why the voice in males changes at puberty. Man's body is still far from being perfect, and is still evolu-

ing and improving, and in future Ages will be a much better, and more highly spiritualized body than now. This subject of the Evolution of Man and his Vehicles, is a big one, and only a few things can be mentioned here. If you are interested in the whole story of the Evolution of Man, and of the Earth in its various Epochs, read the books, "Cosmo-Conception", by Max Heindel, and also the book, "The Key To The Universe", by Dr. and Mrs. Homer Curtiss. These books also explain the two stories of Creation in the Bible. (See Build, Character, Larynx, Pineal Gland, Puberty; "Separation of" under Sex).

EXTERNAL—Externally—Exterior—Exopathic—Exoteric—Outside Influences Over the Mind and Body—Environment—Climate—Location—Associations, etc.—The Asc. denotes the part of the body more liable to affliction from external causes. The sign on the Asc. at B. rules a part, or organ, externally, internally, and structurally. The fiery and airy signs on the Asc. give stronger physical bodies, and less liable to external disorders. The earthy and watery signs rising make the native more liable, receptive, and susceptible to outside influences, and give a weaker constitution. The watery signs espec. give too much receptivity to outside influences, and make the native more liable to infectious and contagious diseases. The ♃ sign gives greater magnetic and attractive powers, and makes one more liable to attract diseases, or impure magnetism, from the outside. The ☿ sign on the Asc. at B. gives much receptivity to external conditions. When the 4th face of ♃ is on the Asc. at B., the native is much affected by others. Acquired tendencies are denoted by the ♃, and diseases and afflictions which come from external causes, such as climate, habits, clothing, food, etc. Man in his pilgrimage upon the Earth Plane is constantly battling with external conditions, the elements, the forces about him, which he must conquer, use for his own purposes and development, or be overcome by them, and nearly every subject in this Work has some reference to Man's external conditions, his relation to them, and their effects upon

him. There are causes from within affecting man, called innate, inherited, organic and structural disorders of the body, and also mental afflictions, etc. Look in the alphabetical arrangement for the subject you have in mind if it is not listed or mentioned here. EYES—The Organs of Vision—Ocular—The Eyes are under the external rulership of the φ sign. The Eyes are also ruled by the \odot , δ , Ψ , H , and the $\#$ sign, as H and $\#$ rule the Ether, thru which Light is transmitted. It is recognized that Ψ has some action on the Eyes and Brain. The Eyes have affinity with the \odot , δ , H , and the φ and $\#$ signs, and also with the Pleiades, Antares, and the Ascelli. (See "Eyes" under Mercury). In our System of Astrology the 1st H. rules and affects the eyes. In the Hindu System, the 2nd H. rules the Eyes, and afflictions in the 2nd H. tend to seriously afflict the eyes, or cause blindness. The \odot is concerned with the structural defects of the eyes, while the δ rules the Lachrymal Apparatus, its diseases,

and also errors of Accommodation, defective powers of adaptation, as Hyperopia, Myopia, Presbyopia, etc. The \odot or δ at B. affl. by H tends to eye trouble or blindness, and espec. if the \odot or δ be near Nebulous Stars, as the Pleiades, Antares, or the Ascelli. The \odot rules the right eye of a man, and the left eye of a woman. The δ rules the right eye of a woman, and the left eye of a man. Due to the large mass of material to be arranged and classified, and the many subdivisions, many subjects concerning the Eyes are handled elsewhere in the alphabetical arrangement, such as Accommodation, Blindness, Eyeballs, Sight, etc. Also much is said concerning the Eyes under such subjects as Antares, Aquarius, Ascelli, Castor, Ether, Hyades, Light, Moon, Navamsa, Nebulous, Neptune, Pleiades, Pollux, Sight, Sun, Uranus, etc. This article has been arranged in two sections. Section One considers the general conditions about the Eyes, as color, form, expression, characteristics, etc. Section Two, the Diseases and Afflictions to the Eyes, the Sight, etc. See the following subjects of both Sections in the alphabetical arrangement when not considered more fully here in this Article.

On the other hand, a prominent ♂, or ♂ affl. by ♃, many planets in positive and masculine signs at B., tend to give more fight to the nature, and to go to extreme measures to avoid defeat. The good influences of ♀ give resignation and contentment. Also ♃ in good asp. to ♂ gives a better understanding of Divine Things, and to be resigned to fate, environment, circumstances, etc., with more grace and contentment, realizing the Divinity within themselves, and by contacting

the Higher Mind. (See Bold, Character, Cheerfulness, Contentment, Destiny, Energy, Environment, External, Individuality, Optimism, Positive, Resignation, Spiritual, etc.).

FATHER—The Father—Paternal—The ☉ and ♃ are allotted to the person of the father. In the European System of Astrology, the 4th H. governs the father, and the 10th H. the mother. In finer detail, some Writers say the 10th H. governs the father in a male nativity, and the 4th H. the father in a female geniture. In the Hindu System of Astrology, the 10th H. governs the father, and the 4th H. the mother. In afflictions to the father, the ☉ should be principally observed by day, and ♃ by night. A planet in the 4th H. is Sig. of the father in Hor'y Questions. The ☉ and ♃ are masculine, and rule espec. over the male members of the family. The ♃ and ♀ are feminine, and rule the mother and female members of the family, as sisters, daughters, aunts, grandmother. Conditions concerning the parents are to be noted in the child's map, and espec. in the map of the first-born, and the influences in the following paragraphs and subjects concerning the afflictions to, suffering, wounds, death, etc., of the father, are to be noted in the map of the child. The maps of birth of any of the children are also permissible for such study, but may not be as typical as the map of the first-born. In day maps, the ☉ and ♀ are the chief Sigs. and representatives of the father and mother, and ♃ and ♃ in night maps, as the ☉ espec. rules by day, and the ♃ by night. (See Day, Night).

Thus a fever is either terminated, ameliorated, or aggravated, according to the elementary qualities of the Sign and Lunar Quarter ruling at the beginning of the fever, and the qualities of the signs thru which the ♃ passes on successive days, whether of the same or opposing nature. Many of the same conditions which relate to the Duration of Disease, Crises Days, Critical Days, etc., will also apply here. The same rules usually apply to the Fiance, or Fiancee, as to Husband or Wife, for when Engagement results, the parties come under the 7th H. influences of each other's maps, the same as if marriage has taken place, and if marriage is delayed, any evil directions coming to a climax in either map, as related to death, sickness, or accident to either party, usually take place when the event is scheduled unless forewarned, and care is taken to forestall it.

The Fibro-Ligamentous System is under the rule of the ♀ and ♂ signs, and the ♀ and ♂ acting thru the ♂ sign affect the Fibro-Ligamentous System, and give way to the Thoracic Diathesis. Also by acting thru ♀, Fibro-Ligamentous affections are caused, and accompanied by Gout in the feet (Podagra). Fibrous tissue is crystallized and hardened by ♃. The density of connecting fiber is increased when ♂ is with ♃. The Nerve Fibers, ruled by ♃, are also under the internal rulership of the ♀ sign. Fire Signs—The Fiery Signs of the Zodiac—These signs are Ψ , Ω , and ζ . They rule the head and face by Ψ ; the heart and back by Ω , and the hips and thighs by ζ . They give the Bilious, or Choleric Temperament. People born under these signs require more sun-

light. The ☉ and ♄, the fiery planets, are closely affiliated with the Fire Signs. These signs are connected with the vital heat of the body, oxygen, and also rule the Spirit, and are known to give increased physical strength and vitality when rising on the Asc. They are the strongest signs for vitality when upon the Asc. at B., or the ☉ in them, but are not good signs for the ♃, as they are not in harmony with the nature of the ♃, as the ♃ is cold and watery by nature. The ☉ in a fire sign gives a strong constitution and vitality, with much Prana, or internal force, and great power to resist disease, but with the danger of excess of force. The ♃ in a fire sign tends to a hasty and excitable nature, and to impeded, retarded, prevented, slow and difficult functions, and espec. with females. The ♃ in ♀ tends to brain disorders; in ♁, palpitation of the heart, and in ♀, nervous debility due to too much haste and excitement in the life. When strong on the Asc. at B., or with many planets in them, these signs tend to fever, hot diseases, inflammation, diseases arising from cholera; hectic fevers, eruptions, erysipelas, adhesions, fusions, and to cause injury or death by cuts, stabs, blows, gunshot wounds, fire, burns, lightning, etc. (See Aries, Choleric, Fevers, Imagination, Impulsive, Inflammation, Leo, Majority; "Operations" under Nature; Sagittarius, and the various subjects mentioned in this Article).

FIRST—

First-Born Child—(See "First-Born" under Children).

First House—The Ascendant—The Rising Sign—This is a masculine house, and corresponds to the ♀ Sign. This

house is a vital center, or part, of the horoscope, and contains the dominant features of the Life that are to be expressed and worked out. The three vital centers of the map are the ☉, ☽, and Asc. This house signifies the nature, life and health of the native, and relates to all questions of life, health, external complaints, appearance, stature, shape, size, color, body blemishes, and also sickness and accidents. It becomes the Sig. in Hor'y Q. in all cases where the life and health are considered. It rules the form, constitution, the bodily temperament, the bodily stamina, animal heat, the health, the personality, general characteristics, and indicates the construction and peculiarities of the physical body; rules the head, eyes, and face. It signifies all matters which affect the physical body, the mind, sickness, travel, health, change of residence, birth or death of children, and the fortunes of the native in general, and has significance of the Life of Man. The physical appearance, description of the body, the strength and vitality of the body, the height, weight, color of the eyes and hair, etc., are largely determined by the sign and degree rising on the cusp of this house, or the Ascendant. The position of the ruler of the Asc., and planets rising, tend to modify the personal appearance. (See Decanates). The 1st H. rules light colors and white. The 1st H. shows the organic elements, the physiological factors, and the physical characteristics which determine the amount of organic resistance, and the strength of the body. It also shows the degree of receptivity to diseases, and which may affect the part of the body ruled by the sign rising. The Asc. denotes, according to the sign rising, the part of the body more liable to affliction from external causes, and is the Indicator of Disease. (See the Ascendant influences in the paragraph, "Arguments for Death" under Death). The benefics, ♃ and ♀, in the 1st H. at B. indicate a good constitution, and much vitality. The malefics in the Asc. at B. denote scars, marks, moles, and defects of the head and face. The 1st H. and its conditions at B., and by dir., signify all diseases in the head, face, eyes, ears, nose, mouth, and foul breath. This house is closely related to the Feelings, Sensations, the Emotions, the Passions, the Manners, the Disposition, the quality of the Mind, etc., according to the nature of the sign rising, signs intercepted in, or partly ruling the Asc. The planet ruling the sign on the Asc. at B. is considered the principal Ruling Planet of the horoscope. (For the nature and meaning of the different kinds of signs on the Asc. at B., see Fire, Air, Earth, Water Signs, under these subjects. Also see Cardinal, Fixed, Mutable, External; "Zodiac" under Degrees). The actual degree rising on the Asc. at B. is to be considered as though it were a planet in forming judgment of the native as to his mind, body, strength, diseases subject to, etc., and all aspects to this degree are to be noted. The degree on the Asc. governs the

brain, the body, and according to the sign rising gives a predisposition to certain afflictions and diseases of the body. Planets in the Asc., together with the planet ruling the rising sign, rule the physical body, and the sign and house position of the ruler of the Asc., the aspects to it, and the condition of its disposer, should be considered. The Asc. under certain conditions may become Hyleg. In a nocturnal horoscope the Asc. becomes hyleg if the ☽ is incr., with both the ☉ and ☽ below the horizon and not in a hylegiacal place. In a diurnal horoscope the Asc. may become hyleg if the ☉ or ☽ are not in a hylegiacal place. The Asc. may become Anareta when the ☽ is hyleg. In Mundane Astrology the 1st H., or the Asc., rules the Public Health generally. (See Anareta, Ascendant, Hyleg).

FIXED—

Fixed Habits—Fixed Opinions—Not Given to Changes—Many planets in Fixed Signs at B.; fixed signs on the angles; ♀ a strong ruler at B.; good asps. of ♀ to the ☉, ☽, and ♀. (See Habits, Opinions).

Fixed Ideas—(See "Anxiety Neuroses" under Anxiety; Ideals, Ideas, Judgment, Monomania, Notions, Opinions).

Fixed Signs—The Strong Signs—Constitutional Signs—Foundation Signs—The Earthquake or Seismic Signs—The four Fixed Signs are ☿, ☿, ♀, and ☿, and are ruled by ♀, the ☉, ☿, and ♀ respectively. These four signs form the Fixed Cross, and are all in ☐ or ☿ asp. to each other, and planets in any one of them tend to affect all the other parts under the rule of the fixed signs. The Fixed Signs correspond to the Succedent Houses. Fundamentally these signs rule the vital parts, as the throat, heart, blood, and the generative system, and all parts or organs under their rule, such as the vocal organs, nose, neck, trunk, sex organs, urinary organs, bladder, excretory system, rectum, urethra, the legs below the knees, as the calves and ankles. The fixed signs give general strength of constitution, endurance, patience of mind, and are thus called the Strong,

or Foundation Signs. They are more robust than the cardinal and common signs. They tend to arouse the Desire Nature, and to give stamina and persistence in action. They relate to Feeling and Emotion; are Vital in Temperament, and correspond to the Heart and Life. The Fixed Signs are also called "The Vicious Circle" because of their fixed and unyielding nature. Fixed Sign people are strongly bound by their habits, and are difficult to change or influence, and when a disease gets a firm hold upon them they usually die of it, but tend to cooperate with the Healer, and try to get well. Afflictions from fixed signs tend to cause deep-seated, lingering, tedious, chronic, and permanent diseases, and more difficult to cure or remedy. Many planets in fixed signs at B. tend to give greater resistance to disease, but to prolong disease, and give less power to throw off disease when it once gets a deep hold on the system. A list of the diseases ruled and given by the fixed signs is given under these signs, and for which see "Diseases Ruled By" under Taurus, Leo, Scorpio, Aquarius. Their principle diseases are those of the throat, heart, blood, sex organs, and lower limbs, as in the calves and ankles. (See "Disease" under Nature). The ♄ sign espec. rules the blood, and afflictions in ♄ tend to blood disorders, impure blood, disturbed circulation, etc. These signs also rule strongly over bronchitis, spinal complaints, suffocation, diseases of the back, diphtheria, stone, gravel, bladder troubles, disorders of the excretory system, etc. The throat (8), and the sex organs (m) are closely related by opposite signs, and the removal of any part of the sex organs tends to affect the voice, and in women tends to a masculine voice, and in men to an effeminate voice. Removal of the tonsils in childhood tends to make the puberty period more disturbed, and also later childhood and parturition more difficult and painful. Afflictions in these signs at B. tend to hereditary and organic diseases. Saturn in a fixed sign at B., or at the beginning of a disease, tends to be a sore afflictor. On the angles, and espec. on the Asc., they tend to lessen the chances of Insanity, and make the native better able to resist trouble, and protect the mind under stress, but when once disturbed in mind or health, the fixed signs on the angles make equipose more difficult. The Fixed Signs show death by drowning, suffocation, strangling, hanging; by blood disorders, throat and heart trouble, disorders of the Generative System, the Excretory and Urinary Systems. Afflictions in fixed signs make punishment by Law, or sentence of a Judge, more durable, and espec. when the radical map denotes the danger of imprisonment. Much can be said about the fixed signs, and their influences are much referred to throughout this Work. Here are two cases of individuals who had a Stellium of planets in the Fixed Signs at B. See "Male", Chap. 8, page 48, and "Female", page 49, in Daath's Medical Astrology. One was a Monster, and

the other a Dwarf and Imbecile. FLUIDS—The Fluidic System—The Liquid Secretions or Excretions of the Body—Humours—The Fluids of the system are ruled by ♀, the ♃, and the watery signs. The ♃ exerts a strong fluidic influence over fluids in the system, or anywhere in Nature, as over the Tides, Rivers, Water, etc. The ♃ is fluidic and cleansing, and tends to mutations and changes in the body by acting thru the fluids. The ♃ rules or dominates all fluids, yet her real dominion is over the neutral solution, the basic or bland humor which forms the medium thru which certain substances can act and react, and put into the forms necessary for the various functions of the body. Thus in milk the ♃ rules the basic fluid, but other ingredients are developed in milk by the action of the ☉, ♃, and ♃. (See Milk). The ♃ rules the base of any fluid, and not fluids as a whole, in specialized forms, resulting from the action of other influences, agents or reagents. The watery signs are especially connected with fluids. For the

different fluids ruled by the watery signs see Cancer, Scorpio, Pisces. Also the fluids of the body are ruled over and controlled by the posterior lobe of the Pituitary Body, ruled by H, and espec. the circulation of the fluids in the kidneys. The following subjects have to do with the various fluids, juices, secretions, and excretions of the body, which see in the alphabetical arrangement when not considered here—

FORGETFUL—(See Carelessness; "Forgetful" under Memory).

FORM—Shape and Description of the Body—The Form of the Body is to be judged principally from three factors,—(1) The Sign rising, the degree on the Asc., and the position of the ♃ at B. (2) Planets which exactly aspect the degree rising on the Asc., or when rising or near the Asc. (3) The position and aspects of the ruler of the Asc. The Form of the body proceeds from the Asc., the 1st H., planets in the Asc.; from the ☐ and ♃, and the asps. to the ♃. Ptolemy says the Asc. has the greatest power in forming the body, and next after the Asc., the ♃. (See Relaxation). Many modifications of form arise from the various positions of the majority of the planets, whether rising, elevated, setting, or below the horizon. Many planets in one sign tend to give the predominating characteristics of that sign, both in mind and body. Family Likenesses are caused by having the same sign rising with different members of the family. (See "Likenesses" under Family).

Significators of Form—They are the sign on the cusp of the Asc., or 1st H., or a sign intercepted in this house; their lords; planets in the Asc., or in any way aspecting the Asc.; fixed stars near the cusp of the Asc., and to these some add the Luminaries and the stars that aspect them,—all these are Sigs. of both mind and body. For further consideration of Form and Shape, see Appearance; "Beastly Form" under Beasts; Body, Build; "Dogs" under Children; Congenital, Crooked, Constitution, Defects, Deformities, Distortions, Figure, Height, Ill-Shaped, Inhuman, Monsters, Posture, Shape, Stature, Weight, Well, etc.).

FOURTH HOUSE—This is a terminal house, a part of the terminal triangle,

The lords of the 4th and 8th H. are Significators of death. This is a feminine House, denotes the breasts and lungs, and is affiliated with the ☿ sign, and is cardinal in quality. This house is the weakest of the angles, and is also an Anaretical Place. The vital powers are at their weakest when the ☉ at B. is on the cusp of this house. This house rules the breasts, the milk, lungs, stomach; inheritance, the birth-place, place of residence, the home and domestic life generally; the mother in a male nativity and the father in a female horoscope; the mother-in-law in a male nativity, and the father-in-law in a female. In Hindu Astrology, this house rules the mother, and the 10th H. the father. Benefics in this house at B. indicate that the native should not leave his native land, but remain at his birthplace all thru his life, if possible, for good health, good fortune, and a happy and peaceful ending to life. The parents usually die before the native if he has ♃ in this house at B. Mars here gives short life to the father or mother, according to the sex of the horoscope. Malefic planets in the 4th H. indicate disease, worry, and distress in old age, and also hurt, sickness, and affliction to the father or mother. This house signifies all diseases in the lungs, breast, and stomach; the end of the disease, and diseases of the ♃ and the ☿ sign. Red is the Color ruled by this house. FRUITFUL—Fruitfulness—Prolific—Fertile—Children Promised—♃, ♀, and the ♃ are the Givers of Children. The watery signs ♉, ♏, and ♋, are called the fruitful signs. Also 8, the exalted sign of the ♃, is a very fruitful sign. Other signs are less fruitful, and ♑, ♒, ♓, and ♍ are classed as unfruitful and barren signs. The 5th and 11th H., being opposite houses, are the principal houses of children, and fruitful influences in these houses at B. promise children. The 11th H. is the 5th H. of

the marriage partner by turning the map upside down, and the same conditions apply to the 11th H. as to the 5th H. when the map is reversed. The ♃ and ♀ are especially fruitful in the matter of giving children, and the ♉ sign influence tends to make women more fruitful and prolific. The horoscope of both husband and wife should be studied in judging of the matter of children, fruitfulness, and promise of children. If both are fruitful, children will result. If one is fruitful, and the other barren, children will be denied. Thus a woman denied children by her first marriage, if the husband is barren, impotent and sterile, may have them in a second marriage, if both are fruitful. The ♃ is the planet of fecundation. Heat and moisture in the body in abundance tend to make one prolific, while a cold and dry body, ruled by ♄ or ♁, tends to barrenness. When ♀ is ori. in fruitful, or seminal signs, and configured with fruitful planets, as ♃, ♀, or the ♃, he gives offspring, but when in barren signs, and with barren planets, he denies them. The malefics also may give children when in prolific, or fruitful signs, and supported by benefics, but the children are apt to be sickly and short-lived. (See "Probability of Children", "Sickly Children", under Children). For the general influences which tend to give children, promise of children, and many children, see "Signs of Children" in this section.

Brothers Promised—Brothers and Sisters Promised—(See Brothers, Sisters).

Children Born—But They Die—(See "Death of Children" under Children).

Creative Powers—(See Creative, Generation, Reproduction; "Sex Powers" under Sex).

Females Fruitful—(See Probability, Signs, Symbols, in this section. Also see "Fruitful" under Wife).

Fruitful Signs—Of the Zodiac—♉, ♏, and ♋, the watery signs. Of these signs ♏ is the least fruitful because of its ruler ♁. The ♉ sign is fruitful because of the ♃. The ♋ sign is fruitful because of ♃, and ♋ is considered the most fruitful of all the signs. The 8 and ♎ signs are considered rather fruitful because of their ruler ♀. The ♃ sign is rather fruitful because of its ruler ♃. The ♎ sign is considered more fruitful than barren.

Generative Powers Strong—(See Creative, Generation; "Sex Powers" under Sex. Also see "Signs of Children" in this section).

Husband Fruitful—(See "Fruitful" under Husband).

FUNCTIONS—The ♃ is the chief index of functional integrity, and is at the head of the functional group. The ♃ is functional, and denotes affections and functional disturbances from external causes, as food, clothing, habits, climate, environment, etc. The nature of functional and structural disorders can be inferred from the combination of the sign, planet, house and aspects. The ♃ has chief rule over the bodily functions, and is the source of natural power, as the natural powers of each organ of the body depend upon the regular and proper functions of such part. The ♃ is more powerful and benefic over the functions when in-

creasing, and more weak and malefic when decreasing in light. Functions, as ruled by the ♃, are to be designated as the particular power or activity of the organ ruled by the sign which contains the ♃ at B. For the functions ruled by each Sign see the Sign in the alphabetical arrangement, as Aries, Taurus, etc. Also for the functions of the various organs and parts of the body, their disorders and disturbances, see the part in the alphabetical arrangement, as Brain, Heart, Kidneys, Liver, Stomach, etc. The following subjects and paragraphs have to do with the various functions of the body, their normal and abnormal activities.

Thus the ♀ in ☽ rules the functions of the stomach; in ♁, the functions of the heart, etc. The ♀ sign, which rules the abdomen and its organs, is recognized as being the algebraic common denominator of all organic diseases and functions, due to the different states and conditions of the digestive and bowel tracts, and their contents, and that nearly all diseases have their origin under the ♀ sign rule. For this reason purging has been held to from Ancient Times as one of the first things to do to relieve and remove the causes of disease in the bowel tract. (See Physic, Virgo). The ☉ is organic, while the ♀ is functional, and afflictions to the ☉ or ♀ in ♀, and espec. when in the 6th H., tend to serious disturbances of organic functions. (See Organic, Organs).

GOOD—The term "Good" is found in many sections and Articles in this book. It would require too long a list to enumerate all the good conditions here, as related to the mind and body, and you are advised to look for the paragraph "Good" under whatever subject you have in mind. (See "Good" under Chemists, Children, Circulation, Complexion, Conduct, Constitution, Digestion, Eyes, Face, Figure, Health, Journeys, Judgment, Mind, Morals, Personality, Recuperation, Resistance, Shape, Sight, Stature, Surgeons, Teeth, Understanding, Vitality, etc. Also see Aspects, Beautiful, Clear, Comely, Dishonest, Evil, Favorable, Favored, Fine, Form, Handsome, Healers, Honest, Periods, etc.).

GROWTH—Increase—Expansion—Enlargement—Increment—Growth of the Mind and Body, etc.—H and ♀ govern the functions of growth, and nutrition of the body. ♀ rules growth until adolescence, and then H takes charge. The ♀ has much to do with the growth and development of the body. Assimilation, and the growth of the body are furthered by the work of ♀. The growth of the mind depends much upon the aspects and position of ♀ at B. The Solar Forces focussed thru the ♀ stimulate the growth of the body.

Abnormal Growth—Of the Body—Strange and Abnormal Growth—Diminished or Increased Growth of the Body—Diminutive growth is due to decreased Pituitary secretion, and enlarged growth to increase of this secretion. The Pituitary Body is ruled

by H, and the action of H by his various aspects and influences on the Pituitary secretion tends to either increase or diminish the secretion, and to produce Giants, Freaks of Nature, Dwarfs, etc. Abnormal growth and freaks of nature, are produced by H ♂ ♀. (See Diminished, Dwarfed, Enlarged, Giants; "Over-Developed" under Organs; Pituitary; "Abnormally Tall" under Tall).

Arrested Growth—Cessation of—(See Arrested, Atrophy, Deformities, Diminished, Dwarfed, Obstructions, Paralysis, Pituitary, Retarded, Suppressions, Thyroid, etc.).

Cessation Of—(See "Arrested" in this section).

Increase of Growth—Incrementitions—Due to the tonic, or plus action of ♂. (See "Tonic Action" under Mars).

Mind—Growth of the Mind—Arrested Mental Development—Precocious—Rapid Mental Development, etc.—The Mind is but a temporary part of Man, and is one of the Vehicles thru which he acts on the Material, or Earth Plane, and by acting thru the brain. Afflictions at B, and also during the prenatal period, tend to place limitations and restraints upon the brain cells, so that the mind is crippled and hampered in its action, and these afflictions, and espec. to ♀, the mental ruler, may cause idiocy, imbecility, a foolish mind, bad judgment, and also to give the various bad traits of temperament, whereas the favorable asps. to ♀, the ♀, the Asc., and with ♂ well-asps. by the ♀, and also in good relation to the Asc., tend to give a better brain, and a more free action of the mind thru the brain. The Pineal Gland, and the Pituitary Body in the brain, have more to do with spiritual growth than with mental growth. The 12th H. conditions at B. also indicate largely the freedom of expression that the mind will have over the brain and body, and a badly afflicted 12th H. at B. tends to restraint of the senses, to deafness, and also to bring limitations upon the brain and body for the present life, so that the native may find it impossible to make much mental progress. The same influences which tend to Deformities, Hunchback, Idiocy, Poor Judgment or Memory, etc., tend to retard the mental growth and development. (See these subjects. Also see "Active Mind" under Active; "Arrested", "Quickened", under Mentality).

Miscellaneous Subjects—The following subjects have to do with Growth in its various phases, which see in the alphabetical arrangement—Abnormalities, Acromegaly, Arrested, Assimilation, Atrophy, Augmented, Backwardness, Blight, Cells, Cessation, Congenital, Corpulent, Crooked, Decrease, Defects, Deficient, Deformed, Development, Deviations, Diminished, Dwarfed, Enlarged, Exaggerated, Exostosis, Expansion, Extremities, Fat, Fleshy, Foetus, Form, Freaks, Genius, Gestation, Giants, Hair, Height, Hermaphrodites, Hindered, Humpback, Idiocy, Ill-Formed, Imbecile, Imper-

Never Grew Up—At Age of 25 Had the Mind of a Child—Case—See "Never Grew Up", No. 720, in 1001 N.N.

These minerals, when carried to excess, become pathological, and the unusual hardening of any part of the body, of an organ, joint, tissue, membrane, etc., takes place when these minerals, wastes, and acids are deposited in excess, and where elimination is at fault. DISEASES OF THE HEAD—

Troubles in the head are largely dependent upon the \times sign, the Plantar System, and \mathfrak{M} , the Abdominal Organs, and troubles originating in these parts are quickly reacted to the head, causing a great number of head and brain disturbances.

Accidents To—Hurts—Wounds—Injuries—Cuts—Blows—Bruises—Fractures, etc.—The \odot , \mathfrak{D} , or malefics afflicted in φ , and espec. when in the 1st H.; the prog. \odot or \mathfrak{D} to the places of malefics in φ ; the \odot by dir. to the ill-asps. σ in φ in the 8th H. at B.; \mathfrak{H} affl. in the 1st H., by machinery; \mathfrak{H} in φ at B., and affl. by σ ; $\frac{1}{2}$ in φ , σ , \square , or δ the Asc. by dir., and espec. if $\frac{1}{2}$ be in the Asc. at B.; $\frac{1}{2}$ σ φ in φ ; σ in φ , $\#$, the Asc., or 1st H. at B., and afflicted;

Affected—The Head Affected—The ☉ and ☽ acting thru the ♀ sign affect the head. (See "Ribes" under Ganglion). All the cardinal signs affect the head, and planets in such signs, as they form the cardinal cross, and all the cardinal signs, of which ♀ is one, are in adverse aspect to each other. The head is affected by disorders in the abdominal organs, ♀, and in the Plantar System, ☿. Any planet when in its own sign tends to affect the head, as the sign ruled by each planet is considered as influencing the head and the ♀-sign. When in a sign next to, or following the sign it rules, it affects the throat and neck and influences the ♁ sign, and so on around thru the 12 signs. Thus the head is affected by the ☉ in ♌; the ☽ in ♍; ♃ in ♋ or ♎; ♄ in ♏ or ♌; ♂ in ♏ or ♎; ♀ in ♁ or ♎; ♁ in ♏ or ♌, as these are the home and strong signs of these planets. HEADACHES—Pains In the Head—Neuralgia In—It may not always be possible Astrologically to detect or locate the cause of a headache, as the causes are many, and often complicated and mixed under various planetary afflictions. However, as a fundamental rule, the \mathcal{P} sign, the Asc., \mathbb{H} and \mathcal{S} are usually involved in the configurations, and strong afflictions from the malefics to the \odot , \mathcal{M} , Asc., or hyleg. There are cases where people may have malefics in \mathcal{P} in the Asc., and afflicted by other malefics, who have never had a headache, and other influences, aspects, house and sign positions of the planets would need to be studied, and also the special idiosyncrasies, or a diathesis, be considered. Headaches may occur with most any disease, and also from Dissipation, Bad Habits, Gluttony, Ex-

cesses, Drink, Loss of Sleep, Insomnia, Irregularities, Feasting, Loose Morals, Over-Exertion, Over-Study or Reading, Eye Trouble, Indigestion, Sex Excesses, etc. (See these subjects). HEALERS—Healing—The Healing Powers—The planetary influences at the birth of individuals endow various Healing Powers, and to suit the various needs, beliefs, peculiarities, and idiosyncrasies of the twelve fundamental classes of Humanity, as represented by the 12 Signs of the Zodiac. All Schools of Healing have their place in the World, have their followers, and it is the duty of a patient to call upon the Healer in whom he has faith, no matter of what School. This Book, and also this Article, are not a treatise upon the merits of the various Schools of Healing, but merely to help you understand the causes and philosophy of disease, why people are sick, the nature of the sickness, its duration, possible termination, etc., and to list those influences which tend especially to endow one with successful Healing Powers, and also to list those influences which tend to make one a failure as a Healer. For the welfare of the patient, it is important that the Healer called upon should be compatible with the patient, for the best success, and that the star maps of the Healer and patient have agreeable exchanges. Otherwise, the Healer may injure the patient. The following subjects have to do with Healers, Healing, Treatment, the care of the Sick, and those connected with such work in various ways, or the preparation of Foods or Remedies for the Sick. The Sixth House rules strongly over the Healing Powers, and the Healing Service.

Absent Healing—(See "Metaphysical" in this section).

Allopathy—The treatment of the sick by using remedies which oppose, and are in antipathy with the planetary influences causing the disease. (See Antipathy, Hippocrates, Opposites).

Antipathy—Healing By—(See Antipathy).

Asylums—Care of the Sick In—Confined In—(See Asylums).

Avoid—Healers for the Patient to Avoid—Those who have ♃ in the Asc. or 6th H. of the patient. (See "Compatibility" in this section).

Bath House Keepers—Good Influences For—(See Bathing).

Biochemists—Those who use the 12 Zodiac, or Tissue Salts, in the treatment of disease, and to supply the lacking chemical constituents of the body. (See Biochemistry; "Salts" under Zodiac).

Black Magicians—Those who use Occult Powers for evil purposes in the treatment of the sick, and to defraud—(See Magical).

Chemists—(See Chemists).

Chiropodist—One Who Treats the Feet and Hands—The ♃, ♀, and ♂ people are especially adapted to this work, and espec. the ♃ people, as ♃ gives unusual skill and ability in the use of the hands.

Chiropractors—The best Chiropractors are born under ♀ and ♃, as a rule, ♃ on the Asc., or the ☉, ♃, ♂, or ♀ in ♃. A keen and sensitive touch is needed for correct palpation by the hands, and

this is given especially by the Π sign, and where the hands are to be used in a more delicate and scientific manner. (See Subluxations, Touch, Vertebrae).

Color—Healing By—(See Color).

Christian Science—(See "Spiritual" in this section).

Compatibility—Of Healer and Patient—Incompatibility of—Rules For—The Compatibility of the Healer and Patient is determined by the rising sign in each map, whether in harmony or not; by the exchanges in the 6th H. in each map, whether of benefics or malefics, and also by the relation existing between h in each map. The 7th H. also rules the Physician in the case. The first important rule is that the rising signs in both maps, the signs on the Asc., should be in harmony, belong to the same triplicity, and be in \ast or Δ aspect to each other. If the patient has \wp on the Asc. at B., his Healer, for the best success, should also have a fiery sign on the Asc., as Ω or \uparrow . If the Healer employed in this case should have Ξ , Υ , or \wp upon the Asc. at B., he would tend to affect the patient adversely, or cause him to get worse. If the patient should start out with an adverse Healer, and continue to get worse, by changing to a Healer whose map is in harmony, the patient would tend to improve rapidly. The \ast and Δ aspects between the rising signs of the two maps tend to naturally inspire faith and confidence between the patient and Healer, whereas the \square or δ aspects between them tend to an aversion, the same as between people who marry under such conditions and separate. (See "Enemies", "Healers", under Antipathy. Also see Death, Poisoned, Sympathy, in this section).

Cure of Disease—Curable Diseases—Incurable Diseases—(See Curable, Drugs, Incurable, Medicines, Moderation, Treatment. Also note the various paragraphs in this section).

Death—The Patient May Die by Having the Wrong Healer—The rising sign of the patient being in \square or δ to the Asc., or rising sign of the Healer; h in the Healer's map in the sign occupying the 6th H. in the patient's map of birth. (See "Compatibility" in this section).

Diagnosis—(See Diagnosis, Judgment, Prognosis).

Diet and Hygiene— \mathfrak{m} is the sign which rules these matters, and people who have δ , and other planets in \mathfrak{m} at B., or who are born under \mathfrak{m} , make good Dieticians, Teachers, Lecturers, and Healers, by the direction of a well-balanced and regulated Diet for their patients. The \mathfrak{m} people, however, tend to hold onto disease when sick, and espec. if they are unenlightened, and live in their lower minds. (See Virgo). Case of a Diet Specialist—See "Wallace", No. 292, in 1001 N.N. (See Diet; "Health Foods" under Food; Hygiene, Prevented (Disease Prevented); Sanitation; "Hygiene" in this section).

Divine Healers—Faith Healers—Spiritual Healers—Metaphysical Healers—Drugless Healers— \uparrow strong at B., and

well-aspected; \uparrow rising, in the Asc. or M.C., and in δ the \odot , gives strong powers for the study and practice of these forms of healing, and to go deeply into the Occult and Recondite Sciences. (See Faith, Hypnotic, Magnetic, Metaphysical, Psychic, Spiritual, in this section).

Doctors—(See "Physicians", and the various paragraphs in this section).

Drugs—(See Drugs).

Drugless Healers—(See Chiropractors, Divine, Faith, Mental, Metaphysical, Nature, Naturopaths, and other paragraphs in this section).

Eclectic Physicians—This School is quite universal in its methods and practices, and tends to choose the best from many Schools of Healing, and to not be bound by any one method. Eclectics tend to be versatile, and to have their planets at B. well-scattered out thru the Signs of the Zodiac, and with a desire to delve into many subjects, and to gather Truth wherever it may be found. In addition to this, the best Eclectic Healers usually have δ , the \mathfrak{m} and \mathfrak{m} signs strong and prominent at B. (See "Physicians" in this section).

Electricity—(See "Healing" under Electricity).

Enemas—Healing By—(See Enemas).

Enemies—The general influences which would tend to make certain classes and types of people an enemy to the native also tend to make the Healer adverse to him, and the magnetic and vibratory exchanges between the two maps, and natures, rather evil, and to not benefit each other. (See Enemies; "Compatibility" in this section).

Failures As Healers—Do Not Make Good Healers— h in the 6th H. of the Healer at B.

Faith Healing—Spiritual Methods, as by Religious Rites, Christian Science, Prayer, Laying On of Hands, etc.— Ψ strong at B., and well-aspected, makes the Healer more susceptible to the inflow of Spiritual Powers in Healing, and also Ψ strong and favorably aspected in the map of the patient makes him more amenable to the spiritual powers of healing. Such methods, however, may become dangerous when Ψ is weak and badly afflicted in the maps of both Healer and patient, and lead to obsessions, and dangerous mental and spiritual states, black magic, etc. Also \uparrow strong at B. in both the maps, of Healer and patient, tend to increase the powers, knowledge, and beliefs necessary for successful healing by faith and spiritual power. (See Divine, Metaphysical, and the various paragraphs in this section).

Foods—Health Foods—(See Diet, Hygiene, Specialties, in this section).

Good Healers—Make Good and Successful Healers—The \odot in a fiery sign at B.; the \odot well-aspected in \mathfrak{m} ; born under \mathfrak{m} . (See "Magnetic", and the various paragraphs in this section).

Injured—By the Healer—(See Antipathy, Compatibility, Death, Enemies, Death, Poisoned, in this section).

Magic Powers—In Healing—(See Magic).

Magnetic Healers—Born under μ , and the μ influence strong at B; the \odot in μ . (See "Healers" under Magnetic).

Massage—Manipulation—Kneading—Friction—Methodic Pressure—Healers born under μ , the \odot in μ , are especially adapted to this work, due to their strong magnetism and healing powers. (See "Osteopathy" in this section).

Medicines—The Use of Medicines In Healing—(See Antipathy, Drugs, Herbs, Medical, Medicines, Remedies, Sympathy, Treatment).

Mental Healing—(See "Psychic" in this section).

Metaphysical Healing—Absent Healing—Healing at a Distance thru Prayer, Concentration, Realization, Spiritual Power, etc., or the use of these same methods in the presence of the patient— Ψ and H strong at B. in the maps of the Healers tend to make the best Practitioners along this line, and with those who have Occult and Metaphysical knowledge, and who understand the healing and magnetic forces and currents which are operating in the Universe. (See Divine, Faith, Prayer, Spiritual, in this section).

Midwives—(See Midwives, Obstetricians).

Mineral Waters—Healers Making a Specialty of—Healers born under \times , the \odot in \times , and many planets in watery signs at B. tend to be especially fortunate in this work. Also people born under η make good Healers, and Managers of Mineral Water Sanitariums, as η rules strongly over minerals, and the mineral products of the Earth. The Occult Masters of Wisdom teach us that we get sufficient mineral nourishment from vegetable foods, and that after 40 years of age, distilled water is more healthful for drinking purposes, and tends to prevent the excess of minerals in the system, causing

Gout, Rheumatism, etc., later in life. One Occult Axiom is, "Internally undistilled water is Man's worst enemy, but used externally on the skin is his best friend." (See Minerals; "Water" under Skin).

Mud Baths—These baths are especially helpful to strong η persons, those born under η , and who thru melancholy and mental depression have so lowered their vital forces as to allow poisons to accumulate in the body. Mud baths help to open the pores of the skin, and to extract the excess of mineral deposits and wastes in the system. Also Healers who practice these methods are apt to be born under η , and to resort largely to material and physical means of healing.

Nature—The Healing Powers of—The Defensive Forces of Nature—Nature is said to do the healing, and all we can do is to assist Nature. (See Phagocytes, Recuperation, Resistance, Stamina, Tone, Vis Conservatrix, Vitality).

Naturopaths—Naturopathy—Good Healers along this line are born under μ and μ , and whose planets at B. also indicate versatility, adaptability, magnetic powers, and with considerable knowledge of Universal Truth, the Occult and Metaphysical Wisdom, and of the Laws of Health. The Naturopaths use what are called natural methods in healing, such as by regulating the diet, habits, and also by the use of massage, electricity, baths, waters, and the various forces in Nature, but are classed as Drugless Healers, and do not use drugs internally. (See Medical Astrology).

HEALTH—The State of the Health—The General Health—Rules for Judging the Health—Good Health—Bad Health, etc.—The 6th H. and μ denote the state of the health. Also the 1st H. rules the health and constitution. The γ governs the health, and has significance over health matters, and espec. with females, while the \odot is a strong indicator of health with males. However, the \odot and γ are important factors in the health of both sexes. The rising sign also governs the health and the life. The Part of Fortune (\oplus) does not affect the health, but has more to do with finance. When η or δ both afflict the \odot , the health is not as bad as when η alone afflicts the \odot , for the aspects of δ to the \odot , whether good or bad, tend to strengthen the system. The planet H does not exercise any great influence over the health except when in the 6th H., and there tends to nervousness, suicide, or accidents. Ill-asps. between the γ and δ , and between the \odot and η , tend to greatly injure the health because of their opposite and dissimilar natures. The ill-asps. between the \odot and δ , and between the γ and η , do not injure as much, as their natures are more in common with each other. Health is largely indicated by the \odot and γ at B,

their positions, signs, and aspects, as they are the fountains of life on the Earth. In health every cell of the body is polarized in subjection to the central will. Therefore, health is obedience, government, and order in the system, while disease is rebellion, insubordination, and disunion. Remember, the stars only incline and show tendencies, and that your health can be improved and modified by self-control, right thinking, spiritualization, and by control of the passional and sex nature. Read the various paragraphs of this Article for the many and manifold considerations concerning health, as regards yourself, your family, your relatives, and also the Public Health in general. The rules for judging the normal state of the health from the star map of birth are given in the paragraph, "Judging The Health" in this section. In this paragraph the influences will be listed which tend to general, fundamental, and prolonged bad health, and further along, in the paragraph, "Periods of Ill-Health", will be given the Directions, Transits, etc., which tend to periods of ill-health, or temporary bad health. Invalidism; Judging the Health—Rules For—(1) The rising sign is the first to be considered, whether strong or weak, and the aspects to the degree ascending, and judge accordingly. (2) Considering the ☉, its sign and strength, the aspects to the ☉, and whether or not the ☉ is hyleg. (3) Consider the ♃, her sign and aspects, and whether strong or weak, or hyleg. These are the three sensitive points in the map, the ☉, ♃, and Asc., and govern the constitution, physical strength, and functions, and the constitutional powers, the vitality, stamina, the regularity or irregularity of the functions, and the general health, depend upon these three vital centers. (4) Consider next the planets in the 6th and 8th H., and whether they afflict any of these three vital centers, as the parts of the body ruled by the signs in which planets are posited will tend to

be disordered according to the nature of the afflicting planet. (5) If no planets in the 6th H., then consider the sign on the cusp of the 6th, as the part of the body ruled by such sign will tend to be a center of physical disturbance, and the part of the body so affected will be a center, or seat from which many other disorders may arise. (See "Indicators" in this section).

Periods of Bad Health—The Health Suffers—The Adverse Influences of Directions, Progressions, and Transits over the Health, etc.—Of course, the degree of suffering which may come to the native at these times will depend upon his knowledge, wisdom, self-control, spiritual understanding, etc. We are taught that we must conquer the Monsters of the Zodiac, to walk the gauntlet of the Zodiacal influences undaunted, and to not be affected by them, but at this stage of human evolution there are only a few who can do it successfully, such as the Masters, the Initiates, the Adepts, etc. The influence of ♀, for instance, in his lower vibrations, is to chastise, afflict, bring suffering and death upon all those who are living in sin, evil, and wickedness, but to those who have conquered, ♀ is our best friend, our Protector, and he is the Bridge over which we pass from this Earth Plane to higher states of spiritual consciousness. So, in considering the following influences, remember they apply only to those who are drifting in life, who are unawakened, unregenerated, and who have not as yet discovered themselves, their real mission and place in life, and who may be classed as "Misfits", failures to a large extent so far in life. A study of the Occult and Metaphysical books which we already have, and to know the plan of the Universe, why we are here, where we came from, and where we go from here, will help us all to be better Masters of our Destiny, and a good book for us all to digest is "The Tarot of the Bohemians", by Papus. Also the books, "The Key to the Universe", and "The Key of Destiny", by Dr. and Mrs. Homer Curtiss; Wilde's Chaldean Astrology, and many others. Also the ☉ and ☽, their sign, house positions and aspects, have much to do with the state of the health, and when the Lights are strong, dignified, well-placed, and free from affliction, the constitution is strong and better able to resist disease. HEARING—The Sense of Hearing—The Hearing is ruled by ♀, the ☐ sign, and the 12th H. The sense vibrations are ruled by ♀. Also ♀ rules the speech. The ☐ sign, ruled by ♀, corresponds to the atmospheric vibrations, and has affinity with the sense of hearing. In the Hindu System of Astrology the Hearing is ruled by the 3rd H. The Hebrew letter Vau, which letter is connected with the ♀ sign, is predominant in Mind and Hearing, and is also closely related to the transformation of thought into speech. The Ears are the organs of Hearing, and the Ears have special affinity with ♀ and the ♁ sign. The 12th H., and its conditions at B., tend to especially affect the hearing, as this house is closely connected with the Senses, and limitations upon them, and in cases of deafness, ♀ and the 12th H., are usually badly afflicted. In our System of Astrology the 1st H. also rules and affects the ears, and the ♀ sign also has some influence over the ears and hearing, as ♀ rules the head. The hearing of the right ear is more especially affected by ♀, and that of the left ear by ♂. (See the various paragraphs under Ears). In this Article the Hearing, its condition, defects, impediments, deafness, etc., will be considered.

Acute—The Hearing Very Acute—♁ in ☐, ♁, or ♀, and well-aspected by ♂.

The hearing becomes less and less acute by the clogging of the Auditory Nerve. (See "Auditory" in this section).

Auditory Nerve—Clogging of—This nerve, and the organs of hearing, and the sense of hearing in general, are ruled by ♀. Clogging and inhibition of the Auditory Nerve are due to mineral deposits by ♀, and espec. when ♀ is affl. in the 12th H., and the hearing becomes less and less acute; Subs at AT and AX.

Born Deaf—Born Deaf, Dumb, Imbecile, Blind and Lame—Case—See "Arundel", No. 159, in 1001 N.N. Being born deaf is due to prenatal afflictions, as a rule. Natal aspects and conditions also may concur, as ♀ affl. in ♀ or ♁ at B.; ♀ ☽ ♁ in ♀ in the 12th H. (See Congenital, Prenatal; "Deaf and Dumb" in this section).

Catarrh—Deafness From—Catarrhal Deafness—♀ affl. in ♁; ♀ affl. in ♁ in the 12th H.; ♀ affl. in ♀. (See Catarrh, Eustachian).

Congestion of Blood—In the Ears—Deafness From—(See Blood, Circulation, in this section).

Danger To the Hearing—♀ affl. in the 12th H. tends to bring dangers to the ears and the sense of hearing, and denotes a limitation upon the Spirit in its manifestation thru the senses on the material plane of life. (See "Disordered" under Ears; Limitations, Twelfth House).

Deafness—Liable to Deafness—Debility of Hearing—Impediment In the Hearing—The ☉ ☽ ♀ in the 12th H. in ☐ or ♁, and affl. by malefics; the ☉, ♀, and ♁ in ☽ in ☐ in the 12th H., and affl. by ♀, ♁, or ♂; the ☉ or ♁ in ☽ with ♀ in any part of the map, and affl. by ♀ or ♂; the ♁ decr. in light, sepr. from ♀ and apply. to ♀; the ♁ incr. in a day nativity, sepr. from ♀ and apply. to ♀; the ♁ sepr. from ♂ and apply. to the ☉; the ♁ ☽ ♁ in the 12th H., and affl. by ♀ or ♂; ♀ afflictions tend to; ♀ in the houses or terms of ♀; ♀ ☐ or ♁ ♁, and espec. if ♀ be lord of the 6th or 12th H.; ♀ tends to deafness by hardening of the bones of the ears, and interfering with vibration; ♀ afflictions tend to deafness by deposits of minerals along the auditory nerve, clogging this nerve and stopping vibration; ♀ occi. in ♀ and affl. the ☉, ♁, or Asc.; signified by

h in ♀ when he is the afflictor in the disease; h in the 6th H., and afflicting ♀; h in the 12th H. in ♂ or ill-asp. ♀; h affl. the hyleg or Asc.; h in ♀, thru colds or chills; h, H, or Ψ in ♀ and affl. the ☉ or ☽, slight deafness; h affl. in ♀; h in ♂; Ψ or H in ♀ or ♀, and affl. the ☉, ☽, or ♀; H in the 12th H. ♂ ♀; ♀ in ♀ and affl. by h, due to congestion in the blood vessels, or ill blood in the head and ears, but mostly of a slight and temporary nature; ♂ in ♀ and affl. ♀, and both ♂ and ♀ affl. by h, and espec. when the 12th H. is also concerned in the configuration; ♀ in the 12th H. in the terms of ♀, and affl. by h, ♂, or ♀, the venous circulation in the ear is obstructed; ♀ affl. in ♀, ♂, ♀, or ♀; ♀ affl. in ♂ in the 12th H.; ♀ weak and affl. at B.; ♀ ♂ the ☉ in the 12th H., and affl. by malefics; afflictions to ♀ in ♀, the 12th sign; ♀ affl. in the 12th H., or combust the ☉, congestion in the ears may follow, and with lack of nerve force and the vital fluids to the ears; ♀ affl. in the 12th H.; ♀ in the 12th H. in ♂ Ψ and in ☐ or ♂ ♀, tends to poor circulation in the ears; ♀ in the 12th H., and affl. by h; ♀ in the 12th H., and espec. in earthy or watery signs, and affl. by H, h, or ♂; ♀ ruling the 12th H., and in ♂ the ☉, or affl. by H, h, or ♂, or with ♀ in the 12th and so afflicted (♀ ruling the intellect is thus held in bondage thru the 12th H. influence); ♀ in the 5th H. in ♀, ♀, or ♀, in the map of a parent or of the child, the infant may be deaf, insane, or deformed; ♀ lord of the 6th H., and affl. by h; ♀ lord of the 6th or 12th, and ♀ posited in the 6th; ♀ in a sign of h, and in the 10th or 12th H., and affl. by h, H, or ♂; in deafness ♀ is nearly always afflicted by a malefic, and is usually in the 12th H.; afflictions in the ♀ sign are also quite common and conspicuous in deafness, and espec. with ♀ upon the Asc., the 6th or 12th H.; ♀ or ♀ on the cusp of the 12th H., and with ♀ affl. in any part of the map. Cases—See Fig. 7, 8, 30, 31, in "Message of the Stars", and Fig. 17C, in "Astro-Diagnosis", books by the Heindels. (See "Deaf and Dumb", and the various paragraphs in this section).

Deaf and Dumb—Deaf Mute—This condition is caused by a combination of the influences which cause deafness and inability of speech, and as ♀ rules both the hearing and the speech, this planet is usually heavily afflicted either during gestation, or at birth. The 12th H., the house of limitations, is also strongly involved. The following planetary influences tend to produce this double affliction.—♀ is usually afflicted by h or ♂, and also the 12th H. is involved; ♀ ruler of the Asc., and affl. in the 12th H.; h and ♂ ♂ ♀ in the 12th H., and espec. when in ♀; malefics and afflictions in the mute signs ♀, ♀, or ♀. This affliction, when congenital, may be caused by afflictions to the ☽ and ♀ at the time of the monthly return of the ☽ to the central line of impulse during gestation, and the planetary positions at B. may not enter into its causes at all. Also the map for the time of conception may give some clue to the disorder, and the conditions over the 12th H. and ♀ at con-

ception, and a study of the Prenatal Epoch should be made in these cases. There is also an Occult significance back of these cases, as involved in the doctrine of Karma, the Laws of Cause and Effect, of Consequence, of Heredity, and as taught in Theosophy and Rosicrucianism, and it would be well for the advanced student to read the Chapter on "The Law of Consequence" in the book "Cosmo-Conception", by Max Heindel. Also read Chap. XXVII, on "Prenatal Abnormalities" in the book "The Prenatal Epoch" by Mr. E. H. Bailey. Cases—Birth Data of Cases of Deaf and Dumb—(1) Jan. 4th, 1834, 10:55 P.M., London, Eng. (2) See "Arundel", No. 159, and "Deaf and Dumb", No. 166, in 1001 N.N. (See Congenital, Defects, Deformities, Heredity, Imbecility, Limitations, Monstrosities, Mutes, Prenatal, Speech, Twelfth House, Born Deaf, Deafness; Deaf, Dumb and Blind; Deaf, Dumb and Idiot, in this section).

Deaf, Dumb and Blind—Caused by the combined influences which lead to Deafness, Dumbness, and Blindness, and with such configurations existing during the prenatal life, and which may also be concurred in at birth in congenital cases of this kind. May also be caused, or concurred in, when the ☉ or ☽ are in ♂ Nebulous Clusters at B., such as the Hyades, Pleiades, etc. Many afflictions in and to the 12th H. at B. or during gestation, would tend to such extreme limitations upon the senses and physical organism, as with a Stellium in the 12th H., the ☉, ☽, ♀, and malefics in the 12th H., and possibly in ♀ in the 12th, as ♀ is also the 12th sign, and the sign of limitations, sorrows, etc. Also if Nebulous Stars be there with the group in the 12th H. at the time, the sight would be greatly endangered, and the blindness be added. (See "Born Blind", "Deaf and Dumb", in this section).

Deaf, Dumb and Idiot—In Idiocy ♀ is also the principal planet to be considered, and also the 12th H., the house of limitations, and Idiocy is only another of the physical and mental limitations which can be added to deafness, dumbness, blindness, imbecility, etc., at B. Case—See "Deaf and Dumb", No. 166 in 1001 N.N. Case—Born Jan. 27, 1900, 3:50 a.m., 50.44 N., 2 deg. W. Died Jan. 16, 1902. (See Idiots, Mutes; Deafness, Deaf and Dumb, in this section).

Deaf, Dumb, Blind and Lame—In Lameness afflictions to ♀ also play an important part, and afflictions in the 12th H., which house corresponds to the 12th sign ♀, and which may result in serious disability to the lower limbs and feet, causing lameness. Such afflictions, combined with those leading to Blindness, Deafness, Mutes, etc., could cause such a combination of unfortunate limitations. Case—See "Arundel", No. 159 in 1001 N.N. (See "Born Blind" under Blindness; Imbecility, Mutes, Lameness; Born Deaf, Deaf and Dumb, in this section).

HELIANTHUS—Sun Flower—A typical plant and drug of the \odot . (See "Sun Group" under Herbs; "Typical Drugs" under Sun).

HELIOCENTRIC—The Heliocentric System of Astrology takes the \odot as a center, and the indications of the planets, including the Earth, in the great Zodiac around the \odot . These influences are important, and often help to explain the nature and cause of diseases and afflictions which are not clearly shown or accounted for by merely consulting the Geocentric map of birth, or the planets as they move in the Earth's Zodiac. It is well for the student of Medical Astrology to understand the Heliocentric System, and to have a Heliocentric Table of the planets for each year. Compare your star map of birth also with a Heliocentric

map for your time and year of birth, and also the directions, transits, and movements of the planets during the current year, in both systems. This Book and Work is based upon the Geocentric System of Astrology, using the Earth's Zodiac. A study of the Heliocentric System would require a separate large treatise. The System of Solar Biology, as taught by Hiram Butler, of the Esoteric Brotherhood of Applegate, California, is a good System of the Heliocentric Method, and they also can furnish you with the Heliocentric Tables of Planets for any year. (See Geocentric). The Heliocentric map for the day of your birth is said to especially show the Soul, its stage of advancement, and the problems to be faced in Earth Life for further development. The Geocentric Map of Birth shows this Soul with its limitations, acting thru the prison house of the physical body, and the relation of the native to the outer and material world for an Incarnation. Some Writers also claim that the map for the time of Conception shows the Soul, the Character, and the nature of the incoming Ego, and the student of Advanced Astrology should study all three maps if he wishes to investigate the spiritual phases of the native, as well as the physical and mental. This book, however, is limited more to the planetary influences as they affect the individual in a physical body (the diseases, afflictions, and experiences he is apt to encounter in Earth life), and we cannot take the time or space to go into the various and important matters on the spiritual side of life, or out of Incarnation, as would be indicated by the Heliocentric Map for the time of birth. It is the hope of the Author, however, that such matters and study may be added to future Editions of this Volume.

Herbs as Remedies—In every locality on the Earth, Nature has provided an Herb, Plant, Flower, Leaf, Root, etc., with medicinal properties to combat the diseases peculiar to that locality. Herbs to be highly efficient as remedies should be gathered during the Planetary Hour ruled by the planet which rules the Herb, and when the Herb is at its prime, green, and juicy. Read the Chapter on "Medicines and Planetary Influence" in Pearce's Textbook of Astrology, which gives the rulership of Herbs, and the rules for gathering them. The large textbook known as "Culpepper's Herbal", very fully treats of Herbs, their rulerships, and as remedies. Also see Chapters IV, V, and VI, on "Herbal Remedies", in Raphael's Handbook of Medical Astrology. Also read Chap. V, in Daath's Medical Astrology, on "How the Planets Crystallize in Organic and Inorganic Life". Herbs are used as remedies on the principles of sympathy or antipathy. Thus diseases caused by \mathfrak{f} may be combated by the Herbs and Remedies of $\frac{1}{2}$, by antipathy, or if the Herbs of \mathfrak{f} are used, by sympathy. (See Antipathy, Culpepper, Cure, Drugs, Healers, Hippocrates, Homeopathy, Medicines, Polarity, Remedies, Sympathy, Treatment). The Physiological Action, the Pathological Action, the General Action, the Elementary Qualities, the Chemical Affinities, the Therapeutic Affinities, the Diathesis, etc., of the Planets and Herbs are very nicely arranged in the book called "Astral Medicine" by Dr. Duz, of Paris, France, and on pages 130 to 141 of the said book. In this Article will be listed the principal Herbs of each Planet, and the Therapeutic Properties given at the end of each Group. Also see "Drugs", Therapeutic Properties, "Typical Drugs", under each of the planets as given in the Articles on each planet. A more exhaustive list of the Herbs ruled by each planet is to be found in the book, "Culpepper's Herbal", which is quite a large volume in itself. A most interesting little Booklet on Herbs, their Therapeutic Qualities and value as remedies, is published by Heath and Heather, Herb Specialists, of St. Albans, England, which booklet is sent free to those writing for it. This Firm claims to gather Herbs at the right time, and to prepare them for the Market in their most valuable and efficient form. Their booklet contains a list of Herbs for sale, with Price List, etc. Raphael's Ephemeris and Almanac annually carries the advertisement of this Firm, and they are, no doubt, reliable.

Of the Herbs, *Croton Oil*, the oil expressed from the seed of the *Croton Tiglium* tree, is listed as a typical herb of this planet. HERCULES—The Star—Caput Hercules—Pollux—(See Pollux).

HEREDITRY—Hereditary—Inherent—Innate—Inherited Tendencies—Constitutional, Organic, and Structural Tendencies of Body—Hereditary Transmission is often explained by the Figure of the Heavens for the moment of Conception rather than by the Figure for the moment of birth, and in this connection you should make a thorough study of the Prenatal Epoch, and how to erect Maps for the time of conception when the birth hour is known approximately. In the Natal Map the ☉ is the Sig. of the inherent tendencies and hereditary transmissions, while the ☽ denotes acquired conditions, as the ☉ is Organic, and the ☽ Functional. In many diseases the Map of Birth does not fully account for the condition, whereas the map for the time of conception does explain and account for the disease condition more fully. A person may be bothered with bowel and abdominal disorders, and the map of birth not show any afflictions in ♀ or the 6th H., but in the map for the time of conception, ♀ or ☽, or both, may be in ♀ in the 6th H., which would account for such an inherent tendency. So also in cases of Deafness, Blindness, Idiocy, and many congenital conditions, the map for the time of conception, and the influences of the ☽ at the time of her monthly return to the central line of impulse during gestation, account for many defects and congenital deformities. Inherent Mania is an affliction especially indicated by the map of conception, and may not be shown by the map of birth. In making a study of the star maps of birth of many individuals in the same family, considering their Aunts, Uncles, Grandparents, Cousins, etc., there is a noted similarity between the maps, and the same Rising Sign, or some particular Sign of the Zodiac, is usually prominent in all of them, and all are similarly afflicted or benefitted, and either the ☉, ☽, or the Asc., are in the same sign or triplicity. (See "Likenesses" under Family). However, an inherited trait may be represented by any part of the nativity, and by antenatal maps from the time of conception, and on down to birth. Hereditry also must be considered to account for the differences in people born at the same time, and in the same vicinity, although the times, seasons, and appointments of their lives will be very similar. The 4th H. in the map of birth also denotes and shows heredi-

tary tendencies. The Occult side of hereditry is a big subject, the incoming Ego, the effects of Karma, the age of the Soul, the stage in Evolution, etc., and these subjects are well-discussed in the book, "Cosmo-Conception", by Max Heindel, and also in the books, "The Key to the Universe", and "The Key of Destiny", by Dr. and Mrs. Homer Curtiss. Also in the book, "The Tarot of the Bohemians", by Papus, the plan of Destiny, Fate, Hereditry, and how the Universe is builded and conducted; the Past, Present, and Future of the Human Race, are well defined and explained. (For collateral study see the references at the end of this section).

Hereditary Diseases—And Tendencies—These are especially indicated by the ☉, his position and afflictions at B. Also indicated by the fixed signs, and with many planets and afflictions in them at B. The 4th, 8th, and 10th H., the Lights and ♀, are espec. concerned with hereditary influences and transmissions. (See Eighth House; "Fixed Signs" under Fixed; Fourth House, Moon, Saturn, Sun, Tenth House).

Well-Descended Body—☽ in an earthy sign at B.; the Ruler or Sig. in his own triplicity, and well-aspected, one well descended. Nature and the Higher Powers so rule, arrange and manage the incarnation of an individual, and by the Law of Attraction and Similar, lead an incoming Ego to parents, ancestors, and a line of descent, which is more or less bound up with the native from out of the Past, and to cause the birth to take place at a time and place which gives a star map of birth considerably in harmony with such relationships. The parents give to the maturing embryo and child a body much like their own, as a rule, or similar to some relative or ancestor in the line, but the Occult Masters and Initiates teach that the mind and character of the child are not directly transmitted from the parents, but that the incoming Ego, or Spirit, brings such character with it. It is said that the star map of birth shows the character and attainments which the native had at his death in the physical body in his material incarnation previous to this one, and that in the present life he is forming and building the map which will be his star map of birth at his next incarnation. Also by right living, right thinking, attainment, wisdom, knowledge, understanding in the present life, by obeying the laws of health, the native is also largely determining the kind and quality of his next physical body. People who are ignorant, negative, passive, receptive, given to worry, brooding, and who are constantly thinking in terms of disease, tend to attract disease, ill-health, and to be born into a family with weak and sickly bodies, as into a family afflicted with Consumption, Asthma, Tuberculosis, and various constitutional and organic diseases, whereas a native now given to right and constructive thinking, thoughts of good and perfect health, is gradually building a body, a prototype, for his next

body, and a more perfect, healthful, handsome, strong and efficient body. These matters are discussed in the books mentioned in this section, and it is well for all students of Astrology to study deeply into the Occult side of life, know The Mysteries, if you ever expect to understand the Philosophy of Life and Destiny, and not follow along ignorantly in the trails of Exoteric Schools of Thought, Religion, or Philosophy, or allow yourself to be governed by the superstitions and false traditions, and false interpretations of Truth, such as prevail over the Earth today. (For further and collateral study along this line see Acquired, Ascendant, Astral, Birth, Blindness, Character, Children, Conception, Congenital, Constitutional, Deafness (see Hearing); Deaf and Dumb (see Hearing); Defects, Deformities, Destiny, Deviations, Diathesis, Ego, Environment, Epilepsy, Events, External, Family, Fate, Father, Form, Functions, Genius, Gestation, Hexis, Idiocy, Idiosyncrasies, Imperfections, Innate, Insanity, Latent, Mania, Map, Monsters, Mother, Mutes, Nativity, Natural, Organic, Parents, Personality, Praecipitants, Prenatal, Prodigies, Remarkable, Soul, Spirit, Structural, Susceptibility, etc., and other subjects which you may have in mind which may be connected with heredity).

HERMAPHRODITES — Androgynous—Dual-Sexed—Bisexual—Male and Female Organs Developed in the Same Body—The human body in the early stages of its evolution was bisexual, hermaphrodite, and with the male and female organs equally developed in the one physical body. Then came the separation of the sexes into two bodies, a more distinct male and female body, of which Adam and Eve are regarded as the first types of the separated sexes. (See the book, "Cosmo-Conception", by Max Heindel, on this subject of the Separation of the Sexes). Remnants of this early hermaphrodite type still appear on Earth. In the remote future it is said by the Occult Masters that the male and female bodies will again be reunited into one form, or body. The word Hermaphrodite originated from the word "Harpocrates", the God of Silence, and Ptolemy used the word at times to refer to Stammerers, those who had some defect of speech, and were silent and unable to speak. The common signs strong at B, are said to predominate at the birth of a hermaphrodite. Also the ♃ in the 1st H., with ♃ and ♀, and espec. if ♂ also give testimony, a hermaphrodite, or perhaps have but one passage. (For further planetary influences which tend to this condition see Eunuchs; "Foolish Mind" under Foolish; "Hermaphrodites" under Men; "Excessive Virile Members" under Virile).

HINDU ASTROLOGY—This System of Astrology differs somewhat from the European System of Astrology, as used in this Work, and it would take a separate volume to go into the Hindu Methods. There is a good Treatise on Hindu Astrology in the book, "Sepharial's Manual of Astrology". Also the British Journal of Astrology, of London, and edited by Mr. E. H. Bailey, is devoting a large amount of time and space to the Hindu Methods. Also see Alan Leo's New Dictionary of Astrology. It is very evident that the Hindu interpretations of Astrology are very valuable in explaining the planetary and Zodiacal causes of many diseases and afflictions, and are an aid in diagnosis, and it is well for the student of Medical Astrology to study into the Hindu System. In future Editions of this Encyclopaedia, an elaborate treatise of the Hindu System will, and should be added, as well as many other subjects which may not appear in the First Edition. My desire is to see this Work added to as the years and Generations go by, and until it becomes a large Library of Volumes on

the subject of Medical Astrology, but such a great and complete Work is too much to be done by any one person, and during the lifetime of one individual. In the Hindu System, the rulership of the Eyes and Ears is placed under different Houses than in our System. Also the rule concerning the Father and Mother is different, and is not elastic, according to sex, as in our System. (See Ears, Eyes, Father, Mother). Also, in the Hindu System, each Sign of the Zodiac is divided into nine equal parts, known as "Navamsa", and this finer division helps to locate the part of an organ afflicted, and to account for the various deteriorations of a complicated organ, such as the Heart. In this Work, I am giving you a brief Article on Navamsa, which should be enlarged upon in future Editions. (See Hyleg, Memory, Navamsa, Senses).

Many of the influences listed in this Encyclopaedia are Horary. The Rules of Horary Astrology are given in Lilly's Astrology,

Wilson's Dictionary of Astrology, Simonite's Horary Astrology, Alan Leo's New Dictionary of Astrology. Also a short Article in Sepharial's New Dictionary of Astrology. (See Cardinal, Course, Cure, Decumbiture, Diagnosis, Duration; "Fixed Signs" under Fixed; Long Diseases (see Long); Mutable Signs (see Mutable); Prognosis; Querent, Quesited, Recovery; "Diseases" under Short).

HORAS—These are the positive and negative halves of Signs, and are known as the Solar and Lunar Horas. The Solar Horas are the positive halves, and the Lunar Horas are the negative halves. Benefics are stronger when in the Negative Signs, and Negative Horas, and weaker when in the positive, or Solar Horas. In the odd, or positive signs, the first half is positive, or Solar, and the second half negative, or Lunar. In the even, or negative signs, the first half is negative, or Lunar, and the second half positive, or Solar. It is well to bear these distinctions in mind in judging of the force of the benefics or malefics in disease or health, and in the matter of the duration of disease, prognosis, etc. Mr. E. H. Bailey, in his Journal, The British Journal of Astrology, is devoting considerable time and space to the subject of Horas, and their influences. To follow the leadings of the Natal Map, its good and strong points, insures greater success with less effort, and to avoid failures and unnecessary illnesses, sorrows, reversals, downfalls, etc. The influences of the Horoscope begin at birth, and endure until the death of the body. Congenital defects belong to the Antenatal Period. The Map, or Figure of the Heavens, for the time of Conception, also indicates and shows the tendencies of the native, and the Prenatal Map, the map for time of

HOSPITALS—Sanitariums—Asylums—Are ruled by ♀ and the 12th H. The same influences which tend to place people in an Asylum, or Hospital, with illness or mental derangement, also tend to self-undoing, and to make the native his own worst enemy, and to undermine the health by dissipation and wrong living, and if people would live right, and obey the Laws of Health, there would be little need for Hospitals. Perfect health can only be attained when people become spiritualized, and more conscious of their Inner and Divine Powers, and of the presence of The Christ within them. It would be a strange sight to see one of the Great Masters, Adepts, or Initiates, lying sick in a Hospital, as they have learned how to conquer and prevent disease, and to rule their Stars, instead of being ruled by them.

HOUSES—The Twelve Mundane Houses of the Heavens—The Houses have an effect on the body in accordance with their correspondence with the Signs of the Zodiac. Thus ♀ and the 1st H. rule the head; ♂ and the 2nd H., rule the neck and throat, and so on around thru the signs and houses. The Houses rule the same parts of the body as ruled by its corresponding Sign, but in a secondary way. In matters of health, diagnosis, and prognosis, it is important to know the house position of planets, and the influence of each house at B., and especially of the 6th H., the house of health, and also of the 1st H., or Asc., the house which rules largely over the physical form. The Houses are positive and negative, masculine and feminine, the same as the Signs. The Odd Houses, as the 1st, 3rd, 5th, etc., are positive and masculine. The Even Houses, as the 2nd, 4th, 6th, etc., are negative and feminine. The Houses are also classed as Angular, Succedent, and Cadent. Delicate In Health—Sickly—(See "Ill-Health Of" in this section).

Dies Before Wife—Will the Husband Die Before the Wife?—One of the best ways to get at this question is to erect a Horary Figure unless the Artist is thoroughly familiar with the age, constitution, habits, and stamina of the Querent, but the information should not be revealed. In Hor'y Q., the lord of the 1st H. and the ♃ are taken for the man, and the lord of the 7th and the ☉ for the woman, and judge of the nature of the aspects to them. An-

other method is to measure the distance in degrees between the lords of the 1st and 7th H., and the lord of the 8th, and then predict that the one will die first whose Sig. is nearest the lord of the 8th. The following influences, if they exist in the map of the wife, indicate the death of the husband before the wife.—Malefics in the 7th H. at B.; the planet to which the ☉ first applies being a malefic; malefics afflicting the ☉, or the Sig. of the wife; ruler of the 7th a malefic, and ♃. For a woman to marry when the ♃ is combust is a bad sign, and indicates the possible death of the husband within two years after marriage. (See Widowers, Widows; "Dies Before Husband" under Wife).

Also ♀ and many planets in the double-bodied signs at B. tend to, and espec. ♀ affl. in ♀; ♃ affl. in the 7th H. of the husband may result in the death of several wives. The tendency is for the wife to share the fate of the husband's map, and if a woman does not want to die an early death by marriage, she should know the map of the fiance beforehand, and not go into the marriage relation blindly, and in ignorance of his horoscope. These same influences also indicate several marriages for the wife, and a wife so born may separate from, or bury several husbands. (See Widowers, Widows).

Their influences when with the ☉ or ♃ at B., or afflicting the Lights, tend to eye disorders, weak sight, blindness, hurts to the eyes or face, to measles, death from fevers, or a violent death. The ☉ with the Hyades at B. is indicative of evil, and liable to a violent death. The ☉ directed to them brings the danger of blindness in one or both eyes. The ♃ Sig. in ♂ the ☉ near the Hyades, likely to be nearly blind. The ♃ to the place of, great defect in the sight, and often blindness. The Asc. to the place of, wounds or hurts to the eyes, cuts, danger from sharp instruments, and often death from fever. HYLEG—The Giver of Life—Apheta—Prorogator—The ☉, ♃, and Asc. are the principal Prorogators, or Givers of Life. Also ♃, ♀, and the Part of Fortune (☉) may become the Hyleg if they are in a hylegiacial place at B., strong, dignified, and well-aspected, and the ☉, ♃, or Asc. are not in such places. The ☉ is the Giver of Life in a day nativity if in a hylegiacial place, dignified, and well-aspected, and the ♃ is the Prorogator by night if similarly strong by sign, aspect, and house position. The Significator should be in one of the Aphetical places in order to be strong. In a male nativity the ☉ or Asc. should be taken as Hyleg if they are so situated, and in a female horoscope, the ♃ or Asc. are the first to be considered for hyleg, and if the ♃ is not strong, then ♀ should be taken as hyleg in a female nativity if in an aphetic place. In a male horoscope, ♃ may well be taken as hyleg if this planet is in dignity, and qualified for such a position, and the ☉ or Asc. are out of proper dignity. In cases of extreme emergency for a hyleg, the Part of Fortune is mentioned by some Authors as permissible to be taken as Hyleg if in a hylegiacial place, and all the other Significators are weak, and not in such places. The Asc. may be taken as Hyleg with either sex. It is advocated by some Writers that the ☉, ♃, or Asc. may become Hyleg at some time after birth by progressing into one of the hylegiacial places soon after birth, but this theory is not very strongly upheld, and does not account for the death in many instances where the supposed progressed ☉, ♃, or Asc. have been so taken. The degree rising on the Asc. at B. is always a most vital place, and is usually afflicted and badly involved in every death, whereas any other degree which may be taken after birth does not show such vital importance in accounting for death. The duration of life depends upon the Hyleg, the Hylegiacial Places, and the rulers of these places, for long life, and the ☉, ♃, Asc., or Benefics in such a place indicate long life, and strong vitality, whereas the malefics in such places weaken the strength and prospect of long life. (See Anareta; "Long Life", "Short Life", under Life). The question of death is ruled over by the afflictions to the Hyleg, the Terminal Houses, and the planets therein. (See Terminal). The Hyleg when coming to the ♂ of malefics is always weakened, and with danger of disease or death. A Hyleg which is badly afflicted by malefics at B., or in an Anaretic Place, should be avoided, and some other one chosen, as ♃, ♀, the Asc., or ☉, if the ☉ or ♃ cannot be taken as Hyleg. When the Hyleg sets, death ensues, and the West Angle becomes Anareta. It usually takes a train of evil directions to the Hyleg to produce death, and one adverse direction is rarely considered as strong enough to cause death. (See "Arguments for Death" under Death; Directions).

Hylegiacial Places—These are the parts of the map, or Houses of the Heavens at B., which give greater vitality and endurance to the native

when the ☉, ☽, Asc., or Benefics, are found in these places. The majority of Writers ascribe the following places and degrees to be the Hylegiacal Places,—(1) From 25 degrees below the Asc. (rising degree), to 5 degrees above the Asc. (2) From 5 degrees below the cusp of the 9th H. to the middle of the 11th House. (3) From 5 degrees below the cusp of the 7th H. to 25 degrees above the Descendant. There is a picture of the Hylegiacal Places in Sepharial's New Dictionary of Astrology, in the Article on Hyleg, showing the Hylegiacal Places in black, but with a little variation from the figures and degrees given for the 11th H. Sepharial gives the 2nd Hylegiacal Place as extending from 5 degrees below the cusp of 9th H. to extend over to the 25th degree of the 11th H. The student should also read the Articles on the Hyleg in the various standard Textbooks and Dictionaries of Astrology.

The Hindu Hyleg—The Hylegiacal Places in the Hindu System—These differ some from those used in the Western Astrology, but are strongly advocated by Mr. Bailey, the Editor of the British Journal of Astrology, and Mr. Bailey considers them more correct than the ones given as authentic in this Article. In the Hindu Astrology the Hylegiacal Places are as follows,—(1) From the middle of the Asc. to the middle of the 12th House. (2) From the middle of the 11th H. over to the middle of the 8th H. (3) From the middle of the 7th H. down to the middle of the 6th H. In any event, in either System, these places are calculated by Oblique Ascension. Mr. Simonite, in his Arcana of Astral Philosophy, says that "No degrees under the Earth are eligible to the rule of Hylegiacal locus." The 6th and 8th Houses are classed as evil houses in the Western Astrology, and to allow one-half of these Houses to stand as a Hylegiacal Place, as is done in the Hindu System, would seem to be contrary to the facts in cases of disease and death. (For further study along this line see such subjects as Ascendant, Decumbiture, Descendant, Incurable, Jupiter; "Duration of Life" under Life; Moon, Part of Fortune, Prognosis, Sun, Terminal, Venus; "Centers" under Vital; Vitality; "Weak Body" under Weak, etc.).

HYOID BONE—The Bone at the Root of the Tongue—(See "Hyoid" under Tongue).

HYOSCYAMUS—A Typical Drug of ♃. (See "Saturn Group" under Herbs; "Drugs" under Saturn).

HYPERACIDITY—An Abnormal Amount of Acid in the Body—Excess Deposits of Wastes and Poisons—Caused by the afflictions of ♃, and especially after middle life, and in old age. Also this condition is more common and prevalent with people born under negative Signs, and who have many planets at B. in the negative Signs and Houses, and with an earthy or watery sign

upon the Asc., and also with the negative planets ♃, ♃, ♃, and the ♃ strong and predominant. A certain amount of acidity in the body is normal, but with age, under the influences and afflictions of ♃, the tissues begin to harden, crystallize, and deposits of Urea, Uric Acid, and other waste minerals, are made by ♃ in order to gradually bring on the death of the body, otherwise people would live too long, and over-populate the Earth. Threescore years and ten are long enough for people to live in a physical body unless they are enlightened, highly spiritualized, and have some special mission to teach and help Humanity. An alkaline body, if not too excessively alkaline, is a healthy body, and when an excess of acidity predominates, and the body is no longer able to keep the balance between acidity and alkalinity, death ensues. The negative people, who are more susceptible to this condition, tend also to conditions of hyperacidity by worry, brooding, introspection, and morbid states of mind, which tend to lower the vital forces, and the resistance against disease, and negative people who are also born under the strong influence of ♃, tend to die an earlier death, and many of them commit suicide, and such people usually are over-charged with acidity, whether they be young or old. Acid conditions in the body are also hastened, and brought on, by excesses in diet, and the use of too much sweets and pastries, starches and sugars. This condition can be remedied by living upon a non-starchy diet, and the free use of fruit juices, such as of the lemon, orange, and grapefruit. Also the daily use of a soda drink, such as Upjohn's Citrocarbonate Effervescent Powder, helps to neutralize the over-acid conditions in the body, and to prolong life, and to keep the body in a healthy and balanced condition. (See Acids, Alkaline, Crystallization, Death, Decay, Deposits, Elimination, Gout, Hardening, Minerals; "Negative Nature", "Negative Planets", "Negative Signs", under Negative; Retention, Rheumatism, Saturn, Stoppages, Suppressions, Urea, Uric Acid, Wastes, etc.).

HYSTERIA—Hysterics—Hysterical—Vapors—The \odot rules the emotional nature in women, and afflictions to the \odot tend to this trouble. A \odot disease; the \odot ϕ , \square , or δ H at B., and by dir.; the \odot afflicted denotes hysterics in women; a η disease; afflictions in the η sign \equiv ; the η \square or δ ψ ; the η hyleg in \approx in female natiivities, and afflicted; the η affl. in \approx , or affl. the hyleg therefrom; the η in \approx , ϕ , or ill-asp. any of the malefics as promitters; the η in \approx , ϕ , or ill-asp. η (or ψ if he be of the nature of η) at decumb., or the beginning of an illness, and tends to the danger of suffocation in hysterical fits (Hor'y); hysterical patients are worse at the Full η ; a ψ disease; ψ \square or δ η ; ψ in evil asp. to ψ ; afflictions to ψ ; ψ in η in the 9th H., and in \square or δ H, η , or ϕ ; ψ in η in ϕ H or ϕ , exaggerated hysteria; ψ in η in \square η , for selfish reasons; H affl. in \approx ; η denotes death by; a ϕ disease; ψ affl. in \approx in the 6th H.; ψ affl. in \approx and affl. the η or Asc.; ψ affl. in \approx ; a ψ disease, and afflictions in ψ , Subs at AT, AX, CP, and PP. I

ICE—Ruled by η . (See Cold, Frost, Hail, Saturn, Snow, Winter).

ICTERUS—(See Jaundice).

IDEALS—Idealism—The Idealistic Temperament—The fiery signs, and especially γ , tend to give Ideals, and the Idealistic Temperament, and to be interested in Utopianism. The earthy signs and η have least to do with Ideals. As a rule δ and η are the least Idealistic.

High Ideals—A special trait of the more spiritual sign \approx , and with the \odot well-aspected in \approx at B., or with \approx on the Asc.; the 1st face of ψ on the Asc. (See Honest, Humane, Noble; "Pious" under Religion).

Impractical Ideals—The afflictions of ψ tend to, and to give wild-cat, radical, extreme ideals and notions, and to influence people to try the impossible and unreasonable way of doing things, and to lead the imagination beyond the limitations of reason. Where the horoscope indicates Humanitarian tendencies, the action of ψ often leads to Utopianism, and espec. if the malefics η and ϕ are obscurely placed, and weak in influence at B. The ψ and ϕ influences combined tend to discontent with the present conditions in the World, and with a desire

to create an ideal condition, or Utopianism. The H influence combined with that of ψ tends to a desire for rapid and sweeping Reforms. The earthy signs and η give a more practical idea of things, but with tendency to endurance, and a more slow and plodding existence, get and keep what they can of material things, and to put up with things and World Conditions as they are. The \times sign in regard to Ideals is considered dreamy and impractical, and people with ψ affl. in \times tend to be fanatical, scattering of their mental forces, and full of vagaries. (For collateral study see Anarchists, Chaotic, Conduct, Confused, Delusions, Destructiveness, Dreamy, Eccentric, Enthusiasm, Erratic, Fanatical, Fancies; "Fixed Ideas" under Fixed; Flightiness, Habits, Hallucinations, Ideas, Illusions, Imagination, Incoherent, Incoordination, Judgment, Misunderstood, Morals, Neptune, Notions, Novelties, Obsessions, Opinions, Peculiar, Reactionary, Reformers, Religion, Riotous, Strange, Uranus, Utopianism, Vagaries, Visionary, etc.).

IDIOCY—Idiots—Phrenasthesia—Imbecility—Extreme Mental Deficiency—Feeble-Minded—Loss of Reason—

Born an Idiot—Congenital Idiocy—This is caused by lack of proper adjustment in prenatal life between the Vital Body and the Physical Body, and the head of the Vital Body may be several inches above the skull, and very noticeable after birth to one who is clairvoyant. The angle of the Stellar Ray is thrown out of proper adjustment to the mother's body during gestation in cases of congenital idiocy. During the prenatal period there are also very serious afflictions in the ♀ sign, the sign which rules the head and brain, and which tend to stop, hinder, and suppress the proper growth and development of the encephalon, head, and skull, etc. There is also an Occult cause for congenital Idiocy, which the deeper students of the Occult Mysteries will find in their reading. Some Idiots are only human animals, and with no human soul. The book, "Cosmo-Conception" goes into these matters, and from the Rosicrucian standpoint, written by Max Heindel. The planetary aspects and influences at B. usually also conform to prenatal conditions, but do not always account for the condition if it existed at B. The configurations at B. indicate conditions which may arise after birth, as a rule, and to loss of mind or reason after birth, and to imbecility. Cases—Birth Data of Congenital Idiots—See "Idiot from Birth", No. 742, in 1001 N.N. See Fig. 12 in "Message of the Stars", by the Heindels. Case—Male Born Nov. 28, 1910, 1 p.m., New York City, N.Y. Other cases are listed under "Deaf and Dumb", and "Microcephalic" in this section. (See Congenital, Hereditary, Organic, Prenatal Epoch, Structural).

Causes at Birth—Influences which conduce to Idiocy at B., or after, or which may concur with prenatal conditions, are as follows,—♁ is the principal planet to be considered, and afflictions to ♁, the houses of ♁, as the 3rd and 6th H., and also the house position of ♁; ♁ unconnected with the ♃ or Asc. at B., and afflicted (see Epilepsy and Insanity, in which diseases these influences also predominate); ♁ ☉ ☉, and with the ♃ in 8^h culminating may tend to; ♁ combust and affl. by malefics, the ♃ also weak and afflicted, the Asc. afflicted by the presence or ill-asps. of malefics, no good asp.

between the ♃ or ♁, or between them and the Asc. the native is apt to be an Idiot or go insane. This may also happen when ♁ is not combust; ♁ ruler of the Asc., and in the 12th H., and affl. by ☉ (see Case of "Deaf, Dumb and Idiot" under Hearing); ♁ affl. at B., "a very idiot or ass", says one Author; ♃ in good asp. to ♁ at B. may preserve the faculties for some years, but with the danger of losing the reason under evil directions if the foregoing conditions exist at B.; ♁ affl. in the 3rd H.; ♃ affl. in the 6th H., danger of Idiocy, and if other afflictions to ♁ concur; ♃ ☉ the ♃ at B., and by tr. or dir. tend to a mild form of Idiocy for the time if other conditions in the map of birth so indicate; the 28° ♃ on the Asc.; Subs at AT and AX. Degeneration of the Thyroid Gland, ruled by ♁, also tends to Idiocy. (For other influences along this line, and collateral study, see Cretinism, Dwarf, Epilepsy, Foolish, Hallucinations, Imbecility, Incoordination, Insanity, Irrationality, "Mental Deficiency", "Weak Mentality", under Mental; Myxoedema; "Loss of Reason" under Reason; Saint Vitus Dance, Thyroid; "Body" under Vital, etc.).

Ill-Formed Body—Ill-Made Body—Ill Figure—Ill-Shaped—Ill-Proportioned—Crooked—Ugly—Misshaped—Ungainly—Ill-Composed—Disfigurements, etc.—All Constellations of human form

tend to give a handsome shape and due proportions to the body. Constellations not of human form tend to vary the proportions, and incline towards their own shape by making the body larger, smaller, crooked, unshapely, stronger, or weaker. The η and f influences especially tend to give a crooked and misshaped body, and with η in the Asc. at B., or with f on the Asc. and Occi. However, η lord of the Asc. and occi., as between the M.C. and Desc., or between the Nadir and Asc., tends to give a good shape. In Hor'y Q. any planet as Sig. in f indicates that the person inquired of is usually of an ugly, crooked, bony, thin, ungainly, and rather unpleasant appearance, stooped, and usually not handsome. The m sign also tends to a misshaped body, and espec. when the \odot , η , f , or σ are Sigs. in this sign; η Sig. in m in partile asp. the Asc.; η Sig. in g , an ill-made body, and awkwardly formed; η Sig. in f or f ; η Sig. in f , or with f on the Asc., tends to make one thin and ungainly; the \odot in m partile the Asc., a mean and ill-made body; the D ill-dig. at B., not handsome, but apt to be a muddling creature; the D Sig. in m or f ; the D Sig. in m , an ill-shaped, thick and short person; the D \square or g η ; the D when occi. gives a lean, short, and ill-formed body; σ in m in partile asp. the Asc., short, crooked, and ill-made; σ Sig. in m , ill-made and misshaped body, and espec. if σ is afflicted by the \odot or D ; f in m or f in partile the Asc.; f on the Asc., an ill figure, crooked, stooping, and with head bent forward. Artistic, or Poetic Imagination, is largely the influence of the fiery and watery signs, but Δ and $\#$ may also be included. The influences of Ψ and the \times sign tend to Imaginations bordering on Hallucinations, and the afflictions of Ψ to Involuntary Clair- voyance. The afflictions of Ψ also tend to imaginations which may be classed as false fears, obsessions, a chaotic mind, and mental perversions, etc. The influence of H has to do more with the Intuitions than with the Imagination, altho the afflictions of H , when con- figured with Ψ or δ , tend to dis- ordered imaginations, eccentricities, and peculiarities of Temperament.

Imbecility of Body—Weakness of—Ill-Health—If the sign of the radical 6th, 8th, or 12th H. be in the 1st H. in a Revolutionary Figure, then sickness and trouble during the year to follow is apt to come, and imbecility of body. IMMEDIATE—Immediate Causes of Death, Disease, Events, Accidents, Hurts, Injuries, etc.—

Death—Immediate Cause of—When the train of Directions which cause death fall together, and none follow, for the quality of the death, and the disease which may cause it, observe those directions which precede, although at a distance; the aspects and positions of the malefics, and especially as they affect the hyieg. Also notice the positions and aspects of the Benefics, as the Benefics, altho they tend to preserve life when concurring in a train of directions, often specify the disease which is the immediate cause of death. In death by violence observe the Genethilical positions of the ☉ and ♀, how they are affected by the malefics, and how the ☉ and ♀ are concerned in the quality of the death. (See "Quality of the Death" under Death; Directions; "Fatal Illness" under Fatal; Quality, Species; "Death" under Violent).

IMPAR—The Ganglion Impar—(See "Impar" under Ganglion).

IMPEDIMENTS—Impeded—Impeded Action of Mind or Body—The influences and afflictions of h tend to impede and suppress the functions, and the action of the various organs of the body. The influence of h with δ , the mental ruler, is to make the mind dull, melancholic, and with fears. Saturn in any sign or house tends to impediments and weakness of the parts or organs ruled and influenced by such sign or house, and worse at times according to the aspects, transits, and directions of h in afflicting his own radical place. Also h afflicted in the 6th H., or h afflicting the \odot , \mathcal{D} , Asc., or Hyleg, tends to many impediments in the body which may adversely affect the health and mind. Nearly every subject in this book has to do with some impediment, detriment, hurt, or injury to the body and mind, and it would take too much space to list them here. (See "Hindered", "Impeded", "Impediment", "Inhibitions", "Obstructions", "Retarded", "Suppressed", etc., under each Organ, or Part of the Body, and look in the alphabetical arrangement for the subject

you have in mind. However, the more general and abstract subjects along this line are listed here, which also see in the alphabetical arrangement when not more fully considered here.

IMPERFECT—Imperfections—This is a very broad and large subject, and practically every subject in this book is related to some imperfection of the mind or body. For the Imperfections which may exist in any Part, or Organ of the body, see "Defects", "Imperfect", "Imperfections", etc., under the Part, Organ, and Subject you may have in mind, as the list and references would be too many to incorporate here in this Article. However, the more abstract subjects which are related to Imperfections, and also some of the more prominent Imperfections over the body, will be listed here in the paragraphs which follow. People born under the Imperfect Signs, Ω , μ , or \times , are apt to be broken, imperfect, or mutilated in some way. (See Broken, Mutilated). Imperfections are also caused by the influences and afflictions of the Malefics, and especially of η and δ , and the imperfection, defect, deformity, disease, affliction, blemish, weakness, etc., is usually in that part, or parts of the body, ruled by the Signs containing the malefics. The Signs the \odot or \dagger are in may also indicate the source and location of imperfections and weaknesses when the Lights at B. are seriously afflicted by the malefics.

IMPERFORATE—Without Opening—Closure of the Different Orifices of the Body, either Congenital or Acquired—Caused by $\frac{1}{2}$ influence, as this planet contracts and limits. Saturn in any sign may cause imperforate conditions in any orifice, or opening ruled by that sign, according to the aspects and afflictions of $\frac{1}{2}$. (See Contractions, Limitations, Orifices, Saturn).

IMPOTENT—Impotency—Barrenness—Sterility—The general influences causing Impotency are listed in the Article on Barrenness. Impotency may largely be considered a $\frac{1}{2}$ disease, and caused by afflictions to $\frac{1}{2}$. Also the 17° II, a barren sign, on the Asc. at B. is a degree of Impotency and loss of Faculties. Also caused by Subs at PP.

Females—Barrenness In—Impotency In—Lack of Sexual Power In—These influences are given under "Causes" in the Article on Barrenness. For influences which tend to cause Females to remain childless and unprolific see "Males Born Maimed" under Maimed; "Never Occur" under Menses; "Unfruitful" under Wife.

Males—Impotency In the Male—Sexual Debility In— $\frac{1}{2}$ in an angle, and espec. in the Western angle, and $\frac{1}{2}$ be in $\frac{1}{2}$, or in configuration with her, or in mutual reception, and $\frac{1}{2}$ elevated above $\frac{1}{2}$, or $\frac{1}{2}$ $\frac{1}{2}$ $\frac{1}{2}$, tends to produce impotence in the male; $\frac{1}{2}$ in a feminine sign alone; $\frac{1}{2}$ and $\frac{1}{2}$ in the 7th H., and $\frac{1}{2}$ elevated above them. (See "Causes" under Barrenness; "Mutilation Of" under Foetus; "Unfruitful" under Husband).

Males Nearly Impotent—If the \odot and J be configured together in feminine signs with $\frac{1}{2}$ and $\frac{1}{2}$, and $\frac{1}{2}$ be in a feminine sign, if a male, will be nearly impotent, but if a female very lustful, but if $\frac{1}{2}$ be feminine and $\frac{1}{2}$ masculine, males will have more strength and vigor. Mars and $\frac{1}{2}$ so configured, when ori. and diurnal, make men more robust, but if vespertine and occi., more debilitated. If $\frac{1}{2}$ be configured with them all, they are more prone to unnatural and violent desires. Their lust is added to by $\frac{1}{2}$, but $\frac{1}{2}$ configured with them also moderates the desires and makes them more circumspect.
